1. The combination with a saw mill carriage and a track therefor, of means for limiting the movement of the carriage along the track, cooperating means adjacent thereto and upon the carriage for holding said carriage against movement away from either extreme position thereof, and means operable from a point between the terminals of the path of movement of the carriage for simultaneously actuating the holding means to release the carriage when in either extreme position.

1,622,060. MECHANISM FOR PRODUCING METAL PLATES. WILLIAM J. STOOP, Wheeling, W. Va. Filed Feb. 10, 1925. Serial No. 8,290. 5 Claims. (Cl. 80—2.)

1. In mechanism for producing sheet metal plates, roughing and finishing mills, alined conveyors between said mills upon which plates are passed and returned through said mills; a rotary table located intermediate said conveyors, a conveyor carried by said table, a reheating furnace located laterally with respect to said table, said table in one position being adapted to present the conveyor thereof in alinement with the first mentioned conveyors for transfer of plates directly from the roughing mill to the finishing mill; and in another position to present the conveyor thereof in alinement with said furnace for transferring sheets to and from the latter.

1,622,061. TELEPHONE MOUTHPIECE. EDNA SORTELLE and VERNON C. PORTER, New York, N. Y. Filed Feb. 2, 1926. Serial No. 85,453. 5 Claims. (Cl. 179—188.)

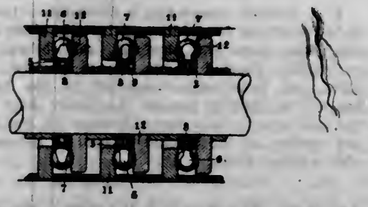
1. A telephone mouth piece comprising a supporting member having perforations therethrough, a mouth piece revolubly mounted on the supporting member and provided with perforations to be brought into and out of registry with the perforations of the supporting member as the mouth piece is turned, and a spring normally resiliently urging the mouth piece to a position in which the perforations register.

1,622,062. UNSOLDERED HOOK ELEMENT FOR WATCH BRACELETS. FRIEDRICH SPEIDEL, Pforzheim, Germany, assignor to the Firm Fr. Speidel, Kallhardstrasse, Pforzheim, Germany. Filed Sept. 2, 1925, Serial No. 54,056, and in Germany Aug. 4, 1925. 2 Claims. (Cl. 24—236.)

1. An unsoldered hook for watch bracelets comprising in combination a box-shaped hook open at the upper end, an extension at the shaft end of said hook rolled to form an eye the free edge of said eye bent downward, an elastic tongue in said box-shaped hook, an elastic clamp on the closed end of said tongue said clamp having a transverse slit with which said bent edge of said eye engages so that the elastic tongue is securely held in the hook without soldering.

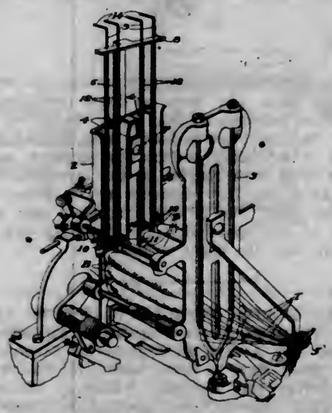
1,622,063. ARTIFICIAL FISH BAIT. CHRISTIAN STEENSTRUP, Schenectady, N. Y. Filed July 20, 1926. Serial No. 123,648. 2 Claims. (Cl. 43—46.)

2. The combination with a plug body having an attaching eye of comparatively large size, of a fish hook structure having an eye of comparatively large size which engages said attaching eye, said structure comprising a trihngular shaped plate having its wide end bent downwardly and curved to form a shallow scoop, and one or more fish hooks attached to said plate.



1,622,064. QUICK-CONNECTING SUCKER ROD. HAROLD L. SULLINS, Taft, Calif., assignor of one-fourth to Wilburn D. Gray, Taft, Calif. Filed Jan. 15, 1926. Serial No. 81,454. 4 Claims. (Cl. 287—119.)

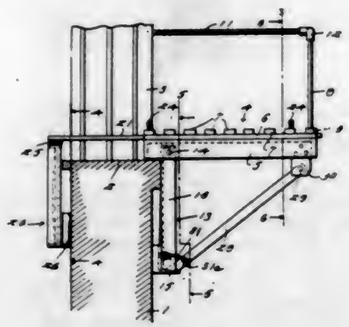
1. A device of the class described comprising a sub having a stud in its bore, a rod section having a substantially L-shaped groove to coact with the stud, said section having a diametric slot communicating with the groove, a latch slidable within the sub to engage said



slot, spring means to urge projection of the latch, said latch being displaceable through engagement of the end of the rod with the end of the latch.

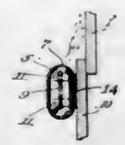
1,622,065. THRUST BALL BEARING. FRANZ SYMANZIK, Schweinfurt, Germany. Filed July 1, 1920, Serial No. 393,475, and in Germany Dec. 10, 1917. 4 Claims. (Cl. 308—235.)

1. In a thrust bearing, a spacer-ring provided with ball spacing lugs projecting from its periphery and adapted to permit radial movement of the balls, said lugs consisting of anti-friction metal secured to the periphery of the ring.



1,622,066. MAGAZINE FOR BOX LOOMS. JOHN TARANTO, Waltham, Mass. Filed Mar. 17, 1925. Serial No. 16,116. 2 Claims. (Cl. 139—245.)

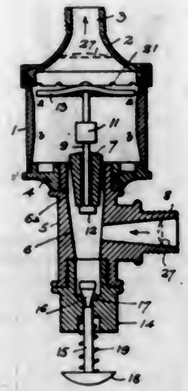
1. In a box loom, a magazine having a groove to receive the bases of a series of bobbins arranged one above



the other, a rod having a head arranged to bear on the base of the uppermost bobbin in the groove, a bracket having a part above the magazine in which the rod is guided, and a coiled spring encircling said rod between said bracket and head and serving to press the rod downwardly.

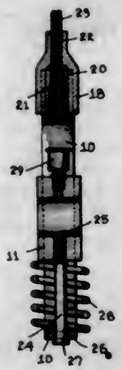
1,622,067. WINDOW-WASHER'S SCAFFOLD. WILLIAM R. TATE, Brooklyn, N. Y., assignor to Tate Safety Window Scaffold Corporation, a Corporation of New York. Filed Mar. 27, 1925. Serial No. 18,811. 3 Claims. (Cl. 304—27.)

1. A scaffold comprising a platform, a bracket pivoted to the platform for folding against the same and normally depending from the platform, said bracket having an outwardly directed flange, struts pivoted to the platform and detachably connected to the flange on the bracket for folding against the latter, bars connected to the platform, and a clamp member on the same side of the scaffold as the bracket pivoted to the bars and foldable against them.



1,622,068. WINDSHIELD HEATER. HENRY P. THOMPSON, Chicago, Ill. Filed Jan. 13, 1922. Serial No. 528,891. 2 Claims. (Cl. 20—40.5.)

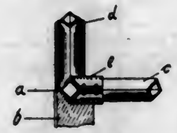
1. In a motor vehicle having a transparent windshield comprising upper and lower sections, the former being mounted for adjustment away from the latter at their junction line, an electric heater and a tubular casing enclosing it extending horizontally adjacent said junction and fixed with respect to the lower section, said casing having air inlet openings at its lower side adjacent the inner side of the windshield and discharge openings at its upper side for directing the flow of heated air over the upper section.



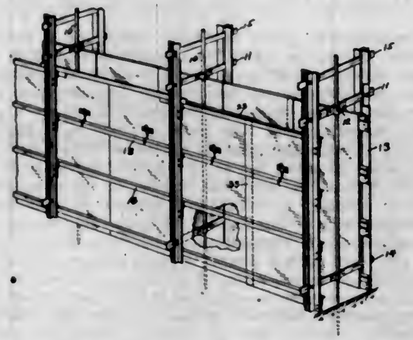
1,622,069. FLUID-CONTROLLING VALVE. CHARLES HARRY THOMSON, JAMES CUMMISKEY, CHARLES JOSEPH MILLER, and ALFRED LESLIE JONES, Liverpool, England. Filed Mar. 9, 1925. Serial No. 14,159, and in Great Britain Mar. 12, 1924. 7 Claims. (Cl. 67—115.)

1. A fluid control valve mechanism, comprising, a valve for controlling the passage of fluid through the mechanism, a cylinder through which the fluid passes, a floating diaphragm in the cylinder of larger area than the valve and loosely connected thereto, said diaphragm supporting the valve in its open position only while

fluid is passing through the cylinder and acting on the diaphragm, and manually operated means for opening the valve initially.



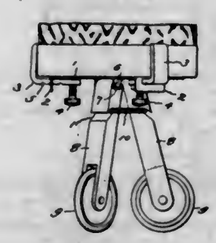
1,622,070. JERK-LINE CONNECTION. PATRICK A. TRAPP, Shelby, Mont. Filed Apr. 29, 1926. Serial No. 105,616. 1 Claim. (Cl. 255—7.)



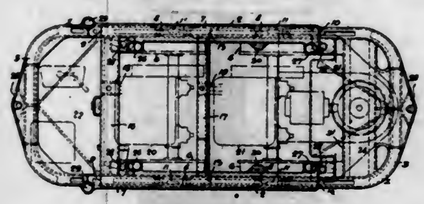
A device for the purpose indicated comprising an open frame, a wrist pin bearing block slidably mounted in the frame, means for connecting the terminal of a jerk line to the frame at one extremity, a limiting stop precluding movement of the bearing block beyond a certain point in the frame in the direction of the connected end of the jerk line, and a cushioning device acting in opposition to said limiting stop, the limiting stop consisting of a screw-stud slidably engaging the frame and having a fixed connection with the bearing block, and the cushioning device comprising a spiral spring in surrounding relation to the stud and compressed between the block and the extremity of the frame.

1,622,071. HOUSE CONSTRUCTION OF TUBES OR TUBULAR MEMBERS. BRUNO URBAN, Sr., Ludwigshafen-on-the-Rhine, Germany. Filed June 14, 1926, Serial No. 115,827, and in Germany May 1, 1926. 2 Claims. (Cl. 189—1.)

1. A house construction of tubes or tubular members, comprising in combination with the foundation, a horizontal supporting frame of steel tubes placed on edge, vertical members, horizontal members, and butt-traps for connecting said horizontal and vertical members with said supporting frame to form a skeleton of considerable carrying capability.



1,622,072. FORM HOLDER FOR CONCRETE WALLS. ERNEST WATSON, Wauwatosa, Wis. Filed May 26, 1925. Serial No. 32,910. 9 Claims. (Cl. 25—131.)

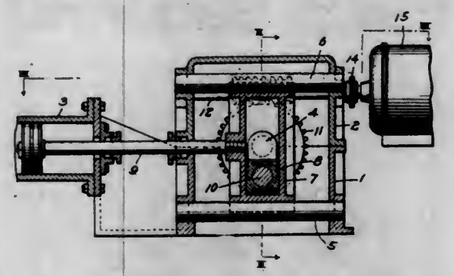


1. A form holder for concrete work, comprising a central standard, a cross bar and depending parallel guides supported thereon, bars arranged longitudinally with relation to the said guides and supported removably thereon, and forms for the surfaces of the wall adjustably arranged on said longitudinal bars.

1,622,073. GOLF-BAG ATTACHMENT. ALBERT E. WHITTIER, Bristol, Conn. Filed June 19, 1926. Serial No. 117,039. 7 Claims. (Cl. 150—1.5.)

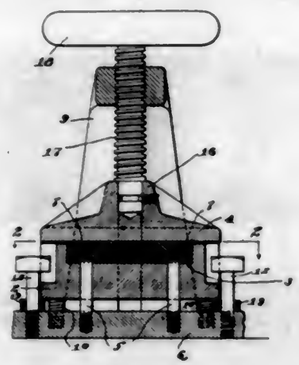
1. A golf bag attachment comprising a base plate, means for attaching the plate to the lower end of a bag, legs movably connected with said plate and adapted to be spread radially outward therefrom beyond the edges of the bag, and yielding means normally retaining the legs contracted within the edges of the bag.

1,622,074. FRAME FOR ELECTRIC LOCOMOTIVES. HENRY V. WILLE, ROBERT M. CAMPBELL, and WILLIAM J. ETHERINGTON, Philadelphia, Pa., assignors to The Baldwin Locomotive Works, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Aug. 25, 1925. Serial No. 52,396. 4 Claims. (Cl. 105—172.)



1. An integral cast frame for electric mine locomotives, comprising main side and end sections and also two cross ties between the side plates, each provided with a foot plate for partly supporting a motor.

1,622,075. COOKING UTENSIL. ANNA ATWATER, Lakewood, Ohio. Filed Aug. 15, 1925. Serial No. 50,391. 3 Claims. (Cl. 53—8.)

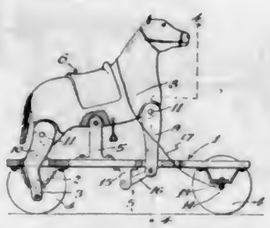


1. As a new article of manufacture, a utensil consisting of a member that is adapted to be positioned over and shiftable with respect to a burner, said member having a flat unobstructed top and a depending peripheral flange whose lower edge is in a plane parallel with the top, and ribs on the underside of the top dividing the space enclosed by the peripheral flange into a plurality of independent compartments, the lower edges of said ribs being substantially parallel with and spaced above the plane of the lower edge of said flange, the top having openings registering with said compartments.

1,622,076. POWER-TRANSMITTING APPARATUS. EDWARD F. AUSTIN and A. FRED PHELPS, Pittsburgh, Pa. Filed July 12, 1926. Serial No. 121,762. 3 Claims. (Cl. 74—14.)

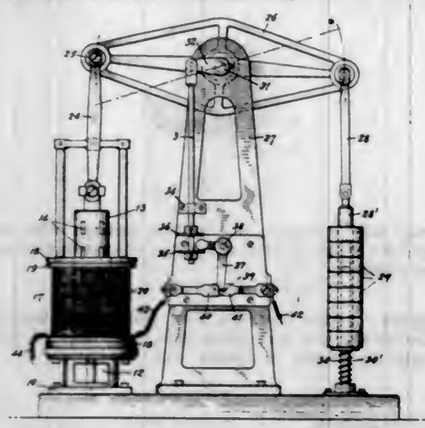
1. In power-transmitting apparatus the combination of a casing consisting of body and cover, a shaft extending within the casing and journalled between such body and cover, a reciprocable rod extending through an orifice in the casing wall formed by and between the meeting edges of body and cover, the said shaft being provided within the casing with a crank and the said rod being operatively connected within said casing with such crank, and means for rotating said shafts.

1,622,077. MANUFACTURE OF RUBBER HEELS. JOHN J. BATTERMAN, Brookline, Mass., assignor of one-half to John J. Daly, Newton, Mass. Filed Sept. 28, 1922. Serial No. 591,093. 2 Claims. (Cl. 18—59.)



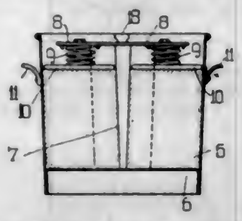
1. That improvement in the process of manufacturing a rubber heel having nail receiving washers embedded therein, which consists in arranging the washers in substantially the positional relationship which it is desired to have them bear to each other in the finished heel, forcing the washers so arranged into the body of an unvulcanized rubber heel blank while maintaining said arrangement substantially undisturbed, displacing the material of the blank solely by said act of forcing the washers into the blank, subsequently placing said blank in a heel mold, and performing the molding and vulcanizing operation on the blank while holding said washers in said relationship.

1,622,078. COMPOSITION FOR TREATING METAL BATHS AND METHOD OF MAKING THE SAME. FREDERICK M. BECKET, Douglaston, N. Y., assignor to Electro Metallurgical Company, New York, N. Y., a Corporation of West Virginia. Filed Sept. 3, 1921. Serial No. 498,447. 23 Claims. (Cl. 75—49.)



1. A composition for treating metal baths, comprising in coherent form a main addition agent existing in microscopic particles and a soft, relatively heavy, low-melting and relatively inert metallic binder.

1,622,079. ROCKING-HORSE TOY. AUGUST O. BERG, Los Angeles, Calif. Filed May 10, 1926. Serial No. 107,965. 3 Claims. (Cl. 208—42.)

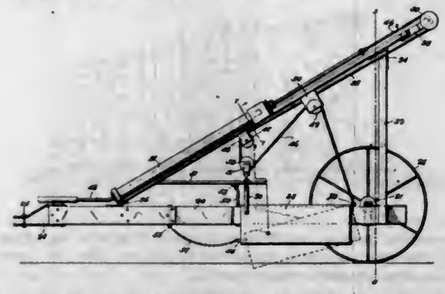


1. A rocking horse toy comprising in combination a vehicle-like structure having a pair of wheels with a crank connected to said wheels, a horse-like body structure pivotally mounted to oscillate, a pair of legs connected between the horse body and the crank, a second pair of legs pivotally connected to the horse body, and means to oscillate said legs.

1,622,080. ELECTROMAGNET. ROBERT A. BLAKE, Brooklyn, N. Y. Filed May 26, 1924. Serial No. 715,802. 1 Claim. (Cl. 175—34.)

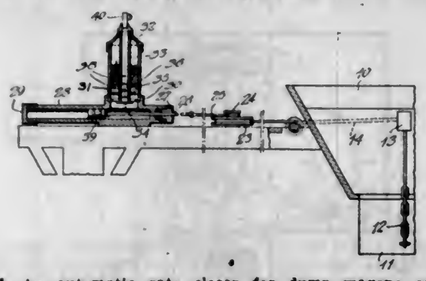
An electrical power appliance comprising a solenoid, a base member on which the solenoid is supported, said base member having holes in its side walls, upstanding side rods disposed at diametrically opposite points on the solenoid and projecting upwardly therefrom, a cross bar connecting said side rods, a guide rod extending axially through the solenoid and connected at its upper end with the cross bar at an intermediate point in the latter and at the lower end secured to the base, and a hollow plunger in surrounding relation to and having slide bearings mounted upon the guide rod, the plunger being reduced in diameter below the bore of the solenoid to provide a minute clearance space between it and the solenoid and having series of air passages in surrounding relation to the slide bearings and lateral openings effecting communication interiorly between it and the clearance space.

1,622,081. COOKING APPARATUS. JOSEPH EDWARD BLINCOW, Wolverhampton, England. Filed Feb. 11, 1926, Serial No. 87,624, and in Great Britain Feb. 13, 1925. 3 Claims. (Cl. 53—1.)



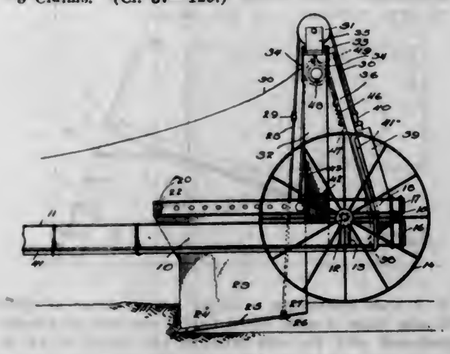
1. A cooking vessel for meats comprising an open-mouthed container, a wedge shaped separating element within said container and a cover plate mounted on said wedge shaped element.

1,622,082. PRODUCTION OF PHOSPHORIC ACID. HERMAN A. BRASSERT, Chicago, and WILLIAM H. WAGGAMAN and HENRY W. EASTERWOOD, Chicago Heights, Ill., assignors to Victor Chemical Works, Chicago, Ill., a Corporation of Illinois. Filed Jan. 23, 1924. Serial No. 687,930. 5 Claims. (Cl. 23—165.)



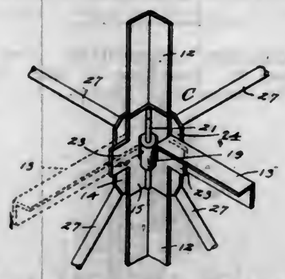
1. In the production of phosphoric acid by the pyrolytic process, the method of controlling the deposition of elemental phosphorus which consists in maintaining the temperature of the volatilized phosphorus within a desired range by means of heat derived from the combustion of a portion of said volatilized phosphorus.

1,622,083. TRACTOR SCOOP. SOUTHWICK W. BRIGGS, Glenmont, Md. Filed Jan. 19, 1926. Serial No. 82,330. 6 Claims. (Cl. 37—129.)



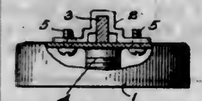
1. In a tractor scoop, a pan, and a single hydraulic means connected to the opposite ends of the pan for independently raising and lowering the opposite ends of the pan for filling and dumping the same.

1,622,084. DUMP-WAGON GATE CLOSER. SOUTHWICK W. BRIGGS, Glenmont, Md. Filed Feb. 10, 1926. Serial No. 87,411. 3 Claims. (Cl. 298—24.)



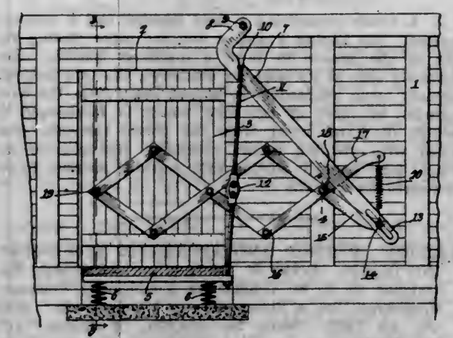
1. An automatic gate closer for dump wagons comprising a cylinder, a receptacle communicating with one end of the cylinder and containing fluid under pressure, a piston in the cylinder, a connection between the piston and the wagon gates for moving the piston against the pressure of the fluid upon the opening of the gates, the fluid adapted to return the piston and gates to normal position, and checking means arranged between the cylinder and the receptacle for retarding the expansion of the fluid in returning the gates and piston to normal position.

1,622,085. HYDRAULIC SCOOP. SOUTHWICK W. BRIGGS, Glenmont, Md. Filed Feb. 10, 1926. Serial No. 87,412. 5 Claims. (Cl. 37—129.)



3. A tractor scoop comprising a main frame, a supporting axle mounted on the main frame, a scraper frame hingedly mounted in the main frame and extending forwardly over said axle in position to engage the same and limit the downward swinging movement of the scraper frame, a scraper pan carried by the scraper frame, and hydraulic means between said frames for raising and lowering the scraper frame.

1,622,086. DERRICK OR TOWER. JAMES W. BROWN, Tulsa, Okla. Filed May 5, 1925. Serial No. 28,165. 11 Claims. (Cl. 189—13.)



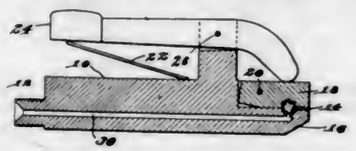
1. A derrick of the class described having legs, cross beams, and means detachably securing the legs and cross beams together comprising inner and outer clamp parts each in one piece and V-shaped, and fastening means for said parts including an element rigid on one of the parts extending through the other part.

1,622,087. BAR HANGER FOR THE SUPPORT OF OUTLET BOXES FOR THE WIRING OF BUILDINGS. HUGH A. CALDERWOOD, Pittsburgh, Pa., assignor to National Metal Molding Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Mar. 6, 1924. Serial No. 697,273. 1 Claim. (Cl. 247—22.)

Means for securing an outlet box in place in the frame of a building, such means consisting in a bar greater in width than in thickness and adapted to be secured at its ends to the frame of the building, a saddle bearing externally upon the box and having a T-shaped orifice of dimensions suitable to clamp the bar against the wall of the box in either of two positions at right angles one to the other, and means securing the saddle to the box.

1,622,088. DOOR-OPENING MECHANISM. CHARLES J. CARLISLE, Coldwater, Mich. Filed Aug. 5, 1926. Serial No. 127,379. 2 Claims. (Cl. 268—41.)

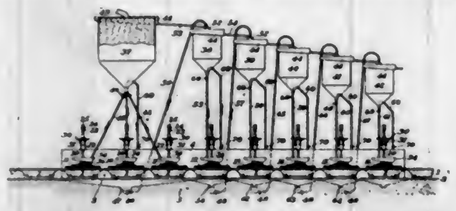
1. The combination with a structure having a door opening and a door slidably mounted to close the opening, of a runway extending through the lower portion of the



door opening and under the path of the door, a lever fulcrumed to said structure and extending to one side thereof, said lever having an offset upper end portion pivotally connected to the structure, a lazy tongs pivotally connected to the door and to the structure, there being arms constituting one end of the lazy tongs, a slidable and pivotal connection between the lever and one of the arms, yielding means for shifting the arms toward each other, and a working connection between the runway and the upper end portion of the lever.

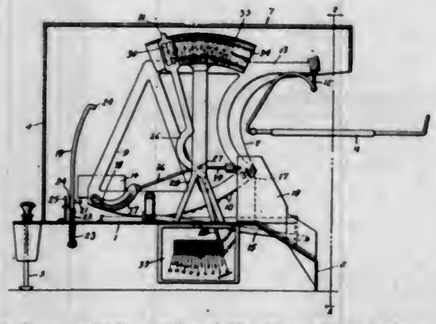
1,622,089. ELECTRIC GAS LIGHTER. AXEL E. CARLSON, Moline, Ill. Filed Aug. 7, 1922. Serial No. 580,100. 11 Claims. (Cl. 175—91.)

1. The combination of a gas lighter including a sparking rod having an arm extending laterally therefrom, a bracket of insulating material adapted to receive said arm, and means for interlocking said arm with said bracket.



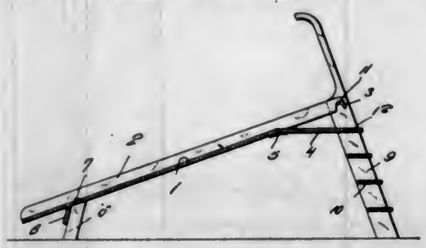
1,622,090. SELF-CLEANING NOZZLE. FRANK B. COMINS, Newton, and JOSEPH ARMSTRONG, Malden, Mass., assignors to American Moistening Company, Boston, Mass., a Corporation of Maine. Filed May 28, 1921. Serial No. 473,330. 9 Claims. (Cl. 299—59.)

1. A nozzle comprising a fixed member and a movable member, one having a groove and the other closing the top of the groove to form a discharge passage open normally only at its ends for discharge, the said movable member being adapted to be spread away from the fixed member by force of the fluid which is discharged to permit discharge away from the nozzle sidewise, combined with yielding means exteriorly arranged on the nozzle for normally holding said movable member in its non-spreadaway state.



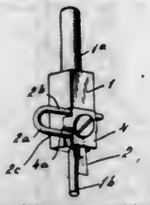
1,622,091. METHOD AND APPARATUS FOR GRINDING GLASS. JAMES W. CRUIKSHANK, Pittsburgh, Pa., assignor to J. W. Cruikshank Engineering Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Oct. 20, 1923. Serial No. 669,679. 4 Claims. (Cl. 51—278.)

1. The method of grinding glass, which consists in successively moving the glass under a series of grinders, flowing abrasive in water through a series of grading compartments and successively separating coarse and fine abrasive in each compartment, supplying abrasive from



successive compartments to successive grinders, and flowing the used abrasive from each grinder into the next succeeding grading compartment.

1,622,092. WEIGHING SCALE. HARRY CUMMER, Buffalo, N. Y.; Harry Wales Cummer and John W. Van Allen, executors of said Harry Cummer, deceased, assignors to The Cummer Scale Company, Inc., a Corporation of New York. Filed Nov. 30, 1923. Serial No. 677,670. 8 Claims. (Cl. 265—70.)

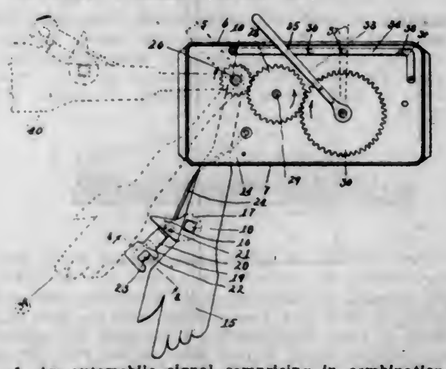


1. In a weighing scale of the type which includes a rocker beam, an indicating means comprising as companion co-operating elements a pointer and a chart, one of said elements being movable and the other being stationary, and cam means influencing the movement of the movable element from the rocker beam whereby said element will move to an equal extent for each unit of weight value marked on said chart.

1,622,093. CHILD'S SLIDE. ARTHUR H. DAUGHERTY, Russellville, Tenn. Filed Apr. 14, 1926. Serial No. 101,981. 6 Claims. (Cl. 272—56.5.)

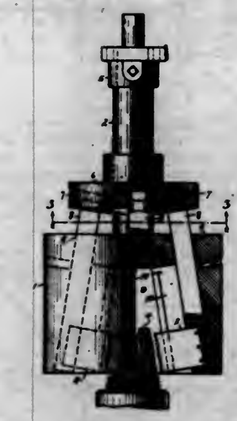
6. A slide comprising a ladder having rungs or steps and side stiles, a slide board having portions detachably interlocked with the side stiles of the ladder at an intermediate point in the length of said side stiles, and a platform hingedly connected to the side stiles of the ladder and also hingedly connected to the slide board.

1,622,094. BORING TOOL. FRANK A. DECKER, New York, N. Y., assignor to Louis G. Pacent, Winfield, N. Y. Filed Dec. 2, 1924. Serial No. 753,420. 1 Claim. (Cl. 77—69.)



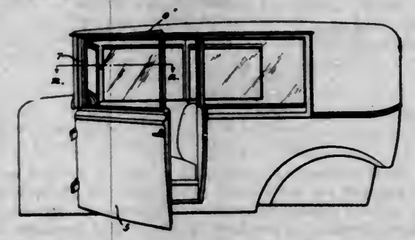
A boring tool comprising, in combination a body portion having an integral shank adapted to be engaged by a chuck, a pilot associated with said body portion and arranged co-axially with said shank, a cutter formed of a rod comprising two substantially parallel side portions spaced apart and formed by means of a return bend, said body portion having at least one recess adapted to seat the parallel side portions of said cutter, and clamping means for grippingly securing said cutter in the recess.

1,622,095. INDICATOR FOR AUTOMOBILE RADIATORS. CLARENCE L. DE ROEHN, Waterville, Me. Filed Dec. 4, 1926. Serial No. 152,672. 9 Claims. (Cl. 116—117.)



7. The combination of a device consisting of a hollow base and a chambered top member connected by curved tubular members; means for securing said device to a radiator cap; means for connecting the chambered base to the radiator water-circulating system; a transparent globe interposed between said base member and top member and communicating with the chamber of said top member; a cylinder extending from the bottom of said globe through the radiator cap; a closure in the upper wall of said chambered top memoer; a rod secured to said closure extending through said globe, cylinder, and cap; and clamping means threaded to the lower end of said rod.

1,622,096. AUTOMOBILE SIGNAL. ROBERT L. DICKSON, Long Beach, Calif. Filed Nov. 24, 1925. Serial No. 71,123. 3 Claims. (Cl. 116—51.)

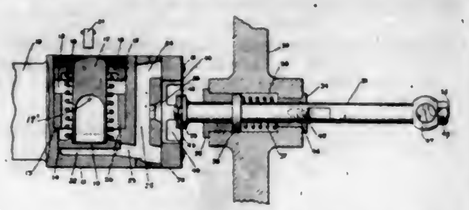


1. An automobile signal comprising in combination a pivoted shaft suitably mounted on a vehicle, a flat signal arm rigidly attached to said shaft, a bracket secured to the arm and extending from one edge thereof, a lamp holder secured to the bracket and extending along one edge of the arm, and having an arcuate opening facing the edge of the arm, a lamp positioned in the holder to shine through the opening thereof on to the edge and opposite side faces of said arm.

1,622,097. COLLAPSIBLE TAPER-THREAD-CUTTING TOOL. CHARLES R. EDWARDS, Houston, Tex. Filed Jan. 12, 1920. Serial No. 350,867. 8 Claims. (Cl. 10—95.)

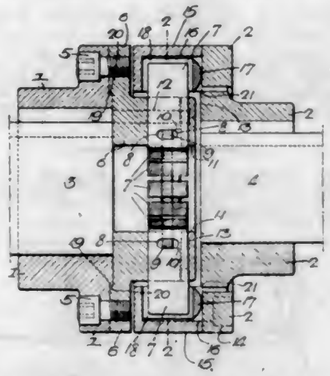
1. A device of the character described including a shank, a carrier guide slidable on the shank, and having bearings inclined relative to its axis, a die block fixed to the shank and provided with bearings, carriers slidably connected to said block and working in said bearings of the guide and block and chasers carried by said carriers.

1,622,098. CLOSED VEHICLE. WILLIAM H. EMOND, Syracuse, N. Y. Filed July 2, 1925. Serial No. 41,076. 8 Claims. (Cl. 296—28.)



2. A vehicle of the closed type having top-supporting corner posts, a windshield fitting against said posts, a door having an upper portion comprising a window frame also fitting against one of said posts, the post and the adjacent portions of the windshield and the window frame which fit against said post together having a maximum opaque area which in transverse dimension is not greater than the normal interpupillary distance between the eyes.

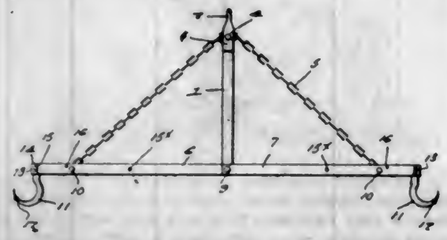
1,622,099. TREATMENT OF EARTHY MINERALS. WILLIAM FELDENHEIMER, London, England. Filed Oct. 30, 1925. Serial No. 65,892. 6 Claims. (Cl. 252—8.)



1. In the process for improving the color of earthy minerals, the step comprising bringing an aqueous suspension of the sub-divided mineral into contact with a salt of sulphurous acid containing a salt of a metal which reduces sulphurous acid and does not form colored oxidized salts.

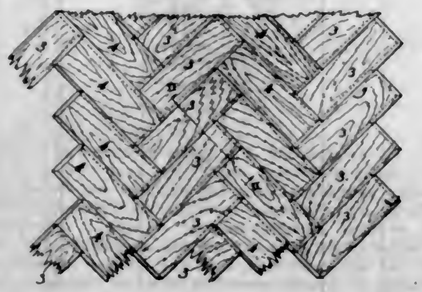
1,622,100. GOVERNING MECHANISM FOR STEAM TURBINES. WARREN B. FLANDERS, Philadelphia, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed June 9, 1920, Serial No. 387,538. Renewed Jan. 9, 1926. 14 Claims. (Cl. 264—17.)

1. In an auto-stop governing mechanism, the combination of an eccentrically weighted tripping member, means for resisting movement of the tripping member in response to centrifugal force, means for developing centrifugal force of fluid for application to the tripping member in opposition to said resisting means, controlling means for rendering the centrifugal fluid pressure developing means effective or ineffective, and means for maintaining the latter means normally in ineffective position.



1,622,101. FLEXIBLE COUPLING. WILLIAM J. FRANCKE, New Brunswick, N. J., assignor, by mesne assignments, to John Waldron Corporation, New Brunswick, N. J., a Corporation of New Jersey. Filed Oct. 23, 1922. Serial No. 596,334. 1 Claim. (Cl. 64—96.)

A flexible coupling comprising a pair of flanged members adapted for attachment respectively to the adjacent ends of two substantially aligned shafts, an element detachably secured to the face of one of said members and having a laterally projecting annular part with radial slots, flexible coupling elements mounted in the slots and projecting beyond the periphery of the annular part, said flexible elements having apertures at their inner ends, a retaining ring extending through the said apertures and supporting the flexible elements in the slots, a plate detachably secured to the outer face of the annular part enclosing the outer sides of the slots, and an annular member detachably secured to the face of the other flanged member and surrounding the aforesaid annular part and having recesses in the inner face thereof for reception of the projecting outer ends of the flexible elements.



1,622,102. GAMBREL. ORLIE E. FULLER, Lamont, Iowa. Filed Apr. 3, 1926. Serial No. 99,569. 2 Claims. (Cl. 17—44.)

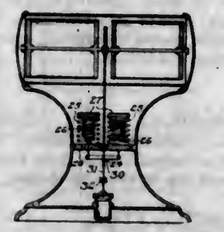
1. In combination, a body bar, arms hingedly connected to said body bar, said arms having transverse apertures adjacent to though spaced from their outer ends, flexible connections between intermediate points of the arms and the body bar at a point spaced from the pivotal connection of the arms to said bar, and hooks pivotally connected to the outer ends of the arms; said

hooks having pointed free ends and also having adjacent to said ends transverse apertures adapted when the bills of the hooks are lapped with the arms to be registered with the said apertures of the arms for the reception of pins for securing the hooks in said positions.

1,622,103. HARDWOOD BLOCK FLOORING. JAMES ORR FULTON, Toronto, Ontario, Canada, assignor to The John C. King Lumber Company, Cleveland, Ohio, a Corporation of Ohio. Filed Sept. 2, 1926. Serial No. 133,150. 7 Claims. (Cl. 20—75.)

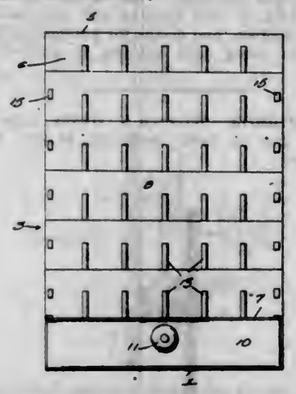
1. A flooring comprising a plurality of blocks, each having an elongated rectangular top and base of substantially the same dimensions, the base projecting beyond the top along one side and one end and receding under the other side and end, the relative arrangement of sides and ends beyond which the base projects being reversed in some of the blocks to that in the others.

1,622,104. BLOCK FLOORING AND PROCESS OF MAKING THE SAME. JAMES ORR FULTON, Toronto, Canada, assignor to The John C. King Lumber Company, Cleveland, Ohio, a Corporation of Ohio. Filed Nov. 6, 1926. Serial No. 146,601. 7 Claims. (Cl. 20—S.)



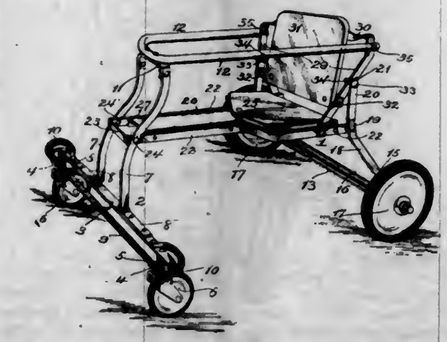
1. The method of laying block flooring which comprises coating the entire bottom surface of a block with fluid adhesive, placing it upon its supporting base, and sliding the block into final position upon the base in a manner to expel substantially all entrapped air and excess adhesive and to form a thin load-carrying film of capillary thickness between substantially contacting portions of the bottom of the block and the base.

1,622,105. ATTACHMENT FOR MEASURING INSTRUMENTS. OTTO GOTTSCHALK, Buenos Aires, Argentina. Filed Oct. 30, 1925. Serial No. 65,857. 4 Claims. (Cl. 33—176.)



1. In a device of the class described, flexible metallic strips, securing members including body portions, clamping means carried by the body portion for clamping the ends of the flexible metallic strips together to form a model of an entire structure, and means for bending the strips.

1,622,106. SCALE. NATHAN A. HALLWOOD, Pittsburgh, Pa., assignor to McKenna-Horix Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed May 12, 1925. Serial No. 29,656. 7 Claims. (Cl. 265—69.)



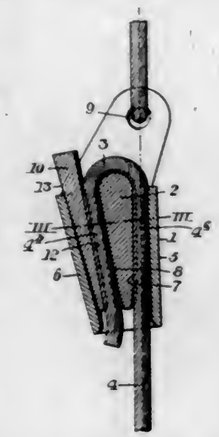
1. In a scale, a load carrying member, a compression spring, a tension spring, said springs having one end interconnected and being made of such lengths and material that each spring will have a substantially equal change in length and tension under variations of temperature, and a support for the free end of one of the springs, the load carrying member being operatively connected to the free end of the other spring in such manner that each of said springs resists movement of said member under load.

1,622,107. BOBBIN RACK. JAMES N. HARROD, Palo Alto, Calif. Filed Oct. 12, 1925. Serial No. 62,082. 1 Claim. (Cl. 211—14.)

A bobbin holder of the class described comprising a sheet of metal bent upon itself to form a base, an upstanding rear wall and a downwardly and forwardly inclined front, said front being bent at longitudinally spaced points to form a plurality of stepped formation, the lowermost horizontal portion terminating above and being spaced inwardly from the adjacent end of said base, side plates connected with the front, rear wall and base, the upper edges of said plates being notched to accommodate the steps to the front, said vertical portions of the steps being formed with openings and said side plates being provided with tongues extending through said openings, and bent upon themselves to hold the side plates in place, and a plurality of bobbin supporting pins carried by the horizontal portions of the steps.

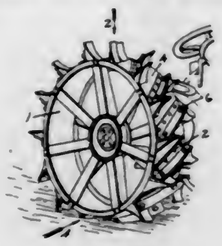
1,622,108. BABY WALKER. AXEL W. HAWKINSON, Washington, Pa., assignor to Sidway Topliff Company, Washington, Pa. Filed July 11, 1925. Serial No. 43,035. 2 Claims. (Cl. 155—22.)

1. In a device of the character described, the combination with wheeled front and rear frames, of a seat frame pivotally connected at its respective ends with said front and rear frames, a back frame detachably engaged with the upper end of said rear frame and pivoted to the seat frame in advance of said rear frame, and an upper frame pivotally connected at its forward end with the upper end of the front wheeled frame and pivotally connected at its rear end with said back frame, said upper frame being adapted to rest on the seat frame in collapsed condition with the back frame swung forwardly within the upper frame and the front wheeled frame being adapted to simultaneously swing rearwardly under the seat frame, and the rear wheeled frame being adapted to swing forward under the seat frame when disengaged from the back frame.



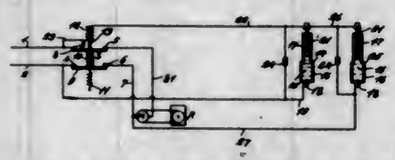
1,622,109. CABLE OR WIRE CLAMP. JEHU FREDERIC HAWORTH, Edgeworth, Pa. Filed Nov. 1, 1926. Serial No. 145,672. 14 Claims. (Cl. 24—126.)

1. A clamp for cables or wires, comprising a housing having a tapered socket for receiving a loop of the cable or wire, and a wedge in the socket tapered in the same



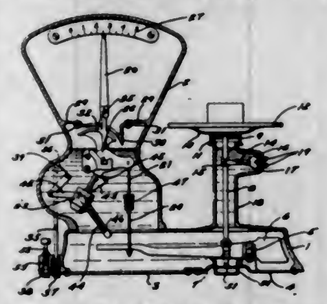
direction as the socket and within the loop of the cable or wire for frictionally clamping the loop, the cooperating portions of the housing and wedge which grip the tensioned leg of the loop being more yieldable relatively to each other at the small end of the socket, whereby the clamping grip on the tensioned leg of the loop is less on the tensioned end of the gripped leg of the loop than at its other end.

1,622,110. CABLE OR WIRE CLAMP. JEHU FREDERIC HAWORTH, Edgeworth, Pa. Filed Nov. 1, 1926. Serial No. 145,673. 7 Claims. (Cl. 24—126.)



1. A cable or wire clamp comprising a housing having a tapered socket for receiving a loop of cable or wire, a wedge in the socket and within the loop of the cable or wire for frictionally clamping the tensioned leg of the loop against one side of the socket, and a second wedge adapted to be forced into the socket into gripping engagement with the other leg of the loop.

1,622,111. GROUSER. RON C. HAWKINS, Long Beach, Calif., assignor to "H H" Manufacturers, Inc., Long Beach, Calif., a Corporation of California. Filed July 9, 1925. Serial No. 42,461. 9 Claims. (Cl. 301—44.)

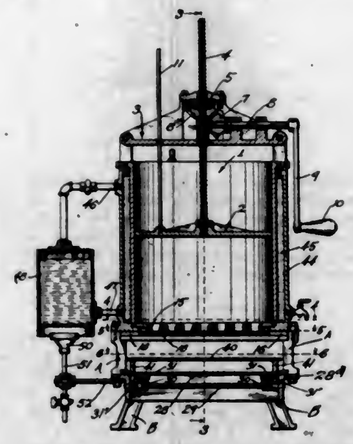


9. A tractor wheel having in combination a wheel rim, a cleat attached thereto having a face extending diagonally across the wheel rim, a grouser having a pair of lugs connected by a web, the back of the lugs and the back of the web being in substantially the same plane and fitting against the cleat, lugs having bases resting on and extending partially along the face of the rim, the lugs extending outgardly from the rim a greater distance than the cleat and the web, the front faces of the lugs extending square across the wheel rim and means to fasten the grouser to the cleat.

1,622,112. SYSTEM OF MOTOR CONTROL. EMIL C. HELLWIG, Denver, Colo. Filed Sept. 20, 1926. Serial No. 136,525. 2 Claims. (Cl. 236—78.)

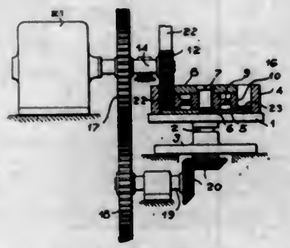
1. In an automatic motor control system having a source of electric current, a motor and a normally open electromagnetic switch for controlling the current to the motor, the combination with said switch and electric current source of a circuit closer that will close an electric circuit through a magnetic coil of the switch and cause the same to close when certain controlling conditions reach a predetermined limit in one direction, means comprising a second circuit closer for producing a parallel path for the switch operating current after the switch has been closed, said second circuit closer being arranged to open after the first mentioned circuit closer has opened whereby the electromagnetic switch will remain closed through a predetermined range in the controlling conditions.

1,622,113. WEIGHING SCALE. HALVOR W. HEM, Toledo, Ohio, assignor to Toledo Scale Company, Toledo, Ohio, a Corporation of New Jersey. Filed Apr. 8, 1925. Serial No. 21,464. 10 Claims. (Cl. 265—62.)



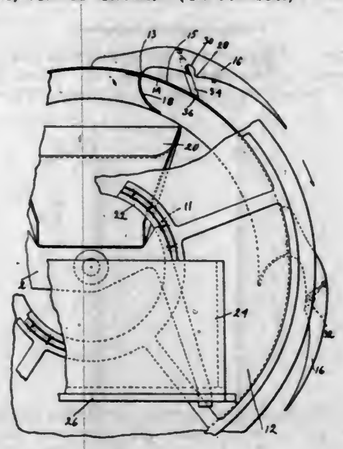
1. In a device of the class described, in combination, a housing having openings, weighing mechanism in said housing, a fluid in said housing and surrounding said weighing mechanism, and means for automatically closing said openings when said housing is shifted from a support.

1,622,114. MIRROR. WILLIAM T. HENRY, Lake Charles, La. Filed Jan. 15, 1926. Serial No. 81,431. 3 Claims. (Cl. 45—97.)



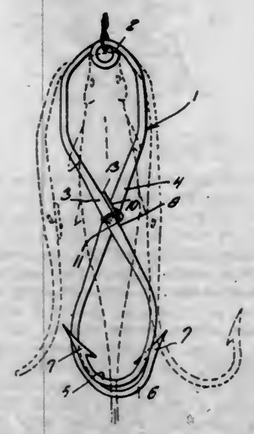
1. The combination with a mirror, of a flexible tongue secured to the casing thereof and having a free end disposed substantially parallel with the mirror and spaced from the mirror and provided with a bearing, a stem fitted through said bearing, a friction member between the mirror and tongue, to which the stem is attached, and a vacuum cup secured to the outer end of the stem.

1,622,115. CREAM DEPOSITOR FOR HAND-ROLL CENTERS FOR CANDIES. HARRY E. HONTS, Los Angeles, Calif., assignor to Rex Products Co., Inc., Los Angeles, Calif., a Corporation of California. Filed Sept. 18, 1920. Serial No. 411,231. 2 Claims. (Cl. 107—29.)



2. A cream depositor comprising a receptacle, a die plate forming the bottom of said receptacle, a plunger reciprocable in said receptacle, means for causing said plunger to force material in said receptacle through the die plate, cutting means arranged beneath the die plate, a gauge plate disposed beneath said cutting means, guide means for causing said gauge plate to move vertically, rock shafts disposed beneath said gauge plate, arms carried by said rock shafts, rollers mounted upon said arms engageable upon the under side of said die plate to raise and lower it upon rotation of said rock shafts, and means for rotating said rock shafts.

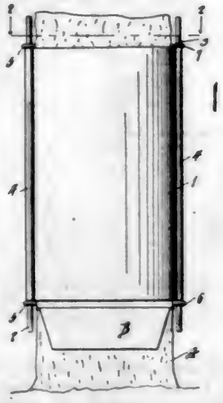
1,622,116. METHOD FOR MOLDING GEARS. WILLIAM B. JASPERT, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 30, 1923. Serial No. 615,913. 5 Claims. (Cl. 154—2.)



1. A method of making a composite article which comprises providing an endless strip of fibrous sheet material impregnated with a binder, corrugating the strip and feeding the same in a continuous helix into the matrix of a mold to form a determined number of superposed layers, and consolidating said layers by the application of heat and pressure.

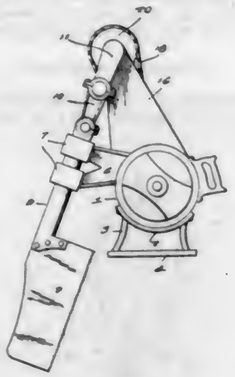
1,622,117. BERRY-PICKING MACHINE. SAMUEL B. JENKINS, West Barnstable, Mass., assignor to Henry N. Sweet, Boston, Mass. Filed July 23, 1920. Serial No. 398,478. 15 Claims. (Cl. 56—330.)

1. A berry picking machine having, in combination, a rotary drum having a berry-excluding surface; combs arranged at intervals around the drum having teeth projecting therefrom and extending in the general direction of the drum surface with their berry-engaging tips a little outside of said berry-excluding surface, whereby an entrance throat is formed between such surface and the comb; there being an opening through said surface to the interior of the drum at the base of the comb, and the apparatus being arranged with the tips of the teeth of said comb to make the initial contact of the apparatus with vines that are to be picked; means to revolve the drum and simultaneously to advance it over the ground; and means within the drum to receive berries that have entered through said throat and to guide them laterally out through the end of the drum.



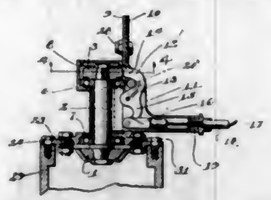
1,622,118. FISHHOOK. LEE JOHNS, Miami, Fla. Filed Aug. 26, 1926. Serial No. 131,712. 4 Claims. (Cl. 43—36.)

1. A fish hook, comprising a pair of resiliently connected arms normally adapted to extend in diverging relation, said arms having penetrating prongs formed at the free ends thereof and adapted to be brought into



adjacent tensioned relation, means adapted to retain the arms in tensioned relation, and rotary means adapted to support bait and operate the last-mentioned means in the rotation thereof to release said arms.

1,622,119. TURPENTINE-GATHERING APPARATUS. THEODORE P. KEATON, Pearson, Ga. Filed Mar. 11, 1926. Serial No. 93,966. 3 Claims. (Cl. 47—24.)

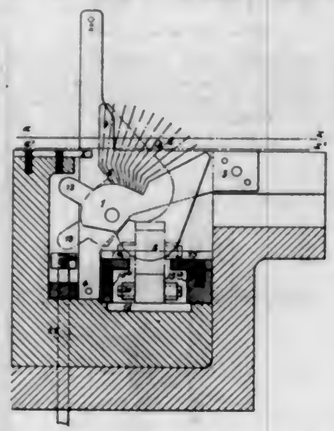


1. In turpentine gathering apparatus, a cover for the streaks in the tree trunk, comprising a plate of metal pivotally secured to the tree trunk at one side of the streaks to swing horizontally and to closely engage the tree trunk in one position, and means to secure the plate in position.

1,622,120. MOTOR-DRIVEN SAW. CRAIG LYNN, Butler, Ind. Filed Apr. 3, 1925. Serial No. 20,469. 1 Claim. (Cl. 143—68.)

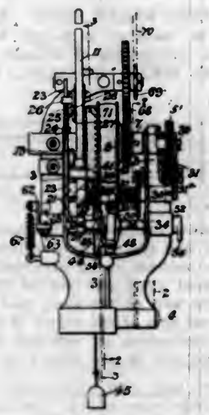
A power operated saw of the class described comprising a base, a saddle supported on said base, a motor mounted in said saddle, an arm extending laterally from said motor at one end and provided with a pair of spaced bearings alined at an incline and substantially tangential to a circle concentric about the axis of the motor, an operating rod of a saw slidable in said bearings, a bracket arm rising from the other end of the motor and having a gear casing formed thereon, gearing in the casing oppositely associated with the motor, an extension disposed laterally of said bracket arm and projecting towards said one end of the motor and terminating in a bearing, said bracket arm terminating in a bearing alined with the last-mentioned bearing, a shaft journaled in the last two mentioned bearings to be disposed substantially horizontally, chain and socket means oppositely associating said shaft with said gearing, a crank on said shaft adjacent the bearing of the extension, a pitman on said crank and engaged with said operating rod.

1,622,121. ADJUSTABLE IMPULSE GENERATOR. CHARLES L. PAULUS and ROBERT KAUCH, Dayton, Ohio. Filed July 25, 1924. Serial No. 728,190. 7 Claims. (Cl. 89—27.)



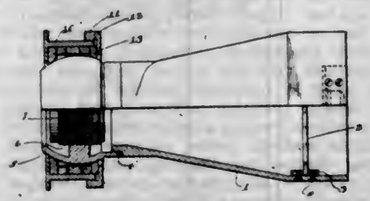
1. An impulse generator comprising a housing, an impulse cam therein rotatable about an axis, an impulse lever operated by said cam, means for rendering said lever inoperative, a support for said impulse lever, and means for adjusting said support on said housing said impulse cam being housed by the housing and the support.

1,622,122. PROCESS OF DYEING. PAUL RABE, Leverkusen, near Cologne-on-the-Rhine, Germany, assignor, by mesne assignments, to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 11, 1924. Serial No. 705,933, and in Germany May 9, 1923. 3 Claims. (Cl. 8—5.)



1. Process for dyeing acidyl celluloses or their transformation products, characterized in and by the fact that a hydrogenated pyridine compound is added in the dyeing, substantially as described.

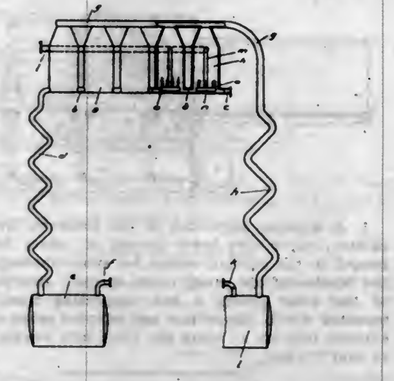
1,622,123. POWER LOOM FOR CARPETS. PIERRE RENARD and FERDINAND RENARD, Nonancourt, France, assignors to Société Renard Frere et Fils, Nonancourt, France. Filed Jan. 5, 1923, Serial No. 610,851, and in France Apr. 26, 1922. 4 Claims. (Cl. 139—116.5.)



1. In a loom, the combination of a shuttle, a plurality of axles parallel to the weft thread, a plurality of blades pivoted about said axles, means for successively rotating said blades after the passing of the shuttle in the direction that pushes the weft thread away from the fabric, rigid blades for stopping the weft threau, and a reed to apply the weft thread against the fabric.

1,622,124. MEASURING DEVICE FOR TEXTILE MACHINERY INCORPORATING A SWIFT. HANS SCHWEITER, Horgen, Switzerland. Filed Feb. 18, 1924, Serial No. 692,580, and in Switzerland Mar. 18, 1923. 7 Claims. (Cl. 33—180.)

1. A measuring device for a textile machine incorporating a swift, comprising a measuring screw mounted on the machine; an oscillatable swift carrying arm mounted on the machine; a measuring screw drive for displacing the measuring screw from an initial position; disengaging means for throwing the measuring screw drive out of action; actuating means on the said arm for actuating the disengaging means; means acting on the measuring screw to return it into its initial position on operation of the drive disengaging means; and engaging means on the said arm for bringing the measuring screw drive into action.

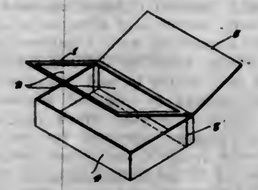


1,622,125. AIRPLANE VIEW FINDER. ALBERT W. STEVENS, Dayton, Ohio. Filed Mar. 15, 1924. Serial No. 699,854. 6 Claims. (Cl. 88—1.)

1. A view finder for aircraft comprising an upwardly flaring rectangular casing, a view screen in the flared end thereof, a lens, a universal mount for said lens attached to the smaller end of the casing and enclosing said lens, said mount having a spherical contour externally, and means for frictionally holding said mount in position on an aircraft.

1,622,126. PROCESS FOR SEPARATING VOLATILE SUBSTANCES. ERNST WECKER, Heilbronn, Germany. Filed Mar. 18, 1924, Serial No. 699,137, and in Germany Mar. 20, 1923. 3 Claims. (Cl. 87—12.)

1. A process of refining oil containing fatty acids which comprises heating said oils to an elevated temperature, injecting into said oils a liquid in the form of a fine mist, said liquid being highly volatile at the temperature to which the oil has been heated, thereby producing an

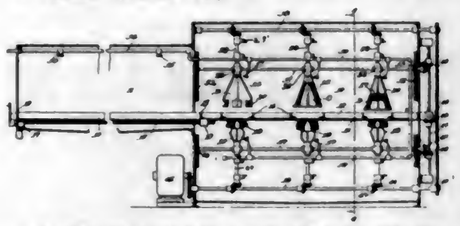


instantaneous expansion and volatilization of the injected liquid and vaporizing the fatty acids in the oil and withdrawing said vapor.

1,622,127. LEATHER DRESSING AND TANNING MATERIAL. FREDERICK C. ATKINSON, Indianapolis, Ind. Filed Aug. 16, 1919. Serial No. 317,899. 5 Claims. (Cl. 149—6.)

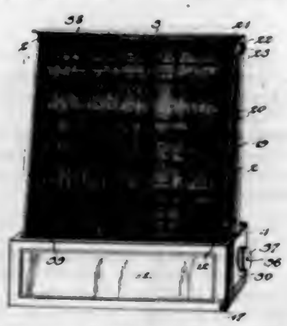
3. A process of producing material suitable for leather treatment comprising digesting corn cobs under pressure at a temperature of 140 to 200° C. from two to three hours, substantially as set forth.

1,622,128. ADJUSTABLE AND ATTACHABLE BOX COVER. SYDNEY BEZZANT, Bristol, and REGINALD BEZZANT, London, England. Filed Dec. 9, 1924, Serial No. 754,839, and in Great Britain Dec. 13, 1923. 1 Claim. (Cl. 217—58.)



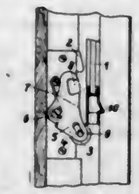
For use in combination with a box having a hinged lid, a transparent cover member having an edge adapted to lie against said lid when the said lid is opened and an expansible band adapted to encircle said box adjacent said edge and to serve both to retain said cover member normally shut and to press its said edge against said lid to form a pivot upon the raising of said cover member.

1,622,129. BARBITURIC ACID AND PROCESS OF MAKING SAME. FRIEDRICH BOEDECKER, Berlin-Dahlem, Germany, assignor to the Firm I. D. Riedel A. G., Berlin-Britz, Germany. Filed Sept. 23, 1924, Serial No. 739,426, and in Germany Oct. 10, 1923. 8 Claims. (Cl. 260—33.)



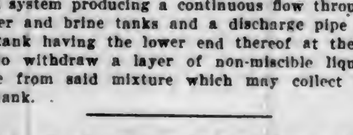
1. As new products, the herein described substituted barbituric acids in which at least one of the hydrogen atoms of the methylene group is substituted by a halogenallyl group containing halogen at least in the β position.

1,622,130. WASHING MACHINE. CHARLES BOYD, Denison, Ohio. Filed Nov. 18, 1922. Serial No. 601,837. 4 Claims. (Cl. 15—56.)



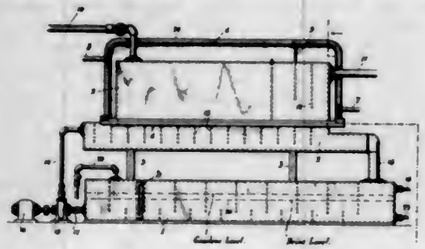
1. A washing apparatus of the character described, a cabinet, upper and lower groups of rotary brushes arranged in the cabinet, means for simultaneously rotating the brushes of one group in an opposite direction to that of the other group, a pan supporting frame slidably mounted within the cabinet and adapted when slid to one extreme position to bring the trays into working relation to said brushes.

1,622,131. AIR COOLER. EDWARD CRISPIN, New York, N. Y. Filed July 30, 1920. Serial No. 400,293. 2 Claims. (Cl. 261—80.)



1. An air moistening and cooling means for air entering the room and comprising an open top tank adapted to contain liquid, parallel uprights mounted in the end walls of the tank, one of said uprights being removably mounted on its supporting wall, a hollow roller adapted to contain a cooling agent for chilling the liquid in the tank, mounted for rotation in said casing and being provided with an opening in one end portion thereof, a sliding cover for said opening which can be moved to open position, a support mounted for rotation in the upper ends of said uprights, and means trained over said support and moved by the hollow roller as the latter rotates, the said last-mentioned means passing through the said liquid to be coated therewith to moisten the air entering the room.

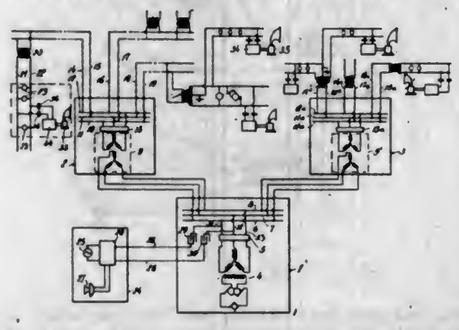
1,622,132. SASH HOLDER. OTTO DANNEHL, Berlin-Zehlendorf, Germany, assignor to Naamlooze Vennootschap Machinerieen en Apparaten Fabrieken, Utrecht, Holland. Filed Oct. 28, 1924, Serial No. 746,425, and in Germany Dec. 3, 1923. 2 Claims. (Cl. 292—79.)



1. In a sash holder, the combination with a frame and slidable sash therein, of means mounted on the frame to automatically check sliding movement of the sash immediately upon contact of the sash therewith, and braking means carried with the last mentioned means also engageable with the sash so as to allow the sash to slide at reduced speed into closed position.

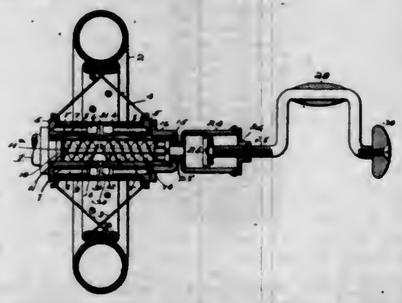
1,622,133. PRESSED BRAKE SHOE. ADIEL Y. DODGE, South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 8, 1924. Serial No. 754,711. 25 Claims. (Cl. 188—250.)

17. A brake shoe comprising two sections, each including a central web and an outwardly-extending cylindrical flange, the sections being arranged with the two webs in engagement from one end of the shoe to the other to form the web of the shoe, and both webs being deflected to one side of the center of the shoe at one end, to permit overlapping an adjacent shoe, and being elsewhere substantially in the center of the shoe.



1,622,134. MEANS FOR GAS SEPARATION. HORACE DUMARS, New Suffolk, and WILLIAM SPENCER BOWEN, New York, N. Y., assignors to Bowen-Dumars Power Corporation, New York, N. Y., a Corporation of New York. Filed Nov. 28, 1923. Serial No. 677,528. 4 Claims. (Cl. 183—2.)

1. Apparatus for segregating a specific gas or gases from a mixture of gases having critical temperatures so related that one becomes liquid while another solidifies at said critical temperature, including a condensing chamber, a conveyer tank and a brine tank, said condensing chamber being in superposed relation to said conveyer tank, a member enclosing said condensing chamber and spaced therefrom forming a jacket for the reception of a refrigerating medium, means communicating with said condensing chamber for admitting and discharging the mixture, baffles in said chamber giving a tortuous flow to said mixture, collecting plates in the conveyer tank for receiving the solid condensate from said mixture, conduits connecting the opposite ends of said conveyer tank and brine tank forming a closed circulation system, a pump in said system producing a continuous flow through said conveyer and brine tanks and a discharge pipe in said brine tank having the lower end thereof at the proper level to withdraw a layer of non-miscible liquid condensate from said mixture which may collect in said brine tank.



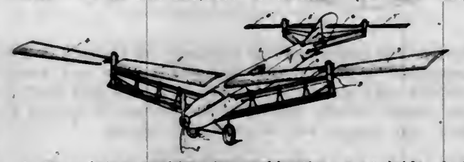
1,622,135. WIRED RADIO BROADCASTING SYSTEM. ROBERT D. DUNCAN, Jr., Bronxville, N. Y., assignor to Wired Radio, Inc., New York, N. Y., a Corporation of Delaware. Filed Sept. 5, 1923. Serial No. 661,037. 3 Claims. (Cl. 179—2.)

1. A signaling system comprising a multiphase electric generator, a multi-phase power transmission line comprising more than two conductors, said line being connected to said generator, a plurality of single-phase branch lines fed from said multi-phase line, a high frequency carrier current transmitter connected to a plurality of said conductors comprising said multiple transmission line, said transmitter being connected to less than the total number of said conductors, whereby high frequency carrier currents are directly impressed on at least one but less than

the total number of conductors comprising the multiphase power transmission line, high frequency signal receiving devices and means connecting them to a plurality of said branch lines, the arrangement being such that the high frequency carirer current is receivable on a plurality of said branch lines including branch lines whose phases do not correspond with the conductors of the multi-phase transmission line with which said transmitter is connected.

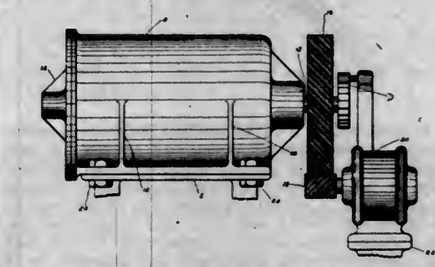
1,622,136. SELF-FEEDING ROTATING LUBRICATING SYSTEM. CHARLES W. DWORACK, Dayton, Ohio. Filed June 6, 1924. Serial No. 718,273. 2 Claims. (Cl. 308—93.)

1. In combination, in a lubricating device for lubricating the bearings of a wheel mounted on a stationary axle, a lubricant reservoir formed within said axle, a pair of bearings adapted to be inserted in the opposite ends of the bearing housing of said wheel and providing a space intermediate of the inner ends thereof, a plurality of longitudinally extending bores through said bearings opening towards said space, angularly disposed fins extending into said space disposed adjacent said bores, apertures formed in said bearings and connecting said bores with the wearing surface of said bearing and means operated by the rotation of said wheel to forcibly feed lubricant from said reservoir to said space.



1,622,137. PROPELLER CASE. CLIO S. EGBERT, Dayton, Ohio. Filed Mar. 18, 1924. Serial No. 700,100. 3 Claims. (Cl. 150—52.)

1. A case for airplane propeller blades comprising a pocket approximately the length of the blade made of a single piece of water-shed ducking doubled over and sewed at the edges leaving an open end to receive the blade and a closure foldable over the periphery of the

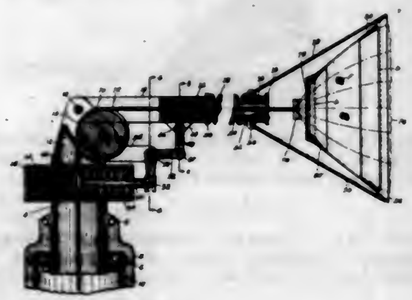


pocket the entire length of the opening to seal the same, a lining next to the ducking of leak-proof cloth, and an inner lining of shock-absorbing felt.

1,622,138. AIRPLANE HELICOPTER CONTROL. FRANK O. ELLERMAN, Dayton, Ohio. Filed Sept. 12, 1922. Serial No. 587,709. 6 Claims. (Cl. 244—15.)

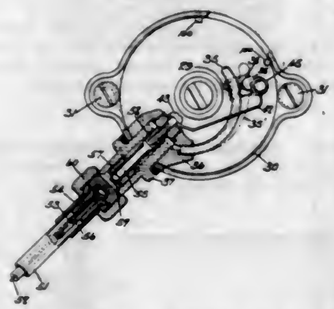
1. In a flying machine, in combination, a variable pitch propeller having blades rotatably supported in a rotating part, means for driving said rotating part to rotate the propeller, means for stopping said rotating part in a predetermined position, a rod and a sleeve coaxially located extending through said rotating part, screw threads on said rod engaging screw threads on said sleeve, screw threads on said sleeve engaging a fixed part of the flying machine, means for connecting the rod to one blade of the propeller, means for connecting the sleeve to the other blade, and means for turning the rod and sleeve to cause endwise movement thereof whereby the angle of incidence of the propeller blades is adjusted.

1,622,139. AIRSHIP MOORING DRUM. ROBERT M. GETCHELL, Dayton, Ohio. Filed Apr. 10, 1922. Serial No. 551,309. 5 Claims. (Cl. 254—172.)



1. In a device of the character described, a driving shaft, a cable drum mounted concentrically of, revolubly of and slidable longitudinally with respect to said shaft, a fixed key in one of said members adapted to travel in a groove in the other of said members, a coiled spring governing the relative longitudinal and rotational positions of said drum and said shaft, and bearings on said shaft in contact with the ends of said spring.

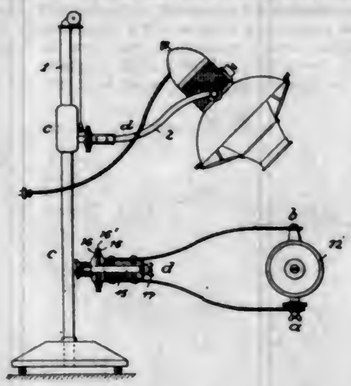
1,622,140. MOORING MASTHEAD. ROBERT M. GETCHELL, Dayton, Ohio. Filed Apr. 18, 1922. Serial No. 555,343. 2 Claims. (Cl. 244—2.)



2. In a mooring means of the character described, a hollow stationary means, a head rotatable in conjunction therewith adapted to have a cable pass therethrough and

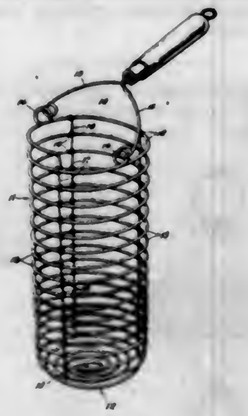
provided with spaced arms, a sheave mounted between said spaced arms, a yoke mounted on said head and having a hollow stem adapted to have the cable pass therethrough, means mounted upon said last mentioned means for containing the portion of an airship to be moored

thereto and means operable therewith for limiting inward movement of said airship engaging portion and means between said airship engaging portion and said stationary means whereby upward forces beyond the normal on said yoke means will be resiliently limited.



1,622,141. AUTOMOBILE THEFTPROOF DEVICE. HARVEY D. GEYER, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Feb. 13, 1924. Serial No. 692,490. 23 Claims. (Cl. 123—146.5.)

1. In combination with an internal combustion engine having an ignition primary circuit and a timer for making and breaking said ignition primary circuit, an electric switch for said ignition circuit located at a distance from said timer, a conduit enclosing the circuit conductor between said switch and timer and having fluid under a pressure different from atmospheric therein, and means associated with said timer and operable by a change of pressure in said conduit to render the ignition system inoperative.

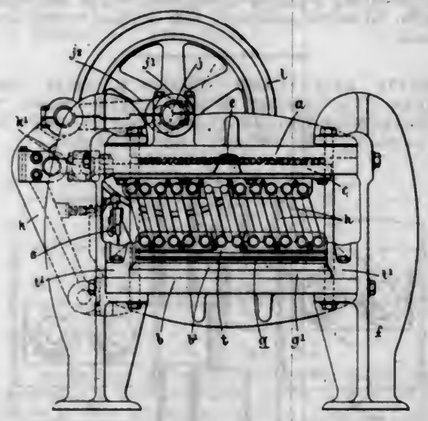


1,622,142. IRRADIATION DEVICE FOR THERAPEUTICAL AND OTHER PURPOSES. FRITZ GIRARD, Hanau-on-the-Main, Germany, assignor to the Firm: Quarz-Lampen-Gesellschaft mit beschränkter Haftung, Hanau-on-the-Main, Germany. Filed Nov. 17, 1922, Serial No. 601,612, and in Germany Nov. 21, 1921. 13 Claims. (Cl. 174—177.)

1. Irradiation apparatus for therapeutic and other purposes comprising a supporting stand, a slide movable along said stand, a supporting arm mounted on said slide for axial rotation, light emitting and reflecting means mounted at the end of said supporting arm for rotation about an axis extending at right angles to the axis of rotation of said arm and resilient frictional clutching means between said slide and said arm and between said

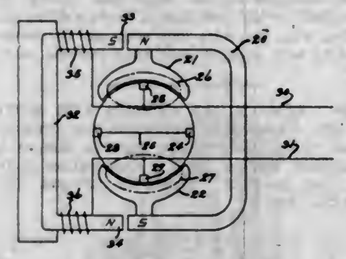
arm and said light emitting and reflecting means, respectively, for automatically securing said parts in the adjusted position.

1,622,143. EGG HOLDER. ALFRED HOPE, New York, N. Y. Filed Aug. 28, 1926. Serial No. 132,223. 1 Claim. (Cl. 53—1.)



An egg holder comprising an elongated body adapted to receive a plurality of eggs in stack formation one above the other formed of a single piece of wire coiled to provide a closed bottom therefor, said wire being helically wound to provide side walls for said body, the convolutions being spaced from each other, longitudinal braces extending the length of said body and fixedly mounted to the convolutions by twisting the same thereabout, opposed eyes formed in the uppermost convolution, and a handle member swingingly connected to said eyes substantially as and for the purpose specified.

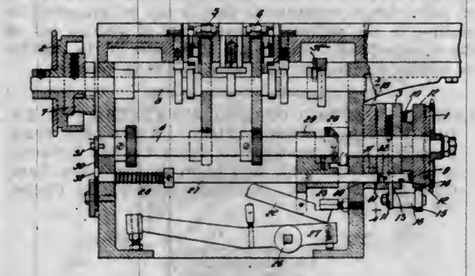
1,622,144. MACHINE FOR MANUFACTURING NAILS OR OTHER ARTICLES FROM SHEET OR STRIP METAL OR MATERIAL. FRANK HUMPHRIS, Parkstone, England, assignor of one-half to Kenneth Alexander Roberts, London, England. Filed Dec. 12, 1922, Serial No. 606,498, and in Great Britain Dec. 20, 1921. 6 Claims. (Cl. 10—11.)



3. A nail making machine, comprising a stationary die, a punch, a punch carrying ram movable towards and

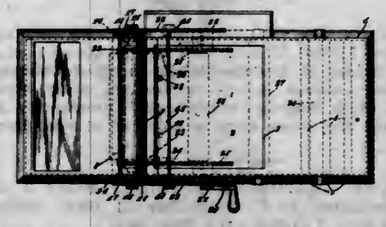
away from the die along a straight path, a bearer plate slide movable along a straight path at right angles to the path of the ram, means for moving the ram by move-

ment of the bearer plate slide, a fixed bolster plate, and rollers interposed between the bearer plate slide and the bolster plate.



1,622,145. GENERATOR-REGULATING APPARATUS. JOHN H. HUNT, Dayton, Ohio, assignor to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Dec. 12, 1923. Serial No. 680,240. 4 Claims. (Cl. 171—227.)

1. A generator comprising, in combination, a field magnet, an armature, a magnetizable core which is stationary relative to the field magnet and has its poles located respectively adjacent the field magnet poles but spaced therefrom to provide a magnetic path in parallel with the armature which path normally is of greater reluctance than the magnetic path between the field magnet poles through the armature, and a coil connected with the armature for magnetizing said core so that its poles will be adjacent, respectively, unlike poles of the field magnet, the flux produced by said coil being alone sufficient to divert substantial quantities of flux of the field magnet from the armature in order to regulate the generator.



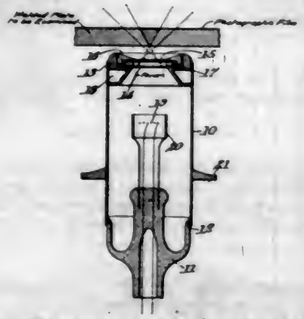
1,622,146. CLUTCH MECHANISM PARTICULARLY APPLICABLE TO WIRE TWISTING OR TYING MACHINES. ERNEST ALBERT INGOLD, London, England, assignor to W. & C. Pantin, London, England. Filed Apr. 26, 1924, Serial No. 709,235, and in Great Britain May 26, 1923. 5 Claims. (Cl. 192—48.)

1. Clutch mechanism comprising a power shaft, a power wheel carried by said power shaft, an axially movable clutch pin, a clutch member on the power wheel co-operating with said clutch pin, means normally locking the clutch pin against axial movement, mechanism actuated by the rotation of the power wheel to release said locking means, a sliding rod axially aligned with the movable clutch pin, a latch normally engaging said

rod to hold it in the operative position, and means carried by the power shaft and operative to withdraw said latch.

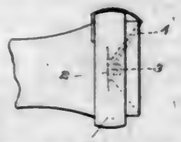
1,622,147. AUTOMATIC REGISTER. PHILIP A. JACKSON, Atlanta, Ga., assignor to The Egry Register Company, Dayton, Ohio, a Corporation of Ohio. Filed Nov. 14, 1923. Serial No. 674,736. 5 Claims. (Cl. 282—16.)

1. In an autographic register for feeding a plurality of paper sheets having spaced series of perforations, feeding rollers, means to actuate said rollers to feed said sheets, means to separate said rollers to interrupt the feeding of said sheets, means to automatically enter perforations in said sheets to align them and to automatically ride out of said perforations on the refeeding of the paper, and common operating means for said feeding and separating means, the several steps in the operation consisting of feeding the desired length of sheets and realigning the sheets ready for the next operation being automatically performed by one revolution of the operating means.



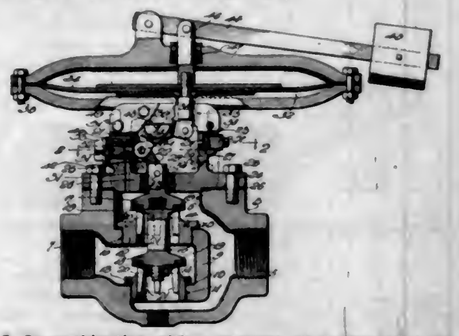
1,622,148. AUTOGRAPHIC REGISTER. PHILIP A. JACKSON, Dayton, Ohio, assignor to The Egry Register Company, Dayton, Ohio, a Corporation of Ohio. Filed Aug. 11, 1924. Serial No. 731,336. 7 Claims. (Cl. 286—16.)

1. In an autographic register having a plurality of strips, pin wheels adapted to engage with said strips in perforations therein, one of said strips being a record roll strip and arranged to be in engagement with a substantial portion of the peripheries of the pin wheels and a plurality of friction members over which said



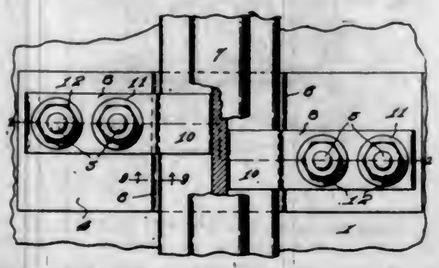
record strip is passed and then wound on a record roll, a record roll and means to permit said record roll to slip relatively to the pin wheels, and means to carry one of said friction members so that it can be supported in position in the register or moved out of position out of the register, and means in the side walls of the register to maintain said last mentioned means in position.

1,622,149. METHOD OF AND APPARATUS FOR RADIOGRAPHIC EXAMINATION. ANCEL ST. JOHN, Brooklyn, N. Y., assignor to Union Carbide & Carbon Research Laboratories, Inc., a Corporation of New York. Filed July 26, 1923. Serial No. 653,997. 2 Claims. (Cl. 250—34.)



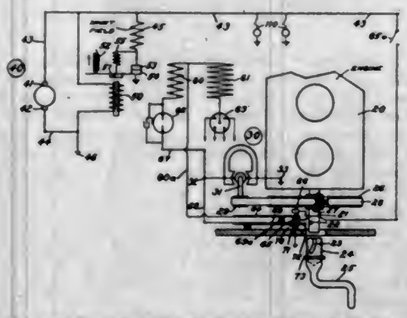
1. Method of detecting defects in objects wherein the tendency toward defects is localized along diverging lines, which comprises simultaneously propagating X-rays through the object along a plurality of said diverging lines.

1,622,150. DIAPHRAGM MUFFLER. BYRON Q. JONES, Washington, D. C. Filed July 12, 1924. Serial No. 725,622. 2 Claims. (Cl. 179—180.)



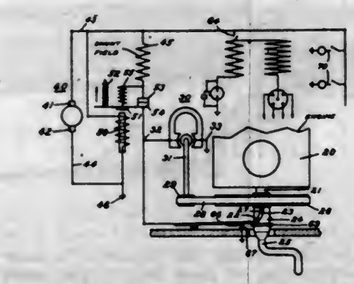
1. A device for muffling the diaphragm of a telephone receiver comprising a muffling pad and a spring clip formed to engage the exterior of the receiver and adapted to resiliently hold said pad against said diaphragm.

1,622,151. PRESSURE REGULATOR. ROY E. JOYCE, Montebello, Calif. Filed June 28, 1926. Serial No 119,132. 9 Claims. (Cl. 50—27.)



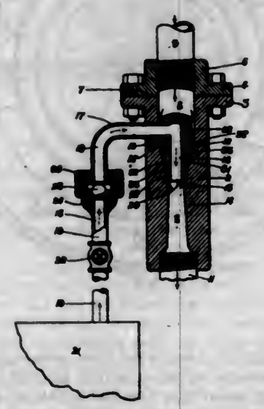
3. In combination with a pressure regulating valve embodying a movable valve member, and a pressure influenced member operatively connected with said valve member for controlling the same; manually controlled means for locking said valve member in closed position independently of the action of said pressure influenced member, permitting replacing or repairing of the last named member while the pressure is held in check by the valve member.

1,622,152. RAIL CLAMP. CHARLES C. KELTY, Point Town, Ohio, assignor of one-fourth to Morris W. Renick, Middletown, Ohio. Filed July 21, 1926. Serial No. 124,039. 2 Claims. (Cl. 238—210.)



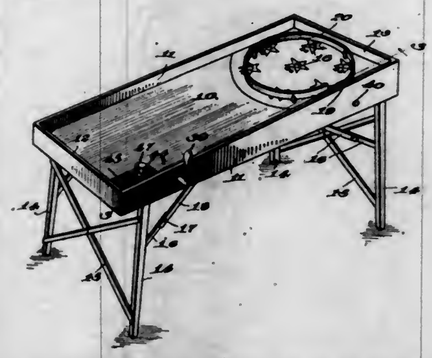
1. A concrete road bed having bolts arranged in spaced pairs anchored therein and extending therefrom, rail plates through which the bolts pass and said plates designed to have rails received thereon, upstanding spaced flanges on each rail plate contacting with the outer edge of the base flanges of the rails, rail clamping plates having lip ends and having their bodies provided with elongated openings through which the bolts pass, washer members arranged on the bolts and having depending lugs received in the openings of the clamping plates for contacting with the bolts and with one of the end walls provided by said openings and nuts screwed on the bolts.

1,622,153. ELECTRICAL SYSTEM FOR MOTOR VEHICLES. CHARLES F. KETTERING and JOHN H. HUNT, Dayton, Ohio, assignors to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed July 9, 1923. Serial No. 650,236. 7 Claims. (Cl. 123—148.)



1. In combination with an internal combustion engine having an ignition system including a spark coil having primary and secondary windings, a main generator driven by the engine for supplying current to said primary winding when the engine is self operating, an auxiliary generator adapted to be operated for supplying current to said primary winding during cranking of the engine, circuit controlling means and means connectible with the engine for cranking purposes and for driving said auxiliary generator and for operating the circuit controlling means to establish an electrical circuit between said auxiliary generator and primary winding during the cranking of the engine.

1,622,154. ELECTRICAL SYSTEM FOR AUTOMOTIVE VEHICLES. CHARLES F. KETTERING and JOHN H. HUNT, Dayton, Ohio, assignors to General Motors Research Corporation, Dayton, Ohio, a Corporation of Delaware. Filed July 16, 1923. Serial No. 651,709. 7 Claims. (Cl. 123—184.)



1. An ignition device for internal-combustion engines, comprising in combination, an engine, a main generator driven by said engine; an auxiliary generator; a crank for cranking the engine; and means for connecting the auxiliary generator with the crank and for arranging electrical circuits, whereby, only during the time the engine is being cranked, the auxiliary generator will be operated to supply current to the main generator for boosting the same to provide sufficient current for ignition purposes.

1,622,155. VACUUM-PRODUCING APPARATUS. ADOLPH MARTIN KOSIOLEK, Glideroy, via Yarra Junction, Victoria, Australia. Filed Nov. 14, 1922, Serial No. 600,965, and in Australia Dec. 5, 1921. 1 Claim. (Cl. 230—13.)

An ejector comprising a pressure fluid conduit having a part reversely flared from an intermediate point forming a passage of maximum constriction at that point, a nozzle in the flared part of said conduit on that side adjacent the source of pressure, communicating with the body of fluid to be ejected, said nozzle having an external shape corresponding substantially to that of the flared wall by which it is surrounded and terminating adjacent that part of the passage of maximum constriction, and a spiral rib between said nozzle and conduit forming a spiral passage for the pressure fluid whereby centrifugal force is imparted to the pressure fluid, effective to hold said fluid against the wall of the oppositely flared part, producing a vacuous central space in advance of said nozzle.

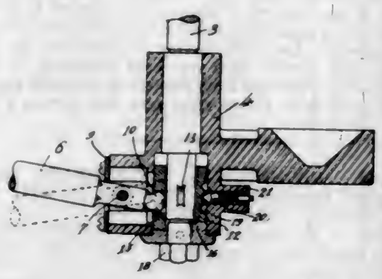
1,622,156. GAME. JOHN N. KORNAHRENS, Summerville, S. C. Filed Oct. 22, 1926. Serial No. 148,426. 5 Claims. (Cl. 273—119.)

1. A game comprising a table having a plurality of pockets at one end, an enclosure having an opening, with the enclosure embracing the pockets, and means for elevating the enclosure above the table.

1,622,157. OVERHEAD SIGNAL MIRROR. SANFORD S. LAW, Coraopolis, Pa. Filed Sept. 27, 1926. Serial No. 138,006. 1 Claim. (Cl. 45—97.)

In combination with a mirror, a rod connected with the rear thereof, said rod having an enlarged flat head having a hole therein, a similar rod adapted to be connected with a supporting member and links connecting the rods together, each link having an enlarged flat head at each end thereof with one head extending at right angles to the other and bolts connecting the links together and the end links to the rods, each bolt having a wing nut.

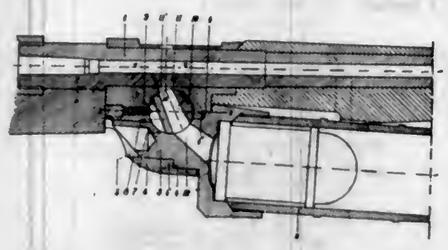
1,622,158. GEOMETRICAL INSTRUMENT. JOSEPH LIBERTY, Hartford, Conn. Filed Aug. 5, 1926. Serial No. 127,199. 1 Claim. (Cl. 33—98.)



A tool of the character described comprising a body portion composed of longitudinally aligned and relatively parallel sections, one of said sections having markings on a face thereof, rectangularly shaped loops formed integral with the inner ends of each of said sections and snugly and slidably embracing the adjacent portion of the relatively opposite sections, bearing shoes engaged with certain of the portions of each of said loops and having sliding contact with the adjacent faces of the opposite sections of said body portion, said bearing shoes being formed of a material softer than that from which said body portion sections are formed, a finger screw turned into engagement with one of said loops and adapted to have engagement with an adjacent portion of the bearing shoe carried thereby whereby to clampingly engage the same with an adjacent portion of the opposite body portion section slidably received therethrough, straight edges pivotally mounted upon the opposite ends of said sections, segmental bars having correspondingly formed slots therein, integral with the inner sides of said straight edges and arranged adjacent portions of the outer

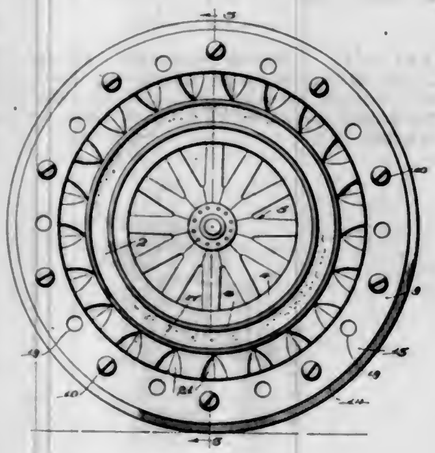
extremities of said body portion sections, and locking means passing through said outer portions of the body portion sections and through the slots in said segmental

bars whereby to releasably secure said bars and their respective straight edges in angularly adjusted positions with respect to the body portion.



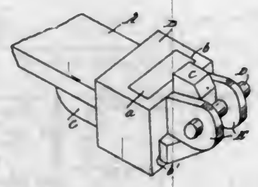
1,622,159. SAFETY LOCKING DEVICE FOR THE SHIFTING MECHANISM OF METAL PLANERS. CARL E. LINDEN and GEORGE H. LANGEN, Cincinnati, Ohio, assignors to The Cincinnati Planer Company, Cincinnati, Ohio, a Corporation of Ohio. Filed June 18, 1923. Serial No. 646,143. 5 Claims. (Cl. 74—39.)

1. In a safety locking device of the character specified, a tumbler, and a handle for manually operating the same, with means controlled by the handle for locking the tumbler against movement when the handle is moved in other than a tumbler operating direction.



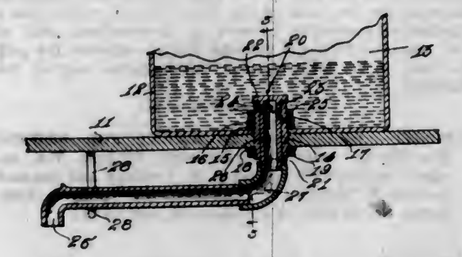
1,622,160. FIRING SOCKET OR CUP FOR GRENADES. ERNEST MATTLET, Brussels, Belgium, assignor to Fabrique Nationale d'Armes de Guerre, Societe Anonyme, Herstal-lez-Liege, Belgium. Filed July 30, 1926, Serial No. 126,021, and in Belgium Aug. 8, 1925. 5 Claims. (Cl. 42—1.)

1. A firing socket or cup for grenades adapted to be mounted eccentrically upon a gun or rifle and comprising axially at its back part a pin, a supporting member attached to the gun barrel and comprising a lodgment for receiving said pin, a transverse groove or throat provided in said pin, a cylindrical member which passes through



said groove and through the supporting member and means for conducting the gases from the gun barrel into the body of the socket.

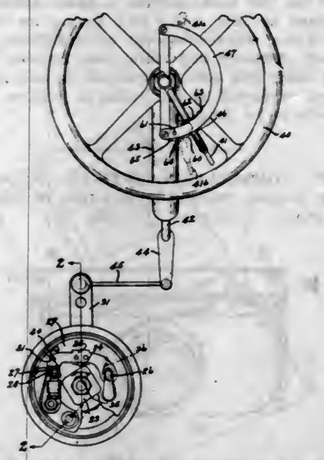
1,622,161. PNEUMATIC-TIRE ARMOR. JOSEPH CLEMENT MIRE, Baton Rouge, La. Filed July 30, 1926. Serial No. 125,992. 5 Claims. (Cl. 152—33.)



1. An armor for pneumatic tires comprising an inner supporting member including a ring adapted to fit on the periphery of a pneumatic tire and a pair of substantially parallel flanges extending radially outward from the edges of said ring, a pair of plates of disk formation straddling said flanges and having oppositely flaring flanges at their inner edges adapted to embrace the approximately outer half portion of a pneumatic tire, fastening devices securing said plates to said flanges and connecting said plates each with the other, the outer edge portions of said plates extending beyond the outer edges of said first named flanges, an outer supporting ring concentric with said first named supporting ring and disposed between the outer edge portions of said plates, said outer supporting ring being supported on the outer edges of said first named flanges, and a solid tire fitting on said outer supporting ring between the outer edge portions of said plates and extending outwardly beyond the outer edges of said plates, said side plates and said first named flanges having aligned ventilating openings.

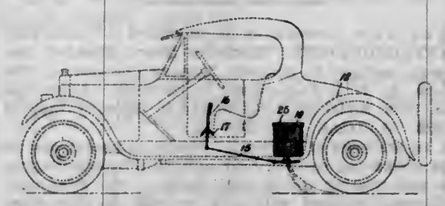
1,622,162. REMOVABLE BOLT HEAD. JOHN MITCHELL and JOHN CECIL GEORGE COSSEY, London, England. Filed Oct. 29, 1923, Serial No. 671,619, and in Great Britain Nov. 25, 1922. 3 Claims. (Cl. 85—9.)

3. A removable head for a bolt comprising a box-shaped member, a recess formed in one face of said box-shaped member, a projection formed at one end of said bolt, said projection being adapted to fit into said recess, an aperture extending through said box-shaped member, a cotter inserted through said aperture, a head on said cotter bearing against the rear end of said box-shaped member, and a pin for locking said cotter.



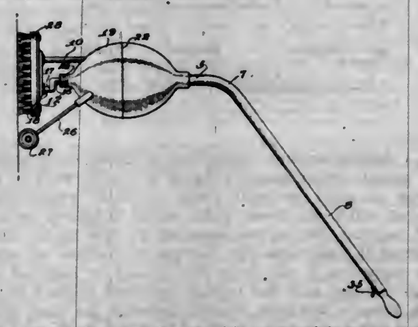
1,622,163. LIQUID-DISPENSING DEVICE. CHARLES NIEDERHAUSER, Woodhaven, N. Y. Filed Oct. 20, 1926. Serial No. 142,928. 2 Claims. (Cl. 221—26.)

1. In combination with a support, of a tank mounted thereon, a cylindrical sleeve extending through said support and the bottom of said tank, said sleeve having cooperating means for clamping the tank onto the support in liquid tight connection, a valve member comprising a tubular portion snugly fitting and rotatably and reciprocably mounted within said sleeve, said valve member having a head at the top or inner end thereof for seating engagement with the top of said sleeve, said tubular portion having lateral openings near the inner end thereof, a spout rotatably carried by the lower or outer end of said tubular member, and coacting means between the sleeve and valve member for raising and lowering said valve member upon the turning of said spout to different positions, whereby said head is unseated from and seated against the top of said sleeve, respectively, for exposing said openings above or closing them by telescoping within the top of said sleeve.



1,622,164. IGNITION APPARATUS. HARRY E. NORVEL, Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Aug. 12, 1924. Serial No. 731,690. 8 Claims. (Cl. 123—146.5.)

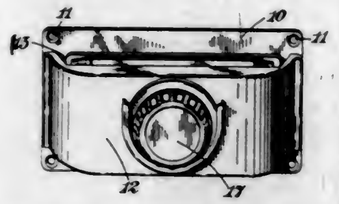
3. Ignition controlling apparatus for automobiles comprising, in combination, an ignition timer; a lever in convenient reach of the automobile driver for controlling the timer to advance and retard the timing of ignition; means responsive to a movement of said lever to a position beyond its normal range of spark-timing-control movement for rendering the ignition inoperative; and means for



adding a noticeable mechanical resistance to the movement of said lever into position for rendering the ignition inoperative.

1,622,165. AUTOMOBILE SANDER. EDWARD P. ROBINSON, Mount Vernon, N. Y. Filed Nov. 27, 1926. Serial No. 151,140. 7 Claims. (Cl. 291—34.)

2. The combination with an automobile including running boards, of said hoppers mounted on the rear ends of the running boards, discharge pipes from the hoppers extending through the running boards and sliding control valves for the discharge pipes mounted under the running boards, and slide valve carriers clamped to the lower ends of the pipes.

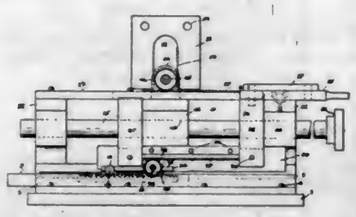


1,622,166. CLEANING MACHINE. JOHN M. SCHULTZ, Waukesha, Wis. Filed July 6, 1926. Serial No. 120,811. 2 Claims. (Cl. 15—49.)

1. A portable cleaning machine comprising a motor, a handle extending therefrom for moving the machine over the surface to be operated upon, a brush having a flat

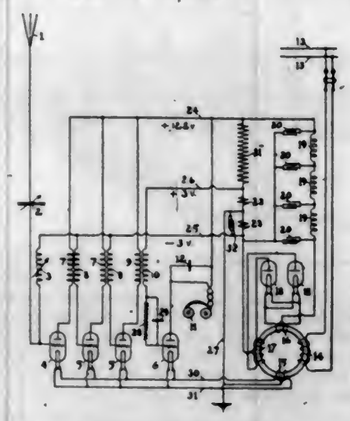
back portion, means providing a sliding and pivotal connection between said brush and said motor, said brush being supported for oscillatory and sliding movement in the plane of its flat back portion, a shaft extending from and rotated by said motor and having its remote end formed into a crank connected to said brush, a casing completely enclosing said motor and forming a support for said shaft and rollers arranged to one side of the brush and supported by the casing in position to engage the surface to be cleaned.

1,622,167. COMBINATION ARTICLE. ALLAN GORDON SMITH, London, England. Filed June 26, 1926. Serial No. 118,814. 3 Claims. (Cl. 224—29.)



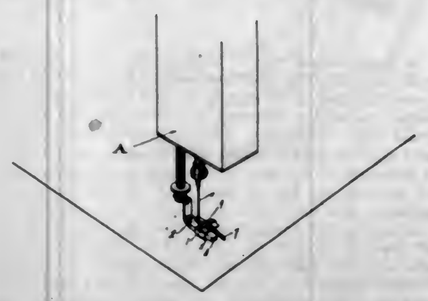
1. A combination toilet article comprising in combination a base-plate, means for mounting it in the interior of a motor car, a body-portion of mouldable material secured thereon to constitute a pocket, a member comprising a grooved support and grooved slides mounted on the front of said body-portion, and a flanged box removably mounted in said slides.

1,622,168. PROCESS OF MAKING 2-7 DINITROANTHRAQUINONE. BERTHOLD STEIN, Elberfeld, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed June 28, 1926, Serial No. 119,199, and in Germany June 25, 1925. 3 Claims. (Cl. 260—57.)



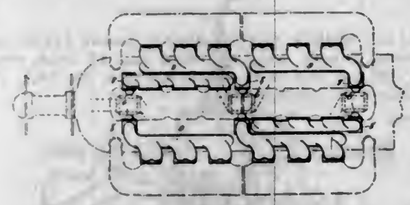
3. In processes of making 2-7 dinitro-anthraquinone the steps comprising treating tetra-nitrodianthrone with pyridine and treating the pyridine salts of the tetra-nitrodianthranol obtained with acid to form the tetra-nitrodianthranol and oxidizing the latter with concentrated nitric acid.

1,622,169. FORGING MACHINE. AUGUST ZIDOVEC, San Rafael, Calif. Filed Jan. 3, 1922. Serial No. 526,642. 3 Claims. (Cl. 80—20.)



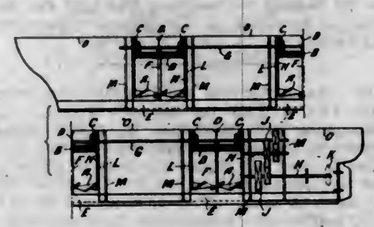
3. A forging machine comprising a frame, an eccentrically mounted work holder adapted to receive work to be pointed mounted on said frame, a shaft reciprocally mounted within the frame, a die carrier supported by the shaft, another die carrier mounted on the frame, dies supported in said respective carriers in position whereby work supported in the work holder may be disposed to engage the dies, said dies having oppositely inclined faces which form a V-shaped opening between the dies, said inclined faces also being inclined from the horizontal so that they converge towards certain ends of the dies for the purpose of drawing the end of the work to a point.

1,622,170. SUPPLY CIRCUITS FOR RADIO SETS. JULIUS GOUBOUSS ACHVES, New York, N. Y., assignor to Crocker-Wheeler Company, Ampere, N. J., a Corporation of New Jersey. Filed Apr. 29, 1922. Serial No. 557,348. 1 Claim. (Cl. 250—27.)



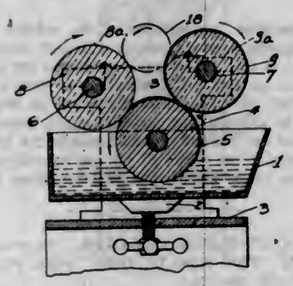
In a radio set, the combination of an amplifying tube, means for heating the filament of the tube, a connecting circuit, a source of direct-current energy in separate circuits from the circuit for heating the filament having its positive end connected to the plate and its negative end connected to the grid of the tube, a resistance connected between the two ends of the direct-current source, and a conductive connection between an intermediate point of the resistance and the filament circuit, whereby the grid is made more negative than the negative end of the filament.

1,622,171. BRAIDER ATTACHMENT FOR SEWING MACHINES. DANIEL L. ANTHONY, El Paso, Tex., assignor of one-half to Henry E. Cottman and one-half to Evor P. Morgan, El Paso, Tex. Filed July 6, 1925. Serial No. 41,475. 1 Claim. (Cl. 112—139.)



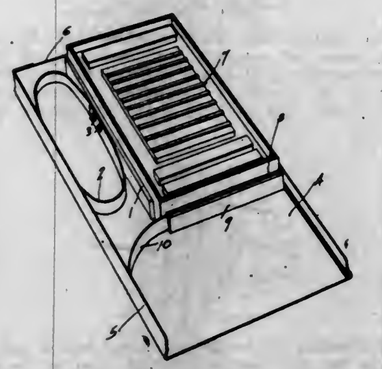
A braider attachment for sewing machines comprising a thin metal body portion adapted to be placed on top of the presser foot of a sewing machine and having a groove extending across the upper side thereof, which groove defines a rib on the under side of the body, which rib is adapted to engage in the bifurcation provided between the extremities of the presser foot, a downwardly extending flange on one edge of the body portion adapted to engage one side of the presser foot, a laterally extending clamping jaw at the lower end of the flange yieldingly engaging the lower side of the presser foot and a narrow spring tongue formed integral with the body portion on the end thereof opposite that carrying the flange, which tongue is bent downward to lie on top of the body portion and extends across said groove.

1,622,172. INTAKE-MANIFOLD ARRANGEMENT FOR W-TYPE INTERNAL-COMBUSTION ENGINES. GLENN D. ANGLE, Dayton, Ohio. Filed May 29, 1923. Serial No. 642,260. 5 Claims. (Cl. 123—55.)



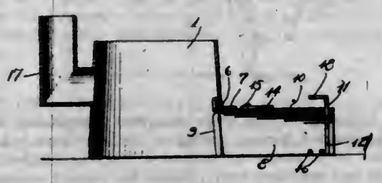
1. In combination with a W-type internal combustion engine, an intake manifold system comprising parallel series of induction pipes in substantially upright position and arranged on opposite sides of and in transverse alinement with the center and two end main bearings, and intake manifold units extending in a fore and aft direction from said induction pipes, all of said intake manifold units being identical and interchangeable.

1,622,173. MEANS FOR UTILIZING WAVE MOTION FOR THE PROPULSION OF SHIPS AND THEIR AUXILIARY MACHINERY. THOMAS RICHARD BRAN, Guernsey, Channel Islands, and RALPH ELIAS TAUDEVIN, Welwyn, Hertford, England. Filed Oct. 9, 1926, Serial No. 140,629, and in Great Britain Oct. 20, 1925. 5 Claims. (Cl. 115—4.)



1. Means for utilizing the motion of the waves and the kinetic energy of the ship's mass in the propulsion of a ship comprising water turbines arranged in the ship's hull and oscillated by the rise and fall of water therein and means transforming said oscillation into uni-directional rotary motion for driving the ship's propeller.

1,622,174. COATING MACHINE AND PROCESS OF COATING CYLINDRICAL OBJECTS. ROBERT F. BECHT, Silverton, Ohio. Filed Aug. 6, 1926. Serial No. 127,602. 6 Claims. (Cl. 91—50.)

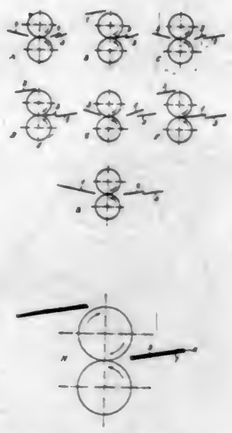


1. That process of coating cylindrical objects which consists in rotating the objects by peripheral contact with a relatively rapid moving roller, and applying a coating of material to the cylindrical objects by peripheral contact with a relatively more slowly rotating roller.

1,622,175. AUTOMATIC TYPE LOCK. EDWIN W. BEEDLE, San Francisco, Calif. Filed Aug. 26, 1925. Serial No. 52,558. 2 Claims. (Cl. 276—42.)

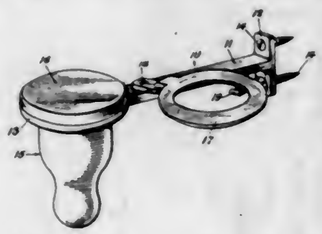
1. A device for holding type in assembled order within a galley comprising a clamping bar adapted to engage the type and a flat spring of substantially circular form fastened to one side of said bar at a point approximately centrally of the ends of said bar, which spring is adapted to engage the wall of the galley opposite the side of the type engaged by said bar.

1,622,176. PORTABLE STOVE. WILLIAM T. BISHOP, Henderson, Tenn. Filed June 18, 1926. Serial No. 116,904. 5 Claims. (Cl. 126—29.)



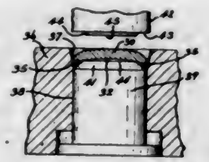
1. A portable stove having a substantially cylindrical center portion having open ends, means for adjusting the respective diameters of the upper and lower ends, a fire-box extending laterally from said center portion and communicating with the interior thereof, a door slidably connected with the outer end of the fire-box, and having notches in the edge thereof, a lever pivotally mounted upon the fire-box in position to engage the notches, and a flue connected with the center portion.

1,622,177. PROCESS FOR ROLLING THIN OR MIDDLE SHEETS FROM SHEET BARS. GIOVANNI BOSCARELLI, London, England. Filed June 20, 1923, Serial No. 646,686, and in Great Britain July 21, 1922. 4 Claims. (Cl. 29—19.)



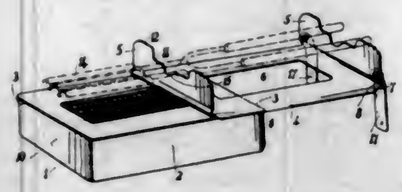
3. A method for producing middle or thin sheets from sheet bars in which the necessity for intermediate heating is avoided and the time for production reduced, comprising the rolling consecutively of a plurality of sheet bars to the desired dimension, piling them together and rolling again in this combined leaf form to the desired dimensions without further heating, mechanically lifting

the combined sheet on the catcher side of the rolls, in order that they may be passed over the rolls to doubling and heating means, doubling the said combined sheet and



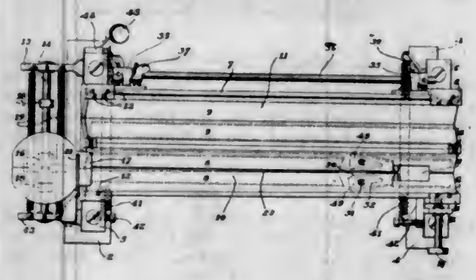
then reheating the doubled sheet thus formed and finally rolling the said combined doubled sheet to the desired dimensions.

1,622,178. CLEANER FOR NURSING-BOTTLE NIPPLES. ROSANNA MARIA BROPHY, Jersey City, N. J. Filed Aug. 27, 1926. Serial No. 131,973. 4 Claims. (Cl. 141—1.)



1. A device of the class described comprising a supporting bracket having a ring at one end thereof, a form member of a shape to receive a nursing bottle nipple thereto and provided with a flange for seating engagement with said ring, and a clamping ring movable into alignment with said ring and engaging said form member for holding the same seated upon said ring.

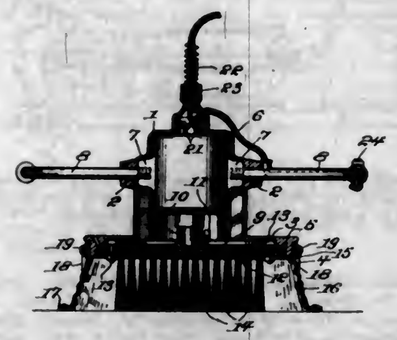
1,622,179. METHOD OF MAKING CLAMPING RINGS FOR COMMUTATORS. JOHN J. CARTER, Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Oct. 31, 1923. Serial No. 672,009. 3 Claims. (Cl. 29—155.5.)



1. The process of making a clamping ring for commutators, which includes forming a dished disk having a flange wedge-shaped in cross-section, then coining the disk to decrease the thickness of the central portion thereof and increase the sectional dimension of the wedge-shaped flange from the apex thereof to the side opposite, and providing an aperture in the disk, concentric with the flange.

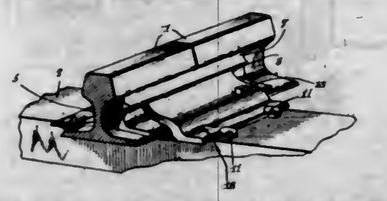
1,622,180. SPIRIT STOVE. PHILIP GEORGE JAMES COLBOURNE, London, England. Filed July 17, 1926, Serial No. 123,216, and in Great Britain Nov. 20, 1925. 12 Claims. (Cl. 126—38.)

1. A portable spirit stove having in combination with the container a slidable stand device conforming in shape with the container, a peripheral flange at the top of the container, guides of channel form on the stand adapted to co-operate with the flange and hold the stand to the container, whereby the stand is usable when slid so as to overlap the container as well as when wholly thereover, and channelled uprising supports at each end of the stand constructed so that when the stand is not in use and is inverted over the container, they lie compactly against the ends of the container and hold the stand to the container by reason of the channels engaging the peripheral flange.



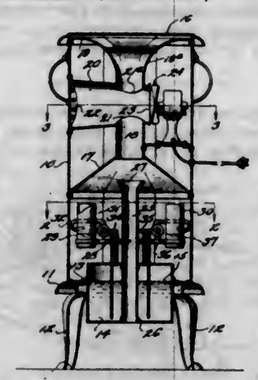
1,622,181. MACHINE FOR SEPARATING THE WHITES FROM THE YOLKS OF EGGS. WILLIAM CONNER, Philadelphia, Pa. Filed Dec. 3, 1921. Serial No. 519,631. 27 Claims. (Cl. 146—2.)

3. In a machine for separating the whites from the yolks of eggs, the combination of a trough having a longitudinal slot in the bottom thereof, means for supporting the trough in an inclined position, said slot being of a width to permit the passage therethrough of the white of an egg and to prevent the passage of the unbroken yolk of an egg, and an inclined trough beneath the first named trough to support the white of an egg extending through said slot prior to its complete separation from the yolk.



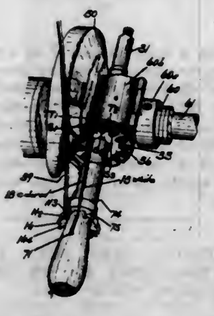
1,622,182. MEAT-BLOCK CLEANER. NATHAN COWAN, Chicago, Ill. Filed Aug. 18, 1926. Serial No. 130,065. 3 Claims. (Cl. 15—28.)

1. A cleaning device of the class described comprising a casing having a base portion, a motor held in the upper part of the casing, a brush holder rotatably mounted in the base portion, means for connecting the holder with the shaft of the motor, a brush connected with the holder, a flexible apron having its upper portion connected with



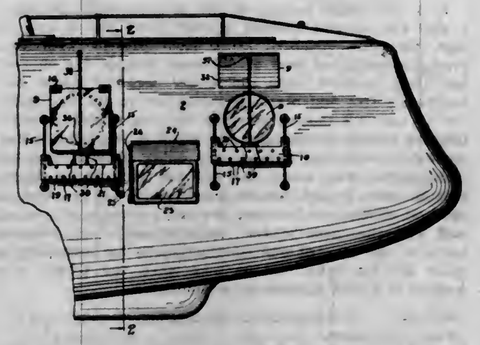
the base portion and spring means connected with the base portion and the bottom of the apron for holding the apron extended.

1,622,183. RAIL JOINT. LÉON D'AMOURS, Trois-Pistoles, Quebec, Canada. Filed July 3, 1926, Serial No. 120,496, and in Canada July 3, 1925. 2 Claims. (Cl. 238—208.)



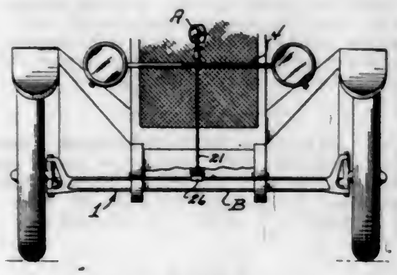
1. A rail joint or support comprising in combination with a rail, a clip on which said rail is disposed, said clip having tongues overlapping the base of said rail, a wedge driven between one of said tongues and said base, said wedge having teeth cut in one of its edges, a locking pin driven through said tongue and adapted for engagement with said teeth, and a spring pressing said pin against said teeth.

1,622,184. AIR-HEATING OIL STOVE. CLAWSON DAVIS, Ann Arbor, Mich., assignor of one-half to C. J. Seyfried, Morenci, Mich. Filed Sept. 20, 1926. Serial No. 136,596. 4 Claims. (Cl. 126—95.)



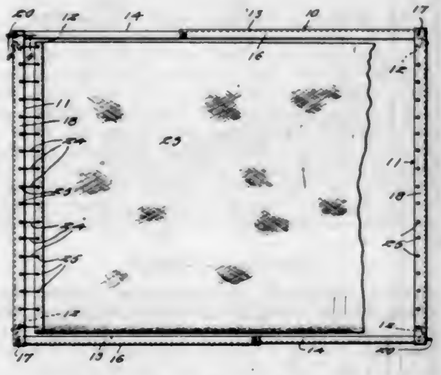
1. In a stove of the character described, a casing, a frusto conical shell member located within the intermediate portion of the casing, a conduit extending to the upper end of the casing, the upper end of said conduit being flared, the top of the casing being perforated, a fuel reservoir located within the bottom of the casing, an air inlet conduit extending upwardly centrally through the fuel reservoir in non-communicating relation thereto and discharging into said frusto conical shell member, and oil burners mounted within the casing between the oil reservoir and said frusto conical shell member.

1,622,185. MANUFACTURE OF ARMATURES. FRED G. DEWEY, Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Oct. 16, 1924. Serial No. 743,973. 7 Claims. (Cl. 171—206.)



1. The method of winding coils progressively into spaced slots of an armature core which includes so winding the first turn of a coil about the core that the starting active coil side is located upon the periphery of the core while the other active coil side of the first turn is located within a core slot, then winding the other turns of a coil so that both active coil sides of these other turns will be located in core slots, and then placing the starting active coil side upon the other coil sides in a certain slot so that the coil leads will emerge from the respective starting and ending active coil sides substantially the same distance from the periphery of the core.

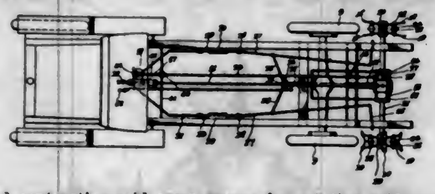
1,622,186. UNDER-SEA-ILLUMINATING MEANS FOR SUBMARINES. WERONIKA DOBSON, Milwaukee, Wis. Filed Apr. 8, 1926. Serial No. 100,720. 8 Claims. (Cl. 114—16.)



1. In under sea illuminating means for submarines, searchlights set into the side wall of the submarine, hinged covers for the outer ends thereof, means for positively moving the covers to open and closed positions, and an electrically charged device movable toward the searchlight opening when the cover therefor is opened.

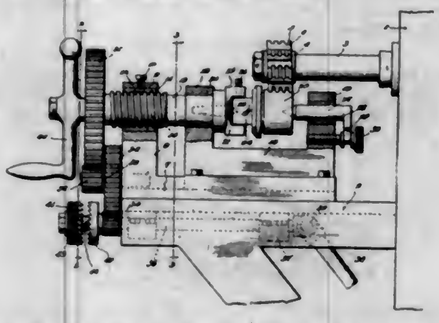
1,622,187. LIGHT. FRANCIS PIERCE DROHAN, Jacksonville, Fla. Filed Feb. 13, 1926. Serial No. 88,133. 6 Claims. (Cl. 240—62.)

1. In a vehicle, a lamp supported on a part of the same, a rotatable member supported in the lower part of the vehicle, means for communicating the movement of the said member to the lamp, means for moving said member a certain extent when the steering mechanism is moved to turn the vehicle in one direction and means for moving the member to a greater extent when the steering mechanism is manipulated to shift the wheels in the other direction.



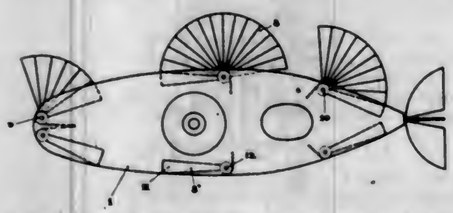
1,622,188. FOLDING CAMP BED. LEROY EDWARDS, Stanley, N. Dak. Filed Apr. 24, 1926. Serial No. 104,427. 4 Claims. (Cl. 5—114.)

1. A bed frame formed in two sections each including a side and an end member of the frame and a pair of legs, the side members being each formed with two pivotally connected bars of different lengths, the shorter bar being foldable upon the longer bar, the longer bar having its free end pivotally connected to the end member at one end thereof whereby the folded side member may be folded against the end member, said legs being pivoted to said end member and being likewise foldable thereagainst, the longer bar of the side frame being shorter than the end member whereby space is provided at one end of the end member for the reception of one of said legs, the space between the free end of the shorter bar and the pivoted end of the longer bar affording a space for the other of the legs when the folded side member is folded against the end member.



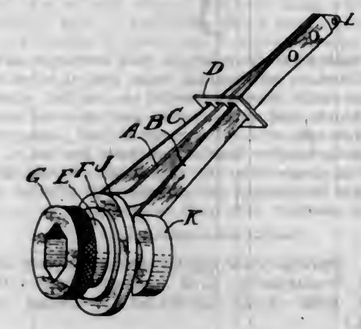
1,622,189. DEVICE FOR ATTACHING LUGS TO VEHICLE WHEELS. AMBROSE ELLZEY, Florien, La. Filed June 11, 1926. Serial No. 115,410. 9 Claims. (Cl. 152—14.)

1. A device for attaching mud lugs to vehicles comprising a pair of laterally expansible arms mounted for longitudinal shifting movement upon the vehicle and being adapted to carry a mud lug, means for expanding



and contracting said arms, means for rotating said arms, and means for shifting said arms toward the vehicle wheels to which the mud lugs are to be applied.

1,622,190. THREAD-CUTTING MECHANISM. STANLEY W. ELSTONE, Walkerville, Ontario, Canada, assignor to Huron Manufacturing Co., Detroit, Mich., a Corporation of Michigan. Filed Mar. 6, 1925. Serial No. 13,533. 1 Claim. (Cl. 10—154.)



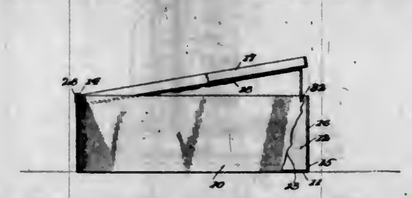
A thread cutting machine comprising a bed plate having an upstanding head having an opening therein, a block slidably mounted upon the bed plate and having upstanding head and tail stocks, a work supporting element carried by the tail stock, a spindle rotatably mounted in the head stock, a chuck carried by the said spindle for supporting the end of the work opposite the end which is engaged by the said supporting element and having a shoulder abutting the head stock, a bushing removably fitted in the opening in the head of the bed plate, means removably securing the bushing in place, the bushing being interiorly threaded and the spindle having a threaded portion fitting therein, a gear fixed upon the spindle, and a drive gear in mesh therewith and free from obstruction to lateral displacement and disengagement of the first mentioned gear therefrom when the securing means for the bushing is rendered inactive.

1,622,191. HELICOPTER. ANTOINE PADOUE FILIPPI, Paris, France. Filed Feb. 6, 1926, Serial No. 86,514, and in France Feb. 27, 1925. 4 Claims. (Cl. 244—20.)

2. In a helicopter a plurality of expanding surfaces, a spherical chamber with means for supplying compressed air to said chamber, a plurality of cylinders arranged around said chamber, pistons in said cylinders, operating means between said pistons and said expanding surfaces, and means for controlling the passage of air from the spherical chamber to the cylinders according to the tilting of the helicopter whereby said surfaces will be expanded in accordance with the tilting of the helicopter, said means consisting of a diaphragm arranged diametrically in the spherical chamber, and means for normally retaining the diaphragm in the horizontal position so that it remains substantially stationary whilst the spherical chamber moves in relation thereto.

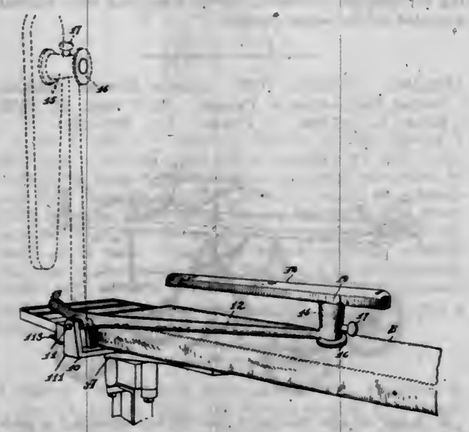
1,622,192. TOOL. WILLIAM P. FINKLE, Castleton-on-Hudson, N. Y., assignor of one-half to Henry A. Bailey, Burlington, Vt. Filed Mar. 9, 1926. Serial No. 93,523. 2 Claims. (Cl. 81—3.)

2. In a washer and nut manipulating tool, an arm having an angularly disposed end, a socket rotatable therein, an arm on each side of the first mentioned arm, each of the second mentioned arms having angularly disposed ends with sockets in the facing edges thereof adapted for receiving a washer and holding it in alinement with the socket, and means for retaining the second mentioned arms in adjusted relation to the first mentioned arm and retaining the washer while the socket is being manipulated.



1,622,193. GUN SIGHT. JOSEPH FISCHER, Faith, S. Dak., assignor to August Hanneman, Redelm, S. Dak. Filed June 29, 1925. Serial No. 40,430. 2 Claims. (Cl. 33—53.)

1. The combination with a firearm including a barrel provided at its forward end with a front sight, of a spring clamp device adapted to be mounted upon the forward portion of the barrel to the rear of the front sight thereon, an elongated tubular member pivotally connected with said clamp and adjustable longitudinally of the barrel, a fork at the rear end of said tubular member, a carriage pivotally mounted within said fork, a leaf pivotally mounted upon the gun barrel and slidably engaged within said carriage and means on the carriage for locking the same against movement with respect to the leaf.

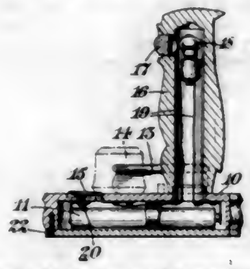


1,622,194. DISPLAY CONTAINER. HIDDEN EARL FREEMAN, Crewe, Va. Filed Nov. 7, 1923. Serial No. 673,314. 1 Claim. (Cl. 206—44.)

A box for containing confection or the like having its rear end cut away to enable access to be had to the interior of the box through the rear end, in combination with a display tray, and means for supporting the tray at an angle on the said box with its front end at the level of the front of the box and its rear end vertically spaced above the rear end of the box, said means including a wire frame constructed of two pieces of wire intertwisted intermediate their ends and having their

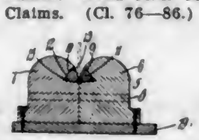
front ends extending from each other in diverging relation and their rear ends extending from each other in diverging relation, the extremities of the front ends being formed with upwardly offset hooks engageable over the front wall of the box, the rear ends having portions disposed to constitute vertical legs and terminating in hooks engageable over the side walls of the box adjacent its rear end.

1,622,195. PRESSING ARM. ALFRED HOPKINS, Allston, Mass., assignor to Hopkins Manufacturing Co., Boston, Mass., a Corporation of Massachusetts. Filed May 21, 1926. Serial No. 110,757. 1 Claim. (Cl. 68—10.)



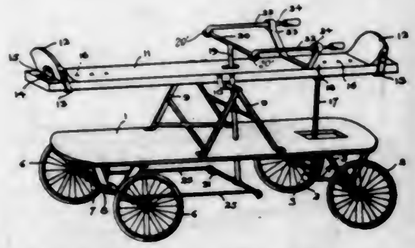
In a device of the class described a support, a presser arm pivoted near one end on said support to swing to a raised position or a lowered position, a socket rigid with said presser arm at the opposite end of said arm and disposed vertically, a presser board, and a member on said presser board turnably fitting said socket to permit the presser board to be swung horizontally.

1,622,196. SMOKER'S COMPANION. BERNARD CHARLES HOWELL, London, England, assignor to Henry Howell & Company Limited, London, England, a British Company. Filed Mar. 23, 1926, Serial No. 96,851, and in Great Britain Feb. 20, 1926. 6 Claims. (Cl. 40—126.)



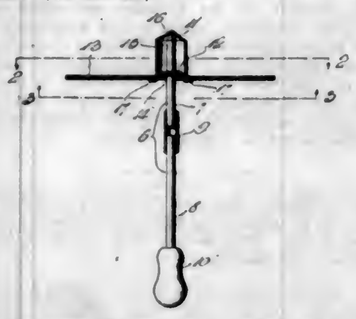
1. In a "smoker's companion," the combination of a hollow ornamental figure, a portion of which is trans-

lucent, an electric lamp serving to illuminate the interior of the hollow figure, an energizing circuit for the lamp,



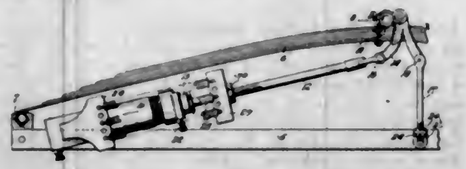
and a switch device for said energizing circuit, said switch device comprising a movable match striking surface.

1,622,197. KNIFE SHARPENER. LILLIAN M. KEEZER and FRED A. OSGOOD, Boston, Mass.; said Osgood assignor to said Keezer. Filed Mar. 30, 1926. Serial No. 98,576. 7 Claims. (Cl. 76—86.)



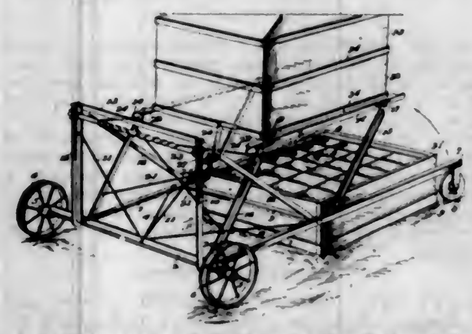
7. A sharpener member for a knife sharpening device, the same being triangular in cross section with abrading surfaces on a plurality of its faces and with notches provided in the edges thereof.

1,622,198. CHILD'S TOY. ALBERT EDWARD KEHLER, Jasper Park, Alberta, Canada. Filed Sept. 22, 1925. Serial No. 57,925. 2 Claims. (Cl. 208—33.)



1. A toy of the character described comprising a platform equipped with axles carrying suitable supporting wheels, the front axle being pivoted to swing about an intermediate vertical pivot for steering the platform, a rigid steering shaft passing upwardly through the central portion of the platform, a cross bar fixed to the lower end of said steering shaft, links connected between the ends of said cross bar and the ends of the pivoted axle to swing the latter laterally in response to turning movement of the shaft, an elevated transverse shaft carried by the platform above the central portion thereof, a board having its intermediate portion pivotally secured upon said shaft and provided with a slot receiving the upper portion of the steering shaft therethrough, a cross bar fixed to the upper end of the steering shaft, handle members attached to the ends of said last named cross bar, bracket members carried by said board and serving to slidably support said handle members, and a drive mechanism between the board and the rear axle functioning to rotate said axle in response to rocking movement of the board.

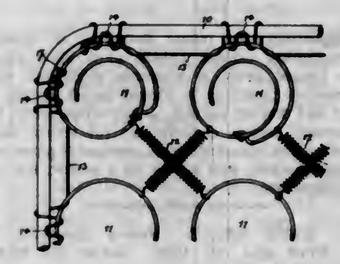
1,622,199. SPINNING TOY. WILLIAM J. KERR, Smethport, Pa. Filed Dec. 3, 1925. Serial No. 72,957. 3 Claims. (Cl. 46—32.)



1. A spinning toy comprising a staff having a pointed upper end and an outstanding flange spaced below said end, a rotatable member having a central opening through which said staff passes, said member underlying said flange, a sleeve secured to and rising from said rotatable member around the upper portion of the staff, and a closure for the upper end of said sleeve resting upon the pointed end of said staff whereby said member is rotatably supported on the staff.

1,622,200. SHOCK ABSORBER AND SNUBBER COMBINED. CHARLES H. LINN, Oakland, Calif. Filed Jan. 27, 1926. Serial No. 84,249. 7 Claims. (Cl. 267—34.)

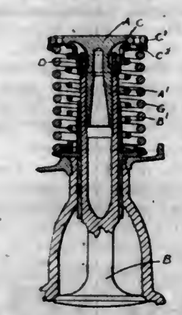
1. A flexible suspension system for vehicles, comprising a bell crank lever, means to pivotally attach said bell crank lever to the axle of the vehicle, a double acting pneumatic resistance device embodying a part adapted to be fixed to the vehicle frame and a movable part attached to one arm of said bell crank lever, and means to connect the other arm of said bell crank lever to the vehicle frame.



1,622,201. PORTABLE LIFTER FOR BEEHIVES. DANIEL G. LITTLE, Hartley, Iowa. Filed Apr. 28, 1926. Serial No. 105,244. 2 Claims. (Cl. 254—4.)

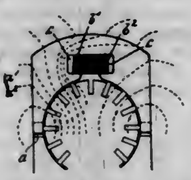
1. A lifting device of the character described comprising a base, said base including a pair of side bars, a cross bar connecting the rearward ends of the side bars,

and an intermediate cross bar between said side bars, said base being open between said side bars from the forward ends of the side bars to said intermediate cross bar, wheels at the opposite ends of said side bars for movably supporting said base, the forward end portions of said side bars being adapted to straddle the lower section of a sectional bee hive, a lifting frame comprising a pair of horizontal supporting bars, and pairs of front and rear lifter bars, the front lifter bars being attached pivotally to the front end portions of the supporting bars and being swingingly attached at their normally lower ends to said side bars of the base intermediate the length of said side bars, the upper end portions of the rear lifter bars being pivotally attached to the rear end portions of said supporting bars and the lower end portions of said lifter bars being swingingly attached to the rearward ends of said side bars of the base, said front and rear lifter bars at each side of the base being parallel, said supporting bars of the lifting frame having inwardly extending flanges at their upper edges, extending beyond the vertical planes of the inner edges of said side bars of the base, stay rods between the rear lifter bars, whereby all of said lifter bars will move in unison, standards on the rearward end portions of said side bars of the base, a transverse shaft rotatably supported by the upper end portions of said standards, and cables connected at their forward ends to the upper end portions of the rear lifter bars and attached at the rearward ends to said shaft.



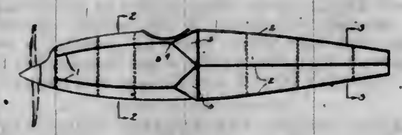
1,622,202. CUSHION-SPRING CONNECTION. VINCENZO MASSACESE, New York, N. Y. Filed Apr. 20, 1926. Serial No. 103,363. 1 Claim. (Cl. 5—260.)

In a spring structure, a frame, springs, and a length of wire provided with U-shaped offset loops having converging members, each loop being bent under and over the end convolution of a spring, under and over the frame and then under and over the said convolution of a spring with its end extending between the members of the loop towards the frame, whereby the frame and the spring are held in separate encircling portions and thereby a rigid connection between the spring and frame obtained.



1,622,203. LOCKING DEVICE FOR ADJUSTABLE RODS, SPINDLES, AND THE LIKE. MONTAGUE STANLEY NAPIER, Cannes, France, and GEORGE SHAKESPEARE WILKINSON and HENRY CHRISTOPHER TRYON, London, England, assignors to D. Napier & Son Limited, London, England, a Company of Great Britain. Filed Sept. 3, 1925, Serial No. 54,342, and in Great Britain Dec. 23, 1924. 2 Claims. (Cl. 151—2.)

1. In a device for locking two screw-threaded parts of an adjustable rod in their position of adjustment, the combination of an externally screwthreaded part, a locking member normally in frictional engagement therewith, a tubular extension on said locking member having a plurality of internal splines of which the majority do not extend to the outer end of the collar, at least one spline extending beyond the rest, an internally screwthreaded part and a plurality of external splines formed around the end of said internally screwthreaded part adjacent the externally screwthreaded part, the majority of said external

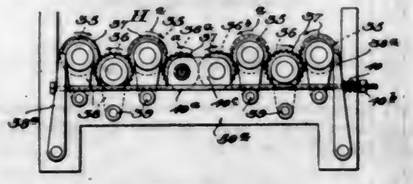


splines terminating short of the end of the internally screwthreaded member while at least one spline extends beyond the rest as set forth.

1,622,204. MAGNET FRAME FOR ELECTRIC MACHINES WITH SPLIT POLES. HERMANN PAPST, Vienna, Austria, assignor, by mesne assignments, to Francis B. Keane, Bridgeport, Conn. Filed May 25, 1926, Serial No. 111,587, and in Austria Mar. 18, 1925. 2 Claims. (Cl. 171—209.)

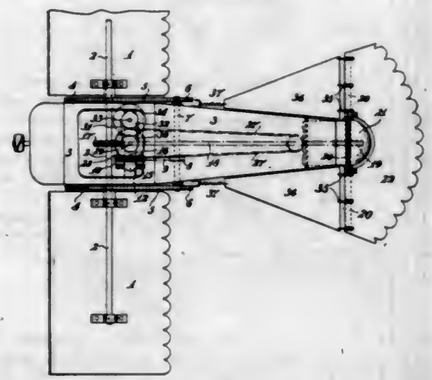
1. In a split pole dynamo electric machine having a field and a slotted armature, a plurality of split polar projections having their adjacent portions separated by pole gaps, each of said gaps having a width of substantially twice the width of the air gap separating said armature and field, and having at least a portion thereof disposed at an angle to the axis of said machine, whereby the sum of the partial fields fluctuating in counterphase about each of said gaps is maintained at a constant value, and whereby the armature flux is resolved into a single field surrounding each of said gaps.

1,622,205. FUSELAGE FOR AIRCRAFT. CHARLES L. PAULUS, Dayton, Ohio, and ROBERT KAUCH, U. S. Army, Camp Nichols, P. I. Filed Feb. 1, 1926. Serial No. 85,407. 9 Claims. (Cl. 244—30.)



9. In an aircraft, a fuselage comprising front and rear sections each of said sections being formed from four similarly shaped plates, rigid members for absorbing longitudinal stresses, the members for the front section extending longitudinally at diagonal points between the horizontal and vertical axial planes of the fuselage and on said axial planes in the rear section, means for connecting the front rigid members to the rear ones, and means whereby the front section may be easily dissembled from the rear section.

1,622,206. PRODUCTION OF PHOSPHORUS PENTOXIDE. GUSTAV PISTOR, Bitterfeld, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort, Germany. Filed Dec. 8, 1925, Serial No. 74,168, and in Germany Dec. 30, 1924. 2 Claims. (Cl. 23—165.)

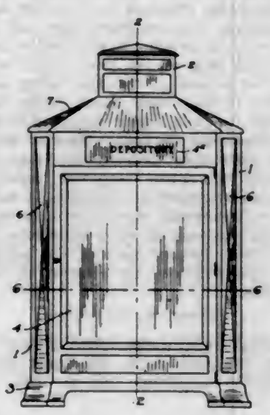


1. The method of making the combustion products of phosphorus and air non-corrosive upon metal vessels which consists in drying the air by means of phosphorus pentoxide obtained by a previous operation.

1,622,207. HUSKING UNIT. JOHN POWELL, Kokomo, Ind. Original application filed Mar. 27, 1925, Serial No. 18,718. Divided and this application filed May 19, 1926. Serial No. 110,239. 6 Claims. (Cl. 130—5.)

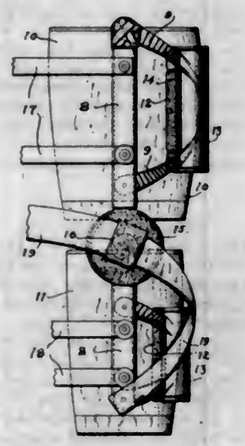
1. In a corn harvesting machine, a corn husking unit including a plurality of husking rolls, and a central pair of said rolls being mounted in a stationary position and rotated in opposite directions, and the rolls at each side of said central pair being pivotally mounted and alternately journaled in planes above and coincident with the axis of the central pair of rolls.

1,622,208. CONTROL OF AEROPLANES AND THE LIKE. THOMAS FREDERICK ROBERTS, Peckham, London, England. Filed Feb. 11, 1926, Serial No. 87,720, and in Great Britain Feb. 21, 1925. 1 Claim. (Cl. 244—29.)



In an aeroplane, the combination of a fuselage, transversely mounted tilting wings carried by the fuselage, a tail mounted transversely of the fuselage operable in unison with said wings, means for obtaining a rotary adjustment of said tail axially of said fuselage, and resilient connections between said tail and said fuselage.

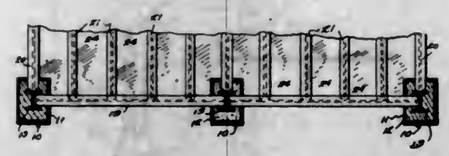
1,622,209. BORING AND REAMING TOOL. CHARLES B. ROBINSON, Wilmington, Ohio, assignor to The Irwin Auger Bit Company, Wilmington, Ohio, a Corporation of Ohio. Filed Feb. 27, 1925. Serial No. 11,945. 1 Claim. (Cl. 145—116.)



A boring and reaming bit comprising a body part, a shank at one end of the body part and a pointed screw-threaded tip at the other end of the body part, said body part being approximately cylindrical from its intermediate part to the shank and said body part being tapered from the cylindrical part to the screw-threaded tip with said tapered part having flattened sides to provide longitudinal cutting edges converging toward the screwthreaded tip.

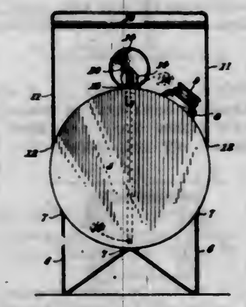
1,622,210. DEPOSITORY ADVERTISING CABINET OR THE LIKE. INGEMAR K. RYSTEDT, Dayton, Ohio, assignor of one-fourth to George K. Ander and one-fourth to A. H. Dunham. Filed Mar. 27, 1925, Serial No. 18,735. Renewed Jan. 12, 1927. 6 Claims. (Cl. 40—38.)

1. A depository for refuse including in combination with a stationary cabinet having open glass panels including a hinged panel, a structure supported rotatably in said cabinet including a hinged panel having means to support and display posters, as advertisements, through said stationary panels, a receptacle for refuse supported within said inner structure and removable upon opening of the hinged panels, and means, as a motor, for rotating the inner structure.



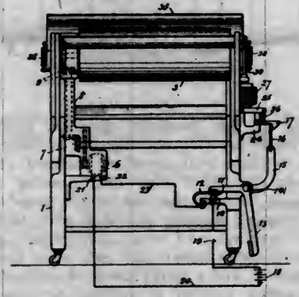
1,622,211. KNEE BRACE. FRANK SHEEHAN, Ithaca, N. Y. Filed Mar. 18, 1926. Serial No. 95,618. 5 Claims. (Cl. 2—22.)

1. A knee brace comprising two elastic bandages adapted to encompass the leg above and below the knee respectively, resilient flexible frame sections supported by the elastic bandages and pivotally connected at the sides



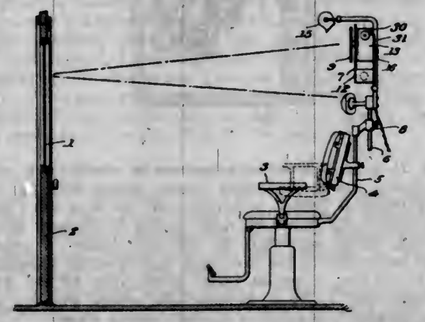
of the knee joint, and elastic means passing across the pivotal connections of the frame sections to draw the same into intimate contact with the opposite sides of the knee joint.

1,622,212. BUILDING CONSTRUCTION. GEORGE A. SHIELDS, Columbus, Ohio. Filed Dec. 12, 1925. Serial No. 75,114. 2 Claims. (Cl. 72—66.)



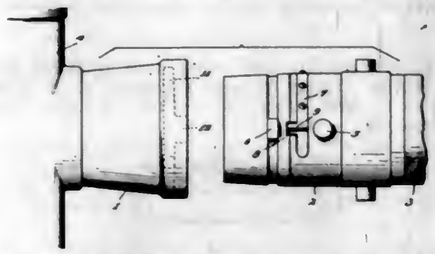
1. In a building construction, a plurality of columns each including a vertical metal beam, a plurality of preformed sheets of material surrounding said beam and spaced therefrom and a filler of concrete arranged in the space between said beam and said sheets, said beam, said sheets and said filler having their upper ends flush, a horizontal metal beam supported at each end upon the upper ends of each adjacent pair of columns, a plurality of relatively small I beams arranged parallel to and spaced from each other and supported by said horizontal beams, said I beams having lower horizontal flanges, a plurality of preformed sheets supported upon the flanges of said I beams, a filler of concrete filling the spaces between said I beams and supported upon said last named sheets, said last named filler extending upwardly beyond said I beams to provide a floor surface, and a second column arranged over each of said first named columns in vertical alinement therewith, the preformed sheets of said second named column having their lower edges terminating substantially flush with the upper surface of said second named filler whereby the latter will bond with the fillers of said columns.

1,622,213. LIQUID SPRAYER. FRANK T. STEWART and WALTER W. STEWART, Sacramento, Calif. Filed July 21, 1925. Serial No. 45,072. 1 Claim. (Cl. 299—89.)



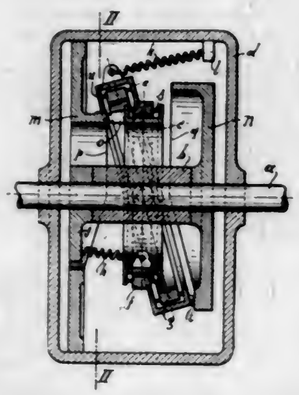
A liquid sprayer comprising a horizontal elongated tank provided with a filling opening, a tapered tubular open-ended manifold rigidly secured directly on top of the tank and extending longitudinally of and in contiguous relation to the tank from end to end of the latter, and an ejector tube extending through the bottom of the manifold and the top of the tank with its lower end terminating within the bottom portion of the tank and its upper end portion projecting forwardly in the forward end portion of the manifold and terminating adjacent the forward smaller end of the latter, said tank comprising a horizontal cylinder, and a supporting stand embodying a substantially W-shaped strip of sheet metal arranged transversely of and rigidly secured to the bottom of the tank.

1,622,214. GUARD AND STOP FOR IRONING MACHINES. HENRY TUCKER, Lakewood, N. J. Filed May 8, 1926. Serial No. 107,736. 1 Claim. (Cl. 192—130.)



In combination with an ironing machine having a roll and a shoe, an electric motor transmitting motion to the roll, a spring contact arm having a contact thereon, a fixed contact, said contacts included in an electric circuit with the motor and a source of electricity supply, a bell crank lever adapted when moved in one direction to bend the spring contact arm so as to swing the contacts together and close the circuit to the motor, an arm fixed to move with the bell crank lever, a pivoted catch engaging said arm and holding the parts in operative position, a guard supported on the shoe and projecting above the roll, an electromagnet adapted when energized to cause the catch to be moved to release the arm and permit the first-mentioned contacts to be separated by the movement of the spring contact arm, and circuit closing means included in circuit with the magnet and a source of electricity, said circuit closing means being operated by the upward movement of the guard.

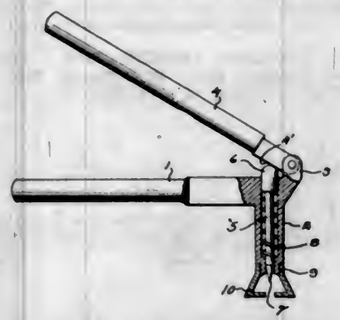
1,622,215. EYE-TESTING APPARATUS. THEODORE J. ARNESON, Baker, Oreg. Filed Jan. 26, 1925, Serial No. 4,898. Renewed Sept. 4, 1926. 1 Claim. (Cl. 88—20.)



In eye testing apparatus, the combination of supporting means, a motor on said supporting means, and a disk mounted for continuous rotation by the motor and having on its face an eccentric red dot and a colored letter E, with a chair on which the testing apparatus is supported and relative to which the testing apparatus is adjustable, and the apparatus being arranged to be observed with the aid of a mirror by a patient seated in the chair.

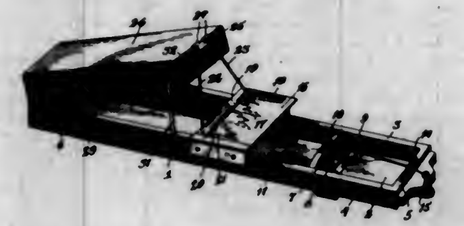
1,622,216. COUPLING. HERMAN ANLAUF and THOMAS J. WARHURST, San Antonio, Tex. Filed Nov. 4, 1925. Serial No. 66,779. 1 Claim. (Cl. 285—175.)

A coupling of the character specified, comprising a member having a tapering opening and an inner annular groove with its outer wall oppositely inclined, and having openings upon its inner side only leading from the annular groove through the end of the member, and a companion tapering member provided with lugs to pass through the openings and enter the annular groove of the first mentioned member and ride upon the inclined outer wall thereof, and a spring mounted circumferentially upon the tapering member in position to clear the end of the first mentioned member, and having a lateral extension to enter the tapering opening and provided with an outer rib to engage a groove in the inner wall of the first mentioned member to secure the members when coupled.



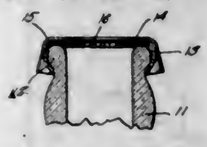
1,622,217. SPEED-REDUCING APPARATUS. ALFRED BARBIER, Courcelles, Belgium. Filed Feb. 16, 1926, Serial No. 88,616, and in Belgium Feb. 19, 1925. 6 Claims. (Cl. 74—14.)

1. In a speed reducing apparatus in combination with a driving shaft, a circular frame, means whereby the said frame is caused to rotate with the said shaft and to oscillate in planes at right angles to the said shaft, a ring freely supported by the said frame, a second ring concentric to the first ring and pivotally connected to the latter, a second frame acted upon by the said second ring, a driven member and means whereby the said member is rotated by the said second frame.



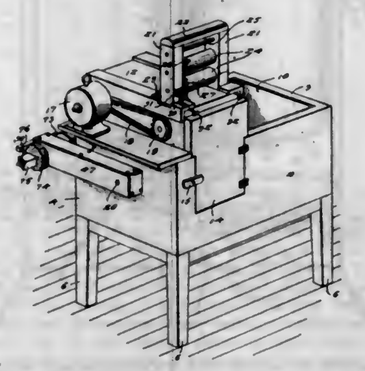
1,622,218. PULLING TOOL. WALTER J. BARNETT, Casper, Wyo. Filed May 19, 1926. Serial No. 110,292. 2 Claims. (Cl. 29—86.2.)

1. A tool of the class described comprising a pair of handles hingedly connected together, a cylinder connected with the lower handle and depending downwardly, a plunger carried by the cylinder and having its head projecting above the handle so that it will be engaged by the other handle, a spring for holding the plunger in



raised position and a pair of supporting members at the lower end of the cylinder spaced apart to permit the plunger to pass by them.

1,622,219. MUSICAL INSTRUMENT. WILLIAM BARTHOLOMAE, Brooklyn, N. Y. Filed Feb. 10, 1926. Serial No. 87,361. 3 Claims. (Cl. 84—173.)



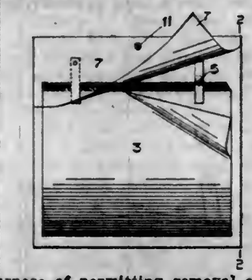
1. A musical instrument comprising a body, a tensioned vibratile member carried by the body acting to produce a sound when vibrated, a sound box hingedly connected with the body, a bridge connected with said sound box and normally resting on said vibratile member, and means for holding a card having music written thereon, and a guide and indicating member carried by the sound box and positioned to travel over said music as the sound box is swung back and forth.

1,622,220. BOTTLE CAP. ALBA C. BOOTH, Burlington, Vt., assignor of one-fourth to Frederick M. Coon, Burlington, Vt. Filed Jan. 16, 1926. Serial No. 81,789. 1 Claim. (Cl. 215—46.)

A bottle closure comprising a washer adapted to repose upon the mouth of the bottle and having a central opening, a crimped cap adapted to embrace the neck of the bottle and having a central opening coextensive with the opening in said washer, a disk of readily destructible material interposed between the cap and washer and clamped therebetween, and adapted to have its entire area equivalent to the size of the opening in the cap to be removed to provide an unobstructed passage for the contents of the bottle, and said openings in the cap and washer having diameters equal to the interior diameter of the neck of the bottle.

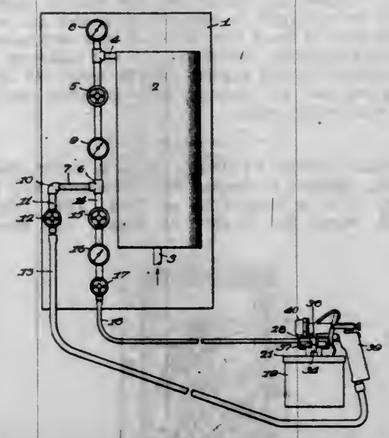
1,622,221. COMBINED CLOTHES AND DISH WASHING MACHINE. WILLIAM BROWN, Jere, and SAM MORANO, Morgantown, W. Va., assignors of one-sixth to John Maone, one-sixth to John Ferrise, one-sixth to Sam Sellaro, and one-sixth to Joseph Nuoto, Morgantown, W. Va. Filed Dec. 4, 1925. Serial No. 73,198. 1 Claim. (Cl. 68—15.)

In a machine of the type described, a casing, a vertical partition therein dividing the same into a tub and mechanism housing, a power shaft journaled in the housing, a shaft journaled in the lower end of the housing, driving connections between the shafts, a rod journaled in the casing and removable through an end wall thereof, said rod being supported at its ends in the end wall of the casing and partition wall, a detachable connection between one end of the rod and the lower shaft and a clothes washing device aplined on the rod.



1,622,222. IMPELLER. FRANK W. CALDWELL, Dayton, Ohio. Filed July 1, 1925. Serial No. 40,806. 7 Claims. (Cl. 170—159.)

1. In an impeller adapted to be driven by the medium in which it operates, a blade having a section in which the angle of substantially zero lift is constant regardless of the speed.

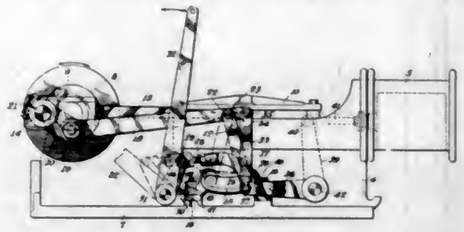


1,622,223. ADVERTISING MEDIUM. CHARLES HENRY HULLETT DESBARATS, Montreal, Quebec, Canada. Filed May 10, 1926. Serial No. 107,876. 1 Claim. (Cl. 40—119.)

An advertising medium of yearly calendar form consisting of leaves folded upon themselves in book form, a relatively stiff and heavier permanently flat mount substantially equal to the width and exceeds the height of the folded leaves, means binding the leaves together and binding them to the back at the lower end of and transversely to the latter; such binding means extending from the inside of the fold of the leaves to and through the mount; means carried by the upper end of the mount for readily releasably retaining the free edges of the leaves in upward position; such means consisting of flat springs and rivets fastening the same to the front of the mount; a relatively narrow flexible horizontal comparatively flat strip fastened at its upper end to the front upper end of the mount and adapted to cover and hide from view the top edges of the leaves and the leaf retaining flat springs

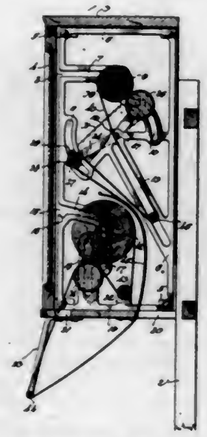
for the purpose of permitting removal of leaves without damage thereto and without disturbing the horizontal strip.

1,622,224. PAINTING APPARATUS. HENRY P. GALE, Chicago, Ill. Filed Nov. 2, 1925. Serial No. 66,137. 3 Claims. (Cl. 91—45.)



1. In a painting apparatus, the combination of a pressure supply, a paint container, an atomizing gun, a valveless fluid outlet pipe rigid with the gun, said gun and pipe being mounted in the cover of the container with the gun closely adjacent and directly upon the cover and the pipe extending down within the container close to the bottom thereof, a pressure conduit from the supply to the container, an independent pressure conduit from the supply to the gun, and independent means remote from the container and the gun for maintaining a greater degree of pressure in the gun than in the container.

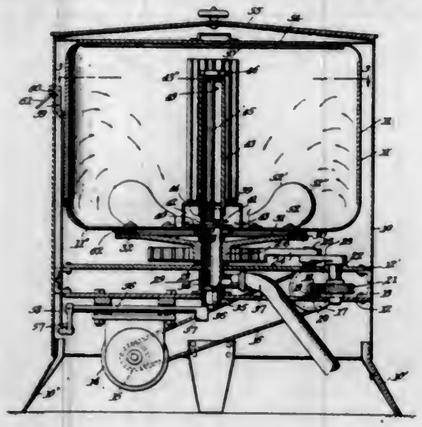
1,622,225. ENGINE. HU M. HARRIS, Chattanooga, Tenn., assignor to Lucey Manufacturing Corporation of Tennessee, Chattanooga, Tenn., a Corporation of Tennessee. Filed Nov. 10, 1925. Serial No. 68,069. 2 Claims. (Cl. 121—169.)



1. A stationary steam engine of the horizontal type comprising an engine bed, a cylinder mounted upon the bed at one end, a crank shaft journaled at the opposite end of the bed, cross head guides upon the bed between the cylinder at one end and the crank shaft at the opposite end, a valve actuating rock shaft journaled on the bed below the cylinder and beneath the cross head guides, a valve actuating rocker arm projecting upwardly from said rock shaft and an operating arm projecting laterally from said rock shaft away from the cylinder, a reversing

shaft journaled on the bed plate in front of the rock shaft, a slotted reverse link mounted on the bed and between the rock shaft and reversing shaft with the concave side of the slot therein faced upwardly, an auxiliary crank fixed on the main crank, an auxiliary connecting rod engaged at one end with said auxiliary crank, a radius link having its lower end shiftably pivoted in the slot of the reverse link and carrying at its upper end a fulcrum for the auxiliary connecting rod, a connecting

link suspended from the auxiliary connecting rod and having its upper end pivoted to the end of said connecting rod at a point beyond the fulcrum of said rod and its lower end pivotally engaged with the laterally extending arm of the rock shaft, an upwardly projecting arm on the reverse shaft, a reach link extending from said upwardly projecting arm over the reverse link and connected with the shiftable pivotal support for the lower end of the radius link and an operating lever extending upwardly from said reverse shaft.

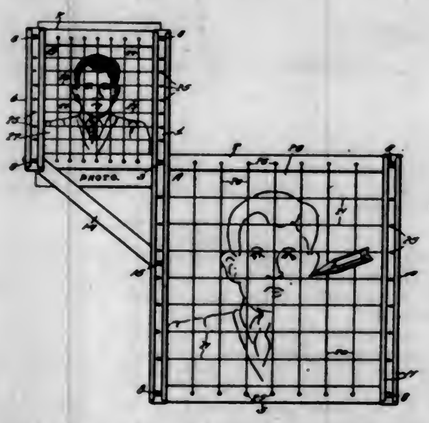


1,622,226. TOWEL CABINET. KARL M. LEUTE, Detroit, Mich., assignor to Steiner Sales Company, Salt Lake City, Utah, a Corporation of Utah. Filed July 14, 1923. Serial No. 651,451. 10 Claims. (Cl. 45—32.)

7. A towel cabinet having a roll of soiled toweling therein, a feed roll contacting with said toweling, the cabinet also having a supply of clean toweling, a feed roll contacting with said clean toweling, means to operate simultaneously the soiled and clean feed rolls, and means becoming operative after the user has released his hold on the towel to draw the soiled portion of the towel up into the cabinet.

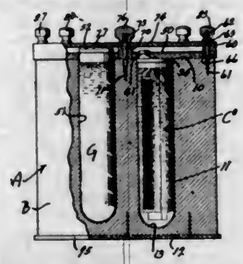
1,622,227. WASHING MACHINE. CHARLES LICHTERMAN, Pittston, Pa. Filed Jan. 22, 1927. Serial No. 162,793. 14 Claims. (Cl. 259—75.)

14. A washing machine comprising a substantially vertically disposed cylindrical tub having a substantially uninterrupted inner periphery and oscillatable about a substantially vertical axis, power driven means to oscillate the tub about said axis, and liquid deflecting means to deflect the liquid in the tub outwardly and upwardly dur-



ing oscillation thereof, said deflecting means being rigid with and on the bottom of the tub, and being spaced from the inner periphery thereof.

1,622,228. PROCESS OF MAKING ORGANIC LEAD COMPOUNDS. THOMAS MIDGLEY, Jr., Dayton, Ohio, assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed May 19, 1923. Serial No. 640,275. 23 Claims. (Cl. 260—11.)

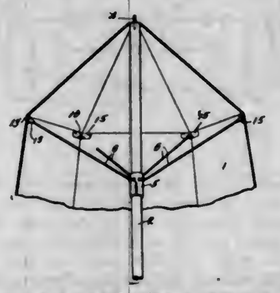


1. The process of producing a hydrocarbon compound of lead which comprises mixing the lead with a hydrocarbon compound of a halogen; and reducing with nascent hydrogen the reaction mass thus formed in the presence of a catalyst.

1,622,229. DRAWING APPARATUS. PERLEY L. ORMISTON, Portland, Oreg. Filed Dec. 23, 1925. Serial No. 77,178. 4 Claims. (Cl. 33—1.)

1. A drawing apparatus, consisting in a rectangular frame enclosing two areas of unequal dimensions, and a plurality of filaments secured to said frame extending over each said area in equal number in oppositely transverse directions providing rectangular corresponding spaces between the filaments of the two areas of equal number and of unequal dimensions.

1,622,230. STORAGE BATTERY. GEORGE W. POILLON, Tarrytown, N. Y. Filed Feb. 19, 1925. Serial No. 10,357. 8 Claims. (Cl. 136—6.)

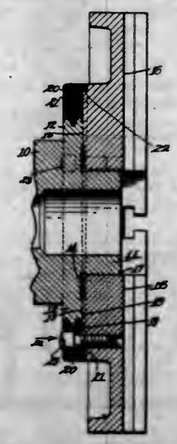


1. In a storage battery the combination of a casing providing a plurality of pockets therein, cells for said pockets each including positive and negative plates and including a dilatable projection having a vent duct therein which may be expanded upon insertion of a proper instrument, said cells when inserted in their pockets having said dilatable projections extending upwardly above the top surface of said casing, sealing material upon the top of said casing covering said cells below said dilatable projections and whereby the vent ducts are extended above said sealing material, means connecting the positive and negative plates of the cells so that the latter are in series, and terminal post means for the storage battery.

1,622,231. IMPLEMENT TONGUE. CHARLES H. RAND, Cheyenne, Wyo. Filed Oct. 3, 1923. Serial No. 666,850. 1 Claim. (Cl. 278—38.)

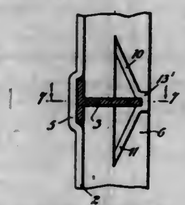
A telescopic vehicle tongue comprising a tongue proper, formed as a tube, a straight yoke receiving extension rod slidable in said tube, a head on one end of said rod having means for connecting it pivotally to the yoke, a flange on the other end of said rod fitting snugly and slidably in said tube, an annular stop member fixed in said tube and spaced from one end thereof and adapted to contact with said flange to prevent removal of said rod from said tube, and a second annular stop member fixed in the end of said tube and adapted to contact with said head to limit the movement of said rod inwardly in said tube.

1,622,232. TENT SUPPORT. BLOOMFIELD H. BROOKS, Denver, Colo. Filed Apr. 26, 1921. Serial No. 464,734. 2 Claims. (Cl. 135—2.)



1. In a polygonal tent having a cover, a supporting member, and a plurality of tension arms pivotally related to the supporting member, a ferrule seated on the end of an arm and having a reduced end part, and an angular guard member adapted to conform with an angle of the tent cover and to be secured thereto, said guard having an orifice at its bend adapted to receive the reduced end part of the ferrule.

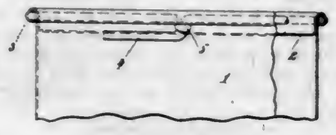
1,622,233. PROCESS OF PRODUCING ALKYL COMPOUND OF LEAD. GEORGE CALINGAERT, Cambridge, Mass., assignor, by mesne assignments, to General Motors Corporation, Detroit, Mich., a Corporation of Delaware. Filed Jan. 17, 1924, Serial No. 686,924. Renewed Nov. 7, 1925. 3 Claims. (Cl. 260—11.)



3. The process of producing tetra ethyl lead which comprises mixing lead, sodium and an ethyl halide; adding water at a rate less than that at which the hydrogen liberator is used, the amount of water added being at least 33% of the theoretical amount; and regenerating water which reacts with the sodium to liberate hydrogen.

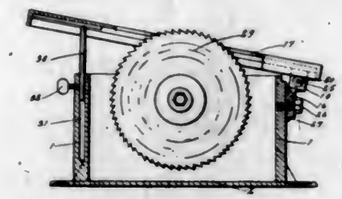
1,622,234. SPINDLE ATTACHMENT. ALDEN M. DRAKE, Greenfield, Mass., assignor to Greenfield Tap and Die Corporation, Greenfield, Mass., a Corporation of Massachusetts. Filed Apr. 24, 1925. Serial No. 25,720. 3 Claims. (Cl. 287—53.)

1. In a machine, a rotatable spindle having a relatively thin externally threaded end flange portion of substantially larger diameter than said spindle, an attachment for said spindle, an internally threaded ring of corresponding thinness and diameter detachably secured to said attachment and loosely fitting the threaded end portion of said spindle to permit slight relative adjustment of the parts, and additional means to accurately center said attachment on said spindle.



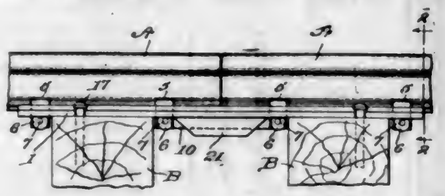
1,622,235. CROSS-JOINTED METAL BAR. STEPHEN J. GUARNERI, now, by judicial change of name, Stephen J. Gary, New York, N. Y., assignor of one-half to John E. Lewis, New York, N. Y. Filed Mar. 18, 1925. Serial No. 16,450. 9 Claims. (Cl. 287—51.)

8. In a cross joint for metal bars, a bar perforated between its edges to permit insertion therethrough of a cross bar, the material of said fire bar adjacent the



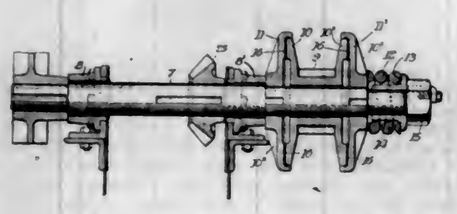
perforation being laterally displaced and formed to engage the second bar laterally of said first bar to effect bracing of said bars by material displaced out of normal position.

1,622,236. EASY OPEN CONTAINER. JAMES E. GUNTER, Baltimore, Md., assignor to The James E. Gunter Corporation, a Corporation of Maryland. Filed Mar. 31, 1925, Serial No. 19,637. Renewed Aug. 3, 1926. 20 Claims. (Cl. 220—43.)



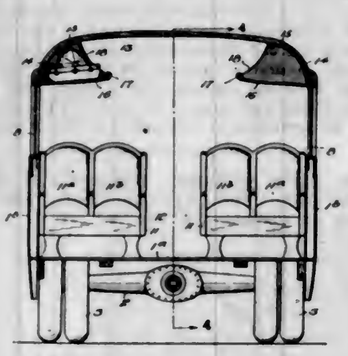
1. In combination, a container, a cap thereon, a rigid retaining ring with a projecting handle, said retaining ring being between and bearing upon said container and cap at points displaced cross-sectionally more than 180 degrees and firmly retaining the latter in place, said projecting handle having a thickness between the container and cap at the point where it projects from said container and cap less than that of the retaining ring between its opposite bearing surfaces between the container and cap, whereby said ring is unobstructedly held in between said container and cap.

1,622,237. POWER SAW. RALPH M. KENNEDY, Philadelphia, Pa. Filed Dec. 8, 1924. Serial No. 754,550. 6 Claims. (Cl. 143—132.)



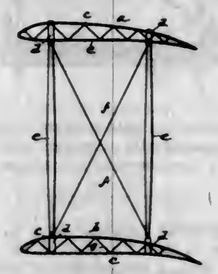
1. A power sawing machine, comprising a supporting frame, a work table, a quadrant member connecting the table with the frame and adapted to function as a hinge connection to permit inclining the table in the direction of its length, also to permit said table being inclined transversely, means to hold the table in its longitudinal elevation, means carried by the frame and cooperating with the quadrant for locking the table in the desired transverse position, and a saw spindle, rotatably supported on said frame.

1,622,238. RAIL JOINT. STEVE MYERS, Ruffsdale, Pa. Filed Nov. 22, 1926. Serial No. 150,073. 7 Claims. (Cl. 238—210.)



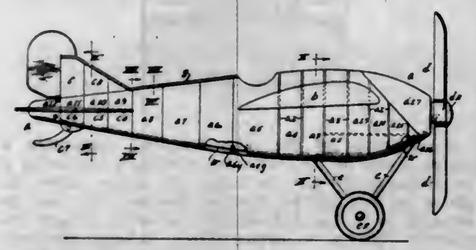
1. In combination with a pair of rails having depending perforated lugs adjacent their abutting ends, a seat forming plate for the rails having pairs of depending perforated lugs, each pair of lugs on the plate being in register with a lug on a rail, the plate being provided with openings through which the lugs on the rails extend and pins passing through the lugs for connecting the rail to the plate.

1,622,239. DIPPER-OPERATING MECHANISM FOR EXCAVATING MACHINES. PHILO A. ORTON, Chicago, Ill., assignor to Orton Crane & Shovel Company, Huntington, Ind., a Corporation of Indiana. Filed June 28, 1924. Serial No. 722,891. 1 Claim. (Cl. 214—135.)



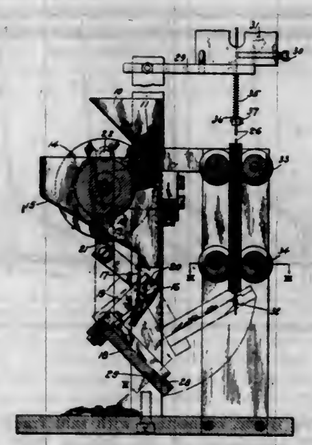
Operating mechanism for shovels of the type specified, comprising in combination, a shaft adapted to be rotated continuously in operation by driving connection with a prime mover, dipper supporting and actuating means, and transmission means connecting said driven shaft and dipper supporting and actuating means, comprising manually controlled friction clutches on said driven shaft, and a slip-friction transmission device applied intermediate said clutches and the dipper supporting and actuating means.

1,622,240. VEHICLE. EDWARD J. STAHL, Cleveland, Ohio, assignor to The Baker-Raulang Company, Cleveland, Ohio, a Corporation of Ohio. Filed Dec. 5, 1925. Serial No. 73,433. 2 Claims. (Cl. 296—37.)



1. A closed vehicle for passengers and luggage comprising a body having a flooring, sides and a substantially flat roof forming a top for the body, seats on and covering a major portion of said flooring, said seats being correlated to form a central aisle on said flooring extending throughout a greater portion thereof, substantially continuous, horizontal walls, disposed in spaced relation to said top and each connected along its outer edge to the adjacent body side and extending inwardly therefrom to form a support and storing space for luggage, and a continuous, unobstructed bar carried on the inner longitudinal edge of each said supporting wall and forming a combined gripping and guiding rail and an abutment to prevent displacement of luggage on said support, said supporting walls extending inwardly over said seats and in relation to said aisle, whereby the bars carried thereby are designedly positioned for gripping by the passengers standing or moving through said aisle and permitting head room between the storing spaces.

1,622,241. AIRPLANE. CECIL HAMELIN TAYLOR and BOUDEWIJN B. NEUTEBOOM, Detroit, Mich. Filed Jan. 21, 1918, Serial No. 212,885. Renewed Feb. 1, 1922. Serial No. 533,396. 2 Claims. (Cl. 244—31.)



2. An airplane wing made of rigid sheet material fashioned into a comparatively flat hollow body, a filling piece extending through the wing transverse of the line of flight and composed of rigid sheet material corrugated so as to have straight line elements running lengthwise of the wing, and a bearing strip fitting against the inner surface of the wing and provided with a seat fitting one end of the corrugation in the filling piece.

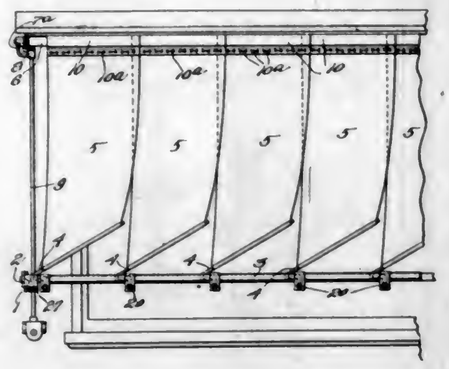
1,622,242. AEROPLANE. CECIL HAMELIN TAYLOR and BOUDEWIJN B. NEUTEBOOM, Detroit, Mich. Filed Oct. 15, 1921. Serial No. 507,848. 13 Claims. (Cl. 244—30.)

2. An aircraft body composed of annular sections secured together axially in line with each other, said sections being turned at right angles at their edges to form securing flanges, one rod or more extending through said flanges and means whereby said rod is caused to bind said sections together.

1,622,243. HEEL-WASHER-STACKING MACHINE. GEORGE G. ANDREWS, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Aug. 7, 1924. Serial No. 730,583. 15 Claims. (Cl. 209—72.)

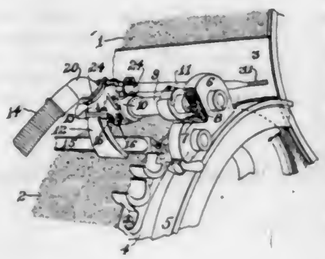
1. A washer stringing machine comprising an inclined plate having washer engaging pockets, a wire for impaling the washers, and means for causing relative movement between the plate and the wire for impaling the washers on said wire.

1,622,244. ELECTRIC AUTOCONDENSATION PAD. WILLIAM R. BECKLEY, Omaha, Nebr., assignor to Ethel Pope Beckley, Omaha, Nebr. Filed Dec. 24, 1925. Serial No. 77,426. 2 Claims. (Cl. 174—89.)



1. In a pad of the class described, a flexible container, a flexible spacing-member disposed within with its sides and ends engaging the container, an attenuated, metallic sheet disposed upon and having a lesser area in plan than the spacing-member, a plurality of paper sheets disposed on the metallic sheet with their edges engaging the container, a yielding filler-member on the paper sheets, keepers traversing the spacing-member and metallic sheet for maintaining said metallic sheet with its edges disposed inwardly of the sides and ends of the spacing-member, said attenuated sheet being elastic to normally cause the pad to assume a rectilinear position but permitting the pad to be rolled into bundle form.

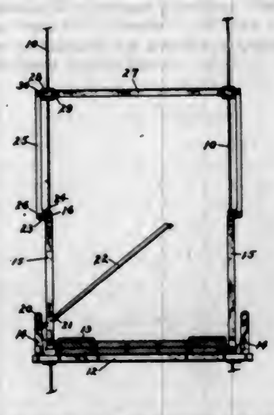
1,622,245. AWNING. ELMER J. BLISS, Boston, Mass., assignor to Regal Shoe Company, Whitman, Mass., a Corporation of Massachusetts. Filed Apr. 27, 1925. Serial No. 26,038. 12 Claims. (Cl. 156—44.)



1. An awning embracing in its construction an upper winding roller mounted in stationary bearings, a lower

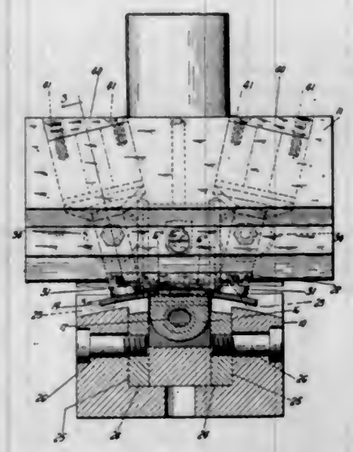
U-shaped frame adapted to swing up and down, a series of individual narrow awning strips connected at their upper and lower ends respectively with said roller and

said swinging frame, connection with said frame permitting angular adjustment of the awning strips to said frame.



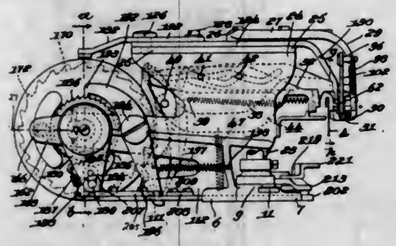
1,622,246. VACUUM STRIPPER FOR CARDING ENGINES. ERNEST CLARK, Abington, Mass., assignor to Abington Textile Machinery Works, Boston, Mass., a Trust of Massachusetts. Filed Jan. 30, 1925. Serial No. 5,748. 2 Claims. (Cl. 19—109.)

1. A vacuum-stripper attachment for carding engines, comprising, in combination, a traversing carriage having a positioning and guiding face, a suction-box having adjustment slots and a face adapted to fit against said positioning and guiding face, a suction-nozzle combined with said suction-box, and screws occupying said slots for holding said faces clamped together with capacity for adjustment of the suction-box to locate the mouth of the nozzle at the required working distance from the face of the card-clothing of the cylinder which is to be stripped.



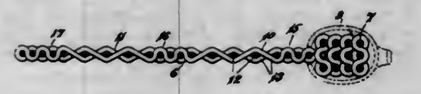
1,622,247. SCAFFOLD HOIST. WALTON C. FERRIS, Lincoln, Nebr., assignor to National Manufacturing Company Inc., Lincoln, Nebr., a Corporation of Nebraska. Filed Mar. 16, 1926. Serial No. 95,077. 6 Claims. (Cl. 304—18.)

1. A scaffold hoist including a platform and a support therefor, said support being adapted to be suspended from an outrigger on a building structure, a hook projecting upwardly from said platform, means consisting of a rigid lever adapted to engage said support and said hook



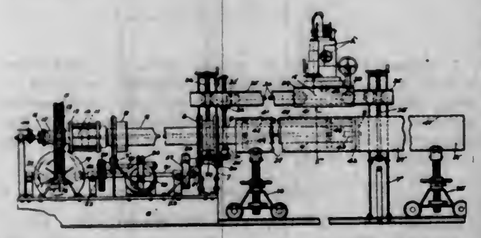
to raise said platform on said support, and means on said platform for automatically engaging said support when the platform has been elevated a predetermined distance.

1,622,248. RIVETING PRESS. MAX O. KUHN, Akron, Ohio, assignor to The Firestone Steel Products Company, Akron, Ohio, a Corporation of Ohio. Filed Apr. 24, 1925. Serial No. 25,488. 4 Claims. (Cl. 78—49.)



1. Apparatus of the class described, comprising a platen, means on the platen for receiving a lug having a rivet thereon so that the latter will project above the platen in such manner that an apertured rim may be mounted on the lug with the rivet extending through the aperture therein, a second platen movable relatively toward and from the first platen, elements on the second platen for engaging the rim and pressing it onto the lug, said elements being directed radially of the rim, yielding pads of resilient material backing said elements and mounted in said second platen so as to flow laterally under compression, and a plunger rigidly carried by the second platen adapted to engage and flatten said rivet, said elements and said plunger being adapted respectively to engage said rim and said rivet at points closely adjacent each other in the order named as the second platen moves toward the first platen.

1,622,249. FEED MECHANISM FOR KNITTING MACHINES. MAX C. MILLER, Cumberland Hill, R. I., assignor, by direct and mesne assignments, of two-thirds to Rudolph H. Wyner, Boston, Mass., and one-third to Herman T. Gammons, Natick, Mass. Filed Aug. 3, 1921. Serial No. 489,441. 35 Claims. (Cl. 66—139.)

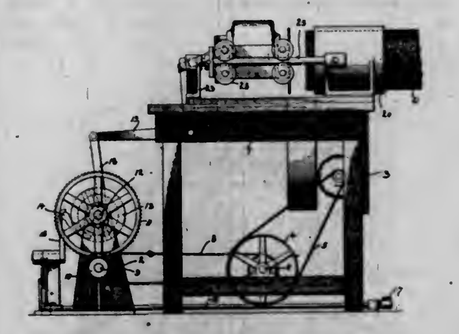


1. A circular knitting machine comprising a row of relatively fixed needles, means for continuously moving said row of needles in a predetermined path while maintaining their tops in a predetermined plane, and a yarn guide movable from idle position at one side of the needle row and below the plane of the tops of the needles to a yarn feeding position upon the other side of the needle row and also below said plane.

1,622,250. FABRIC. HAROLD J. MOORE, Middletown, Conn., assignor to The Russell Manufacturing Company, Middletown, Conn., a Corporation of Connecticut. Filed May 15, 1925. Serial No. 30,547. 3 Claims. (Cl. 24—205.)

3. A bordering strip comprising a fabric having a thickened edge, a plurality of loosely formed sections located back of said thickened edge and separated by stiffer supporting sections, a mechanical closing device slidable in a direction lengthwise of said edge and a guiding member at said edge and upon which said closing device rides.

1,622,251. ELECTRIC-ARC-WELDING MACHINE. VICTOR A. NELSON, Portland, Oreg. Filed Dec. 1, 1922. Serial No. 604,178. 16 Claims. (Cl. 219—8.)

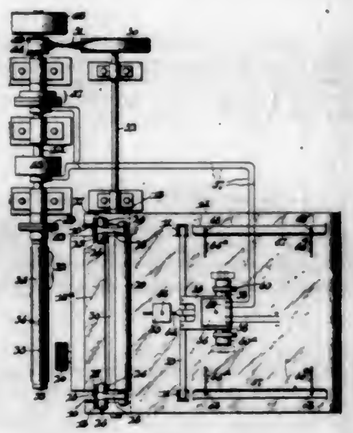


1. In a machine of the character described, a work holding revoluble mandrel, a segmental expansible head portion for said mandrel; fluid piston means for operating said expansible head, means of the character described for revolving said mandrel in either direction selectively by increments in combination with an adjustable carriage for a welding means whereby a cylindrical shaped piece of work may have a seam thereof presented progressively to said welding means.

1,622,252. DEVICE FOR TESTING INFLATABLE ARTICLES. MAX H. PADE, Akron, Ohio, assignor to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Apr. 15, 1925. Serial No. 23,404. 10 Claims. (Cl. 73—51.)

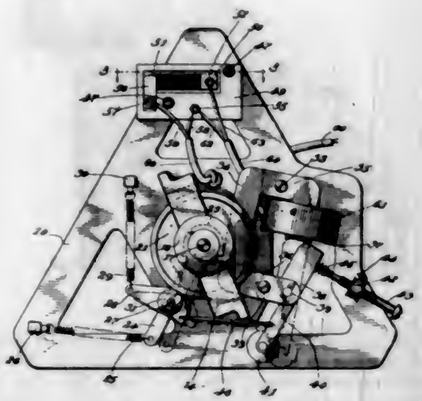
1. Apparatus for testing inflatable articles comprising a tank for a liquid, conveyor mechanism for loosely supporting the articles and carrying them into and from the tank, and means over said conveyor mechanism in the tank for depressing the articles below the surface of the liquid.

1,622,253. MACHINE FOR CUTTING FAN BELTS OR THE LIKE. EDWARD D. PUTT and HORACE D. STEVENS, Akron, Ohio, assignors to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Apr. 2, 1923. Serial No. 629,347. 19 Claims. (Cl. 164—61.)



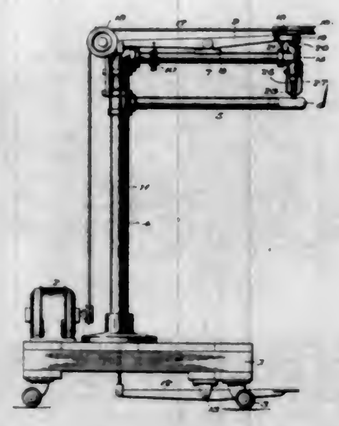
1. In a machine for cutting belts or the like, a holder for supporting an uncut cylinder so as to be fed thereon, a reciprocating carriage movable toward and from the holder, and a rotary knife supported on said carriage.

1,622,254. AUTOMATIC WINDING AND MEASURING MACHINE. GEORGE RITTER, Perth Amboy, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa., a Corporation of West Virginia. Filed Feb. 11, 1922. Serial No. 535,944. 12 Claims. (Cl. 33—136.)



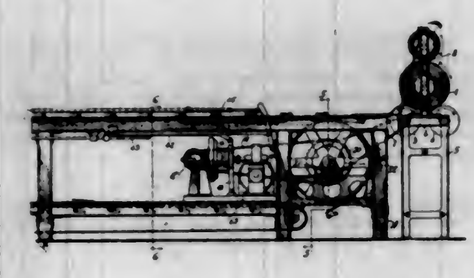
1. In an automatic winding and measuring machine for sheet material, the combination of an inclined table over which the material is progressed for measurement, a continuously operating driving means, a collapsible mandrel contiguous one edge of the inclined table, means for coupling the mandrel and driving means to wind the material to form a roll, means supported on the table

and controllable by the passage of the material thereover to uncouple the winding mandrel and driving means after a desired length of material has been rolled, and braking means between the mandrel and driving means adapted



to absorb the energy of rotation of said mandrel in bringing the same to a quick stop substantially simultaneous with the act of uncoupling from the driving means.

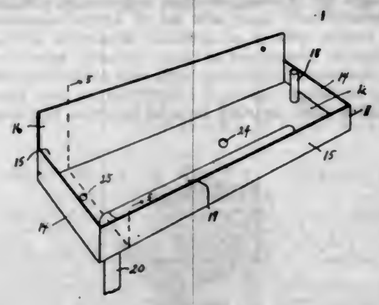
1,622,255. MAGNETIC MOTOR. JOHN G. RUCKELSHAUS, Newark, N. J. Filed June 11, 1926. Serial No. 115,176. 4 Claims. (Cl. 172—126.)



1. A magnetic motor comprising a base having a standard, a vertical spindle rotatable therein, a turntable carried by the spindle, a disc fixed to the spindle, an arm journalled on the spindle, a cam plate pivoted on said arm, an eccentric roll on said plate, resilient means to swing said arm in one direction, means to oscillate said cam plate to cause said roll to engage the periphery of said disc when said arm is moved by said resilient means, an electro-magnet, a pivoted armature drawn by said magnet in a direction opposite to that in which said resilient means acts, said armature being connected to said plate, and means for periodically interrupting current to said magnet.

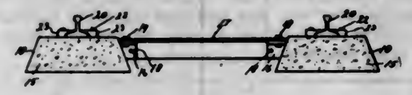
1,622,256. VALVE-HOLE-PUNCHING MACHINE FOR INNER TUBES. HORACE D. STEVENS, Akron, Ohio, assignor to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed June 12, 1922. Serial No. 567,563. 4 Claims. (Cl. 164—97.)

1. An apparatus for punching valve stem holes in inner tubes comprising an elongated arm adapted to receive an inner tube thereover, an imperforate anvil on the end of said arm, a rotary punch above the anvil, and means to depress the punch.



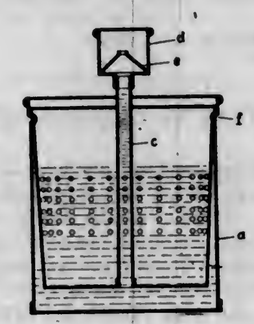
1,622,257. TUBE STOCK CUTTING APPARATUS. HORACE D. STEVENS, Akron, Ohio, assignor to The Firestone Tire and Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Oct. 25, 1923. Serial No. 670,650. 18 Claims. (Cl. 164—78.)

1. Apparatus for use in cutting strips to length from a reel of material comprising, a traveling conveyor, a stock rack located adjacent the conveyor, and means arranged to press the leading end of the stock against the surface of the conveyor to facilitate withdrawal of the stock from the rack by said conveyor.



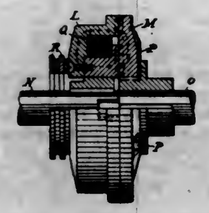
1,622,258. OIL PAN FOR SEWING MACHINES. ISAAC FELDMAN, Philadelphia, Pa. Filed May 23, 1925. Serial No. 32,294. 4 Claims. (Cl. 184—106.)

1. In an oil pan for sewing machines, the combination with a supporting member and a machine, of a pan resting on the supporting member and in which the machine is set, an outlet pipe connected with said pan and passing through the supporting member, a stand pipe



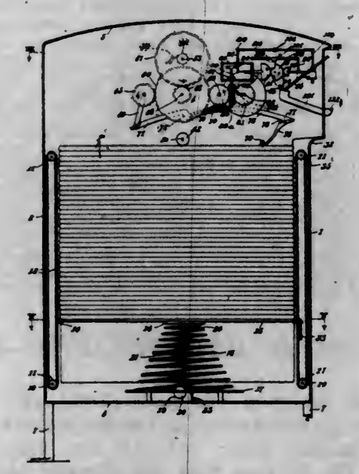
within the pan through which a portion of the machine passes, and means to fasten the machine to the tray and thereby clamp the pan in position.

1,622,259. CONCRETE RAILROAD TIE. HARVEY J. LIPMAN, Creamery, Pa. Filed June 10, 1926. Serial No. 114,926. 3 Claims. (Cl. 238—115.)



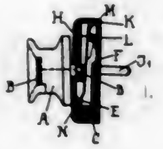
1. A railway tie comprising two composite support blocks and a reach rod for spacing said blocks apart and securing them together, each of said composite blocks consisting of a supporting beam, a series of supporting rods, the ends of which latter are secured to the head of said beam, said rods extending beneath the base of said beam, cables surrounding the supporting rods, reenforcing rods upon which the lower portion of the supporting rods are seated, all of said parts being embedded in a suitable plastic material; and a clip secured to the web of the supporting beam and projecting beyond the plastic material for attachment to the reach rod.

1,622,260. LINEN BOILER. ROBERT MERTENS, Olpe, Germany, assignor to Industriebedarf G. m. b. H., Weidenau-Sieg, Germany, a Company. Filed Aug. 20, 1925, Serial No. 51,472, and in Germany Aug. 23, 1924. 1 Claim. (Cl. 68—30.)



A linen boiler comprising in combination an outer boiler vessel, an inner vessel removably inserted in said outer vessel and having a perforated wall and bottom plate, an ascending tube open at both ends fixed on the centre of the bottom plate of the inner vessel having a perforated middle portion and projecting over the lid of the boiler, a condenser vessel on the top end of said ascending tube, and an overflow in the shape of an inverted funnel on the bottom plate of said condenser to collect the dirt from the water of condensation.

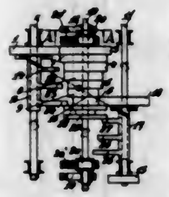
1,622,261. ELECTROMAGNETIC CLUTCH. CLARENCE Q. PAYNE, New York, N. Y. Filed Dec. 12, 1925. Serial No. 74,940. 13 Claims. (Cl. 192—84.)



1. An electromagnetic engaging device comprising an armature and an electromagnet whose polar surfaces are greater in area than the combined cross-sectional core areas of said electromagnet, both of said engaging members having contact surfaces provided with grooves disposed with relation to each other to resist sliding along the plane of contact by the "Isthmus method" of the arrangement of the lines of force thereon, and means for bringing said grooved surfaces into and out of direct contact engagement with each other.

1,622,262. NEWSPAPER-DISPENSING MACHINE. METRO J. KINDRAT and HAWRYIL ZATZERKOWNY, Detroit, Mich. Filed Mar. 7, 1925. Serial No. 13,735. 22 Claims. (Cl. 211—8.)

1. In a newspaper dispensing machine, a casing having a delivery opening therein, a vertically moving paper supporting platform in the casing, means for elevating the platform including endless sprocket chains, spring rollers for the upper ends of the chains, connections between the rollers including a gear train and brake drum, and a brake shoe for the drum operated by the stack of papers to hold the spring rollers against movement.



1,622,263. ELECTRIC CIGAR LIGHTER. ALFRED SCHOELLER, Frankfort-on-the-Main, Germany. Filed May 6, 1926, Serial No. 107,083, and in Germany July 6, 1925. 1 Claim. (Cl. 219—32.)

Electric cigar lighter comprising in combination, a contact casing, a blade spring in said contact casing, a holder yieldably mounted in said casing opposite said contact spring, a carrier in said holder, a heating wire in said carrier, a contact coating in said casing, and a contact spring connected with said blade spring for said holder and having a contact pin opposite said contact coating so that said holder has to be tipped, turned or placed on edge for closing the circuit for the heating wire.

1,622,264. CHANGE-SPUR GEARING. MAX STRBIT, Breslau, Germany. Filed Sept. 27, 1926, Serial No. 138,024, and in Germany Mar. 15, 1926. 2 Claims. (Cl. 74—58.)

1. A change spur gearing especially for motor driven vehicles, comprising in combination a stationary driving shaft, a driving wheel shiftable on said shaft in axial direction, an intermediate shaft shiftable in lateral directions, a set of wheels forming one element mounted on said intermediate shaft said set of wheels consisting of three coaxial wheels of different diameters serving as transmission wheels and of three eccentric wheels of different diameters alternating with said coaxial wheels and serving as change wheels, a driven shaft, a spur wheel on said driven shaft shiftable in axial direction and designed

to come into gear with any of said coaxial wheels, a two-armed lever for shifting said driving wheel and said driven wheel in opposite directions on their respective shafts to change from the first to the second, third or fourth speed and inversely, transverse guides for the bearings of said intermediate shaft, a pinion on each end of said intermediate shaft, transverse racks one for each pinion meshing with said rack, and means for controlling the lateral displacement of said intermediate shaft at the speed changing.

Patents Nos. 1,622,265 to 1,623,084.

THE
OFFICIAL GAZETTE
OF THE
United States Patent Office.

Vol. 356—No. 5. TUESDAY, MARCH 29, 1927. Price—$10 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; single numbers, 25 cents each.
PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.
CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

Transfer of Examiner.

(ORDER No. 2,999.)

U. S. PATENT OFFICE, *Washington, Mar. 10, 1927.*

Associate Examiner Vernon I. Richard is hereby transferred to Division 55, to be Acting Examiner in charge thereof, effective March 15, 1927.

THOMAS E. ROBERTSON,
Commissioner.

Changes in Classification.

Order No. 3,000, March 11, 1927, directs:

In *class 33, Geometrical Instruments* (Division 36), establish the following subclass and definition, the patents contained in this subclass having been taken for the most part from class 33, subclass 46, Light-ray type:

Light-ray type
46.5 Aircraft type.

46.5. LIGHT-RAY TYPE, AIRCRAFT TYPE. Sighting and direction-finding methods and devices (frequently for bomb dropping) combined with means for positioning the sight line in accordance with altitude, ground speed, etc., or wherein indicating means is controlled by angular movement of the sighting means as it is kept trained on the target; also ground-speed indicators wherein angular movement of a sight, trained on a target, is employed in connection with an altitude setting to give average ground speed.

Search this class, subclass 20.
Search Classes—
33—Optics.
235—Registers, subclass 61.5, Calculators, Ordnance control data.

In *class 184, Lubrication* (Division 45), establish the following subclass and definition, the patents contained in this subclass having been taken from classes 74, Machine Elements; 103, Pumps; 141, Washing Apparatus; 184, Lubrication; and 221, Dispensing:

1.5. Automobile crank and gear case service.

1.5. AUTOMOBILE CRANK AND GEAR CASE SERVICE. Devices having means for emptying, cleaning by flushing, and replenishing the oil in the crank case, transmission case, or differential casing of an automobile.

Note.—This subclass will take devices adapted to perform any one of the above functions alone, unless the device (if for emptying or replenishing) is one which could be used for dispensing or emptying for any purpose. In these instances classification might be in either class 221, DISPENSING, or class 103, PUMPS, respectively. Devices showing cleaning alone will be found in this class (184) if alleged to be for an automobile crank case, etc. Possible analogous art, involving cleaning, where the thing cleaned is other than a crank case, etc., will be found in class 141, WASHING APPARATUS.

NOTICE—CHANGES IN PATENT OFFICE FEES—EFFECTIVE APRIL 14, 1927.

The act of Congress approved February 14, 1927, amends section 4934, Revised Statutes, so as to provide (except in design cases) a fee on filing each original application for a patent of $20 and of $1 for each claim in excess of twenty, and on issuing each original patent, of $20 and of $1 for each claim in excess of twenty.

The new rates are effective in connection with all applications filed on or after April 14, 1927, and all final fees paid on or after that date.

In every case which contains more than twenty claims, the payment after April 13, 1927, of a final fee of $20, or less than $20 plus $1 for each claim in excess of twenty, will not save the case from forfeiture.

Condition of Applications Under Examination at Close of Business March 18, 1927.

Room No.	(Total number of applications awaiting action, excluding Trade-Mark Division, 56,120; Trade-Mark Division, 1,864. Oldest new case, Aug. 5, 1926; oldest amended, Aug. 2, 1926. The dates given are 1926 except where † indicates 1927.) DIVISIONS, EXAMINERS, AND SUBJECTS OF INVENTIONS.	Oldest new application and oldest action by applicant awaiting office action. New.	Amended. DECISIONS IN PATENT AND TRADE-MARK CASES.

Commissioner's Decision.

STANDARD PLATE GLASS COMPANY *v.* CENTRAL LABORATORIES COMPANY.

Decided August 4, 1926.

1. TRADE-MARKS—OPPOSITION—PORTIONS OF BOTH MARKS SUBSTANTIALLY IDENTICAL—CONDITIONS WHICH WARRANT DISMISSAL.

Where an applicant has adopted as a portion of its mark what is substantially a portion of opposer's mark, *Held* that if the marks are properly held so far dissimilar as to warrant dismissal of the opposition then it must be because the other portions of the two marks are dissimilar in appearance, sound, spelling, and significance or because the opposer should not be allowed a reasonably broad protection as to such other part of its mark on the ground that such portion has been so generally used by others as to become common property or is descriptive of the goods.

2. SAME—DECEPTIVE SIMILARITY—"AUTO EZE"—"So-E-Zy."

The marks "Auto EZE" and "So-E-Zy," if applied to the same class of goods, would produce confusion in trade.

APPEAL from Examiner of Interferences.

Opposition No. 6,759 to registration of trade-mark of Central Laboratories Company, for Paints, application filed August 10, 1925, Serial No. 218,612, published September 22, 1925.

Messrs. Beale & Park for Standard Plate Glass Company.

Mr. H. E. Dunlap for Central Laboratories Company.

KINNAN, *First Assistant Commissioner:*

This case comes on for review, on appeal of the Central Laboratories Company, applicant, of the decision of the Examiner of Trade-Mark Interferences sustaining the opposition filed by the Standard Plate Glass Company and adjudging the applicant company not entitled to the registration for which it has applied.

Central Laboratories Company has applied for registration of the notation "Auto EZE," used on engine-enameling paints, metal-enameling paints, automobile body paints, and tire paints. The second portion "EZE" appears below the first portion "Auto" on a wide paraph underlying such first portion and leading from the final down stroke of the letter "A." The opposer company is the owner of the registered mark "So-E-Zy," used in connection with various enamels, colors, and paints, including auto and furniture enamel.

By stipulation it is agreed that the applicant company first adopted and used its mark about the 8th day of June, 1925, and that opposer or its predecessor in business has had continuous use in trade of its mark from a date long prior to that alleged by the applicant.

The goods clearly belonging to the same class, the only question here to be reviewed is the similarity of the marks and the resulting probable confusion or mistake in the mind of the public or deception of purchasers.

There is here disclosed an instance of an applicant seeking registration of a mark adopted long after a rival in business had adopted and used its mark and made the same known among its customers and probable patrons. In consequence the applicant, who had the entire field from which to choose its mark open to it, should be denied registration if there is any reasonable probability of confusion in trade. If doubts exist, they should be resolved against the newcomer in accordance with the established rule.

[1, 2] There has been some difference of view expressed as to how the applicant's notation is pronounced; but for the purposes of this proceeding it must be held many purchasers would pronounce the second portion of the notation as if it were two syllables—as if it were spelled "easy". It would seem, therefore, the applicant has adopted as a portion of the opposer's mark. If the marks are properly held so far dissimilar as to warrant dismissal of this opposition, then it must be because the other portions of the two marks are dissimilar in appearance, sound, spelling, and significance or because the opposer should not be allowed a reasonably broad protection as to the second portion of its mark on the ground that such second portion has been so generally used by others as to become common property or is descriptive of the goods. The record does not disclose that this somewhat fanciful spelling of a descriptive word has been used to such an extent in connection, at any rate, with goods of the character here under consideration as to bar the opposer from obtaining protection for this portion of its mark. It is doubted if such second portion is merely descriptive. It is rather suggestive that the enamel may be applied in an easy manner and a satisfactory result obtained. Regarding the word "Auto" in the applicant's mark, it is purely descriptive of the article on which the paint is to be used. In connection with the first portion of the notation it clearly designates the enamel as "Auto" enamel. If this first portion "Auto" were fanciful and arbitrary, it is possible such portion would give a distinctive and different significance to the applicant's entire notation, and therefore justify the dismissal of this opposition. Being, however, merely a descriptive term and the opposer using its enamel for the same purpose, enameling autos or auto parts, it would seem substantially the distinctive feature of the two marks resides in the second portions, and these portions being substantially identical in sound, significance, appearance, and even in spelling the applicant company must be held to have approached too closely the opposer's mark. The average purchaser, it is believed, would retain in mind the suggestive portion, "E-Zy" or "EZE" of each mark, and if such purchaser did this confusion would be inevitable.

It is true the appearances of the marks are different; but the purchaser seldom has the opportunity of comparison, merely retaining in his mind some feature of the mark by which goods satisfactory to him were formerly purchased.

The decision of the Examiner of Trade-Mark Interferences sustaining the opposition and adjudging the applicant not entitled to the registration sought is affirmed.

Court of Appeals of the District of Columbia.

IN RE VISSERING.

No. 1,869. Decided December 6, 1926.

INVENTION—MECHANICAL SKILL—SLIGHT IMPROVEMENT.

While appellant's device for uncoupling cars may disclose a slight improvement over the prior art, the improvement is so slight as to amount merely to an obviously mechanical change and not to an invention.

APPEAL from Patent Office. Affirmed.

Mr. Paul Carpenter and *Mr. J. T. Bassecheс* for Vissering.

Mr. T. A. Hostetler for the Commissioner of Patents.

Before MARTIN, Chief Justice, VAN ORSDEL, Justice, and HATFIELD, Judge U. S. Court of Customs Appeals.

VAN ORSDEL, *J.*:

This appeal is from the decision of the Commissioner of Patents, rejecting the claims of appellant's application for a patent for a device for uncoupling cars.

The alleged invention consists of a rotatable horizontal shaft with one end bent for use as a handle and the other end connected to a pair of coupling links. One of the links is connected to the shaft and the other to the coupling pin or coupler lock as it is called. The combination is old in the art, and if appellant has disclosed any novelty it lies in the connection between the operating shaft and the coupler lock. It is contended by appellant that the relative movement of the links, between the lock and the end of the operating lever, is so arranged as to permit the longitudinal movement of the coupling links, with respect to each other, in such a manner as to prevent any relative rotation which would cause the operation of the links to be in any respect obstructed.

The principal patent cited in anticipation of appellant's device is one to Anderson, No. 1,189,773. The movement of the links in the Anderson device is controlled by a round shaft, while the movement in appellant's device is controlled by a square shaft. It is appellant's claim that his device overcomes defects in the Anderson device, due to rotary movement on the round shaft which could not occur on appellant's square shaft. But the square shaft of appellant is not new, since it is anticipated in other references disclosed in the record, consequently we think that the substitution of the square shaft for the round shaft in the Anderson device is a mere mechanical change which does not amount to invention.

Appellant contends that the adjustment of the links is such that, when the device is operated, they knock together and jar the pin or lock loose, facilitating the operation, especially if the pin is frozen or rusted in position. But the same result is obtained, perhaps to a less degree, by the Anderson device.

While appellant's device may disclose a slight improvement over the prior art, we agree with the tribunals below that the improvement is so slight as to amount merely to an obvious mechanical change and not to an invention. Inasmuch as the prior art is reviewed elaborately and carefully in the opinions of the tribunals below, we deem it unnecessary to make such a review or comparison here.

The decision of the Commissioner of Patents is affirmed.

PATENT SUITS.

1,569,056, W. C. Welch, Colored patent leather and process of making same, suit filed Nov. 20, 1926, D. C. Mass., Doc. E 2751, *Snyder-Welch Process Corp.* v. *A. C. Lawrence Leather Co.*

1,599,553. (See 1,127,733.)

Re. 14,667. (See 1,307,734.)

Re. 15,401, L. S. van Westrum, Method of making roads, appeal filed May 7, 1925, C. C. A. (3d Cir.), Doc. 3350, *Bituminous Products Co. et al.* v. *Headly Good Roads Co.* Decree affirmed Feb. 10, 1927.

Re. 15,829, E. P. Engelbrecht, Slate brick, appeal filed Aug. 29, 1925, C. C. A. (3d Cir.), Doc. 3397, *Toupet-Taylor Engineering Co.* v. *Red Dog Mfg. & Supply Co.* Decree affirmed (notice dated Feb. 10, 1927).

Des. 67,837, J. N. Joerger, Casing for a cylinder oiler, suit filed Jan. 13, 1927, D. C., S. D. Calif. (Los Angeles), Doc. L-30-M, *Craveroiler Co. of America* v. *Jay Mfg. Co. et al.*

ADJUDICATED PATENTS.

(D. C. N. J.) The Hopkins patent, No. 1,271,527, for cone-type loud speaker, claims 29 and 30 *Held* invalid. *Lektophone Corporation* v. *Brandes Products Corporation*, 16 F. (2d) 934.

(D. C. N. J.) The Hopkins patent, No. 1,271,529, for cone-type loud speaker, claims 1-7 *Held* invalid and not infringed. *Lektophone Corporation* v. *Brandes Products Corporation*, 16 F. (2d) 934.

ADVERSE DECISIONS IN INTERFERENCE.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,518,190, H. Emery, Method of casting hollow ware of aluminum, decided February 14, 1927, claims 5, 7, and 8.

Pat. 1,518,791, G. W. Hedstrom, Drying machine, decided February 15, 1927, claims 7, 8, 9, 18, and 20.

Pat. 1,548,397, A. C. Taylor, Electric welding machine, decided March 5, 1927, claim 3.

Pat. 1,569,031, J. D. Rauch, Power shovel, decided February 18, 1927, claim 5.

TRADE-MARKS CANCELED.

74,443. Antiseptic and disinfectant compounds. Minna M. Dubin, Philadelphia, Pa. Registered July 13, 1909. Canceled March 10, 1927.

94,998. Illuminating and lubricating oils. Kansas City Oil Co., Kansas City, Kans. Registered January 20, 1914. Canceled March 10, 1927.

151,282. Malt extracts. Albert Wielich, New York, N. Y. Registered January 24, 1922. Canceled March 10, 1927.

154,932. Phonographs. Federal Phonograph Co., Inc., New York, N. Y., assignors to Paul B. Klugh, New York, N. Y. Registered May 16, 1922. Canceled March 10, 1927.

192,860. Eggs. Ernest Lebers, New York, N. Y. Registered December 16, 1924. Canceled March 10, 1927.

210,269. Penetrating oils for vehicle springs and chassis grease. John T. Stanley Co., Inc., New York, N. Y. Registered March 9, 1926. Canceled March 10, 1927.

214,071. Women's and misses' dresses. Chicago Mail Order Company, Chicago, Ill. Registered June 8, 1926. Canceled March 10, 1927.

219,018. Hosiery. Glidden Hyde Co., Boston, Mass. Registered October 5, 1926. Canceled March 10, 1927.

219,413. Ready-mixed paints and paint enamels. A. G. Adams & Co., Chicago, Ill. Registered October 19, 1926. Canceled March 10, 1927.

220,051. Leather belting. Conrad Zimmer, doing business as Conrad Zimmer Belting Company, New York, N. Y. Registered November 2, 1926. Canceled March 10, 1927.

Disclaimer.

1,553,301.—*William H. Albee*, Marlboro, Mass. HEEL BASE AND PROCESS OF MAKING SAME. Patent dated September 15, 1925. Disclaimer filed March 12, 1927, by the patentee, assignee, *B. A. Corbin & Son Company*, consenting.

Hereby enters this disclaimer to claim 7 of said patent.

Notice of Cancellation.

U. S. PATENT OFFICE, *Washington, Mar. 7, 1927.*

Charles Hedden Incorporated, its assigns or legal representatives, take notice:

A cancellation proceeding having been instituted by this Office upon the application of Alfred Wright, Perfumer, Inc., of No. 113 West Eighteenth Street, New York, N. Y., to effect the cancellation of the trade-mark registration of Charles Hedden Incorporated, of 16 East Thirty-Third Street, New York, N. Y., No. 88,875, dated October 29, 1912, and the notice of such proceeding sent by registered mail to the said Charles Hedden Incorporated at the said address having been returned by the post office as undeliverable, notice is hereby given that unless said Charles Hedden Incorporated, its assigns or legal representatives, shall enter an appearance therein within 30 days from the first publication of this order the cancellation will be proceeded with as in case of default. This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

WM. A. KINNAN,
First Assistant Commissioner.

TRADE-MARKS

OFFICIAL GAZETTE, MARCH 29, 1927.

[VOL. 356. No. 5.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 177,840. (CLASS 39. CLOTHING.) GIMBEL BROTHERS, New York, New York, N. Y. Filed Mar. 22, 1923.

FOOTMOULD

Particular description of goods.—Leather and Combination Leather and Fabric Shoes.
Claims use since Jan. 2, 1900.

Ser. No. 206,816. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ROSE WILKE, doing business as Vital Food Co., Los Angeles, Calif. Filed Dec. 16, 1924.

Radiant Health

Particular description of goods.—Medicinal Remedies—Namely, Laxative Herbal Compounds.
Claims use since Jan. 3, 1924.

Ser. No. 212,383. (CLASS 21. ELECTRICAL APPARATUS, MACHINES, AND SUPPLIES.) CHARLES HILTON KENNEY, doing business as The Guide-O-Light Company, New London, Conn. Filed Apr. 8, 1925.

Guide-O-Light

Particular description of goods.—Vehicle Direction Signal Including Light Boxes and Control Circuit Maker and Breaker as Unit.
Claims use since Dec. 1, 1924.

Ser. No. 213,276. (CLASS 39. CLOTHING.) MARCEL BLUME, Paris, France. Filed Apr. 25, 1925.

"FAIRYLAND"

Particular description of goods.—Ladies' and Children's Dresses, Suits, and Lingerie.

Ser. No. 229,841. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) WILLITS GREEN & MARSTON, doing business as Willits & Green, Los Angeles, Calif. Filed Apr. 7, 1926.

CALIFORNIA POPPY

Particular description of goods.—Peanut Butter, Crushed Fruits, Marmalade, Jams, Conserves, Spiced and Pickled Fruits.
Claims use since 1913.

Ser. No. 229,875. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MARGUERITE BLAIR ORCHARD, Long Beach, Calif. Filed Apr. 8, 1926.

Particular description of goods.—Face Whiting and Skin Lotion.
Claims use since Nov. 24, 1924.

Ser. No. 231,048. (CLASS 12. CONSTRUCTION MATERIALS.) KERRY & HANSON FLOORING CO., Grayling, Mich. Filed May 3, 1926.

CHIEF

Particular description of goods.—Flooring Made of Maple, Beech, and Birch. The Flooring is Made Tongue and Grooved and Square Edge.
Claims use since August, 1905.

Ser. No. 231,574. (CLASS 12. CONSTRUCTION MATERIALS.) UNITED STATES GYPSUM COMPANY, Chicago, Ill. Filed May 13, 1926.

THERMOFILL

Particular description of goods.—Powdered Heat and Cold Building Insulation, Calcined Gypsum, Wall Plasters, Gypsum Tile, and Plaster Board.
Claims use since Oct. 24, 1925.

Ser. No. 232,228. (CLASS 39. CLOTHING.) BENJAMIN WAXMAN, doing business as Great Eastern Manufacturing Company, Rose Waxman, administratrix of the estate of Benjamin Waxman, deceased, Philadelphia, Pa. Filed May 25, 1926.

ViKing Overalls

Applicant disclaims the word "Overalls" except as used in connection with the mark.
Particular description of goods.—Overalls.
Claims use since May 1, 1926.

Ser. No. 232,450. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) CARTER MEDICINE COMPANY, New York, N. Y. Filed May 29, 1926.

No claim is made to the exclusive use of the words "Trade-Mark Registered" and "Little Iron Pills Compound" apart from the mark shown in the drawing.
Particular description of goods.—Iron Pills.
Claims use since April, 1926.

Ser. No. 232,451. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) CARTER MEDICINE COMPANY, New York, N. Y. Filed May 29, 1926.

No claim is made to the exclusive use of the words "Trade-Mark Registered" and "Little Nervine Pills" apart from the mark shown on the drawing.
Particular description of goods.—Nervine Pills.
Claims use since April, 1926.

Ser. No. 232,868. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) CHEM. FABRIKEN KUNHEIM & CO. A. G., Berlin, Germany, Filed June 8, 1926.

„Erka“

Particular description of goods.—Ammonium Carbonate, Ammonium Chloride, Ammonium Sulphate, Ammonium Sulphocyanide, Barium Carbonate, Barium Chloride, Barium Nitrate, Barium Sulphide, Barium Sulphocyanide, Blanc Fixe, Calcium Chloride, Bleaching Powder, Calcium Ferrocyanide, Calcium Sulphocyanide, Citric Acid, Copper Sulphocyanide, Molybdic Acid, Molybdate of Ammonia, Potassium Ferricyanide, Potassium Sulphocyanide, Soda Ash, Caustic Soda Crystals, Sodium Bisulphite Sodium Sulphate, Sodium Sulphide, Sodium Sulphite, Sodium Sulphocyanide, Thorium Nitrate and Salts, Tungstic Acid, Phosphates, Superphosphates, Sulphate of Ammonia, Ammonia Superphosphate, Phosphate Mixed with Cyanamide, Digestive Enzymes.
Claims use since Nov. 13, 1924.

Ser. No. 233,367. (CLASS 14. METALS AND METAL CASTINGS AND FORGINGS.) THOS. FIRTH & SONS, LIMITED, Sheffield, England. Filed June 17, 1926. Under 10-year proviso.

THOMAS FIRTH & SONS,

Particular description of goods.—Cast Steel, Castings, and Forgings.
Claims use since prior to 1876.

Ser. No. 233,717. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) JOHN F. BARKER PRODUCE COMPANY, INC., Phoenix, Ariz. Filed June 25, 1926.

BREAKFAST

Particular description of goods.—Eggs.
Claims use since Sept. 1, 1921.

Ser. No. 233,738. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) THE LEVY & LEVIS COMPANY, INC., New York, N. Y. Filed June 25, 1926.

EATRITE

Particular description of goods.—Dried Vegetables Comprising Whole Green Peas, Green Split Peas, Yellow Split Peas, Marrow Beans, Pea Beans, Lima Beans, Lentils, Green Kern and Mushrooms; Dried Fruits Comprising Pears; and Sto. John's Bread; Cereals Comprising Barley and Rice, Tapioca, Tea, Coffee, Nuts, Salted and in Their Natural State; Spices Comprising Allspice, Laurel Leaves, Yellow Mustard Seed, Caraway Seed, Poppy Seed, Pepper, Paprika, and Nutmeg, and Birdseed and Sunflower Seed.
Claims use since Oct. 17, 1924.

Ser. No. 233,755. (CLASS 31. FILTERS AND REFRIGERATORS.) SUMMERFIELD & HECHT, Detroit, Mich. Filed June 25, 1926.

Grand Rapids

The words "Grand Rapids" and the representation of the refrigerator are disclaimed apart from the mark as shown.
Particular description of goods.—Refrigerators.
Claims use since 1908.

Ser. No. 233,864. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) EDWARD H. ANTHONY, doing business as Consolidated Pharmacal Laboratories, Los Angeles, Calif. Filed June 29, 1926.

ACNE-OINT

No claim is made to the exclusive right to use the word "Acne" except in the association shown in the drawing.
Particular description of goods.—Ointment for Skin Diseases.
Claims use since May 1, 1926.

Ser. No. 234,008. (CLASS 40. FANCY GOODS, FURNISHINGS, AND NOTIONS.) STEMOR COMPANY, INC., New York, N. Y. Filed July 1, 1926.

"WATERTRAN"

Particular description of goods.—Patterns for Embroidery.
Claims use since Apr. 2, 1926.

Ser. No. 234,098. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) COLTON FRUIT EXCHANGE, Colton, Calif. Filed July 3, 1926.

COLTON TERRACE

The geographical term "Colton" is disclaimed apart from the other features of the mark as shown in the drawing.
Particular description of goods.—Fresh Citrous Fruits—Namely, Oranges, Lemons, and Grapefruit.
Claims use since January, 1893.

Ser. No. 234,366. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) REGINALD G. BULLARD, doing business as Bullard Products, Monterey Park, Calif. Filed July 10, 1926.

PRESERVATOP

Particular description of goods.—Auto Top and Leather Dressing.
Claims use since Mar. 1, 1926.

Ser. No. 234,624. (CLASS 2. RECEPTACLES.) MY PAL PRODUCTS, Chicago, Ill. Filed July 16, 1926.

"MY PAL"

Particular description of goods.—Vacuum Heat-Insulated Jugs and Bottles.
Claims use since May 1, 1926.

Ser. No. 235,656. (CLASS 2. RECEPTACLES.) RUSSELL O. SAYERS, doing business as Auto Box Equipment Co., Mount Vernon, N. Y. Filed Aug. 6, 1926.

ABECO

Particular description of goods.—Automobile License and Ownership Card Boxes.

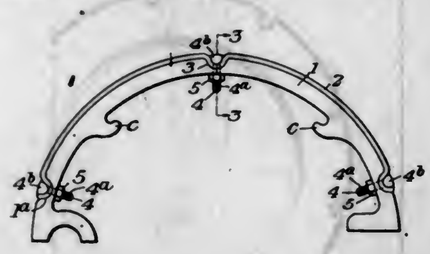
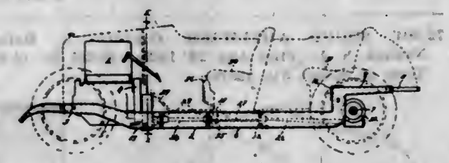
REISSUES



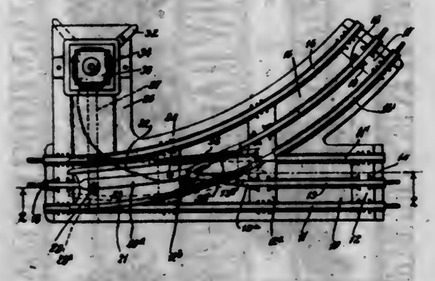
MARCH 29, 1927.

16,577. GAS-EMERGENCY CONTROL FOR FLOWING OIL OR GAS WELLS. ERD V. CROWELL, Los Angeles, Calif., assignor to The Guiberson Corporation, Dallas, Tex., a Corporation of Delaware. Filed Oct. 31, 1924. Serial No. 747,125. Original No. 1,432,674, dated Oct. 17, 1922, Serial No. 476,714, filed June 11, 1921. 22 Claims. (Cl. 166—1.)



18. The combination with a hollow well packer, of a head having a gas escape port therein, a valve member carried by the head and movable relatively thereto for opening and closing said port, tubing extending through the packer and connected with the valve member, and positive means for holding the valve open while the packer is being set.

16,578. BRAKE-BAND LINING-SECURING MEANS. EDWARD TRIAT, Pittsburgh, Pa. Filed Aug. 3, 1926. Serial No. 126,908. Original No. 1,562,132, dated Nov. 17, 1925, Serial No. 695,014, filed Feb. 25, 1924. 2 Claims. (Cl. 188—234.)

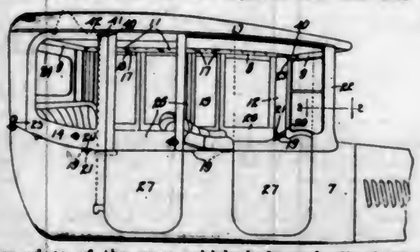


1. The combination with a brake shoe of open construction provided adjacent each end and centrally thereof with a transversely extending recess and openings extending through the shoe centrally of said recesses, T-bolts having their shanks extending through the shoe and being disposed so that the heads of the bolts are located within the recesses, a brake lining extending about the shoe with the shanks of the bolts extending through the lining and the heads transversely engaging the lining within the recesses and nuts threaded upon the shanks of the bolts and bearing against the brake shoe upon the face opposite the recesses to provide a single transversely central pull upon the lining at points spaced around the shoe and uniformly tension the lining.

16,579. MOTOR VEHICLE. JAMES S. BOOTH, Detroit, Mich. Filed June 28, 1926. Serial No. 119,263. Original No. 1,546,708, dated July 21, 1925, Serial No. 571,613, filed June 29, 1922. 10 Claims. (Cl. 180—70.)

5. In an automobile, the combination of a rear driving axle and axle housing, a chassis frame provided with a rear portion over said axle housing to give the usual necessary clearance and having a relatively deep drop just forward of said axle housing to provide a drop portion of the chassis frame with its lower side below the center of said rear axle when the same is in its normal position, a reinforcing cross bar for said chassis frame forward and above the center of said rear axle, a motor supported upon the front portion of said chassis frame and largely thereabove, a propeller shaft supported below said reinforcing cross bar and connecting said motor with said rear axle and having a driving connection with said rear axle the axis of which connection is below the main horizontal center line of the axle, thereby permitting the lowering of said chassis frame.

16,580. TOY TRAIN TRACK. JOSHUA L. COWEN, New York, N. Y., assignor to The Lionel Corporation, a Corporation of New York. Filed Jan. 27, 1927. Serial No. 164,105. Original No. 1,534,303, dated Apr. 21, 1925, Serial No. 626,683, filed Mar. 21, 1923. 16 Claims. (Cl. 246—419.)

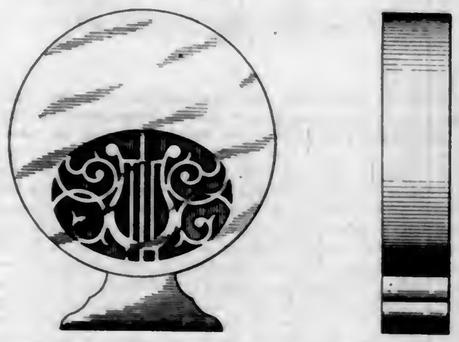


16. In a track switch for toy electric railroads, cooperative fixed and movable wheel bearing rails for routing

a train through a main line or onto a branch line, said wheel bearing rails including a pair of converging rails insulated from the other rails, and a stationary electrically continuous power supply rail extending through the main line and branch line and independent of the wheel bearing rails.

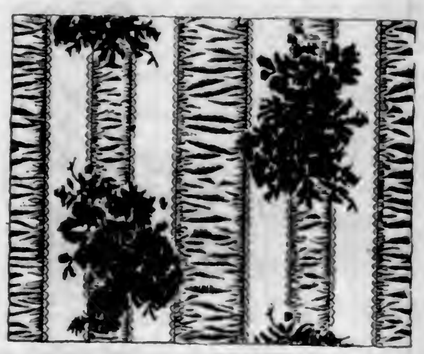
16,581. AUTOMOBILE TOP. MATTHEW R. HULL, Connersville, Ind., assignor to Rex Manufacturing Company, Connersville, Ind., a Corporation of Indiana. Filed Dec. 9, 1922. Serial No. 605,962. Original No. 1,425,014, dated Aug. 8, 1922, Serial No. 558,455, filed Mar. 29, 1917. 4 Claims. (Cl. 296—103.)

1. In combination with an open vehicle body, a deck provided with narrow longitudinal side members, means at the front and rear ends of the body for supporting the deck a fixed distance above the body, deck reinforcing rails secured to the side members of the deck and extending the length and around the corners of the deck and depending below the lower edges of the deck to form flanges, means for securing said rails to the deck side members, removable windows, panels and door extensions arranged between the lower edges of the deck and the



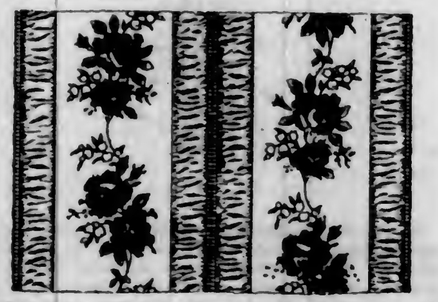
upper edges of the open vehicle body and alined by the depending portions of said deck reinforcing rails, and means for removably securing said windows, panels and deck reinforcing rails together, substantially as set forth.

DESIGNS



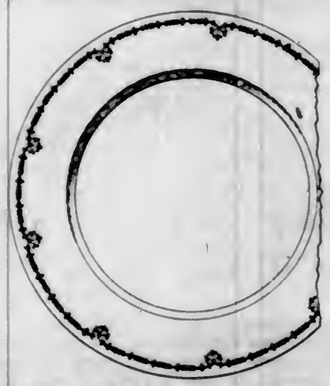
MARCH 29, 1927.

72,304. SOUND AMPLIFIER. GARROLD L. BAILEY, Newark, N. J. Filed Aug. 28, 1925. Serial No. 14,622. Term of patent 3½ years.



The ornamental design for a sound amplifier, as shown.

72,305. TEXTILE FABRIC OR SIMILAR ARTICLE. LUCIEN BIVA, Brooklyn, N. Y., assignor to Titus Blatter & Company, New York, N. Y., a Corporation of New York. Filed Feb. 3, 1926. Serial No. 16,389. Term of patent 7 years.



The ornamental design for a textile fabric or similar article substantially as shown.

72,306. TEXTILE FABRIC OR SIMILAR ARTICLE. LUCIEN BIVA, Brooklyn, N. Y., assignor to Titus Blatter & Company, New York, N. Y., a Corporation of New York. Filed Feb. 3, 1926. Serial No. 16,391. Term of patent 7 years.

The ornamental design for a textile fabric or similar article substantially as shown.

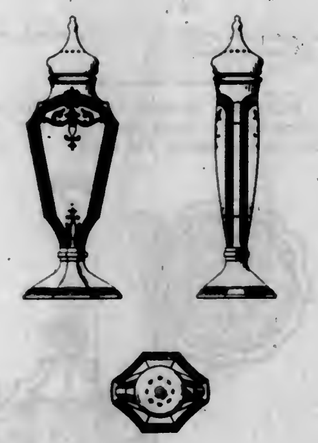
72,307. PLATE OR SIMILAR ARTICLE. JOSEPH F. CARNEY, New York, N. Y., assignor to Waldorf Asforia Service Corporation, Long Island City, N. Y. Filed Dec. 24, 1926. Serial No. 20,144. Term of patent 7 years.

The ornamental design for a plate or similar article, as shown and described.

72,308. LIGHTING-FIXTURE PART. PAUL CRICCHIO, New York, N. Y., assignor to Royal Metal Lighting Fixture Co., Inc., a Corporation of New York. Filed Jan. 24, 1927. Serial No. 20,478. Term of patent 3½ years.

The ornamental design for a lighting-fixture part substantially as shown and described.

72,309. DRESS. TAUBE DAVIS, New York, N. Y., assignor to Franklin Simon & Company, Inc., New York, N. Y., a Corporation of New York. Filed Nov. 23, 1926. Serial No. 19,823. Term of patent 3½ years.



The ornamental design for a dress, substantially as shown and described.

72,310. BATHING SUIT. TAUBE DAVIS, New York, N. Y., assignor to Franklin Simon & Co., Inc., New York, N. Y., a Corporation of New York. Filed Dec. 10, 1926. Serial No. 20,005. Term of patent 3½ years.

The ornamental design for a bathing suit, substantially as shown and described.

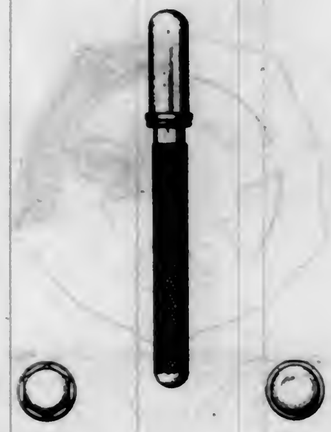
72,311. COMBINED SALT AND PEPPER SHAKER. ALFRED J. FLAUDER, Bridgeport, Conn. Filed Feb. 10, 1927. Serial No. 20,665. Term of patent 7 years.

The ornamental design for a combined salt and pepper shaker substantially as shown.

72,312. COMBINED SALT AND PEPPER SHAKER. ALFRED J. FLAUDER, Bridgeport, Conn. Filed Feb. 11, 1927. Serial No. 20,698. Term of patent 7 years.

The ornamental design for a combined salt and pepper shaker substantially as shown.

72,313. FERN STAND OR ARTICLE OF SIMILAR NATURE. STANLEY A. FLOWERS, Pittsburgh, Pa., assignor to Pittsburgh Tinware Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 13, 1926. Serial No. 16,043. Term of patent 14 years.



The ornamental design for a fern stand or article of similar nature, as shown.

72,314. ELECTRIC CHANDELIER. SAMUEL FROST, New York, N. Y. Filed June 12, 1926. Serial No. 18,012. Term of patent 3½ years.

The ornamental design for an electric chandelier, as shown.

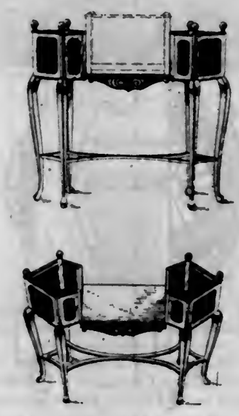
72,315. THERMOMETER CASE. ISAAC Q. GURNEE, Butler, and ALBERT A. SMITH, Riverdale, N. J., assignors to Superior Hard Rubber Company, Butler, N. J., a Corporation of New Jersey. Filed Dec. 18, 1925. Serial No. 15,785. Term of patent 14 years.

The ornamental design for a thermometer case, as shown.

72,316. TEXTILE FABRIC OR SIMILAR ARTICLE OF MANUFACTURE. ALFRED J. HEINKE, Towaco, N. J., assignor to H. R. Mallinson & Co., Inc., New York, N. Y., a Corporation of Delaware. Filed Oct. 12, 1926. Serial No. 19,290. Term of patent 3½ years.

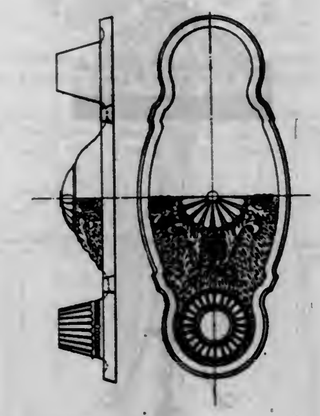
The ornamental design for a textile fabric or similar article of manufacture substantially as shown and described.

72,317. TEXTILE FABRIC OR SIMILAR ARTICLE OF MANUFACTURE. ALFRED J. HEINKE, Towaco, N. J., assignor to H. R. Mallinson & Co., Inc., New York, N. Y., a Corporation of Delaware. Filed Oct. 12, 1926. Serial No. 19,300. Term of patent 3½ years.



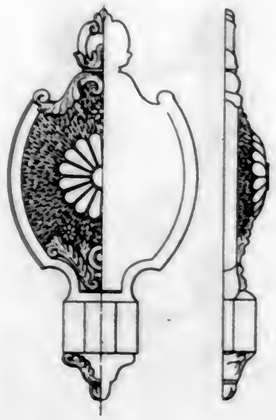
The ornamental design for a textile fabric or similar article of manufacture substantially as shown and described.

72,318. LIGHTING-FIXTURE STRAP. MICHAEL JONICK, New York, N. Y., assignor to Jonick Sirken Co., Inc., a Corporation of New York. Filed Dec. 15, 1926. Serial No. 20,053. Term of patent 3½ years.



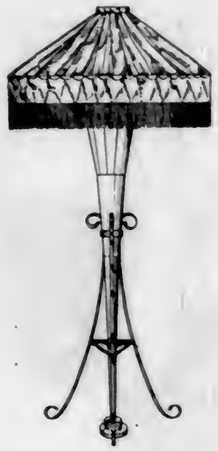
The ornamental design for a lighting-fixture strap substantially as shown.

72,319. FERNERY STAND. CHARLEY KOWALSKI, Chicago, Ill. Filed Mar. 2, 1925. Serial No. 12,539. Term of patent 7 years.



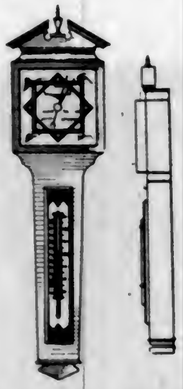
The ornamental design for a fernery stand, as shown.

72,320. ELECTRIC-LIGHT FIXTURE. CHARLES W. LOGAN, Kenmore, N. Y., assignor, by mesne assignments, to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Dec. 4, 1926. Serial No. 19,927. Term of patent 3½ years.



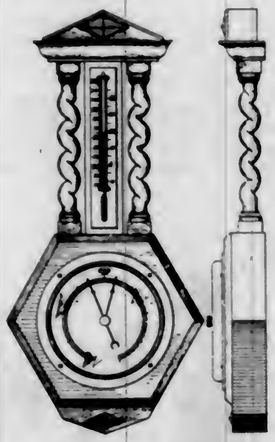
The ornamental design for an electric-light fixture, as shown.

72,321.. WALL PLATE FOR ELECTRIC-LIGHT FIXTURES. CHARLES W. LOGAN, Kenmore, N. Y., assignor, by mesne assignments, to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Dec. 4, 1926. Serial No. 19,929. Term of patent 3½ years.



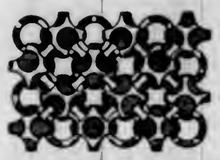
The ornamental design for a wall plate for electric-light fixtures, as shown.

72,322. COMBINED FLOOR LAMP AND SOUND AMPLIFIER. THOMAS TATLOW TANNEHILL, Toronto, Ontario, Canada. Filed Dec. 17, 1926. Serial No. 20,069. Term of patent 3½ years.



The ornamental design for a combined floor lamp and sound amplifier, as shown.

72,323. BAROMETER. HERBERT LONG, Walthamstow, London, England, assignor to Taylor Instrument Companies, Rochester, N. Y., a Corporation of New York. Filed Sept. 27, 1926. Serial No. 19,179. Term of patent 14 years.

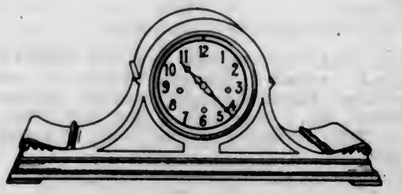


The ornamental design for a barometer, as shown.

72,324. BAROMETER. HERBERT LONG, Walthamstow, London, England, assignor to Taylor Instrument Companies, Rochester, N. Y., a Corporation of New York. Filed Sept. 27, 1926. Serial No. 19,180. Term of patent 14 years.

The ornamental design for a barometer, as shown.

72,325. METALLIC MESH FABRIC. SAHATIEL G. MANDALIAN, North Attleboro, Mass. Filed June 24, 1924. Serial No. 9,957. Term of patent 14 years.



The ornamental design for a metallic mesh fabric, as shown.

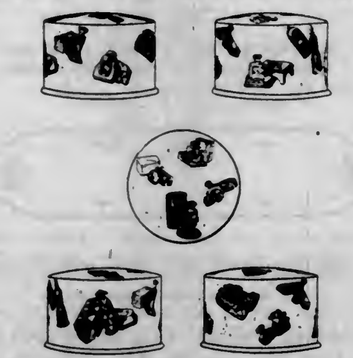
72,326. HAND BAG. HYMAN MARGOLIN, New York, N. Y. Filed June 30, 1926. Serial No. 18,217. Term of patent 3½ years.

The ornamental design for a hand bag, as shown.

72,327. CLOCK CASE. NELS JAMES NELSON, Milwaukee, Wis., assignor to The Herschede Hall Clock Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Oct. 21, 1925. Serial No. 15,211. Term of patent 14 years.

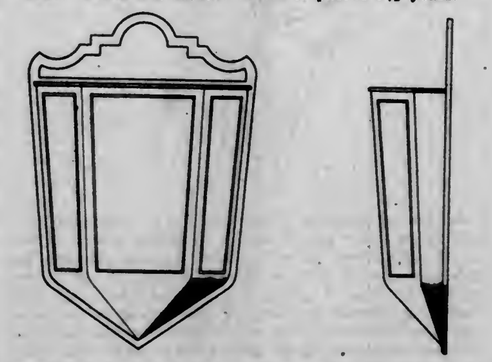
The ornamental design for a clock case, as shown.

72,328. COFFEEPOT OR ANALOGOUS ARTICLE. HAROLD E. NOCK, Newburyport, Mass., assignor to Towle Manufacturing Company, Newburyport, Mass., a Corporation of Massachusetts. Filed Feb. 5, 1927. Serial No. 20,622. Term of patent 14 years.



The ornamental design for a coffee pot or analogous article, substantially as shown.

72,329. CASING FOR A DIRECTION SIGNAL AND STOPLIGHT. JAMES C. NORDGRAN, Los Angeles, Calif. Filed Oct. 12, 1925. Serial No. 15,097. Term of patent 14 years.

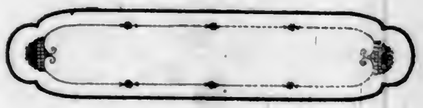


The ornamental design for a casing for a direction signal and stoplight substantially as shown.

72,330. BOX OR SIMILAR CONTAINER FOR TOILET PREPARATIONS. HAROLD H. RAYNOR, New York, N. Y., assignor to Les Parfums De Rosine, Inc., New York, N. Y., a Corporation of Delaware. Filed Oct. 26, 1926. Serial No. 19,490. Term of patent 7 years.

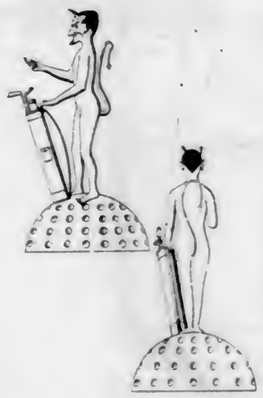
The ornamental design for a box or similar container for toilet preparations, substantially as shown.

72,331. WALL POCKET OR SIMILAR ARTICLE. GORDON E. ROEDDING, Grand Rapids, Mich. Filed Oct. 21, 1925. Serial No. 15,203. Term of patent 3½ years.



The ornamental design for a wall pocket or similar article substantially as shown.

72,332. CLOCK CASE. HENRY AUGUST SCHIERHOLTZ, La Salle, Ill., assignor to Western Clock Company, La Salle, Ill., a Corporation of Illinois. Filed Feb. 24, 1926. Serial No. 16,655. Term of patent 14 years.



The ornamental design for a clock case as shown.

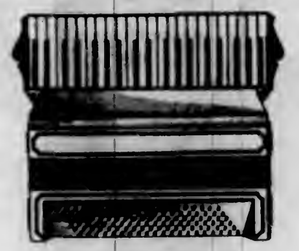
72,333. BUFFET SCARF. JACK SCHWAB, New York, N. Y. Filed Aug. 23, 1926. Serial No. 13,806. Term of patent 3½ years.

The ornamental design for a buffet scarf as shown.

72,334. PAPER WEIGHT. OKLA WILBUR SICKS, French Lick, Ind. Filed July 10, 1925. Serial No. 14,056. Term of patent 3½ years.

The ornamental design for a paper weight, as shown.

72,335. COAT. MAUDE SIEGEL, New York, N. Y., assignor to Franklin Simon & Co., Inc., New York, N. Y., a Corporation of New York. Filed Jan. 29, 1927. Serial No. 20,539. Term of patent 3½ years.

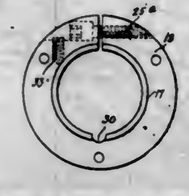


The ornamental design for a coat, substantially as shown.

72,336. ELECTRIC-HEATER BASE OR SIMILAR ARTICLE. ALBERT H. SIMMONS, Wheaton, Ill., assignor to Edison Electric Appliance Company, Incorporated, Chicago, Ill., a Corporation of New York. Filed Jan. 28, 1927. Serial No. 20,525. Term of patent 3½ years.

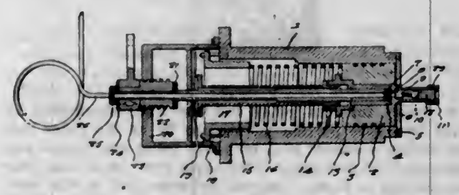
The ornamental design for an electric heater base or similar article substantially as shown.

72,337. ACCORDION. ROBERTO PANCOTTI, Brooklyn, N. Y. Filed Sept. 25, 1926. Serial No. 19,173. Term of patent 14 years.



The ornamental design for an accordion, as shown.

PATENTS

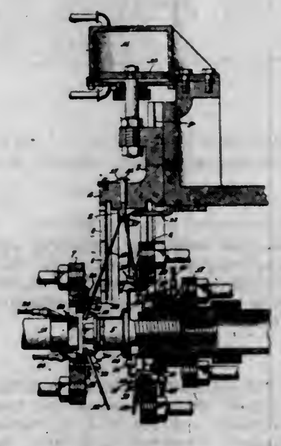


GRANTED MARCH 29, 1927.

1,622,265. ADJUSTABLE LEATHER-STRIP CUTTER. FRANK ACKERMANN and HERMAN GOULD, New York, N. Y. Filed Mar. 1, 1926. Serial No. 91,340. 2 Claims. (Cl. 164—70.)

1. In a cutting device of the nature described, a circular cutter, a circular die, comprising a split collar, an extension on the collar, a ring having an annular slot in its peripheral surface, said ring being seated on the extension and secured to the collar and means for springing the collar.

1,622,266. DEVICE FOR THE ATOMIZATION AND INJECTION OF LIQUIDS. CLARENCE JAMES AKE, Vallejo, Calif. Filed Aug. 12, 1925. Serial No. 49,863. 5 Claims. (Cl. 123—139.)



1. A device of the class described including a primary cylinder, a plate closing one end thereof and provided with a restricted opening, a primary piston slidable in the cylinder and having a reduced projection piercing the restricted opening, the diameter of the projection being smaller than the diameter of the opening, a frustoconical portion at the juncture of the primary piston with its projection for seating in the opening, and atomizer unit in the projection, a secondary cylinder in the primary piston, a secondary piston slidable in the secondary cylinder, said secondary piston being of hollow construction, a pair of check valves, one in the projection of the primary piston, and the other in the secondary piston adjacent the projection, and a spring associated with the primary piston normally holding its frustoconical portion closed against the restricted opening.

1,622,267. SUPPORT FOR VACUUM TUBES. MILTON ALDEN, Springfield, Mass. Filed Mar. 8, 1926. Serial No. 93,105. 8 Claims. (Cl. 173—328.)

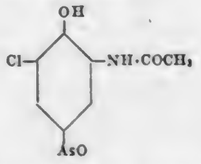
1. A support for a vacuum tube or the like comprising, in combination, a socket and a plurality of yielding supports for said socket, each of said supports being formed in a single piece and embodying therein a torsion coil fast to said socket, said supports also embodying therein a contact arm projecting laterally from said coil and adapted to engage a terminal of a vacuum tube, said spring constituting an electric circuit connection thereto.

1,622,268. METHOD OF CONSTRUCTING SUSPENSION WHEELS. CHARLES S. ASH, Royal Oak, Mich. Filed May 11, 1925. Serial No. 29,633. 10 Claims. (Cl. 29—174.)

6. The method of constructing wire wheels which consists in locating and holding rim and hub members in concentric relation with spokes extending between said members, heating end portions of said spokes, and then forming laterally the said end portions of all of said spokes simultaneously to secure them to the members.

1,622,269 BRASSIÈRE ANCHOR. CECILIA BAILIE, Camden, N. J. Filed June 9, 1925. Serial No. 35,923. 1 Claim. (Cl. 24—225.)

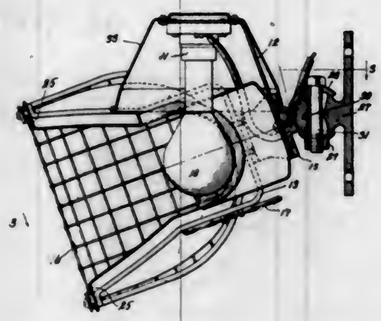
As an article of manufacture, a brassière anchor comprising a hook including a body having a slot at its upper end, an integral upturned prong terminating in a curved lip, the terminal edge of said lip being spaced from the inner face of said prong, a strip of elastic tape secured to the body and passing through said slot, and a pin bar including a cross piece for coaction with the hook, said cross piece having inturned curved keepers and U-shaped pins secured to the ends of said cross piece with their free arms adapted for insertion in the keepers.



1,622,270. DEMOUNTABLE WHEEL RIM. FREDERICK WILLIAM BAKER, Stourbridge, England, assignor to Trinity Wheel Corporation, a Corporation of New York. Filed Feb. 1, 1926. Serial No. 85,261. 9 Claims. (Cl. 301—35.)

1. A demountable wheel rim comprising opposed side flanges each carrying a segment of the rim bed, and means on each segment for placing the segment carried by one flange in locking engagement with a portion of the opposed flange.

1,622,271. ACYLAMINO-HYDROXYBENZENE ARSINE OXIDES. LUDWIG BENDA, Mainkur, near Frankfort-on-the-Main, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed June 19, 1925, Serial No. 38,329, and in Germany July 3, 1924. 4 Claims. (Cl. 260—14.)



4. As new substance 5-chloro-4-hydroxy-3-acetylaminobenzene-arsine oxide of the formula

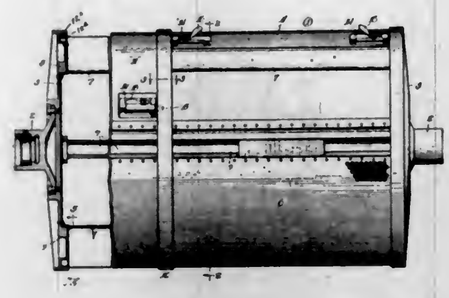
being a white powder dissolving hardly in water, gradually in dilute alkalies.

1,622,272. HIGHWAY-LIGHTING UNIT. REUBEN B. BENJAMIN, Chicago, Ill., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed May 15, 1924. Serial No. 713,417. 9 Claims. (Cl. 240—25.)

1. A high-way lighting unit comprising means for supporting a source of light and reflector means for controlling the light distribution, comprising two pairs of concave reflector members, one pair being located intermediate the members of the other pair, the outer pair of members being in the form of trough-like wings extending in substantially opposite directions from the light center, each of said trough-like wings having an open side and open ends, and having means for reflecting the light rays incident thereon as a beam through the outer open end thereof whereby the two wings throw two beams of light in substantially opposite directions, each of the intermediate reflector members having means for

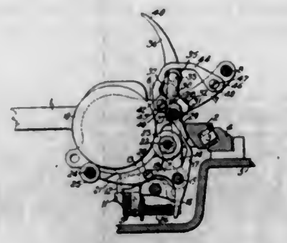
reflecting rays of light incident thereon through the inner open end of that wing portion which is farthest from it.

1,622,273. TENT-POLE SOCKET. SIEVERT THEODORE ANDERSON, Chicago, Ill. Filed Dec. 27, 1924. Serial No. 758,401. 1 Claim. (Cl. 135—2.)



A socket for tent poles and the like, comprising an angle iron base portion adapted to fit at the inner side and within a corner of a tent and being continuous and imperforate at the corner of the angle iron, said base portion having a socket disposed between and in the common plane of the ends of the angle iron and opening at its outer end to receive a tent pole and the like, said socket being closed at its inner end by said imperforate corner of the angle iron to prevent the pole from projecting through the wall of the tent, said base portion having bracing webs between the ends of the angle iron and the socket to support the latter.

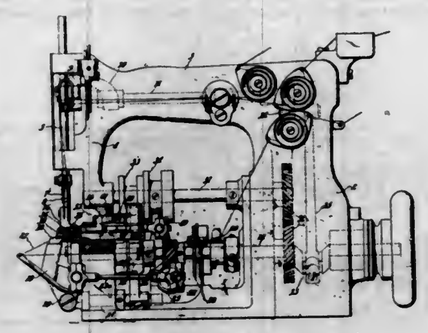
1,622,274. NOZZLE AND CAP THEREFOR. CHARLES A. ANTHONY, New York, N. Y., assignor to Metal Package Corporation of New York, New York, N. Y., a Corporation of New York. Filed Oct. 18, 1924. Serial No. 744,314. 3 Claims. (Cl. 220—39.)



1. In combination with a screw-threaded nozzle including an abutment flange on the upper edge thereof, a screw-threaded closure adapted to be screwed on said nozzle, said closure including an enlarged top portion having formed thereon an upwardly extending cup portion spaced from the periphery of said top portion, a washer fitting within said cup portion and adapted to be compressed against said flange.

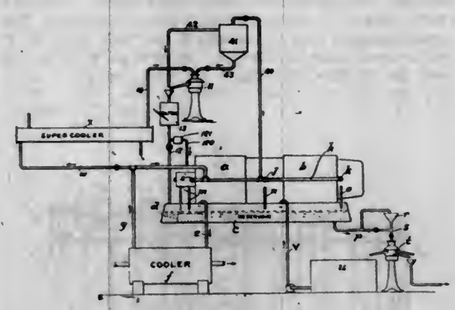
1,622,275. CYLINDER CONSTRUCTION. FRITZ BALKER, Moline, Ill., assignor to Troy Laundry Machinery Co., Ltd., Chicago, Ill., a Corporation of New York. Filed Nov. 14, 1923. Serial No. 674,633. 3 Claims. (Cl. 68—18.)

1. Cylinder construction comprising supporting members provided with integral aligned abutments and a plurality of sheet metal members carried by said abutments and shaped to conform to the abutments upon said supporting members, said sheet metal members comprising the cylindrical wall of said cylinder construction, each of said sheet metal members being mounted to extend from one set of abutments to and conformed over the next set of abutments.



1,622,276. TYPEWRITING MACHINE. EDWIN E. BARNEY, New Rochelle, N. Y., assignor to Remington Typewriter Company, Ilion, N. Y., a Corporation of New York. Filed July 5, 1924. Serial No. 724,187. 12 Claims. (Cl. 197—138.)

1. In a typewriting machine, the combination of a platen, a pressure roll cooperative therewith, a release rock shaft, a train of releasing devices connecting said rock shaft with said pressure roll, a crank arm fixed to said rock shaft, a release key lever of the first order fulcrumed directly on said crank arm, and a part with which said lever coacts.

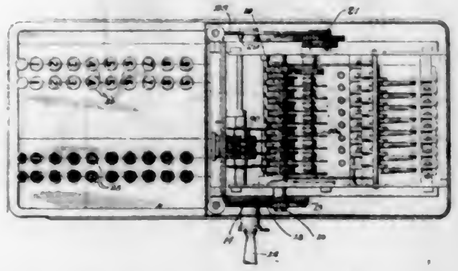


1,622,277. SPREADER MECHANISM FOR SEWING MACHINES. RUDOLPH BECKER, North Plainfield, N. J., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a Corporation of New Jersey. Filed Nov. 29, 1924. Serial No. 752,876. 5 Claims. (Cl. 112—162.)

1. The combination with a sewing machine having a plurality of eye-pointed needles, a loop-taker, and a vertically movable presser-foot and presser-bar, of spreader implements mounted and sustained independently of the presser-foot and presser-bar on the needle side of the work entirely at one side of the line of seam-formation and disposed with their working extremities above and

closely adjacent the presser-foot, said implements being free to move vertically when the presser-foot is lifted.

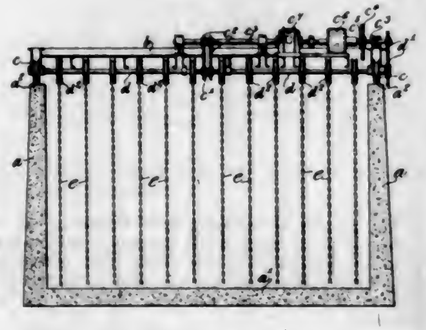
1,622,278. LUBRICATING-OIL PURIFYING AND RECLAIMING SYSTEM. FREDERIC R. C. BOYD, Boston, Mass., assignor to The De Laval Separator Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 26, 1924. Serial No. 740,001. 22 Claims. (Cl. 184—6.)



1. The process of purifying and reclaiming oil from the bearings of an engine which consists in establishing a flow of oil drained from the engine and differentially cooling different fractional parts of said oil and purifying that part of the oil that has been cooled to the lower temperature.

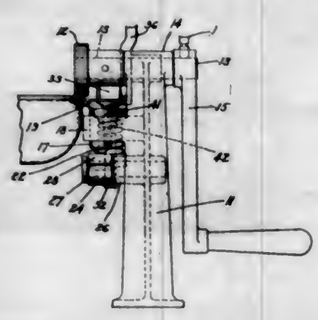
1,622,279. MULTIPLYING MACHINE. JAMES W. BAYCE, Binghamton, N. Y., assignor to The International Time Recording Company of New York, a Corporation of New York. Filed Apr. 22, 1921. Serial No. 463,534. 42 Claims. (Cl. 235—60.)

1. In a multiplying machine the combination with contacts corresponding to the digits of the multiplicand and means such as a bank of keys for setting up or connecting such contacts with a source of current, of multiplying



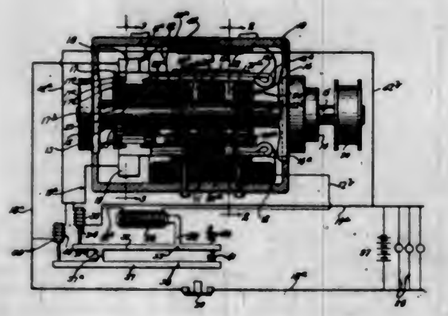
slugs such as are herein described corresponding to the digits of the multiplier and other means such as a second bank of keys for selecting the slugs and bringing the selected slugs into operative electrical relation to the multiplicand contacts, a counter and means intermediate the slugs and said counter for connecting the active product indicating contacts of the slugs to the appropriate

counter mechanisms for registering the numerals corresponding to the active product contacts.



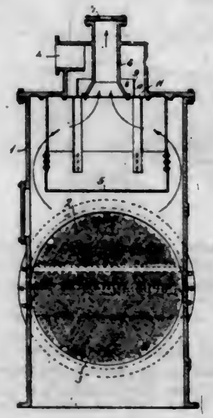
41. In a calculating device, a device upon which values of a product may be set up, means for actuating the same, a plurality of electrical contact elements representing multiplication tables for controlling said actuating means, and multiplier and multiplicand keys for controlling the operation of said elements.

1,622,280. APPARATUS FOR AGITATING SLURRY, ETC. JOHAN S. FASTING, Valby, near Copenhagen, Denmark, assignor to F. L. Smidth & Co., New York, N. Y., a Corporation of New Jersey. Filed Sept. 5, 1924. Serial No. 736,010. 1 Claim. (Cl. 259—144.)



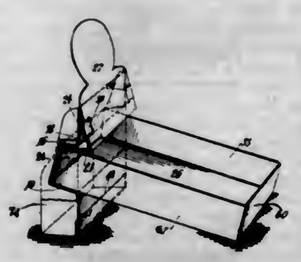
In combination with a tank to receive slurry, a carrier supported on the wall of the tank and having a shaft with a series of sprocket wheels, chain loops suspended from the sprocket wheels within the tank, means to rotate the shaft and sprocket wheels, means to cause the carrier to move bodily above the tank, weighted air pipes pivotally supported from the carrier, and means to supply air and pressure to the air pipes.

1,622,281. WELT-ROLLING MACHINE. ANDREW H. HAVIR, Minneapolis, Minn., assignor to Progressive Shoe Machinery Company, Minneapolis, Minn., a Corporation of Minnesota. Filed Feb. 1, 1923. Serial No. 616,363. 9 Claims. (Cl. 12—67.1.)



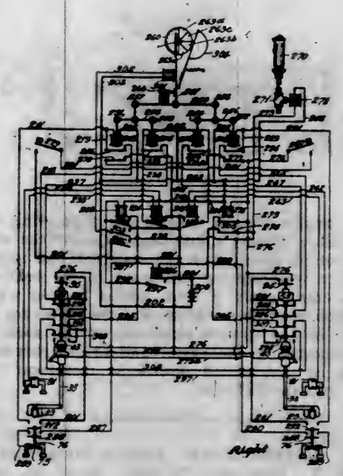
1. In a welt rolling machine, relatively movable members between which the welt is gripped and rolled, oscillating means for forcing one of said members toward the other one, and mechanism adapted to hold said one member in its welt gripping position.

1,622,282. APPARATUS FOR GENERATOR REGULATION. GEORGE E. HULSE, New Haven, Conn., assignor to The Safety Car Heating & Lighting Company, a Corporation of New Jersey. Filed Mar. 12, 1923. Serial No. 624,583. 20 Claims. (Cl. 171—229.)



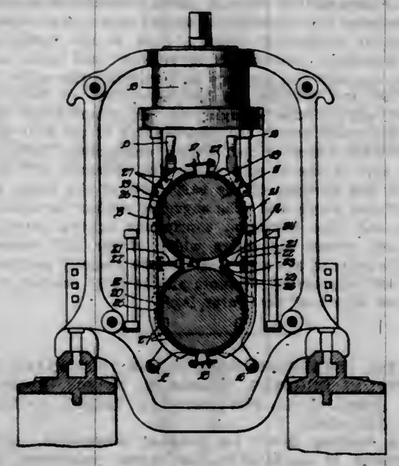
1. In apparatus of the character described, in combination, a generator having a frame member and a rotary current-carrying member, one of said members being provided with a duct therein, regulating means for said generator arranged to control a function of the output of said generator and including a heat responsive device, and means for passing a heat-absorbing medium through said duct to be heated in its passage therethrough, said device being positioned to be affected by the heated medium.

1,622,283. DEAERATOR. RUSSELL C. JONES, Bronxville, N. Y., assignor to The Griscom-Russell Company, New York, N. Y., a Corporation of Delaware. Filed May 24, 1924. Serial No. 715,718. 10 Claims. (Cl. 183—2.5.)



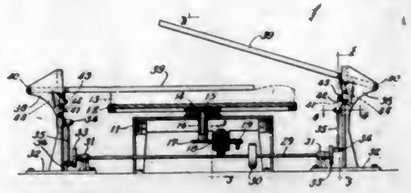
1. Deaerating apparatus of the class described comprising a containing shell for the liquid being treated, means for heating the liquid to expel the gases contained therein, an inlet for admitting untreated liquid, means for accommodating a portion of said incoming liquid and distributing it in the apparatus as a curtain of falling rain, means for distributing that portion of the liquid not accommodated by said first mentioned distributing means, an outlet for permitting escape of the expelled gases and means for directing the stream of evolved gases and vapors thru said falling curtain of incoming liquid to thereby condense said vapors and prevent escape thereof.

1,622,284. DISPLAY BOX. FRANK XAVER LIST, New York, N. Y., assignor to National Card Mounting Company, New York, N. Y., a Corporation of New York. Filed Oct. 12, 1920. Serial No. 416,506. 9 Claims. (Cl. 206—44.)



6. A display carton comprising a container, a cover therefor having an opening to receive an end of the container, when the cover is stood on end, a portion of the bottom of the container being foldably connected with said end of the container, having a part extending above the container and sliding in and out the opening therewith.

1,622,285. CAB-SIGNAL AND TRAIN-CONTROL SYSTEM. MATTHEW H. LOUGHRIDGE, Bogota, N. J. Filed Nov. 18, 1920, Serial No. 424,889, and in Canada Apr. 6, 1920. 106 Claims. (Cl. 246—63.)



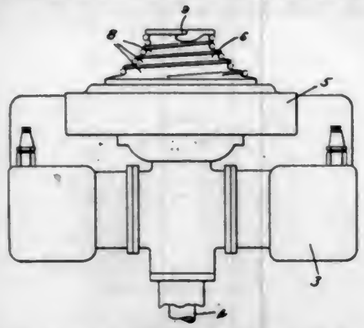
1. In combination, a railway track, a magnet on said track comprising a plurality of ridges, means for magnetizing said ridges by direct current and independent means for magnetizing said ridges by alternating current.

1,622,286. METHOD AND APPARATUS FOR HEATING ROLLS. ROBERT L. MCINTOSH, Indiana Harbor, Ind., and GORDON FOX, Chicago, Ill.; said Fox assignor to Freyn Engineering Company, Chicago, Ill., a Corporation of Maine, and said McIntosh assignor to Inland Steel Company, Chicago, Ill., a Corporation of Delaware. Filed Mar. 3, 1924. Serial No. 696,466. 10 Claims. (Cl. 80—41.)

10. In combination, a roll, a pair of electrical heating elements extending longitudinally of said roll, each of said heating elements comprising a resistor arranged to have a varying heating effect longitudinally of the corresponding element.

1,622,287. MATTRESS-BEATING MACHINE. DAVID MICON, Benton Harbor, Mich. Filed Jan. 27, 1923. Serial No. 615,288. 3 Claims. (Cl. 226—43.)

1. The combination of a table for supporting a mattress or other article, a standard adjacent the table, a beater pivotally mounted on the standard, and means for imparting a reciprocating movement to the beater comprising a crank shaft, a block guided in said standard, a connection between the block and the beater for lifting the beater on the upward movement of the block, and a spring connected to the beater and to the standard for imparting an accelerated downward movement to the beater to beat the mattress.

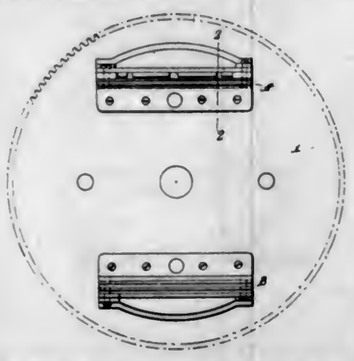


1,622,288. BAFFLE WALL. JOHN E. MUHLFELD, Scarsdale, N. Y. Filed Oct. 26, 1920. Serial No. 419,621. 3 Claims. (Cl. 110—37.)

1. In combination with a furnace combustion chamber having vertically disposed water legs at the sides thereof and spaced water tubes extending longitudinally through said combustion chamber; an arch wall consisting of baffle units positioned in a common horizontal plane extending substantially entirely across the combustion chamber between the vertically disposed water legs, spaced cylindrical supporting elements fixed to the water legs and projecting transversely therefrom, said units each having opposite end portions of identically the same construction and provided on the lower face of each end portion with a tube engaging surface adapted for close seating contact across the entire width of the unit upon one of said tubes or for seating engagement upon the upper side of one of said supporting elements, and each of said end portions of the baffle unit at the upper side thereof and above said tube engaging surface terminating in an end face having a continuous convex curvature extending across the entire width of the unit whereby the side units of the arch wall may be properly positioned upon said supporting elements and in close relation with the side sheets of the water legs.

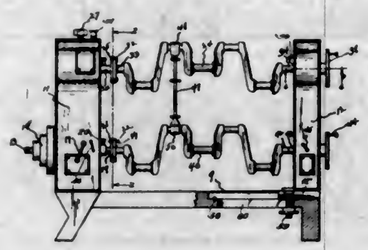
1,622,289. STARTING DEVICE FOR INTERNAL-COMBUSTION ENGINES. VICTOR B. NELSON, Rockford, Ill. Filed July 11, 1924. Serial No. 725,327. 4 Claims. (Cl. 123—185.)

2. A starting device for internal combustion engines comprising, in combination, an engine crankshaft, and a body connected to rotate with said crankshaft, said body having a peripheral groove winding in convolutions thereabout and having at one end means for detachably connecting a rope or cord thereto, whereby a rope attached to the body and wound in said groove may be pulled at its free end for imparting rotary motion to the body, the convolutions at the end of the groove at which the rope is attached to the body being of less radius than that at the opposite end of the groove at which the



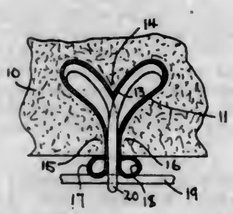
motion is initiated, whereby greater leverage is obtained in imparting the initial rotary motion and said motion will be accelerated with constant lineal pull of the rope.

1,622,290. PAD REST. THEOPHIELD D. OAKLEY, Chicago, Ill., assignor, by mesne assignments, to Defiance Sales Corporation, New York, N. Y., a Corporation of New York. Filed July 10, 1922. Serial No. 574,001. 3 Claims. (Cl. 40—120.)



1. The combination with a pad stand having oppositely inclined sections with intermediate staples for holding pad leaves on one of the sections so that the leaves turn over on to the other section, of an attachment adapted to detachably interlock with the staples for holding the leaves in an upraised position above the latter section.

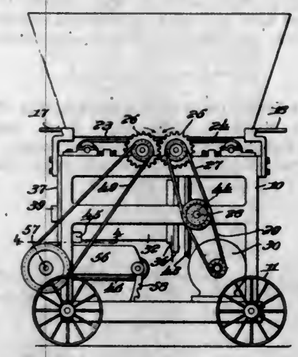
1,622,291. TYPOGRAPHICAL MACHINE. HANS PETERSEN, Davenport, Iowa; Stella Charlotte Petersen, executrix of said Hans Petersen, deceased, assignor to The Linograph Company, Davenport, Iowa, a Corporation of Maine. Filed Mar. 21, 1924. Serial No. 700,921. 6 Claims. (Cl. 199—13.)



1. Assembling mechanism for assembling matrices at two levels and a carrier for casting at three levels in combination with a line delivering channel adapted to deliver matrices assembled in the second level to the carrier in either the second or third levels of the carrier.

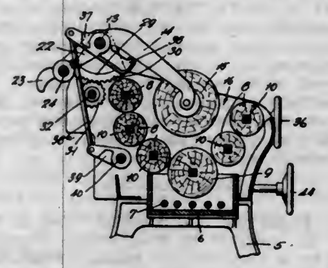
1,622,292. LATHE. LEO RENO, Flint, Mich. Filed Apr. 14, 1924. Serial No. 706,296. 7 Claims. (Cl. 51—166.)

1. A lathe adapted for use in polishing crank shafts, comprising a crank bearing supporting member; means for supporting said crank bearing members; means for supporting rotatably a crank shaft to be polished adjacent said crank bearing member; means for rotating said crank shaft; and polishing means associated with said crank shaft and said crank bearing member for effecting the rotation of said crank bearing member upon the rotation of said crank shaft.



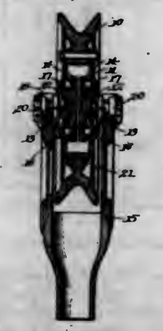
1,622,293. STAPLING DEVICE. JOHN H. ROUTSON, Flint, Mich. Filed Aug. 1, 1924. Serial No. 729,442. 1 Claim. (Cl. 256—54.)

A staple securing means comprising: a tubular member having divergent side walls, the converging edges of said walls being slightly spaced apart, said side walls diverging on an arc, said tubular member opposite said edges being formed re-entrant to provide a spreading portion for engaging between the prongs of a staple driven into the space separating said converging edges, the inner surface of said tubular member at opposite sides of the apex of said re-entrant portion defining curves intersecting in a line determined at the apex of said re-entrant portion, said side walls and said re-entrant portion thus forming a pair of divergent channels, the closed end thereof being substantially semi-circular, said curved surfaces engaging throughout their length the prongs of a staple driven therein, the closed ends of said channels engaging the ends of said prongs for clenching the same.



1,622,294. MIXING MACHINE. JOSEPH SAULNIER, New Bedford, Mass. Filed Oct. 16, 1925. Serial No. 62,866. 10 Claims. (Cl. 83—73.)

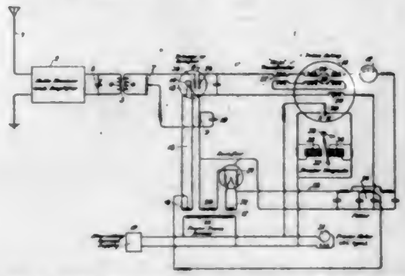
1. A mixing machine of the class described comprising a frame; containers for the ingredients to be mixed; a mixing receptacle comprising flexible walls; means whereby ingredients from said containers will be conveyed to and dumped into one end of said receptacle; a mixing implement revolubly arranged in said receptacle; means to



receive mixed material from said receptacle and convey it to a given point; and means to moisten said mixed material in its transit to a given point.

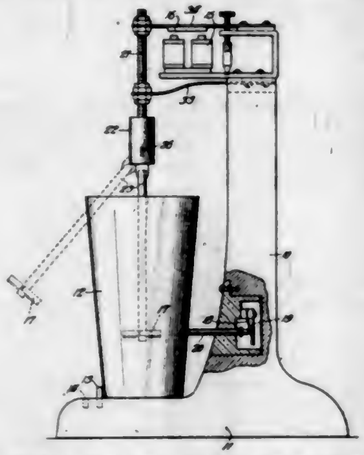
1,622,295. HAT-FELTING MACHINE. FRANCIS SCHAEFFER, Mohnton, Pa. Filed Dec. 26, 1924. Serial No. 758,117. 12 Claims. (Cl. 26—23.)

1. In a felting machine, driven bed rollers and a pounding roller between which the material is to be confined, said pounding roller being of sectional formation, and means for raising and lowering the sections of the pounding roller.



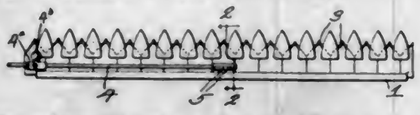
1,622,296. TROLLEY WHEEL. FREDERICK THORNTON, Huntington, W. Va. Continuation in part of application Serial No. 598,813, filed Nov. 3, 1922. This application filed July 31, 1925. Serial No. 47,351. 8 Claims. (Cl. 308—190.)

1. A bearing for trolley wheels comprising, in combination, a wheel rim having discs secured to the opposite sides thereof, said discs presenting lateral grooves providing annular raceways on their inner faces, a pair of



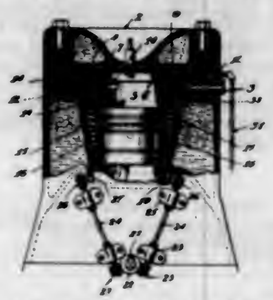
separate non-rotatable race members arranged between said discs, each presenting a lateral groove providing annular raceway complemental to the raceway in one of said discs and balls arranged in said complemental raceways to provide side-thrust anti-friction bearings for the wheel.

1,622,297. RADIO PRINTING-TELEGRAPH SYSTEM. GILBERT S. VERNAM, River Edge, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 29, 1924. Serial No. 758,710. 7 Claims. (Cl. 250—8.)



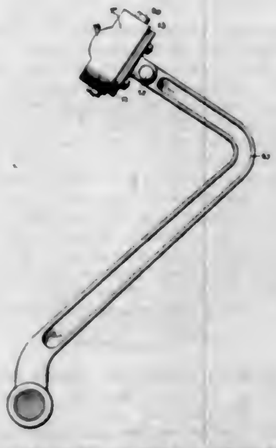
1. In a radio printing-telegraph system, the combination with a radio receiver having means to change the frequency of the printing telegraph impulses to an intermediate frequency above the limits of audibility, of means to amplify the detected impulses, and a printing-telegraph printer containing a polar relay, the armature of which is adapted to control the energization of the magnets of the said printer, and a detector adapted to control the said polar relay by the variation of the space current resulting from the application to the said detector of the intermediate frequency signaling currents.

1,622,298. VIBRATOR MECHANISM. LEO J. WAHL, Sterling, Ill., assignor to Wahl Clipper Corporation, Sterling, Ill., a Corporation of Illinois. Filed June 28, 1926. Serial No. 119,050. 15 Claims. (Cl. 259—113.)



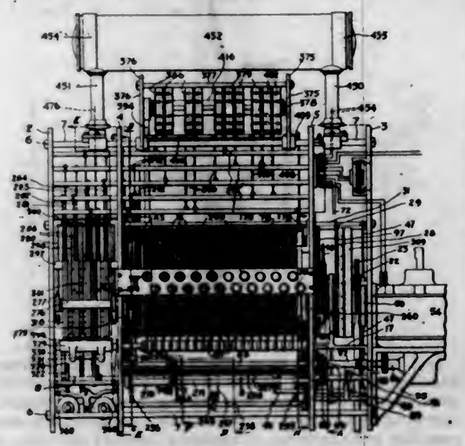
1. A device of the character described comprising a stand having means to support a receptacle, an agitator support adapted to project into said receptacle, means for causing a to-and-fro movement of said agitator, and means for swingingly mounting said agitator support so that said receptacle when being mounted in place or taken away is adapted to engage and move said agitator support toward and away from its operative position.

1,622,299. CUTTER-BAR CONNECTING ROD. JOHN M. WANAMAKER, Trenton, Mo. Filed Jan. 8, 1924. Serial No. 684,992. 1 Claim. (Cl. 56—299.)



The combination with a mowing machine cutter bar, a cutter guard in which said bar is slidably mounted, said cutter bar and guard being substantially horizontally disposed, of a flexible operating rod, one end of said operating rod being rigidly and non-movably connected to the cutter bar substantially centrally thereof, said flexible operating rod inclining upwardly and outwardly towards one end of the cutter bar.

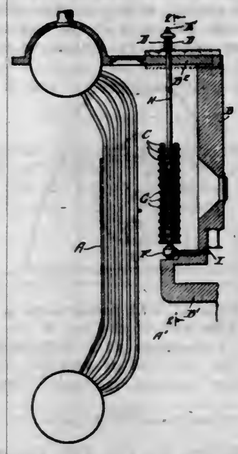
1,622,300. INTERNAL-COMBUSTION ENGINE. WALTER P. WIENS, Peoria, Ill. Filed Nov. 3, 1924. Serial No. 747,448. 11 Claims. (Cl. 123—80.)



1. An internal combustion engine including in its construction an engine block having a tapered bore constituting a seat for a cylinder, including ports leading into said bore, and a tapered cylinder adapted to have a working fit upon the walls in said seat, said cylinder having a cylindrical bore, the walls of said cylinder having ports therein to register with those of the block.

1,622,301. ELECTRICAL SWITCH MECHANISM. CHARLES FRANCIS WOLFORD, Santa Ana, Calif. Filed Oct. 23, 1923. Serial No. 670,290. 1 Claim. (Cl. 200—59.)

A switch mechanism comprising a pivoted support, a base plate fixed thereon, a pair of lower outer contacts fixed to said base plate, a lower intermediate spring controlled contact projecting from the upper face of said plate and arranged between said pair of contacts, each of said fixed contacts in a normally open circuit, said spring controlled contact permanent in circuit with a source of electrical energy, said contacts insulated from each other, a foot actuated circuit opening and closing element pivoted upon said plate and associated with said fixed contacts, a conductor secured to and insulated from the lower face of said element, an upper pair of outer contacts, an upper intermediate contact, said upper contacts fixedly secured to and having permanent electrical connection with said conductor, said intermediate contact in electrical engagement with said spring controlled contact, said upper outer contacts selectively engaging with the lower outer contacts on the pivoting movement of said element to electrically couple with the said other contacts that circuit in which is disposed the engaged outer contact to close such circuit, and means interposed between the ends of said element and plate for normally maintaining the lower outer contacts spaced from the upper outer contacts.

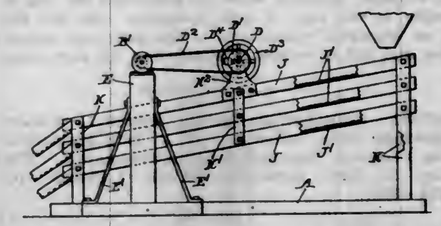


1,622,302. SCALE. GEORGE R. WOOD, Dayton, Ohio, assignor to Dayton Scale Company, Dayton, Ohio, a Corporation of New Jersey. Original application filed July 19, 1919, Serial No. 312,096, and in Canada July 18, 1919. Divided and this application filed Mar. 4, 1924. Serial No. 696,764. 25 Claims. (Cl. 265—5.)

1. In a computing scale, the combination with means adapted for connection to the platform thereof, of a rotary device operatively constructed and arranged to be rotated by said means when an article is placed upon the scale, said device including a pair of rotating members, both of which are rotated by the weight of an applied load, the periphery of one of said members being toothed, means for locking said toothed member, and means intermediate of said members and effecting a yielding connection therebetween for the purpose of permitting rotation of the other member when the toothed member is locked.

1,622,303. HANGER BOLT FOR BOILER SETTINGS. ROBERT H. WYLD, Hempstead, and WALTER F. KENNAN, Jr., Pelham, N. Y., assignors to Power Specialty Company, New York, N. Y., a Corporation of New York. Filed May 15, 1923. Serial No. 639,056. 2 Claims. (Cl. 122—510.)

1. In a boiler setting comprising a hanger bolt located in a high temperature portion of the setting, the improvement which consists in a sleeve surrounding the bolt with an air space between the bolt and the sleeve which is in communication at its upper and lower

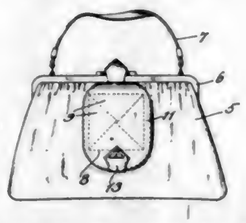


ends with the atmosphere, whereby the bolt is cooled by air drawn through said air space by the chimney action of the latter.

1,622,304. PROCESS OF MANUFACTURING STORAGE BATTERIES. CHESTER M. ANGELL, Chicago Ill., assignor to Vesta Battery Corporation, Chicago, Ill., a Corporation of Illinois. Filed Nov. 5, 1923. Serial No. 672,990. 2 Claims. (Cl. 136—176.)

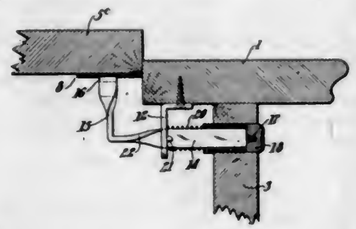
1. In a process of making storage batteries, the steps which consist in drying the surfaces of freshly pasted plates, then burning the plates into groups in which the plates assume their final structural relation of positive and negative plates respectively, then assembling such groups of positive and negative plates in their usual relation and forming the assemblies in the otherwise finished battery.

1,622,305. SCREEN. JOHN BLAND, Chicago, Ill. Filed Nov. 13, 1924. Serial No. 749,584. 19 Claims. (Cl. 209—347.)



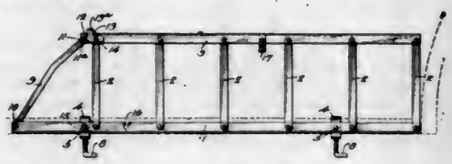
1. In a screen device, a screen and screen frame including transversely opposite holding parts other than springs for said screen, said holding parts being rigidly mounted and held against longitudinal movement in combination with means for bending and vibrating all of such screen frame whereby said screen is vibrated.

1,622,306. LADY'S HAND BAG. MAURICE BORFUSS, Brooklyn, N. Y., assignor to Morgenstern & Brosseau, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 26, 1926. Serial No. 97,541. 1 Claim. (Cl. 150—28.)



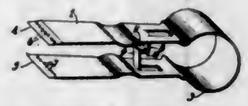
In combination with a handbag a pocket adapted to receive an article and having a base wall secured to the outer side of one of the side walls of the bag adjacent

the bag frame, and relatively foldable collapsible side walls adapted when folded to extend over and confine the article in said pocket, a flap flexibly attached at one of its ends to the side wall of the bag at one side of the pocket and adapted to extend over and conceal



the collapsed walls of said pocket, and a fastener tab secured to the side wall of the bag at the opposite side of the pocket to cooperate with complementary fastening means on the free end of said flap and releasably secure the latter against movement relative to the bag wall.

1,622,307. LIFTING DEVICE FOR COVERS. DANIEL H. CHASON, Elizabeth, N. J., assignor to The Singer Manufacturing Company, Elizabeth, N. J., a Corporation of New Jersey. Filed Aug. 12, 1925. Serial No. 49,681. 4 Claims. (Cl. 268—1.)

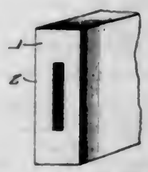


1. The combination with a receptacle having an apertured top and a cover closing the aperture in such top, of a cover-lifting device free of connection with such cover comprising a manually operated rod slidably and rotatably mounted below the receptacle top and accessible at the side of such receptacle, said rod having an angularly related arm at its inner end adapted when said rod is rotated to engage and lift such cover.

1,622,308. LUGGAGE CARRIER. MELVIN L. CLELAND, Hastings, Nebr., assignor to G. A. Roth Manufacturing Company, Hastings, Nebr., a Corporation. Filed Apr. 15, 1926. Serial No. 102,275. 7 Claims. (Cl. 224—29.)

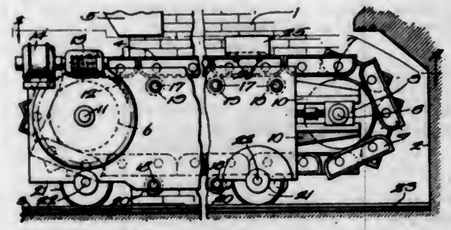
1. A luggage carrier including an upper bar, a lower bar, links connecting the bars and pivotally attached thereto to admit of the upper bar being moved toward and away from the lower bar, a locking bar pivotally connected to the lower bar, a lateral stud in the swinging end of the locking bar, the upper bar being formed with a keyhole slot adapted to detachably receive the stud, means for locking the stud in engagement with the contracted end of the key hole slot to hold the parts in an extended position, the locking bar being adapted to be swung downwardly along side of the lower bar when the parts are collapsed and the lower bar being formed with a notch to receive the stud.

1,622,309. DATE PITTER. LESTER C. DE FOREST, Westfield, N. J., assignor to Hills Brothers Company, Inc., a Corporation of New York. Filed Feb. 17, 1926. Serial No. 88,803. 2 Claims. (Cl. 146—31.)



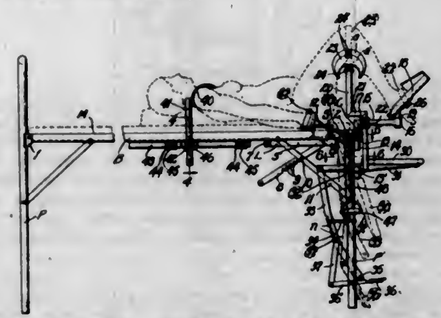
1. A tool for pitting dates comprising a pair of outwardly spring-pressed jaws, having straight, elongated cutting edges at the ends thereof, the said cutting edges being parallel to each other and adapted to be moved and held in contact with each other.

1,622,310. VEHICLE WHEEL CONSTRUCTION. LEWIS FINE, Philadelphia, Pa., assignor, by mesne assignments, to Budd Wheel Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 2, 1919. Serial No. 269,289. 4 Claims. (Cl. 301—9.)



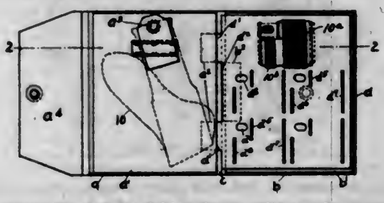
1. A wheel of the class described, comprising the combination of a hub, having a portion of non-circular cross section, a wheel disc having a central opening therein and a portion of non-circular cross section surrounding said opening, a retaining member screwed on said hub and clamping said disc thereto, and a locking member carried by said retaining member and engaging said disc to prevent rotation relative thereto.

1,622,311. DEFORMABLE EXPANSION-CONTRACTION JOINT. ALBERT C. FISCHER, Chicago, Ill. Filed Feb. 20, 1926. Serial No. 89,773. 7 Claims. (Cl. 94—18.)



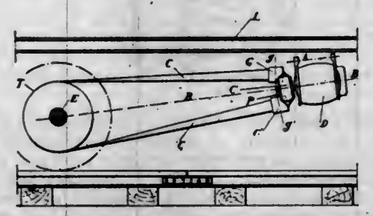
1. A deformable expansion-contraction joint, comprising a plastic strip having internal longitudinally divided non-adhering vertical walls, said walls adapted to expand and contract for increasing or decreasing the transverse dimension of the strip.

1,622,312. CLINKER-REMOVING DEV... WILLIAM GAUGHRIN, Chicago, Ill. Filed Feb. 12, 1926. Serial No. 87,816. 4 Claims. (Cl. 110—40.)



1. Apparatus for removing clinkers from the side walls of furnaces including an endless traveling conveyor having upper and lower stretches and a clinker removing member upon said conveyor, the conveyor and clinker removing member having interengaging holding formations interacting to prevent separation of said conveyor and member when said member is in the upper stretch of the conveyor to enable said member to effect removal of clinker and permitting said member to fall from the conveyor upon reversal in the direction of travel of the holding formation upon the conveyor.

1,622,313. OBSTETRICAL BED. GEORGE GELLHORN, St. Louis, Mo. Filed June 13, 1925. Serial No. 36,919. 1 Claim. (Cl. 45—50.)

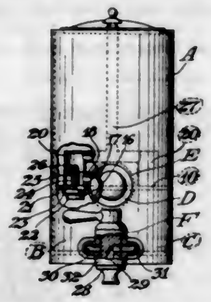


An obstetric bed comprising head and foot frames, a bed-bottom supported thereby, a pair of brackets adjustably mounted in spaced relation on the foot frame, each of said brackets being provided with a pair of sockets in spaced relation, a foot-rest revolubly mounted in one of said sockets and a limb-support adjustably mounted in the other socket, said limb support comprising a standard and a saddle movably mounted on the upper end thereof, the vertical axis of said saddle being offset from the socket carrying the standard.

1,622,314. REVISABLE SAMPLE FOLDER. WILLIAM H. GOSCH, Reading, Pa., assignor to The Nolde and Horst Company, Reading, Pa., a Corporation of Pennsylvania. Filed Aug. 4, 1925. Serial No. 48,161. 1 Claim. (Cl. 211—34.)

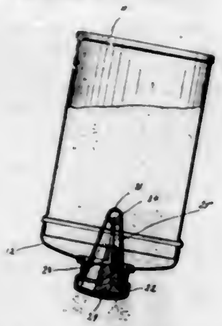
A revisable sample folder for textile goods, comprising a folding envelope having hinged-together covers the adjacent edges of which are provided with tongue-receiving pockets staggerdly arranged and one cover of which is provided on its inner face with article-attaching means; and a swatch card leaf made up of a backing sheet, and a facing sheet having swatch-card engaging pockets and provided with reversely bendable hinge-tongues removably engaged in said staggerdly-arranged cover pockets.

1,622,315. BELT-DRIVING DEVICE FOR RAILWAY-CARRIAGE DYNAMOS. HENRI GUILLOU, Montrouge, France. Filed Jan. 28, 1925, Serial No. 5,384, and in France Jan. 28, 1924. 6 Claims. (Cl. 105—102.)



1. In a drive for a dynamo connected to a railroad car or the like having trucks, the combination of means for connecting said dynamo to said car independently of said trucks, secondary revoluble driving means for said dynamo spaced from the shaft of said dynamo, said secondary revoluble driving means being supported from said car independently of said trucks, primary revoluble driving means mounted on a truck and connected to and adapted to operate said secondary driving means, said secondary driving means being wholly free from any connection with said trucks save for their connection with said primary driving means, the respective axes of revolution of said primary driving means and of said secondary driving means being non-parallel.

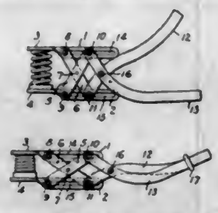
1,622,316. CLIP FOR PENCILS, PENHOLDERS, AND LIKE ARTICLES. BENJAMIN W. HANLE, Elizabeth, N. J., assignor to Eagle Pencil Company, New York, N. Y., a Corporation of Delaware. Filed July 24, 1926. Serial No. 124,578. 4 Claims. (Cl. 24—11.)



1. In a device of the character described, the combination with a cap provided with an opening in its periphery, of a tempered spring secured within the cap and having a bent portion extending out through the opening, said bent portion merging into a second portion extending substantially parallel to and out of contact with the periphery of the cap, and a rust-proof pocket-clip element secured to and covering the exterior surfaces of said second portion of the spring.

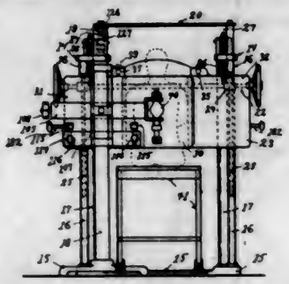
1,622,317. AUTOMATIC MEASURING DEVICE FOR LIQUIDS. NORMAN B. IRVING, Philadelphia, Pa. Filed Oct. 21, 1926. Serial No. 143,165. 2 Claims. (Cl. 221—110.)

2. The combination with an urn provided with a false bottom, of a plurality of measuring compartments positioned beneath the said false bottom, a valve seat formed in said false bottom, a housing formed over said valve seat, a plunger valve slidably positioned in said housing; means for communicating said urn with the said measuring compartments for filling the same, by the outward movement of said plunger valve; buoyantly operable means for communicating said measuring compartments, when being filled, with the atmosphere, whereby said compartments may be shut off from the atmosphere when filled and the measured quantity of liquid retained in said compartments; means for communicating said measuring compartments, when being filled, with the atmosphere by the inward movement of said plunger valve; and means for causing the optional discharge of any of said compartments.



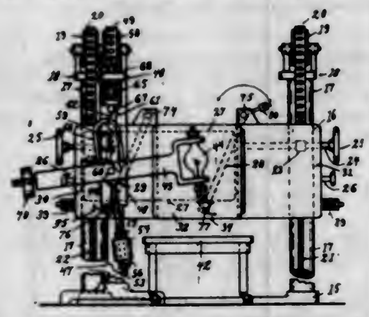
1,622,318. RECEPTACLE. ANDRE JANER, Flushing, N. Y. Filed Aug. 12, 1925. Serial No. 49,690. 9 Claims. (Cl. 221—64.)

1. A receptacle for talcum powder and the like comprising a body and a cover having a perforated portion through which the contents of the receptacle is adapted to be discharged, in combination with a weighted member the upper end of which is adapted to play over and scrape the entire inner surface of said perforated portion, a support carried by the receptacle for the weighted member, and means for loosely connecting the other end of said weighted member to said support.



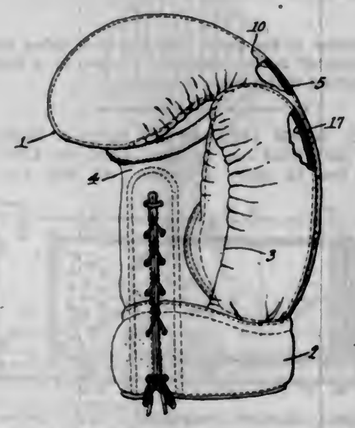
1,622,319. DEVICE FOR COMPRESSING VALVE SPRINGS OF INTERNAL-COMBUSTION ENGINES AND FOR LIKE PURPOSES. HENRY CAMPBELL JENKINS, Hove, England. Filed May 4, 1926, Serial No. 106,595, and in Great Britain Dec. 7, 1925. 3 Claims. (Cl. 29—86.3.)

2. A device for compressing valve springs of internal-combustion engines and for like purposes, comprising arms provided with bifurcated jaws moving parallel to one another, curved crossed handles detachably pivoted to



said arms, said handles being pivoted to one another at their point of intersection.

1,622,320. RADIOGRAPHIC APPARATUS. JOHN ROBERT KELLEY, Covington, Ky. Filed Oct. 16, 1925. Serial No. 62,922. 53 Claims. (Cl. 250—34.)

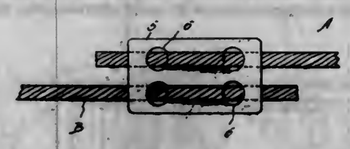


1. A radiographic apparatus comprising in combination with a source of radiant energy, and shields spaced apart and impervious to radiant energy, a plate holder supporting member pendulously supported and adjustable in rear of said shields, a plate holder mounted upon said supporting member and movable therewith relative to said shields, and a space pervious to radiant energy intermediate of said shields, means to release said supporting member from one fixed position near one extremity of its pendulous movement, means to latch said supporting member after a period of movement to another fixed position near the opposite extremity of its pendulous movement, and an energizing member adjustable into engagement with said supporting member to insure a substantially uniform predetermined pendulous movement of said supporting member.

1,622,321. RADIOGRAPHIC APPARATUS. JOHN ROBERT KELLEY, Covington, Ky. Filed May 17, 1926. Serial No. 109,610. 9 Claims. (Cl. 250—34.)

1. A radiographic apparatus comprising sensitive plates to be radiographically exposed, an X-ray generator, a pivotally mounted support for said generator having a pendulous movement to adjust the position of said generator, and means operable to positively lock said support and generator alternately at opposite extremities of the pendulous movement of said support to thereby adjust said X-ray generator from one position to another position without exciting vibratory movement in said generator or its supporting members.

1,622,322. BOXING GLOVE. DANIEL J. KENNEDY, Yonkers, N. Y. Filed Aug. 23, 1926. Serial No. 131,032. 2 Claims. (Cl. 2—18.)

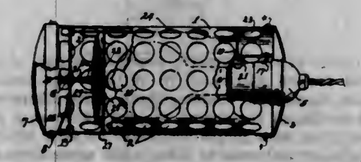


1. A boxing glove comprising a casing and an inflatable cushion in the casing and extended longitudinally of the glove, the inner wall of the cushion being flexible and inelastic, and the outer wall of the cushion being flexible and expansible, whereby when the cushion is inflated, the glove will be given a longitudinal curvature, the end of the cushion being turned to overlie the inner wall of the cushion, and a flexible inelastic connection between said end of the cushion and the inner wall thereof.

1,622,323. MOTHPROOF BAG. MARY E. KUIK, Racine, Wis. Filed Sept. 28, 1926. Serial No. 138,261. 3 Claims. (Cl. 206—7.)

1. A garment protecting bag of the character specified having a reenforcing strip attached to an end portion of the back and adapted to have end portions of the sides and front folded thereover.

1,622,324. LINE-SPLICING DEVICE. PHILIP H. LETTRE, North Attleboro, Mass. Filed July 9, 1926. Serial No. 121,387. 1 Claim. (Cl. 24—129.)

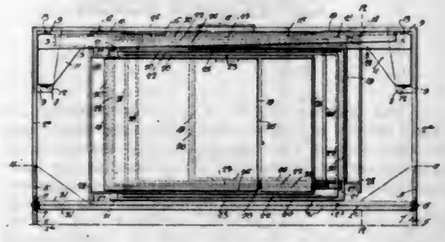


In a line splicing device of the class described, a flat plate member of substantially rectangular shape, said plate being formed with spaced pairs of longitudinally aligned end receiving openings, teeth formed at the inner opposed sides of the longitudinally aligned openings, one end of the line adapted to pass through one pair of longitudinally aligned openings, the adjacent end of the line passing through the other pair of longitudinally aligned openings, said teeth biting into the respective end portions of the line for securing the same against displacement from the openings.

1,622,325. MOLDING OF PIPES AND LIKE HOLLOW ARTICLES. MARCEL LEVY, Geneva, Switzerland, assignor to "Prodor" Fabrique de Produits Organiques S. A., Canton of Geneva, Switzerland, a Corporation. Original application filed Nov. 2, 1922, Serial No. 598,651, and in Switzerland Nov. 16, 1921. Divided and this application filed July 22, 1924. Serial No. 727,575. 4 Claims. (Cl. 18—48.)

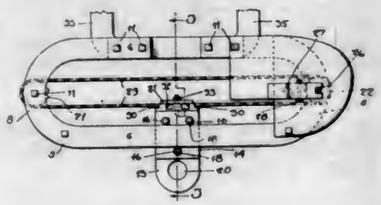
1. The method of molding hollow concrete articles from hot concretes which comprises casting them in molds with cores, removing any parts of said molds and cores which impede the contraction of the concrete on cooling after the concrete has set, thereby allowing the free contraction of said concrete.

1,622,326. ELECTRIC BED WARMER. ANSON T. LISTER, Wichita, Kans. Filed Mar. 1, 1926. Serial No. 91,535. 2 Claims. (Cl. 219—45.)



1. In an electric bed warmer, the combination of a perforated housing and a lamp concentrically supported by the end of the housing and positioned axially therein, of a partition spaced a short distance from the opposite end, an annular thermostat having flexible sides and being filled with ether or like substance as reciprocating means for the sides, a screw centrally connected to the thermostat, a pivotally connected bar engaging with the screw, a spring to tension the bar toward the thermostat, a bell crank pivotally connected to the lamp, a rod connecting said bell crank with the free end of the bar as actuating means therefor when energized by the thermostat, contact members in the insulation of the lamp, a pin slidably engaging through the insulation as circuit closing means for the contact members, said pin being pivotally connected to the bell crank and actuated thereby, all as, and for the purpose described.

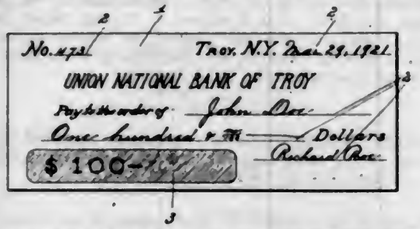
1,622,327. CHAIR TABLE SET. BENJAMIN S. LIVINGOOD, Lebanon, Pa., assignor to Livingood Manufacturing Corporation, Lebanon, Pa., a Corporation of Pennsylvania. Filed Nov. 15, 1923. Serial No. 674,928. 1 Claim. (Cl. 190—12.)



A table comprising two flanged top sections hinged together and adapted to be folded so that the edges of the said flanges meet to form a closed casing, each of said

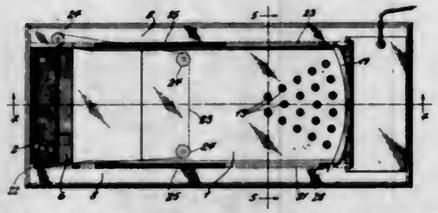
sections being adapted for reception of at least one folding chair, an overhanging flange on each of said sections at their connected edges under which said chair is adapted to lie, and legs secured at each of the outer corners

of said sections and adapted to fold into said sections in a position at the outer edges of said sections overlying said chairs, said overhanging flanges with the said legs constituting means for retaining the chairs within the sections which they respectively occupy.



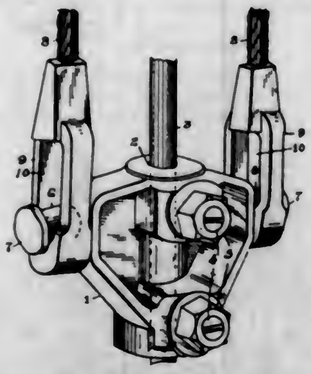
1,622,328. TRACTOR HITCH. JOHN P. LIVINGSTON, Clyde, N. Y. Filed July 31, 1926. Serial No. 126,181. 1 Claim. (Cl. 280—33.10.)

In a device of the character described, a pair of spaced elongated frames positioned in vertical alinement with each other, a movable tongue slidably carried between the parallel portion of the spaced elongated frames, a pair of complementary wear plates positioned on each side of the movable tongue, adapted to ride on the inner faces of the elongated frames, rollers revolubly carried on each side of the movable tongue adapted to engage the lateral edge of the elongated frames, staggered teeth formed on the movable tongue, opposite sprocket wheels carried between the arcuate portions of the elongated frames, one of said sprocket wheels being mounted on a vertical shaft and the other sprocket wheel carried by one of the elongated frame spacing bolts, a sprocket chain passing around the sprocket wheels, and clamped between the teeth on the movable tongue and the clamping plate, a hand wheel mounted on the upper end of the vertical shaft for imparting motion to the sprocket chain and movable tongue, a connecting U-shaped frame carried between the other parallel portion of the elongated frames, adapted to connect the device to a tractor or the like and a guard plate of a concaved curvature positioned above one of the sprocket wheels and having an opening for the reception of the vertical shaft.



1,622,329. METHOD OF PROTECTING CHECKS. CHARLES A. MACCORDY, Albany, N. Y., assignor to MacCordy Master-Check Corporation, Syracuse, N. Y., a Corporation of New York. Filed Apr. 7, 1921. Serial No. 459,251. 9 Claims. (Cl. 283—9.)

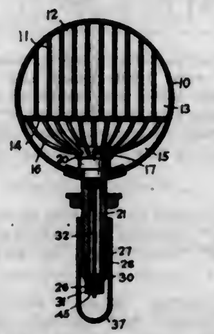
1. A blank for a negotiable instrument or the like, having thereon appropriately designated spaces for the entry of the usual data, the said blank having, further, a delineated space which is more permeable to light than



the remainder of the sheet, the said space being adapted to be disrupted by the formation thereon of a plurality of designating characters.

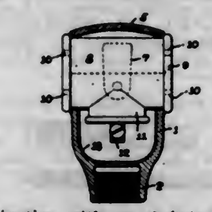
1,622,330. GAME APPARATUS. DAVID C. MADER, St. Louis, Mo. Filed Jan. 26, 1925, Serial No. 4,759. Renewed Jan. 19, 1927. 7 Claims. (Cl. 273—123.)

2. A game apparatus comprising a table, devices supported by the table for indicating the results of successful plays, positions defined upon the top of the table as positions of successful plays, balls arranged to be rolled along the top of the table to said positions in making successful plays, means for operating a corresponding one of said devices when a ball enters one of said positions thereby indicating the making of a successful play, and a device for moving the balls from said positions along the table top toward the players.



1,622,331. POLISHED-ROD GRIP. JOSEPH R. MAHAN, Toledo, Ohio, assignor to The National Supply Company, Toledo, Ohio, a Corporation of Ohio. Filed Dec. 24, 1926. Serial No. 156,856. 1 Claim. (Cl. 255—18.)

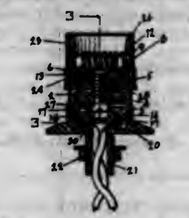
In a polished rod operating device, a pair of suspension means each having vertically elongated eyes, a body having a vertical hole therein for a polished rod, means carried by the body for clamping the rod to the body, horizontal trunnions projecting from opposite sides of the body and seated in the lower ends of the said eyes, and heads on the trunnions beyond the outer faces of the



suspension means, the vertical dimension of heads being not greater than the width of the eyes and the horizontal dimension of the heads being greater than the width of the eyes and not greater than the length thereof, the heads overlapping the suspension means at both sides of the eyes.

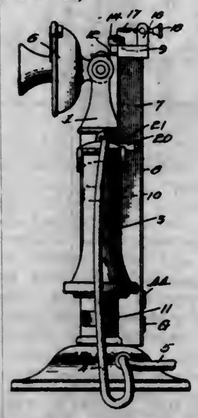
1,622,332. INNER-TIRE VALVE. DOMENICO MARRAZZO, Brooklyn, N. Y. Filed Oct. 7, 1925. Serial No. 60,948. 10 Claims. (Cl. 152—12.)

1. A valve for an inner tube comprising a valve cylinder, a closure for said cylinder containing a plurality of openings, flexible tubes forming air passages from said openings, and a bodily movable member in said cylinder for controlling the opening and closing of all of said openings simultaneously.



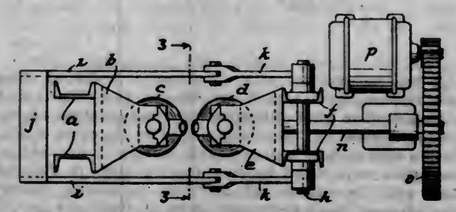
1,622,333. CASING FOR ELECTRICAL FITTINGS. WILLIAM F. MESCHENMOSER, New Dorp, N. Y.; Julia Jeanette Meschenmoser, executrix of said William F. Meschenmoser, deceased, assignor to Russell & Stoll Company, New York, N. Y., a Corporation of New York. Filed Feb. 24, 1925. Serial No. 11,039. 2 Claims. (Cl. 247—1.)

1. In combination with an electrical fitting having a body with binding posts extending downwardly therefrom and provided with end walls each having openings therein for receiving the jacks of a plug, of a casing for receiving and holding said fitting, said casing comprising a hollow body part and a detachable cover, said casing having annular openings receiving and supporting the body of the fitting with the ends thereof only exposed to view and the binding posts extending into the body of the casing, said detacnable cover engaging said fitting for holding the latter in said body part and cover and having portions forming parts of the walls of said annular openings.



1,622,334. AUTOMOBILE CIGAR AND CIGARETTE LIGHTER. BENJAMIN L. METZGER, Toledo, Ohio. Filed Nov. 30, 1925. Serial No. 72,184. 8 Claims. (Cl. 219—32.)

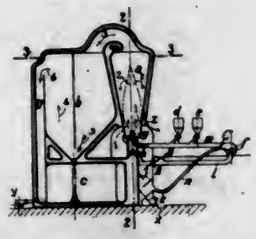
5. In an electric cigar and cigarette lighter, a shell, a pair of terminals connected to a source of supply of an electric current located in the shell, a second shell telescopingly supported by the first named shell, a resistance element located in the second named shell and having contacts connected to its ends adapted to make contact with the electric terminals in the first named shell, a spring pressed disc connected to the first named shell, the ends of the contacts of the second named shell being



located within the said disc, the first named shell having means for uncovering the contacts when the second named shell is moved inwardly with respect to the first named shell.

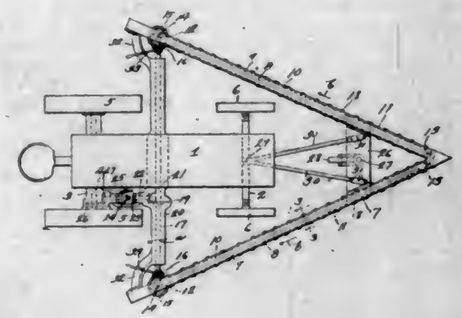
1,622,335. RADIO RECEIVER ATTACHMENT FOR TELEPHONES. GEORGE F. MITCHELL, Washington, D. C. Filed Oct. 3, 1925. Serial No. 60,845. 13 Claims. (Cl. 179—2.)

1. A radio receiver attachment for telephones comprising, in combination, a telephone stand, a support adapted to carry radio receiving apparatus, a contact member extending from said support, and spring arms carried by said support for engagement with opposite sides of said telephone stand for securing said support with respect to said telephone stand with said contact member in operative engagement with the upper extremity of said telephone stand for establishing electrical connection therewith.



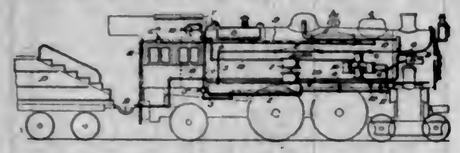
1,622,336. APPARATUS FOR MANUFACTURING CONTINUOUS TUBING FROM SEPARATE REELS OF SKELP. JOHN W. MOON, Butler, Pa., assignor to Fretz-Moon Tube Company, Butler, Pa., a Corporation of Pennsylvania. Filed Feb. 27, 1925. Serial No. 12,086. 8 Claims. (Cl. 78—83.)

1. In an apparatus for manufacturing a continuous length of tubing from separate reels of skelp, the combi-



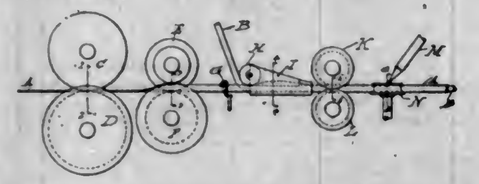
nation with a furnace through which the skelp is adapted to travel, means to form the skelp into tubing and to continuously draw the skelp through the furnace, means at the rear of the furnace to hold reels of skelp, a welding contrivance, a reeling-out machine adapted to engage the skelp from the reels and unwind it from the reels for delivery to the furnace, and driving means for said machine adapted to operate said machine to unwind said skelp at a higher rate of speed than that at which it is pulled through the furnace and adapted to be stopped to allow the rear end of the skelp from one reel to be welded to the front end of the skelp from another reel.

1,622,337. KILN FOR THE BURNING OF CEMENT. CARL NASKE, Berlin-Charlottenburg, Germany. Filed Feb. 7, 1925. Serial No. 7,629, and in Germany Jan. 8, 1924. 4 Claims. (Cl. 222—3.)



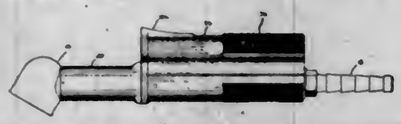
1. In a calcining kiln for cement and the like, a burning and calcining shaft, a single conduit for introducing solid cement material in finely divided condition, air and fuel from below into the bottom thereof, and substantially in an upward direction, means adapted to introduce secondary air into said bottom portion in close vicinity of the material-air-and-fuel introducing means, discharging means communicating with the bottom portion below the said fuel-air-and-material introducing means and a settling chamber communicating with the top portion of the shaft.

1,622,338. SNOWPLOW. CLAUS R. NEWHAUS, Benson, Nebr. Filed Mar. 8, 1926. Serial No. 93,166. 3 Claims. (Cl. 37—44.)



1. The combination with a tractor, a V-shaped snow plow disposed forwardly of said tractor, the sides of said V-shaped snow plow diverging to opposite sides of the tractor, endless belt conveyors carried by the sides of said plow, a transversely disposed shaft carried by the tractor, gear drive connections between the transversely disposed shaft and the endless belt conveyors, a driving connection between the transversely disposed shaft and one of the axles of the tractor and clutch means for controlling the operation of the transversely disposed shaft.

1,622,339. APPARATUS FOR CHANGING THE WATER IN BOILERS. SPENCER OTIS, Chicago, Ill., assignor to The Locomotive Terminal Improvement Company, Chicago, Ill., a Corporation of Maine. Filed July 22, 1920. Serial No. 398,249. 5 Claims. (Cl. 122—379.)

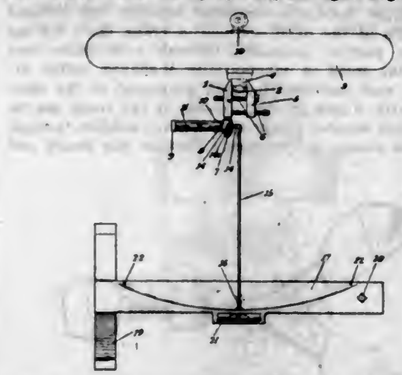


1. In combination with a boiler, means for releasing air below the water level therein and thereby bringing precipitate of the boiler into suspension and causing it to rise to an upper stratum of the water; and a skimmer adapted to permit the water of such boiler with its suspended sediment to blow off from near the surface of the water.

1,622,340. PROCESS OF CURING RUBBER HOSE AND THE LIKE. CHARLES H. PAEPLOW, Buffalo, N. Y. Filed Feb. 17, 1926. Serial No. 88,837. 10 Claims. (Cl. 18—55.)

1. The process of curing tubing or the like containing rubber, consisting of bending a sheet of metal in solid form around the tubing to determine the outside diameter thereof, subjecting the interior of the tubing to pressure and vulcanizing the rubber of said tubing while the same is pressed by interior pressure against said metal.

1,622,341. COMBINED AIR NOZZLE AND GAUGE. MAITLAND STORM PLATT, Toronto, Ontario, Canada. Filed Sept. 3, 1926. Serial No. 133,421. 9 Claims. (Cl. 152—11.5.)

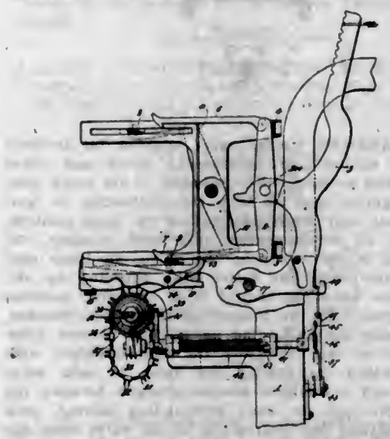


1. A device of the kind described comprising a sleeve having an air inlet and an opening in the wall thereof, an air pressure indicating gauge mounted adjacent said sleeve and operatively connected with said opening, a valve closing said inlet, a hollow piston slidable in said sleeve adapted to close said opening and open said valve when telescoped within said sleeve, and an air chuck carried by said piston.

1,622,342. DEVICE FOR TESTING KNUCKLE-PIN CASTERS. GEORGE W. PRATHER, Santa Cruz, Calif. Filed July 13, 1926. Serial No. 122,151. 6 Claims. (Cl. 33—203.)

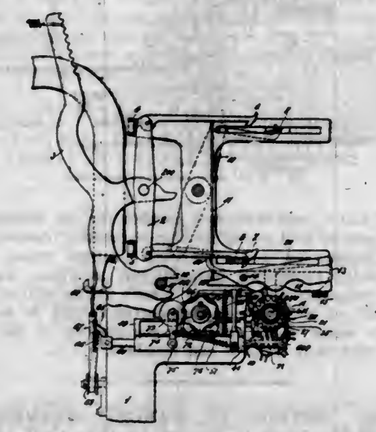
1. A device for testing the caster of a knuckle pin, said pin being associated with a wheel spindle which projects laterally therefrom, said device including a gage rod to project laterally and outwardly from the spindle, means for detachably but rigidly securing one end of the rod in connection with the spindle, a horizontal table adapted to be arranged so that the other end of the rod when said rod is connected to the spindle will overhang the table at both limits of swinging movement of the rod

with the turning of the pin, a level mounted on said connecting means and projecting at right angles to the



rod, and means between said level and connecting means for tilting the level relative to said connecting means.

1,622,343. HARROW TOOTH. LOUIS REIMERS and NELS ERICKSON, Dalton, Nebr. Filed Oct. 8, 1926. Serial No. 140,296. 2 Claims. (Cl. 55—37.)

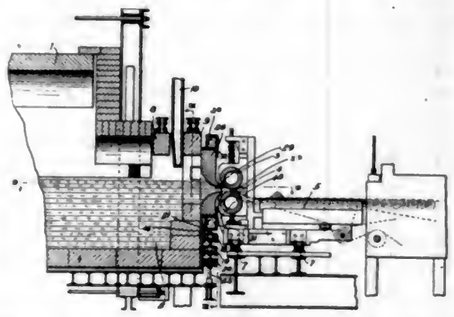


1. A harrow tooth of the class described including a blade having a plane upper surface inclining downwardly to one longitudinal side edge, a plane upright side surface and a concave bottom surface, the upper and bottom surfaces merging into a cutting edge, a shank rising from one end of the blade.

1,622,344. PATTERN MECHANISM FOR DOBBIES. JOHN REYNOLDS, New Bedford, Mass., assignor to Butler Mill, New Bedford, Mass., a Corporation of Massachusetts. Filed Mar. 21, 1923. Serial No. 626,529. 7 Claims. (Cl. 139—328.)

1. In a dobby mechanism adapted to weaving both a cross-wise pattern and a lengthwise pattern and having pattern chains, a shaft carrying a cylinder adapted to carry one of said chains and a sleeve concentric therewith adapted to carry another of said chains, means for continuously operating said sleeve, and means located on said shaft for temporarily and periodically connecting said shaft with said sleeve.

1,622,345. PATTERN MECHANISM FOR DOBBIES. JOHN REYNOLDS, New Bedford, Mass., assignor to Butler Mill, New Bedford, Mass., a Corporation of Massachusetts. Filed Oct. 1, 1925. Serial No. 59,767. 9 Claims. (Cl. 139—323.)



1. In a dobby, a constantly running pattern cylinder carrying a chain, each link of said chain being provided with pins adapted to operate a harness mechanism, a second pattern cylinder mounted independently of but co-axially with said first pattern cylinder, said second cylinder also carrying a chain having links some of which are flat, said flat links being segregated, and others of which also segregated are provided with harness mechanism operating pins and means for temporarily connecting said second cylinder with said constantly operating cylinder whereby said second cylinder may be given periodically a continuous movement to advance its chain whereby the pins thereon will operate said harness mechanism to cause the weaving of the crosswise border, and independent means for giving said second cylinder a further step by step movement whereby said chain thereon will be advanced step by step and said flat links will pass in proximity to said harness mechanism and the number of said flat links will control the distance between the crosswise borders.

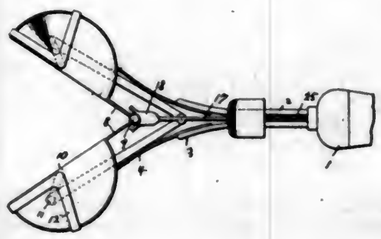
1,622,346. GLASS-TANK CONSTRUCTION. JOHN ROTHERAM, Creighton, and ALBERT E. EVANS, Pittsburgh, Pa., assignors to Pittsburgh Plate Glass Company, a Corporation of Pennsylvania. Filed July 20, 1926. Serial No. 123,628. 15 Claims. (Cl. 49—33.)

2. The combination with a tank adapted to carry a bath of molten glass, and rolling means at one side thereof for forming a sheet or ribbon of glass, of a clay outlet member intermediate the glass bath and the rolling means provided with an outlet slot for conducting the glass to the rolling means, a pair of hollow metal beams extending along the upper and lower edges of the outlet member and adapted to support such member, and means for circulating a cooling fluid through said beams.

11. In combination with a tank adapted to carry a

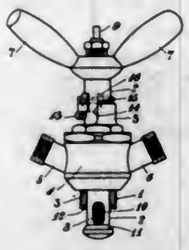
bath of molten glass and having a drawing extension or forehearth at its front end of less height than the body of the tank, and rolling means at one side for forming a sheet or ribbon of glass, of a removable clay outlet member intermediate the end of the forehearth and the rolling means provided with an outlet slot and constituting the upper portion of the front wall of the fore-

hearth, and a removable roof member for the forehearth to the rear of said outlet member extending transversely of the forehearth, and comprising a metal frame with downwardly projecting inclined end members, and a set of wedge shape refractory blocks fitting against the lower side of the frame and supported therein by reason of their wedge shape and the engagement of the end blocks with said inclined end members.



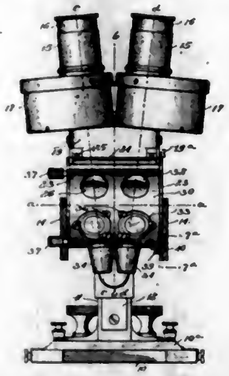
1,622,347. METHOD OF MAKING ORNAMENTAL CANDLES. JESSE B. RHOADS, La Jolla, Calif. Filed Mar. 16, 1926. Serial No. 95,111. 10 Claims. (Cl. 18—48.)

1. The method for making a candle with an integral supporting base, which method consists in forming a wax candle with an elongated end of enlarged diameter, heating the same to a temperature sufficient to render the wax flexible, and forcing the lowermost part of the enlarged end inwardly to cause the wax to be displaced laterally radially without restraining such lateral displacement.



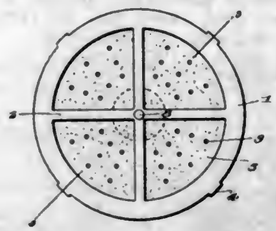
1,622,348. CREAM SCOOP. JOHN C. RITTER, Portland, Oreg. Filed Apr. 1, 1925, Serial No. 19,928. Renewed Feb. 10, 1927. 1 Claim. (Cl. 107—48.)

In an ice cream cone disher, a handle, a slotted shank having one end received in the handle and having its opposite end forked, a flat spring secured to each arm of the fork, a two-part conical mold, outstanding lugs on the sides of the mold to which the respective flat springs are connected, flat wings extending from the confronting inner edges of the mold sections having their outer ends notched and rounded to provide interengaging knuckles and a pintle connecting said knuckles, each of said wings having one of its corners provided with a finger extension arranged beneath the reduced end of each of the mold sections, a crank shaft having a straight portion journaled through each finger and entering the mold, a substantially V-shaped cutter arranged in each mold section and connected to the mentioned shafts, a link pivoted to each of the crank shafts, an actuating member comprising a plate slidable through the slotted shank, spring means between the shank and



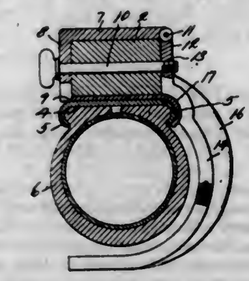
actuating member for holding the latter normally in one position with respect to the former, a post on the actuating member to which the free ends of the links are pivoted, said actuating member having an outer flattened and widened portion whose outer end is notched, a thumb piece fixed on the actuating member and guided through the slotted shank, and the notched end of the actuating member being disposed in a line with but normally away from the pivoted end of the wing members.

1,622,349. SPARK-PLUG VALVE FOR INTERNAL-COMBUSTION MOTORS. CARL AUGUST RUDQVIST, Kungsangen, Sweden, assignor to J. & C. G. Bolinders Mek. Verkstadts Aktiebolag, Stockholm, Sweden. Filed Oct. 5, 1923, Serial No. 666,835, and in Sweden Oct. 14, 1922. 1 Claim. (Cl. 123,145.)



In an adjustable ignitor valve adapted for internal combustion motors and movable to inner and outer positions, and keeping, when adjusted in its outer position, the ignitor shut off from the combustion or ignition chamber, and, when adjusted in its inner position, the ignitor in communication with said chamber, the combination of two seats in the valve, an inner seat and an outer seat, the latter seat affording an airtight closure when the ignitor is in its inner position communicating with the combustion or ignition chamber, and the inner seat affording an airtight closure when the ignitor is shut off from the said chamber, with means provided for locking the valve in both valve positions, and a resilient device arranged between the ignitor valve and the fixed surrounding thereof, such device permitting free contraction of the valve when the latter is shut off from the combustion or ignition chamber and is cooled from the outside.

1,622,350. BINOCULAR MICROSCOPE. JOHN C. SABEL, Rochester, N. Y., assignor to Bausch & Lomb Optical Company, Rochester, N. Y., a Corporation of New York. Filed June 8, 1926. Serial No. 114,529. 13 Claims. (Cl. 88—39.)

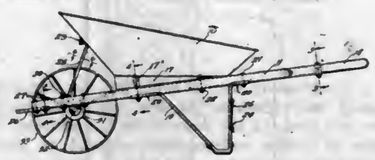


1. A binocular microscope comprising a plurality of pairs of objectives, and a carrier for said objectives arranged for rotation about an axis lying substantially in the plane of the binocular axes at equal angles with the latter, for adjustably positioning each of said pairs of objectives, selectively, for use in the binocular axes.

1,622,351. FRYING-PAN COVER. BARBARA M. SALMON, Severna Park, Md. Filed Nov. 30, 1926. Serial No. 151,779. 9 Claims. (Cl. 53—7.)

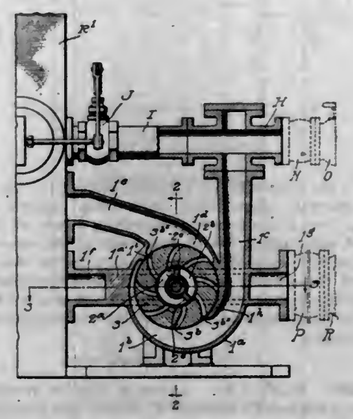
1. A cover for frying utensils provided with an absorbent element arranged to have its under side disposed to absorb and thereby prevent grease from spattering on the stove or on the person using the cooking utensil.

1,622,352. AUTOMOBILE LIFTING JACK. HENRY J. SCHMITT and JOHN LITTLE, Omaha, Nebr. Filed Feb. 20, 1926. Serial No. 89,707. 3 Claims. (Cl. 254—94.)



1. The combination with an automobile wheel felly, a demountable rim mounted on said felly, a tire carried by said demountable rim, of a detachable jack carried by said felly, said jack comprising a plate engaging the inner periphery of the felly, an arm carried by said plate and engaging one side of the felly, an arm hingedly connected to the plate and engaging the other side of the felly, ends of said arms engaging the demountable rim, a removable bolt extending through the arms and the felly, and a downwardly and outwardly curved arm carried by the hinged arm and terminating below the tire in spaced relation thereto.

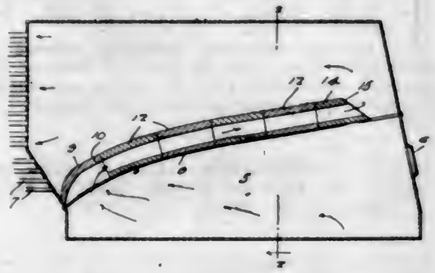
1,622,353. COMPOSITION USED FOR MARKING ON CLOTH AND THE LIKE. DAVID H. SHAPIRO, Montreal, Quebec, Canada. Filed June 14, 1926. Serial No. 116,016. 2 Claims. (Cl. 134—34.)



2. A marking composition comprising paraffine wax approximately 35%, carnauba wax approximately 15%, soapstone approximately 40%, stearic acid approximately 10%, and a small percentage of colouring material.

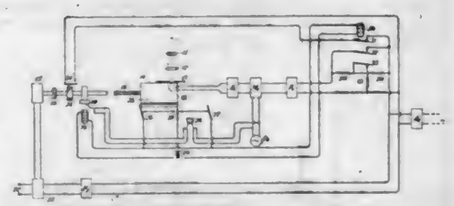
1,622,354. WHEELBARROW. IRVING R. SMITH, Wauwatosa, Wis. Filed May 24, 1923. Serial No. 641,105. 5 Claims. (Cl. 280—52.)

1. A metal wheelbarrow comprising a hopper, a pair of longitudinally extending arms formed of sheet metal bent to the desired shape, a channel iron connecting said arms at their forward ends, braces connecting said arms to said hopper, channel bars disposed between said hopper and arms, channel shaped legs secured to said arms, handles in the rearward ends of said arms and means for securing said handles in place.



1,622,355. CENTRIFUGAL VACUUM PUMP. KARL G. SOMMER, Battle Creek, Mich., assignor to American Steam Pump Company, Battle Creek, Mich., a Corporation of Michigan. Filed Mar. 23, 1925. Serial No. 17,632. 15 Claims. (Cl. 230—14.)

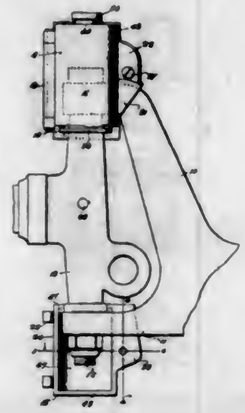
1. In a centrifugal vacuum pump or compressor a casing having a rotor chamber, a water outlet, an air outlet, a water inlet and an air inlet; a shaft extending



through said chamber; and a rotor mounted on said shaft within said chamber, and having passages open at both inner and outer ends and adapted to alternately register with the water inlet and air inlet in each revolution of the rotor.

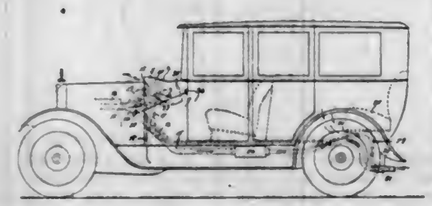
1,622,356. FIRE BOX FOR BOILERS. ROBERT MARVEN SPENCER, Waycross, Ga. Filed July 20, 1926. Serial No. 123,708. 2 Claims. (Cl. 110—87.)

1. In combination with a boiler fire box, longitudinally extending rods between the fire containing portion of the fire box and the fire flues thereof, a plurality of arch sections of hollow construction mounted on said rods, each section including a plurality of blocks, the intermediate blocks being hollow and open ended, and the front block having one open end adjacent the next intermediate block and an open bottom, and the other end block having open ends one of which is beveled.



1,622,357. ELECTRICAL TRANSMITTING SYSTEM. ELLIOT M. STAPLES, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed May 1, 1925. Serial No. 27,253. 6 Claims. (Cl. 179—78.)

1. In the operation of a transmission line, the method of protecting neighboring lines from inductive interference, which consists in introducing a loss at the sending end and cutting out an equal loss at the receiving end when certain excessive electromotive forces may be applied at the sending end, whereby the transmission level on the line is kept below a normal limit, and at the same time the transmission equivalent of the complete system is unchanged.

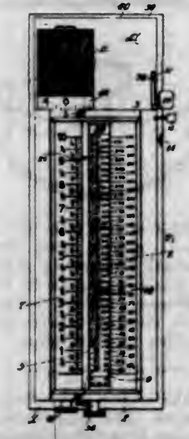


1,622,358. DUST CAP. JACOB M. STONE, Breckenridge, Tex., assignor to Leonore F. Stone, Breckenridge, Tex. Filed July 18, 1923. Serial No. 652,381. 2 Claims. (Cl. 280—96.1.)

1. A dust cap for a steering knuckle comprising complementary shells provided with registering recesses at one end adapted to receive the end of a steering knuckle, said shells having registering recesses in their longitu-

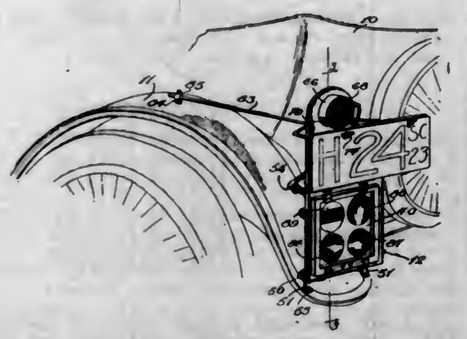
dinal meeting edges adapted to surround the end of an axle, and means for clamping said shells in closed position.

1,622,359. VENTILATING AND HEATING SYSTEM FOR MOTOR VEHICLES. DENTON K. SWARTWOUT, Cleveland, Ohio. Filed Nov. 23, 1921. Serial No. 517,206. 6 Claims. (Cl. 237—12.3.)



1. In combination with an enclosed motor vehicle, means utilizing the exhaust gases from the motor for heating air that is discharged into the vehicle and positively withdrawing air from the vehicle.

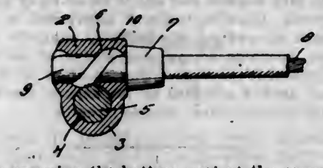
1,622,360. MEASURING AND COMPUTING MACHINE. FERDINAND J. TILLMAN, St. Louis, Mo., assignor to Yard-O-Meter Corporation, St. Louis, Mo. Filed Sept. 14, 1920. Serial No. 410,176. 16 Claims. (Cl. 33—133.)



5. In a measuring machine, a worm shaft bearing a carriage, a measuring scale co-operable with said carriage, a pair of friction rollers one of which operates said shaft, severing means for operating on the material after being passed between said rollers, and locking means for operating said severing means and co-operable with one of said rollers for preventing said rollers from being further operated after said severing means has operated.

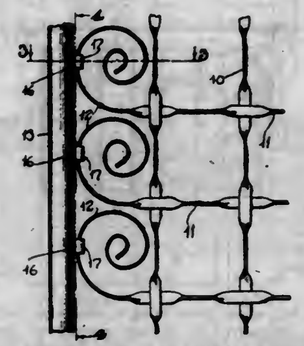
8. In a measuring machine, the combination of a feed roller for co-operation with the material to be measured, a quantity scale, an indicating carriage operated by said

roller and movable along said scale, and a scale carried by said roller, said scale bearing characters which are comparative with said quantity scale.



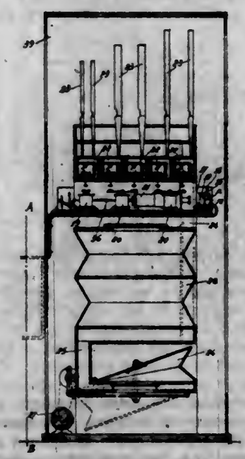
1,622,361. AUTOMOBILE SIGNAL. SAMUEL ADAMS WALL and EDWIN ANDERSON BOYD, Greenville, S. C. Filed Feb. 21, 1923. Serial No. 620,396. 2 Claims. (Cl. 177—329.)

1. A signal for vehicles comprising an upright open wire frame, a plate secured on said frame and provided with signal areas, lamps carried by the plate in the signal areas of the same, a door hinged on the frame having transparent fields registering with respective areas of the plate, arched rods extending rearwardly from the top and bottom of said frame, braces extending between and rigidly secured to said arched rods, and means connected with the braces and the arched rods for securing the frame on a vehicle.



1,622,362. BATTERY TERMINAL. ALBERT W. WEIMER and JACOB SMITH, Geneseo, Ill.; said Weimer assignor to Walter O. Parsons, Geneseo, Ill. Filed Jan. 17, 1925, Serial No. 3,112. Renewed Nov. 12, 1926. 1 Claim. (Cl. 173—259.)

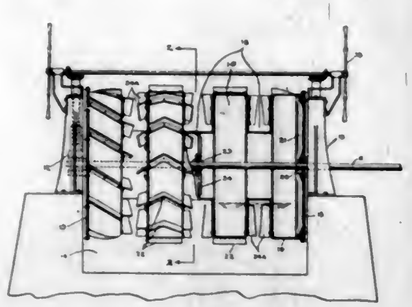
A terminal for storage batteries comprising a sleeve, a lateral extension formed thereon and provided with a bore adapted to be disposed over a battery terminal post, the inner wall of said sleeve being provided with a spiral groove, said groove communicating with the bore of the extension, a socket member secured on one end of a conductor cable, a reduced shank extending from the closed end of said socket member and adapted to be disposed within said sleeve, and a spiral rib formed on said shank and adapted for engagement with said spiral groove for locking the shank in said sleeve, a portion of the



spiral rib engaging the battery post at the communication of the bore of the extension with the groove for simultaneously locking the shank in engagement with the post.

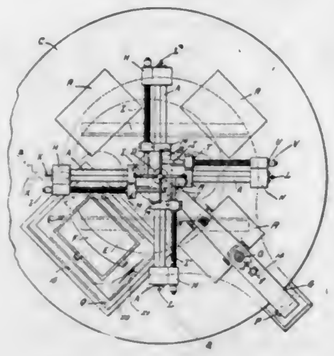
1,622,363. GRILLE. JOHN A. WULFTANGE, Hamilton, Ohio. Filed Aug. 21, 1925. Serial No. 51,619. 8 Claims. (Cl. 189—82.)

1. A grille having a body portion and an edge member, a plurality of means for yieldingly connecting the body portion and edge member together whereby the body member may yield relative to the edge member in a direction parallel to the edge member and also yield resiliently toward and from the edge member.



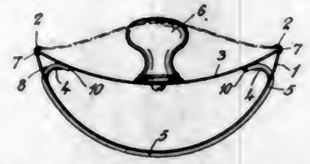
1,622,364. COMBINED ELECTRIC PIANOFORTE AND ORGAN. D ANGELO BARBIERI, Milan, Italy. Filed Jan. 4, 1923, Serial No. 610,681, and in Italy Jan. 4, 1922. 6 Claims. (Cl. 84—172.)

1. In combination a piano including a keyboard, an organ, an auxiliary keyboard only serving for playing the organ, a pedal counterbase keyboard applied to the



piano, electric solenoids for actuating the air valves of the pipes of the organ, electric circuits connecting the keys of the different keyboards to said solenoids, contact devices inserted in said circuits and apt to be acted by the keys of the keyboards, movable contacts interposed in said circuits, means connecting said movable contacts in groups and double solenoids acting said groups of movable contacts in such a manner as either to allow or to prevent the contact devices actuated by the keys of the keyboards closing the corresponding electric circuits.

1,622,365. WATER-POWER WHEEL. GEORGE ERASMUS BROOKS, Toronto, Ontario, Canada. Filed Aug. 16, 1926. Serial No. 129,564. 7 Claims. (Cl. 170—124.)

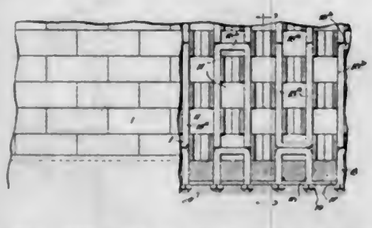


1. A water wheel comprising a rotatable floating drum having a plurality of spaced peripheral grooves and blades adjacently disposed in said grooves in staggered formation adapted for deflecting the water striking one blade to and upon the blade next adjacently disposed.

1,622,366. ELECTRICALLY-CONTROLLED REPRODUCING SCRIBER. EMILE BUENO, Hericourt, France. Filed Mar. 3, 1922, Serial No. 540,809, and in France Mar. 11, 1921. 6 Claims. (Cl. 33—18.)

3. An apparatus of the class described, comprising a circular plate, means for rotating said plate, said plate being formed with opposed pairs of defined spaces to receive the negative and the respective monochrome negatives, a tracer movable radially of the plate, and reproducers movable radially of the plate in exact correspondence with the movement of the tracer.

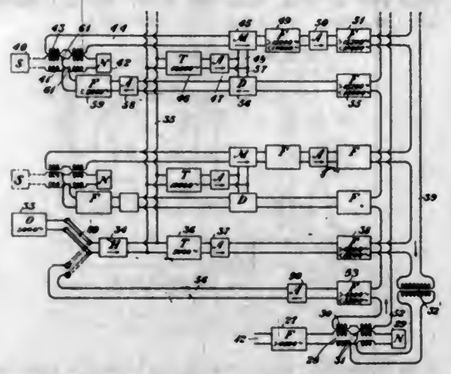
1,622,367. BLOTTER. CORNELIUS BULL, Sagesund, near Tvedestrand, Norway. Filed July 9, 1925, Serial No. 42,572, and in Norway Feb. 10, 1925. 6 Claims. (Cl. 120—24.)



1. In blotters made of two plate springs clamping the blotting paper sheets between them, the combination of a stronger plate spring arranged in such manner in relation to a weaker plate spring as to lock the latter in either of two different positions, in one of which the blotting papers are clamped between said springs, and in the other of which they are loose.

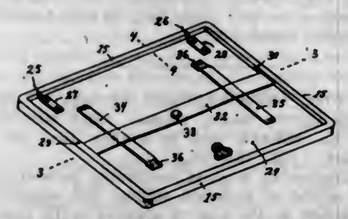
1,622,368. SPINNING PROCESS. HENRI LOUIS JOSEPH CHAVASSIEU, Izieux, France, assignor to La Société Pour la Fabrication de la Soie Rhodiaseta, Siege Social, Paris, France. Original application filed Mar. 7, 1925, Serial No. 13,861, and in France Jan. 20, 1925. Divided and this application filed Mar. 26, 1926. Serial No. 97,773. 14 Claims. (Cl. 18—54.)

1. A spinning process, comprising the steps of dissolving a cellulose ether or ester in a solution of a sulfocyanic derivative, and coagulating the resultant solution in the form of threads or films.



1,622,369. BUILDING BLOCK AND WALL. NILS E. CLEMENTSON, Chicago, Ill. Filed Aug. 4, 1926. Serial No. 127,031. 6 Claims. (Cl. 72—41.)

1. A wall constructed of blocks respectively provided with a vertical space extending therethrough and with vertical recesses at the ends thereof substantially in line with and of substantially the same width as said space, in combination with metal members comprising a cross element and parallel elements thereto, and a footing consisting of concrete, a plate embedded therein and a plurality of said metal members secured in said plate and partially embedded in said concrete, said space and said recesses in said blocks and said cross element and said parallel elements in said metal members so related that when said cross element is in said space of a block in a course of blocks said blocks are anchored to said footing, and when said cross element is in a space in a block and said parallel elements are in said space in adjacent blocks of a course said adjacent blocks are bound together.



1,622,370. MULTIPLE-ANTENNA SYSTEM FOR RADIOCOMMUNICATION. LLOYD ESPENSCHIED, Queens, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 3, 1921. Serial No. 498,187. 8 Claims. (Cl. 250—11.)

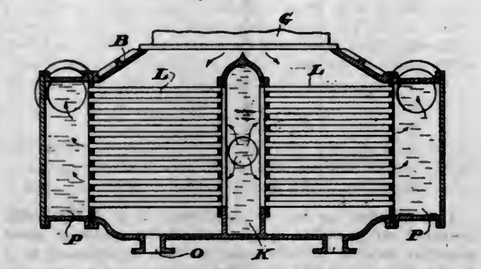
1. A plurality of antennæ assembled to constitute an array for directional operation, a low frequency central station, low frequency conductors extending therefrom to the respective antennæ of the array, frequency changing means at the respective antennæ for co-operation between

said low frequency conductors and said antennæ operating at high frequency, and means to adjust the currents for phase and amplitude at each of the antennæ.

1,622,371. KASSETTE. GEORGE EDWARD GEISE, Covington, Ky. Filed Jan. 15, 1925. Serial No. 2,639. 2 Claims. (Cl. 250—34.)

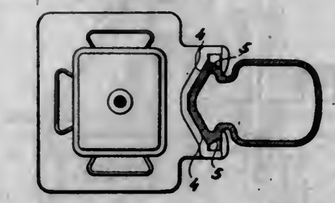
1. A kassette comprising a frame having a peripheral flange, and a face pervious to X-rays and impervious to light rays, a back plate impervious to light rays to detachably fit said frame in rear of a sensitive plate and adapted to move into engagement with said frame in planes parallel with the face plate of said frame, a cross-bar of resilient material pivotally attached to the rear face of said back near the center thereof and adapted to have its opposite ends detachably engaged with said frame, and a pair of transverse bars of resilient material located upon opposite sides of the pivot of said cross-bar and transversely to said cross-bar when engaged with said frame, each of said transverse bars being rigidly attached at one end to said back plate and curved outwardly from said back plate through its central portion and bearing rigidly at one end and slidingly at its opposite end upon the rear face of said back plate, said cross-bar serving to resiliently engage the curved central portions of said transverse bars when the ends of said cross-bar are engaged with said frame to simultaneously apply and substantially equally distribute pressure at four substantially equidistant points where the ends of said transverse bars engage said back plate to yieldingly hold said back plate in position with reference to said frame and a contained sensitive plate and intensifying member contained therein.

1,622,372. PROCESS FOR THE MANUFACTURE OF HYDROCYANIC ACID. WILHELM GLUUD, Dortmund-Eving, Germany. Filed Apr. 18, 1924, Serial No. 707,473, and in Germany Apr. 23, 1923. 10 Claims. (Cl. 23—151.)



1. The process of manufacturing hydrocyanic acid, which comprises treating finely divided material comprising HSCN with oxygen at a temperature high enough to oxidize combined sulphur.

1,622,373. LAMP. IGNATZ GONYK, Ljubljana, Yugoslavia. Filed June 17, 1926, Serial No. 116,616, and in Germany July 27, 1925. 10 Claims. (Cl. 67—65.)

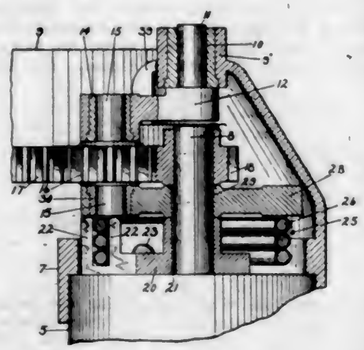


1. A blank for forming a lamp frame consisting of a strip of sheet-metal having longitudinal cuts extending from the central portion towards its opposite ends, and an integral enlarged disk portion on one end having peripheral prongs.

1,622,374. SURFACE CONDENSER. JOHN E. GOODWILLIE, Brooklyn, N. Y., assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Apr. 11, 1925. Serial No. 22,249. 2 Claims. (Cl. 257—48.)

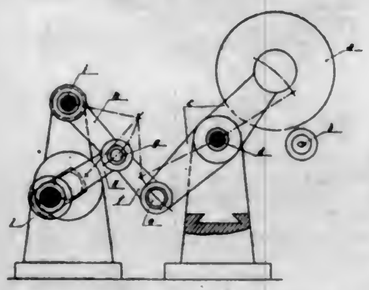
1. A single pass surface condenser, comprising a casing, water tubes extending into said casing transverse to the direction of steam flow, and a central inlet associated with said water tubes for supplying water to said tubes in substantially equal quantities and in opposite directions along said casing.

1,622,375. HEAD-SPINDLE-STOCK GUIDE. JOSEF DAHMEN, Dusseldorf, Germany, assignor to Dusseldorfer Werk-Zeugmaschinen-Fabrik und Eisengiesserei Habersang & Zinzen, G. m. b. H., Dusseldorf-Oberbilk, Germany. Filed June 3, 1925, Serial No. 34,621, and in Germany June 12, 1924. 2 Claims. (Cl. 308—3.)



1. In a head-stock guide for drilling and boring machines, a frame, a stationary hollow integral guide structure on the frame comprising a body portion having at one side thereof a guide rib of angular form in cross-section and of less width than said body portion, said rib presenting a transversely flat front face of restricted width, a pair of opposite side faces extending outwardly and rearwardly at oblique angles to said front face, and two rear faces extending inwardly and rearwardly at oblique angles to said side faces, said rear faces having wall extensions forming a neck connection between the body portion and rib, and a head spindle-stock provided with a guide sleeve slidably embracing said front, side and rear faces of the rib and having an angular internal form conforming thereto.

1,622,376. APPARATUS FOR REFRIGERATING SYSTEMS. RANSOM W. DAVENPORT, Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 8, 1925. Serial No. 54,867. 14 Claims. (Cl. 62—126.)

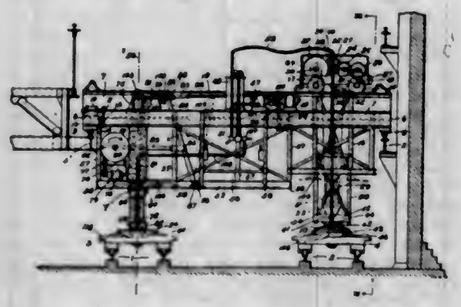


4. A member for use as an element in a mechanically operated refrigerating system comprising plates of sheet material secured to each other in face engagement in a fluid-tight manner and providing therebetween an elongate passage differential in size.

1,622,377. ENGINE STARTER. CLARENCE F. GILCHRIST, Toledo, Ohio, assignor, by mesne assignments, to The Electric Auto-Lite Company, Toledo, Ohio, a Corporation of Ohio. Filed Oct. 3, 1919, Serial No. 328,113. Renewed Aug. 15, 1924. 5 Claims. (Cl. 290—38.)

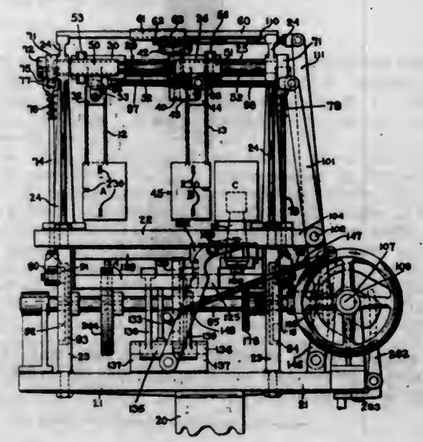
1. In an engine starting mechanism, the combination of a frame, a driving member rotatably mounted in said frame, an electro-magnetic device comprising co-operating field and armature elements, an arm rotatably mounted in said frame, a stub shaft carried by one of said elements and said arm and transmission means on said stub shaft in engagement with said driving member and adapted to be moved into operative connection with a rotatable element of said engine when said electromagnetic device is energized.

1,622,378. ROD-CIGARETTE MACHINE. PAUL LOUIS GRAUPNER, Dresden, Germany, assignor to "Universelle" Cigarettenmaschinen-Fabrik, J. C. Müller & Co. Filed Feb. 21, 1925, Serial No. 10,847, and in Germany Mar. 28, 1924. 2 Claims. (Cl. 131—37.)



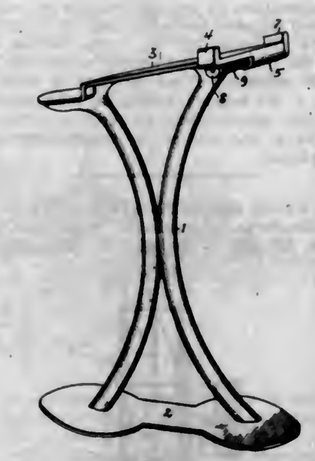
2. In a cutting device for a rod cigarette machine, the combination with a circular cutter, of a double armed lever carrying said cutter and swinging around and reciprocating on its axis in the direction of the rod, a crank arm, a pitman, a link connected to the free end of said lever and a rock lever swinging on a fixed axis, both said rock lever and link being pivotally connected to said crank arm by said pitman, said rock lever and link, when in extension of one another, being substantially at a right angle both to said double armed lever and said crank arm.

1,622,379. LUMINESCENT PRODUCT. ANTOINE AUGUSTE GUNTZ, Nancy, France. Filed May 8, 1922, Serial No. 559,416, and in France June 10, 1921. 3 Claims. (Cl. 184—47.)



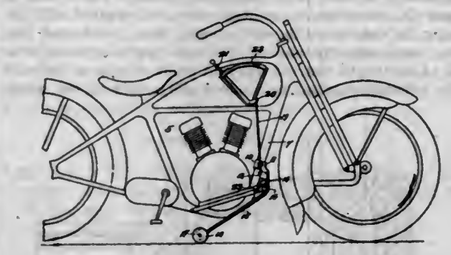
3. A luminescent product containing between 1% to 30% by weight of cadmium sulfide, and another luminescent sulfide of the zinc or alkaline earth type, such sulfides being in a crystalline condition.

1,622,380. APPARATUS FOR HANDLING GLASS SHEETS. HALBERT K. HITCHCOCK, Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company, a Corporation of Pennsylvania. Filed June 9, 1926. Serial No. 114,643. 8 Claims. (Cl. 214—87.)



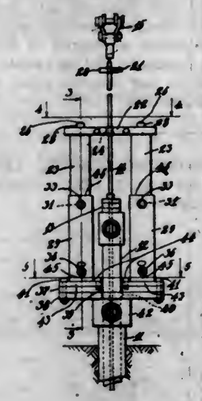
1. In combination in apparatus for moving glass sheets to and from a surfacing table and inverting them, which consists of a vacuum frame mounted above the table for vertical movement toward and from the table and for movement around a horisontal axis to invert the frame, power means for moving the frame vertically, and automatic means operated by said power means for causing the vacuum frame to rotate about said axis to bring it to inverted position when the frame has moved upward a predetermined distance.

1,622,381. LABELING MACHINE. CARL HOLM and ARVID H. JOHNSON, Worcester, Mass. Filed Mar. 18, 1923. Serial No. 624,839. 62 Claims. (Cl. 216—54.)



1. A box labeling machine comprising a support for a box, a label holder, pickers arranged to apply gum to a surface of a label in said holder and transport the label to a position adjacent a box and mechanism cooperating therewith including a presser arranged to move towards the box and to press substantially the entire area of the label directly onto the box in a direction normal to the surface thereof.

1,622,382. FOOT REST FOR SHOE-SHINING STANDS. ROBERT J. JAUCH, Fort Wayne, Ind. Filed Sept. 24, 1924. Serial No. 739,588. 1 Claim. (Cl. 15—267.)

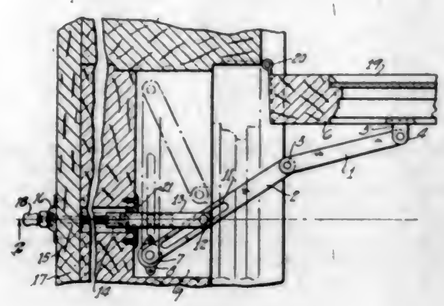


A toe clamping device for a foot-rest consisting of an immovable jaw projecting upwardly at one side of said rest; a pendant lug on the foot-rest at the side thereof opposite said immovable jaw; and a spring pressed movable member slidably mounted in said lug having a jaw disposed opposite the former jaw and having also a head with a flat face bearing against the lower face of said rest operable to prevent turning movement of said movable member.

1,622,383. MOTOR-CYCLE STAND. CLARENCE W. JESKE, Walnut Grove, Minn. Filed Mar. 12, 1926. Serial No. 94,225. 1 Claim. (Cl. 208—81.)

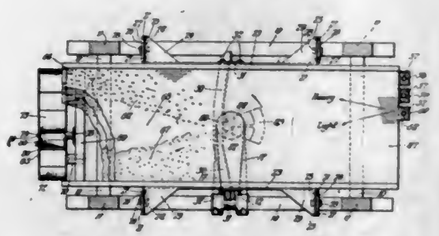
In a structure of the class described, a block, a clamp adapted to be connected therewith and adapted to be attached to a frame bar of the machine to be supported, a shaft mounted for oscillation upon said block, stub-axles carried by the end portions of the block, intermeshing gearing between said shaft and said stub-axles, a pair of arms connected to said stub axles, and rollers on the outer ends of the arms.

1,622,384. PUMPING APPARATUS. GEORGE KAMMERER, Whittier, and FRANK HILL, Los Angeles, Calif. Filed Mar. 10, 1926. Serial No. 93,641. 3 Claims. (Cl. 103—202.)



2. A pumping apparatus comprising cylinders provided with air vents, plungers in the cylinders, a crosshead supported on the plungers, means releasable by weight imposed on the crosshead to hold each of the plungers elevated in its cylinder, and means operable by downward motion of a polish rod to impose the weight of the polish rod and its suspended load upon the crosshead.

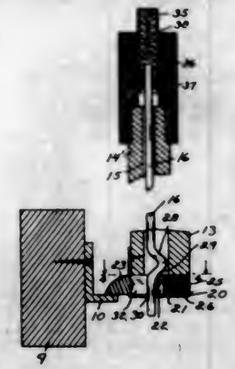
1,622,385. WINDOW-CASEMENT CONTROL. WILLIAM F. KLEIN, St. Louis, Mo. Filed Dec. 23, 1925. Serial No. 77,274. 1 Claim. (Cl. 268—120.)



A window casement control, of the class described, comprising a horizontally reciprocable member internally screw-threaded at its inner end adapted to be reciprocated by a rotatable member fixed against longitudinal movement and having its outer end externally screw-threaded adapted to engage the screw-threaded portion of the said horizontally reciprocable member, a crank attached to the inner end of said rotatable member by which

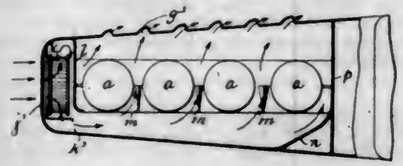
said rotatable member may be rotated, a link bar pivotally attached to a window sill and adapted to be rotated through approximately 90 degrees, said pivot joint being located at a rightangle to the longitudinal axis of the said reciprocable member at a sufficient distance therefrom to permit the reciprocable member to be reciprocated without coming in contact with said pivotal joint, said link bar being longitudinally slotted through approximately one-half of its length nearest the said pivot joint and adapted to be slidably engaged by a pin rigidly fixed in the outer

end of said reciprocable member, the said link bar being hingedly attached to a second link bar at its outer end, the said second link bar being adapted to be hingedly attached to a hinged member adapted to be attached to a window casement, so that when the said crank is rotated in one direction, the window casement will be caused to close, and when the crank is rotated in the opposite direction, the window casement will be caused to open, and may be fixedly held at any desired point between fully open and in a closed position.



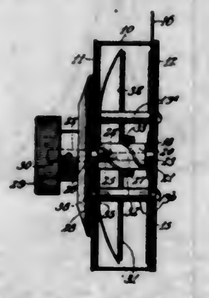
1,622,386. GRAIN-SORTING DEVICE. LESTER L. LADD, Lockport, Ill. Filed Aug. 2, 1923. Serial No. 655,255. 26 Claims. (Cl. 209—481.)

5. In a separating device, an imperforate inclined shelf-like member, zig-zag shoulders on said member, facing only toward one side and one end thereof and means for shaking said member with a rotary shaking movement of small radius.



1,622,387. CRIB LATCH. FREDERICK C. MARQUARDT, Milwaukee, Wis. Filed Oct. 8, 1924. Serial No. 742,338. 6 Claims. (Cl. 292—170.)

1. In a device of the class described, a seat for a latch-bolt, a latch bolt arranged to engage said seat when in operative position and to support a load thereon, an operating part for said latch-bolt having a resilient connection therewith, the strength of said connection being



so related to the resistance of said bolt that it is adapted to retract said bolt from said seat only when the latter is relieved of load.

1,622,388. AIR-COOLED ENGINE. ALFRED F. MASURY and CHARLES FROESCH, New York, N. Y., assignors to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 22, 1925. Serial No. 77,159. 6 Claims. (Cl. 173—171.)

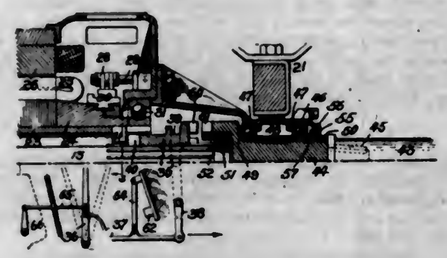
1. In combination, an internal combustion engine comprising spaced cylinders having an exhaust manifold along one side, an enclosure for the engine formed with an opening in the front end and louvers on the side adjacent the exhaust manifold, a fan disposed in front of the engine and a fan housing having an inlet adjacent the opening in the enclosure and an outlet to deflect the air from the fan to the side of the engine away from the exhaust manifold.

1,622,389. RADIO COMMUNICATION DEVICE. BENJAMIN F. MIESSNER, Chicago, Ill. Filed Nov. 6, 1922. Serial No. 599,203. 3 Claims. (Cl. 250—40.)

1. In combination a combination electrical inductive and capacitive element comprising a concentrated flat spiral winding, means for varying the inductance of said winding comprising a disk of conducting material parallel to said winding and means adapted to alter the parallel

distance between said disk and winding, a second element of conducting material adjacent said disk but insulated therefrom so as to form with said disk the two electrodes of a condenser, the capacity of which is altered as the position of said disk is altered.

1,622,390. PROCESS OF PRODUCING FISH-OIL POWDER. WALTER E. MILLER, Vineland, N. J., assignor to Silmo Chemical Company, Inc., Vineland, N. J. Filed Mar. 5, 1926. Serial No. 92,639. 1 Claim. (Cl. 99—11.)



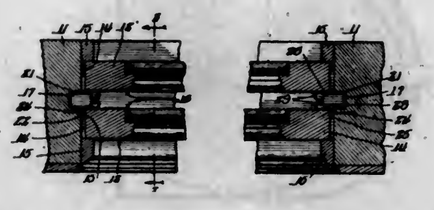
The process of reducing fish oil to powdered form, which consists in placing a given amount of fermented milk in an air-tight receptacle, adding thereto the oil slowly while agitating the mixture until the weight of the oil substantially equals the weight of the total solids in the fermented milk, allowing the mixture to stand in the vessel at a temperature of about 50° F. for a period of about 48 hours, adding water to the mixture and agitating the same until the amount of the water substantially equals the amount of the oil, homogenizing the mixture to produce an emulsion, allowing the emulsion to stand at a temperature of about 50° F. for a period of about 48 hours, separating the solid matter from the liquids at a temperature of about 70° F., and collecting and powdering the solid matter.

1,622,391. DENTIFRICE. FERDINAND W. NITARDY, KENNETH A. BARTLETT, and FRANTZ F. BERG, Brooklyn, N. Y., assignors to E. R. Squibb and Sons, New York, N. Y., a Corporation of New York. Filed Sept. 26, 1924. Serial No. 740,031. 7 Claims. (Cl. 167—91.)

1. A dental cream comprising a suspension of magnesium hydroxide in glycerin combined with solidified glycerin.

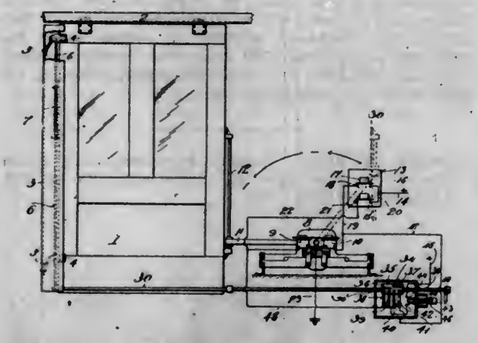
5. The method of preparing dental cream, which comprises forming a jellylike mass by combining glycerin with an alkali metal stearate, grinding the jelly-like mass and incorporating a scouring or cleansing agent therewith.

1,622,392. SEARCHLIGHT TRUCK. MARTIN L. PATTERSON, Bogota, N. J., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed Mar. 16, 1922. Serial No. 544,192. 14 Claims. (Cl. 290—1.)



4. In an automotive vehicle having a driving axle, a power unit mounted on said vehicle, an auxiliary generating unit, a shaft driven by said power unit, said auxiliary unit comprising an electric generator, means whereby said shaft may be connected to said generator to operate the latter, and a switch controlling a circuit of said generator, said means being movable to connect said shaft to the driving axle to propel the vehicle and being connected to said switch to simultaneously break a circuit of said generator.

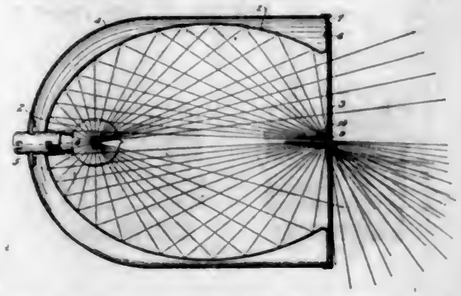
5. In combination, a power unit, an auxiliary power-generating unit, an operating device, means for connecting said auxiliary unit to said power unit to be driven thereby, said means being movable to connect said device to said power unit to be operated thereby and simultaneously break a circuit of said generator.



6. In combination, a power unit, an auxiliary power-generating unit, an operating device, means for connecting said auxiliary unit to said power unit to be driven thereby, said means being movable to connect said device to said power unit to be operated thereby and simultaneously disconnect said auxiliary unit from said power unit, and a continuously actuated governor for controlling said power unit, said means also operating to vary the effect of the governor on said power unit.

1,622,393. WEATHER STRIP. CHARLES A. PIPENHAGEN, Chicago, Ill. Filed Nov. 23, 1925. Serial No. 70,750. 19 Claims. (Cl. 20—52.4.)

1. In a weather strip, an integral resilient sheet metal strip, adapted to be substituted for a parting bead, comprising a bottom flange for engaging the bottom of the parting groove, a side flange for engaging the side of said groove, an affixing flange engaging the window frame adjacent said groove, and a resilient extension from said affixing flange to effect sealing contact with both edge and side of the sash.

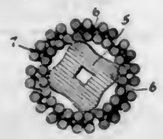


1,622,394. DOOR-OPERATING MECHANISM. JAMES L. QUINN, Rahway, N. J., assignor to National Pneumatic Company, New York, N. Y., a Corporation of West Virginia. Filed Apr. 2, 1920. Serial No. 370,740. 3 Claims. (Cl. 268—50.)

1. The combination with a car door, and a motor for operating the door to open and close the same, of an opening and closing magnet for respectively, when energized, initiating the opening and closing movements of said door, a collapsible shoe carried by said door and adapted to be moved relative to the door upon encountering an obstruction during the closing movement of the door, a rod carried by said door to move therewith, means actuated by the collapsing movement of said door for rotating said rod, means controlled by the rotation of said rod for supplying current to said opening magnet, means for automatically extending said shoe to its normal

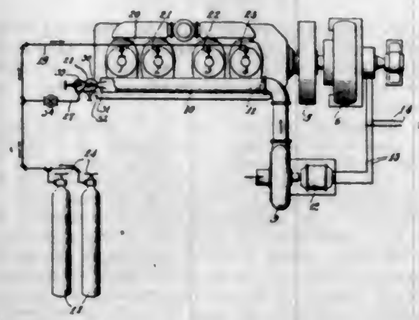
position when pressure thereagainst is removed to thereby rotate said rod in an opposite direction to normal position, means controlled thereby for supplying current to said closing magnet, and means controlled by the door reaching the limit of its closing movement for rendering said current supplying means to the opening magnet inoperative.

1,622,395. HEADLIGHT. WILLIAM E. RICHARD, Evansville, Ind. Filed May 10, 1923. Serial No. 637,978. 1 Claim. (Cl. 240—41.)



A reflector substantially ellipsoid in shape and truncated at its second focal point, a translucent cover plate fitting said truncated portion and having at the second focal point of the reflector a transparent portion and a deflector arranged at said transparent portion and constructed to deflect all of the lower reflected rays outwardly and downwardly.

1,622,396. PROCESS OF PRODUCING A POROUS CEMENTITIOUS ARTICLE. ALEXANDER T. SCHENCK, Seattle, Wash. Filed Jan. 4, 1926. Serial No. 79,265. 1 Claim. (Cl. 18—55.)

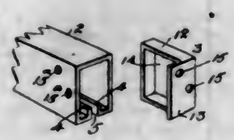


The process of producing a porous cementitious article consisting in mixing cement in granulated form, hydrated lime, aluminum and warm water, molding the article during the gas liberation, securing the article within the mold and rotating the mold during the setting operation to compel formation of substantial uniform voids in the mass to the gas passage therethrough.

1,622,397. TUBING. HERMAN SCHLAICH, Long Island City, N. Y. Filed Sept. 25, 1922. Serial No. 590,276. 5 Claims. (Cl. 137—75.)

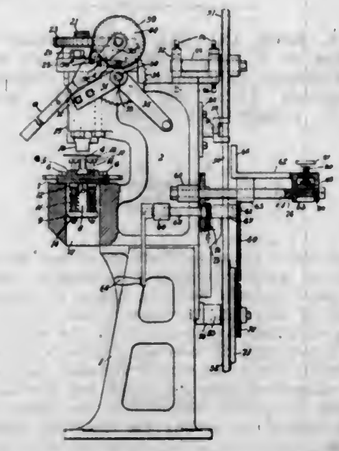
1. A transmission tubing for pressure responsive instruments, comprising a capillary tubing having a covering in the form of a braided wire sheath sufficiently flexible to permit bending the tubing but so proportioned and constructed with reference to the size and bore of the tubing as to make it impossible to kink the tubing sharply enough to close the bore thereof.

1,622,398. INTERNAL-COMBUSTION ENGINE. RUDOLPH SCHLATTER, St. Louis, Mo., assignor to Busch-Sulzer Bros.-Diesel Engine Co., St. Louis, Mo., a Corporation of Missouri. Filed Aug. 22, 1924. Serial No. 733,470. 4 Claims. (Cl. 123—69.)



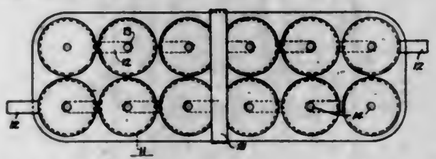
1. The combination with a two-cycle internal combustion engine, of a normal source of scavenging air, means for setting the engine in motion, a source of high pressure fluid, and means operated thereby for supplying scavenging air during the engine starting period.

1,622,399. BOBBIN BIN AND SHELF THEREFOR. GEORG SCHLESINGER, Berlin-Charlottenburg, Germany. Filed Oct. 15, 1926, Serial No. 141,865, and in Germany Apr. 24, 1925. 3 Claims. (Cl. 220—97.)



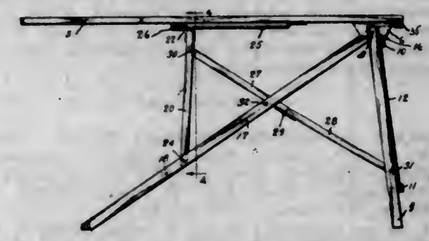
1. An improved bin for bobbins, cops and the like comprising a rectangular foraminated metallic box having a bottom, side walls and end walls, said box having a frame about its bottom and a frame about its rim, said frames being complementary so that the bins may be stacked, the outer parts of said frames being encircled by the side wall of the box so that the sides of the stack form walls without projections.

1,622,400. DOOR HANGER AND TRACK STRUCTURE. NATHANIEL B. SHELLY, Wadsworth, Ohio. Original application filed Dec. 5, 1925, Serial No. 73,368. Divided and this application filed Aug. 13, 1926. Serial No. 128,996. 4 Claims. (Cl. 16—97.)



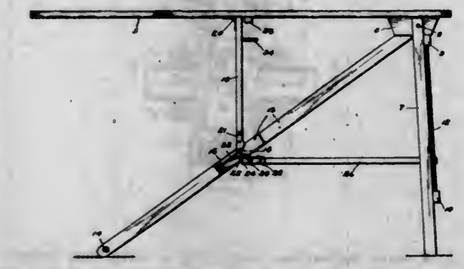
1. In an apparatus of the class described, the combination of a track, each cap provided with a broad side against said track, and end caps upon said track, fastening means engaging one side of the track and said broad side of the caps for holding caps and track together.

1,622,401. METAL-WORKING MACHINE. GEORGE SIPKOVITZ, Detroit, Mich. Filed Nov. 4, 1922, Serial No. 599,042. Renewed Oct. 16, 1926. 3 Claims. (Cl. 164—96.)



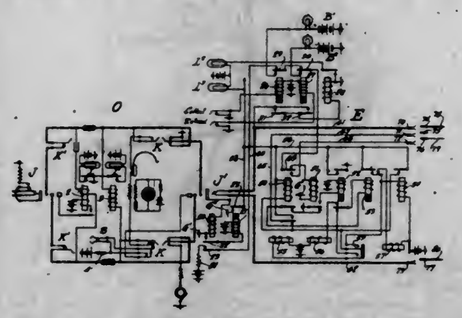
1. In a machine of the class described, a support for a piece of work, a stationary die, a movable ram, guides for the ram, a die carried by the ram, a screw to raise and lower the ram, a driven shaft coupled with the screw to rotate the same, a driving shaft coupled with the driven shaft to rotate the driven shaft, a drum mounted on the driven shaft, a pivotally mounted lever having a frictional band encircling the drum to be tightened thereabout to rotate the same as the lever is actuated.

1,622,402. DRY CELL OR BATTERY. JOHN SMITH, Brooklyn, N. Y. Filed Sept. 9, 1921. Serial No. 499,444. 8 Claims. (Cl. 136—175.)



1. As a new article of manufacture, a dry cell battery consisting of a block of water-proofed material having a plurality of cylindrical recesses formed therein and a dry cell built up in each said recess, one element of said cell directly upon the walls of said recess.

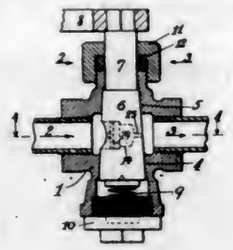
1,622,403. FOLDING IRONING BOARD. ALBERT E. TODD, Seattle, Wash. Filed Sept. 8, 1924. Serial No. 736,437. 3 Claims. (Cl. 68—10.)



1. In a folding ironing table structure, a board, a rear leg structure pivoted thereon, a front leg pivoted to the rear of said board and extending forwardly and downwardly therefrom, a support pivoted to the front leg and arranged to stand substantially vertical for supporting the forward end of the board, means slidably connecting the upper end of the support with the board, and a collapsible brace member one end of which is pivoted to the upper end of said support and the other end of which is pivoted to the lower portion of said rear leg of the structure.

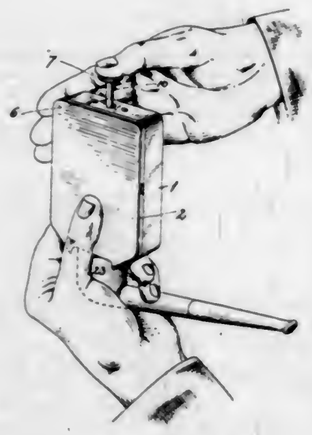
1,622,404. FOLDING IRONING BOARD. ALBERT E. TODD, Seattle, Wash. Filed June 29, 1926. Serial No. 119,306. 3 Claims. (Cl. 68—10.)

1. A folding ironing table comprising a board, a rear leg structure and a slanting leg structure pivoted to the rear end portion of said board, a vertical brace hingedly secured at one end to the central portion of said board, a horizontal brace pivotally connected at one end to the rear leg structure, channeled bracket members on the other ends of said vertical and horizontal braces, said brackets being pivotally connected together, a transverse rod on the slanting leg structure, the bracket on said vertical brace having a slot arranged to engage said rod to retain said braces in their respective vertical and horizontal positions, a guide rod secured to said transverse rod and to the lower end of said slanting leg structure, and said bracket on the vertical brace having a slot adapted to slidably engage said guide rod when the ironing board is moved to operative or inoperative position.



1,622,405. AUTOMATIC TELEPHONE SYSTEM. JOHN WICKS, Chicago, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Original application filed Mar. 8, 1920, Serial No. 364,069. Divided and this application filed Jan. 22, 1922. Serial No. 531,076. 30 Claims. (Cl. 179—27.)

1. In a telephone system, subscribers' lines of two classes, the lines of one class only being equipped with paystation mechanism, toll lines, a toll service trunking system comprising selector and connector switches controlled by an operator for connecting a toll line with a subscriber's line of either class, and signalling means

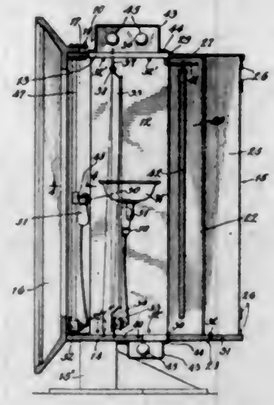


effective to transmit a signal over the established connection through said switches for automatically advising the operator of the class to which any connected line belongs.

1,622,406. VALVE. CHRISTIAN WILHJELM, Philadelphia, Pa. Filed Nov. 24, 1925. Serial No. 71,065. 2 Claims. (Cl. 277—41.)

1. A valve mechanism comprising a valve body providing an inlet and an outlet, a valve plug seated in said valve body and having a pressure reducing chamber formed within said plug and provided with a plug inlet and outlet adapted to communicate with the said body inlet and outlet respectively, a shutter on said valve plug for adjusting the said plug inlet, the said plug outlet being in the form of a channel leading from the said pressure chamber to an eccentrically formed groove in the surface of the plug substantially as and for the purpose set forth.

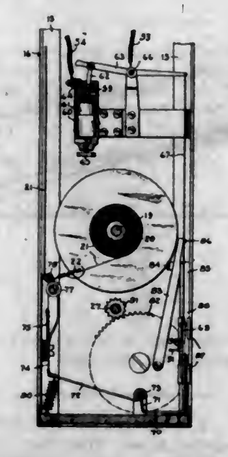
1,622,407. TOBACCO CASE. WALTER BAEHNE, West New York, N. J. Filed Apr. 8, 1925. Serial No. 21,511. 1 Claim. (Cl. 206—41.)



A tobacco case adapted to contain loose tobacco and having an opening therein, a movable pusher forming a closure for said opening, an operating stem for said pusher extending through the case, a spring retaining tube within the case surrounding said opening stem, a spring within the tube having one end secured by the tube within the case surrounding said opening stem, a stem, a bridge piece rigidly secured to the case and to the upper end of the spring retaining tube for positioning the tube within the case, and a locking means for holding said pusher in inoperative position.

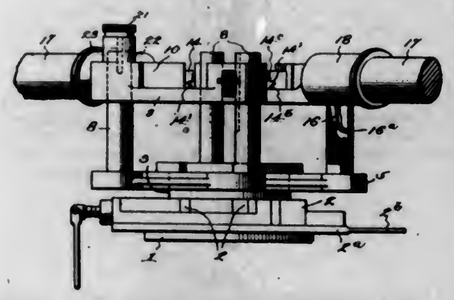
1,622,408. HOOK AND EYE TAPE. ABRAHAM BEBEL, Brooklyn, N. Y., assignor to The De Long Hook and Eye Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Mar. 10, 1924. Serial No. 698,010. 1 Claim. (Cl. 2—265.)

A hook and eye tape structure for closing the edges of garments of wearing apparel comprising a tape, hooks having shank and bill portions, means for securing the rear ends of the shank portions to said tape, a row of stitching extending longitudinally of the said tape and having loops formed at intervals therein, which loops extend laterally toward an edge of the said tape and which are in engagement with the outer end portions of the said hooks at points intermediate the shank and bill portions thereof for holding the same flat against the said tape.



1,622,409. DISPLAY APPARATUS. ALEXANDER BERNSTEIN, New York, N. Y., assignor to William S. Gluck New York, N. Y. Filed Sept. 6, 1923. Serial No 661,208. 7 Claims. (Cl. 40—147.)

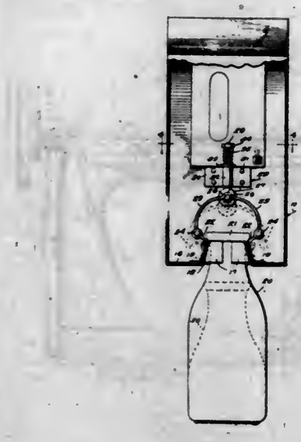
1. In a device of the character described, in combination, a display box, a mask, means for supporting the mask interiorly of the box for adjustment longitudinally thereof, the box being constructed and adapted to receive an object or pictorialization therewithin observable through the mask whereby an adjustment of the mask will produce the illusion of a positional change in the relationship of the object or pictorialization with reference to the complete device.



1,622,410. ADVERTISING DISPLAY DEVICE. FRANK W. BLUMIE, Seattle, Wash., assignor to Automatic Display Company, Seattle, Wash., a Corporation of Washington. Filed Mar. 31, 1925. Serial No. 19,599. 10 Claims. (Cl. 40—53.)

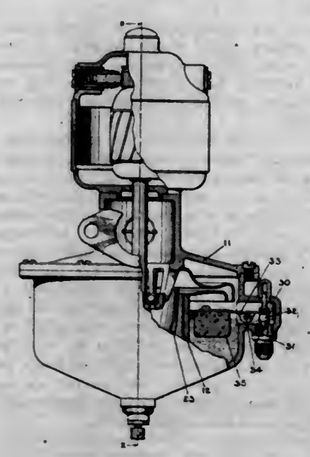
1. In an advertising device, a frame having a display opening, rollers at the top and bottom of said display opening respectively, a curtain formed of a plurality of sections and arranged to be rolled on said rollers, clips detachably connecting the ends of said sections, means for periodically moving and stopping said

curtains and timing means operated by said clips for determining the time that said curtains will be at rest.



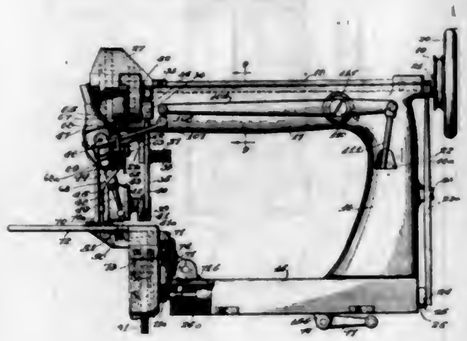
1,622,411. PIPE-THREADING MACHINE. BRADFORD BORDEN, Cleveland, Ohio. Filed Apr. 9, 1924. Serial No. 705,298. 13 Claims. (Cl. 10—120.5.)

7. A pipe threading machine including a die stock comprising a substantially square plate having a work receiving opening, bosses radiating from said work receiving opening toward the corners of said plate, said bosses having longitudinal die receiving slots therein and transverse post receiving holes communicating with said slots, dies slidably receivable in said slots and having pins projecting from the sides thereof, posts loosely receivable in said post holes for slidably mounting said die stock on a support, said posts having longitudinal grooves therein and disposed obliquely with respect to the axis of the work, and said grooves having one end open for the reception of said die pins, the opposite ends of said grooves being turned laterally in a direction away from the axis of the work.



1,622,412. COMBINED MAIL BOX AND BOTTLE HOLDER. PAUL BRANDOFINE, Port Richmond, N. Y. Filed May 17, 1926. Serial No. 109,752. 5 Claims. (Cl. 232—41.)

1. A device of the character described comprising a pair of coacting engaging members each pivotally supported adjacent its lower end, the upper ends of said members normally being arranged closer to each other than the lower ends and being adapted to engage a bottle, and a single operating means for moving both of

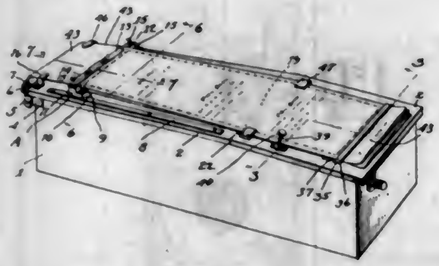


said members toward and away from each other, said means including a spring normally urging said members to engaging position.

1,622,413. LIQUID-FUEL FEEDING AND CARBURETING APPARATUS. CARL P. BROCKWAY, Toledo, Ohio, and ERNEST R. HUNTLEY, Milwaukee, Wis., assignors to Industrial Research Corporation, Toledo, Ohio, a Corporation of Delaware. Filed June 21, 1920. Serial No. 390,586. 12 Claims. (Cl. 261—91.)

1. In a carbureter, means for conducting air therethrough in two separate passages, means for producing a fine spray of fuel in one of said passages, through which spray the air in that passage must travel, said spray producing means furnishing spray in a constant and excessive amount, means for collecting and condensing the excess fuel and returning it to said first named means, and means for variously proportioning the amounts of air moving through said passages whereby the amount of fuel passing from the carbureter is regulated.

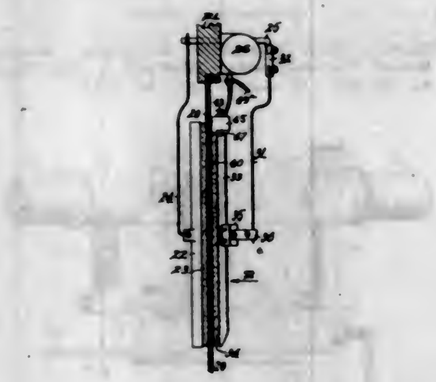
1,622,414. FELLING MACHINE. MAURICE D. BRODY, Chicago, Ill. Filed Mar. 31, 1923. Serial No. 628,970. 42 Claims. (Cl. 112—178.)



1. In a sewing machine, the combination of a table for supporting thicknesses of material to be sewed, a guide for separating said thicknesses at the stitching point, stitch forming devices comprising an oscillatory needle, a bobbin and a rotary loop-forming hook, an upper push rod for depressing the upper thickness of material into the path of the needle for alternate stitches, and a lower push rod for raising the lower thickness of material into the path of the needle for intermediate stitches, said push rods acting in opposed relation to each other above and below the material being sewed and substantially in alinement with each other.

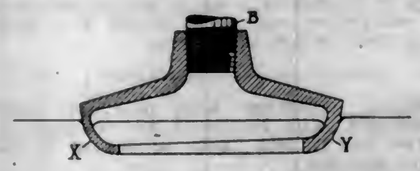
14. In a sewing machine, the combination of a stationary presser foot, stitch forming devices adjacent said foot, a movable housing for said devices, a support for said housing, and devices for moving said housing from stitching position to facilitate inserting material to be sewed.

31. In a sewing machine, the combination of a table for supporting layers of material to be sewed, a guide having walls diverging from the stitching position at an acute angle for separating said layers of material, a curved needle in a plane between the guide walls and having a path of travel extending between said guide walls and through an opening in their intersecting edges at the sewing position, a needle bar for supporting and oscillating said needle, a hook rotatable in a vertical plane adjacent the forward position of the needle to loop the needle thread, a bobbin casing loosely supported within said hook to be encircled by said loop, one of the walls of said guide being substantially parallel with said table, and a presser foot having an upwardly inclined extension adjacent to and substantially parallel with the other wall of said guide.



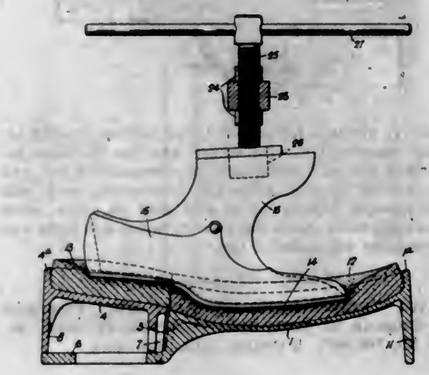
1,622,415. DUPLICATING DEVICE. ARTHUR BUADELL, Atlanta, Ga., assignor, by mesne assignments, to A. S. Gilman, Cleveland, Ohio. Filed July 5, 1924, Serial No. 724,443. Renewed Dec. 10, 1926. 3 Claims. (Cl. 282—19.)

1. A duplicating device comprising a cabinet, a cover therefor over which a strip of multi-folded stationery is adapted to pass, a carbon holding means and means coacting therewith for moving the said carbon holding means longitudinally with respect to the said cover, adjustable means for clamping the stationery to the cover, means coacting with the said clamping means for effecting the release of the clamping means and a paper elevating arm simultaneously coacting with said additional



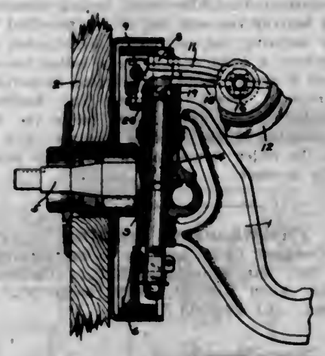
means to effect elevation of the free end of the stationery above the surface of the cover.

1,622,416. WINDSHIELD CLEARER. HARRY R. BURTON, Worcester, Mass. Filed Mar. 12, 1925, Serial No. 15,077. 5 Claims. (Cl. 15—253.)



1. In a windshield clearer, a heating device comprising a swingingly mounted frame member, a heating member slidably mounted in said frame member, said frame member and heating member having interlocking portions, and a thin glass-engaging covering for said heating member clamped in position by said interlocking portions.

1,622,417. GLASS DRAWING AND APPARATUS THEREFOR. WALTER E. BUZBY, Wichita Falls, Tex. Filed Apr. 7, 1925. Serial No. 21,323. 5 Claims. (Cl. 49—17.1.)

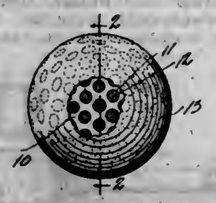


2. In the art of drawing glass cylinders, the method of compensating non-uniformity of temperature conditions of the surface of the bath which comprises the immersion, in the surface of the bath, of a bait arranged so as to initially chill a hotter portion of the bath more than a cooler portion of the bath.

1,622,418. SOLE-PRESSING APPARATUS FOR USE IN THE MANUFACTURE AND REPAIR OF BOOTS AND SHOES. THOMAS EDWIN CANN, Leicester, England. Filed Apr. 28, 1926. Serial No. 105,171, and in Great Britain May 14, 1925. 3 Claims. (Cl. 12—38.)

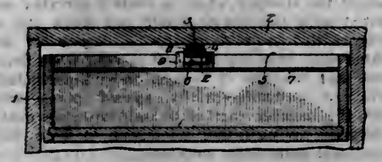
1. A sole laying press comprising a bed for the support of the tread part of a sole, and a separate and detachable bed for the support of the heel extension of the sole.

1,622,419. AUTOMATIC BRAKE. ALBERT J. CHAPIN, Oakland, Calif., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Dec. 15, 1923. Serial No. 680,863. 4 Claims. (Cl. 188—152.)



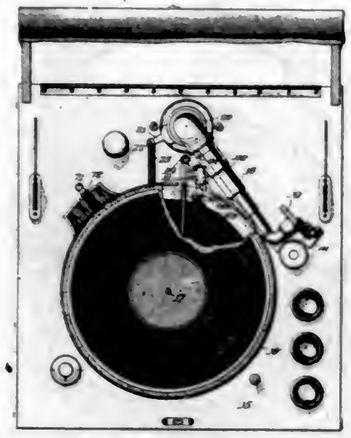
4. In an automotive front wheel brake, the combination with a front wheel steering knuckle having a king pin, of a brake operating sleeve slidably and non-rotatably mounted on said king pin, a cam lever rotatably mounted on said king pin for operating said sleeve, a brake chamber carried by said sleeve and containing a flexible diaphragm operable by fluid under pressure, and a diaphragm rod operated by said diaphragm and operatively connected to said cam lever.

1,622,420. VEHICLE BRAKE DEVICE. HORACE S. CLARK, Oakland, Calif., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed May 27, 1925. Serial No. 33,172. 3 Claims. (Cl. 188—78.)



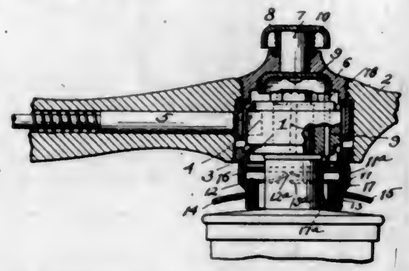
1. In a vehicle brake, the combination with brake heads, of a rotatable cam interposed between the free ends of said brake heads, said cam having a tip at the end of the cam providing a more abrupt cam face.

1,622,421. GAME BALL. CHARLES W. COFFIELD, Bowie, Tex. Filed Mar. 30, 1926. Serial No. 98,471. 1 Claim. (Cl. 273—62.)



A solid game ball having a plurality of separated recesses upon its periphery, luminous material filling said recesses flush with said periphery, and a transparent covering completely enclosing the surface of the ball and said material.

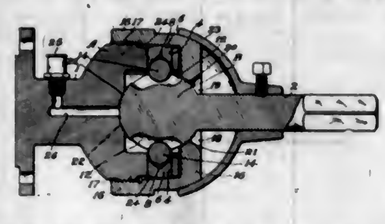
1,622,422. DRAWER GUIDE. WILLIAM CONWELL and CLARENCE MAHONEY, Elwood, Ind., assignor to G. I. Sellers & Sons Company, Elwood, Ind., a Corporation of Indiana. Filed June 2, 1923. Serial No. 642,901. 3 Claims. (Cl. 45—77.)



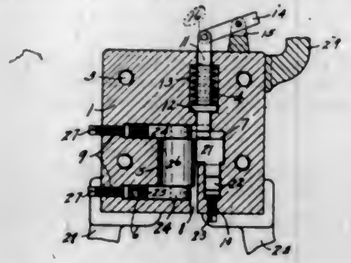
3. The combination with a drawer and a supporting guide therefor extending in the direction of movement of the drawer, the guide and the rear side of the drawer being at right angles to each other and having opposite grooves in their edges, and a guide member therefor having inwardly turned edges at opposite sides thereof adapted to engage in the grooves of the drawer side and the guide for free sliding movement thereon.

1,622,423. PHONOGRAPH MECHANISM. FRED H. DOERR and GORDON E. ROEDDING, Grand Rapids, Mich., assignors to Cheney Talking Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 27, 1922. Serial No. 590,784. 19 Claims. (Cl. 274—15.)

1. The combination with a motor and a moving member, stop mechanism serving to stop the motor upon cessation of movement by the member, a control lever for said stop mechanism, and mechanism associated with the stop control and stop mechanism whereby movement of the control lever to a predetermined position serves to disengage the stop mechanism and permit starting of the motor.



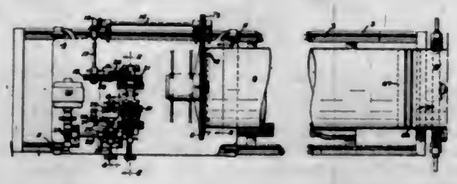
1,622,424. MAKE AND BREAK DEVICE. DAVID J. DOLAN, Cleveland, Ohio. Filed Nov. 28, 1921. Serial No. 518,345. 2 Claims. (Cl. 200—59.)



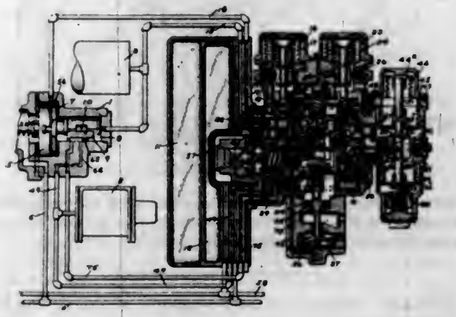
1. The combination with a steering wheel, a steering post on which the steering wheel is mounted, a member mounted upon said steering post and extending within the hub of the wheel, a depressible button mounted on the hub of the steering wheel, a contact carrying member associated with the steering post and below the wheel, contacts carried by said member, a depressible member associated with said contacts and serving when depressed to cause said contacts to engage, and means including a plurality of circumferentially spaced pins extending through the member carried by said steering post, said pins forming an operative connection between the button and said depressible member.

1,622,425. UNIVERSAL JOINT. WILLIAM S. DWYER, Devon, Conn. Filed Aug. 10, 1926. Serial No. 128,364. 5 Claims. (Cl. 64—91.)

1. An universal joint, comprising ball and socket members having alined pairs of diametrically opposed bearing recesses, said pairs being disposed at an angle to each other, the recesses in one member being elongated, while the recesses carried by the socket member are formed in blocks which extend loosely within pockets in the socket and have their outer faces extending beyond the outer wall of the socket, ball bearings housed within said recesses, a keeper shell, said socket and shell having complementary bearings for said ball, and said shell being adjustably connected to said socket whereby the wear between said ball and socket may be compensated for, and means carried by said shell and cooperating with said blocks whereby adjustment of said shell as above noted will automatically cause the wear between said balls and recesses to be compensated for.

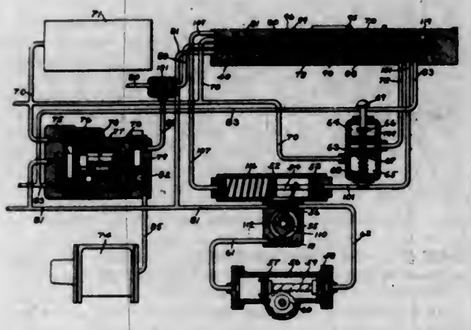


1,622,426. ELBOW-BENDING MACHINE. FREDERICK W. ENGELKE, St. Louis, Mo. Filed Mar. 22, 1924. Serial No. 700,997. 3 Claims. (Cl. 153—32.)



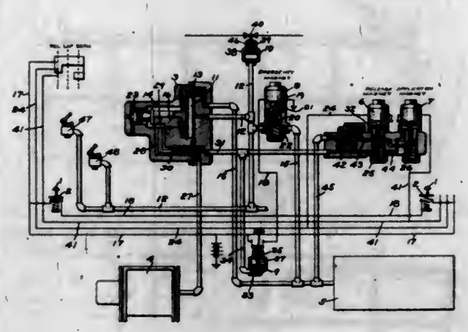
3. A device of the kind described, comprising a sectionally constructed machine block, having hammer, anvil, roller and bearing recesses and a slot provided therein; means for securing the sectionally constructed machine block together; a hammer, having a collar incorporated therein and a spring mounted thereon, mounted in the hammer recess; means actuating the hammer; an anvil mounted in the anvil recess below the hammer; bearings mounted in the bearing recesses; and a roller located in the roller recess, journaled in the bearings in the bearing recesses.

1,622,427. PIPE-WRAPPING MACHINE. CHARLES S. EVANS, Oakland, Calif., assignor to The Paraffine Companies, Inc., San Francisco, Calif., a Corporation of Delaware. Filed May 11, 1926. Serial No. 108,240. 20 Claims. (Cl. 242—11.)



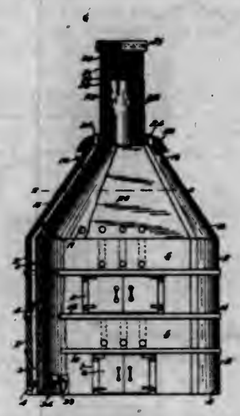
1. In a machine for wrapping objects, a carriage, a track on which the carriage is movable, a chuck on the carriage for supporting one end of the object, means for propelling the carriage along the track, and means for rotating the object.

1,622,428. FLUID-PRESSURE BRAKE. CLYDE C. FARMER, Pittsburgh, and THOMAS H. THOMAS, Edgewood, Pa., assignors to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Apr. 20, 1925. Serial No. 24,361. 13 Claims. (Cl. 303—60.)



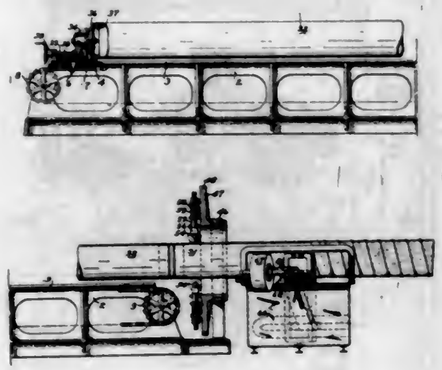
1. In a fluid pressure brake, the combination with a brake pipe and a brake cylinder, of a valve device operated upon a reduction in brake pipe pressure for supplying fluid under pressure to the brake cylinder, and an auxiliary valve device, subject to the pressures of the brake pipe and the brake cylinder for also controlling the supply of fluid under pressure to the brake cylinder.

1,622,429. SAFETY CAR-CONTROL EQUIPMENT. CLYDE C. FARMER, Pittsburgh, Pa., and JOHN S. McWHIRTER, New York, N. Y.; said Farmer assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania, and said McWhirter assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 5, 1925. Serial No. 28,087. 20 Claims. (Cl. 303—6.1.)



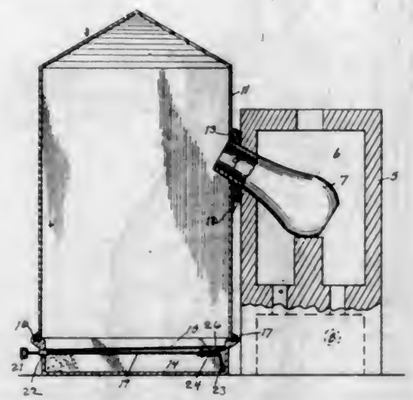
1. In a car control apparatus, the combination with manually operated means for controlling the power circuit and having a power on and a power off position and manually operated means for controlling a car door, of means for rendering said car door controlling means inoperative to open the car door when the power circuit controlling means is in the power position.

1,622,430. ELECTROPNEUMATIC BRAKE. CLYDE C. FARMER, Pittsburgh, and JOSEPH C. McCUNE, Edgewood, Pa., assignors to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed May 27, 1926. Serial No. 111,995. 5 Claims. (Cl. 303—19.)



1. In a car control apparatus, the combination with a control pipe and an emergency valve device operated upon a reduction in fluid pressure in said pipe for effecting an application of the brakes, of a valve for venting fluid from said pipe, a magnet for operating said valve, a foot controlled switch for controlling the circuit of said magnet, and a switch device operated upon an application of the brakes for controlling the circuit of said magnet.

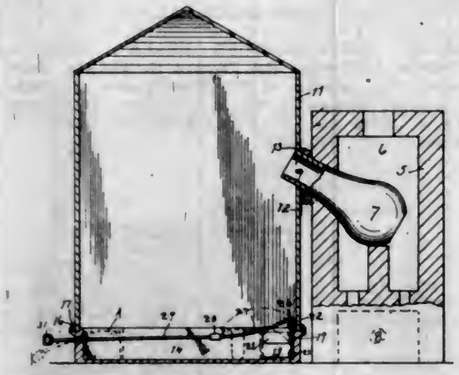
1,622,431. AIR-COOLED INCINERATOR. JOSEPH FEIGENBAUM, Los Angeles, Calif., assignor to Safety Concrete Incinerator Co., Inc., a Corporation of California. Filed Oct. 19, 1925. Serial No. 63,342. 5 Claims. (Cl. 110—18.)



2. An incinerator comprising a wall body formed of courses of blocks having air passages from top to bottom and having fresh air inlet holes in their outer faces, a dome consisting of a course of convergent hollow blocks on the top of the wall and having ports in its inside face to the block chambers and top outlet vents for the rising air; whereby when the wall is heated cooling air by thermic circulation flows into and out of the block chambers from bottom to top without passing into the fire space.

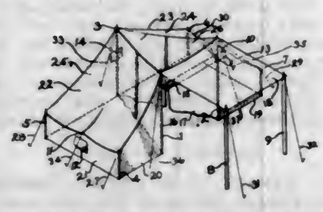
1,622,432. PIPE-WRAPPING MACHINE. DOZIER FINLEY, Berkeley, Calif., assignor to The Paraffine Companies, Inc., San Francisco, Calif., a Corporation of Delaware. Filed May 17, 1926. Serial No. 109,540. 11 Claims. (Cl. 242—11.)

1. In a machine for wrapping objects, a carriage, a track on which the carriage is movable, a chuck on the carriage for supporting one end of the object, means for propelling the carriage along the track, a rotor ring, means for rotating the ring, and means on said ring for fixing the object for rotation with the ring while permitting the object to pass thru the ring in an axial direction.



1,622,433. APPARATUS FOR THE PRODUCTION OF METAL DUST. ROBERT B. FINN, San Francisco, Calif., assignor to John Finn Metal Works, San Francisco, Calif. Filed Apr. 28, 1926. Serial No. 105,153. 5 Claims. (Cl. 266—19.)

1. In an apparatus of the character described, a condenser pan, a blade movable over the bottom thereof, and means for maintaining said blade in contact with the bottom thereof.

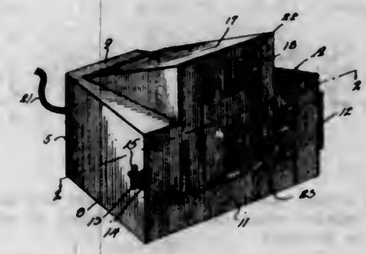


1,622,434. APPARATUS FOR THE PRODUCTION OF METALLIC DUST. ROBERT B. FINN, San Francisco, Calif., assignor to John Finn Metal Works, San Francisco, Calif. Filed June 12, 1926. Serial No. 115,635. 5 Claims. (Cl. 266—19.)

1. In an apparatus of the character described, a condensing pan, a scraping element having a cover portion formed integral therewith, said scraping element adapted to initially rest upon the pan in a horizontal position and means for upsetting said scraping element so that the

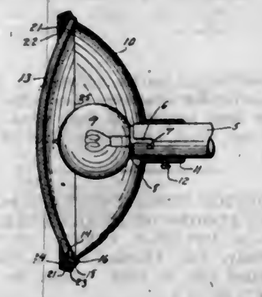
same will assume a vertical position, said means serving to move said scraping element over the bottom of said pan, for the purpose specified.

1,622,435. TOURIST'S AUTO TENT. FRANK D. FRAZEE, Springfield, Ill. Filed Feb. 18, 1924. Serial No. 693,510. 1 Claim. (Cl. 135—1.)



A tourist's auto tent of the character described adapted to cover a rectangular area and having perpendicular walls supporting the top; said top comprising three sections including a central section of a triangular shape and a pair of oppositely disposed end sections each of which forms a quadrilateral containing two adjacent right angles, one acute angle and on obtuse angle; the front perpendicular wall of the tent terminating in its highest elevation in a centrally disposed horizontal line over the entrance to the tent; said line forming the base line of said triangular central top section whose apex is located at a slightly lower level at a point over the perpendicular rear wall of the tent; said end sections of said top adapted to slope endwardly from the corresponding sides of said triangular top section until they meet the tops of the perpendicular end walls of the tent; a centrally disposed entrance in the front wall of the tent provided with an awning for optionally shading the same or for closing the tent as described and for the purpose set forth.

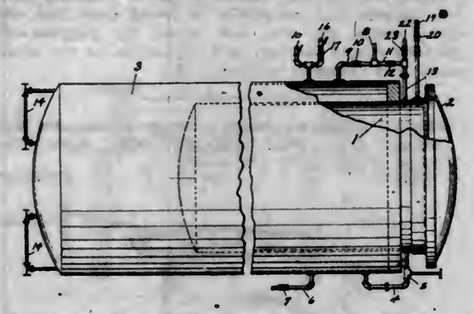
1,622,436. NUMBER HOLDER. WESLEY W. FREED, East Palestine, Ohio. Filed July 9, 1923. Serial No. 650,495. 1 Claim. (Cl. 40—133.)



In a device of the class described, a main sheet metal casing including top, bottom and side walls, one of the said side walls being provided with a laterally directed ear, an auxiliary casing stamped from the said top wall, a lamp within the main casing, brackets carried by the inner surfaces of the said side wall inwardly of the outer ends thereof, a transparent panel received within the main casing and the auxiliary casing and engaging the said brackets, a door including a flat stenciled metal plate stamped from a single sheet of material hinged at

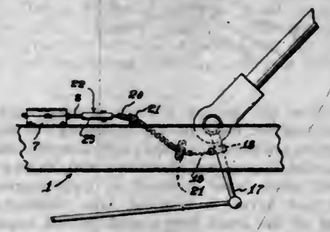
one of its ends to one of the said side walls in front of the said panel and adapted to close the main casing and the auxiliary casing, the opposite end or the said door being

provided with an ear adapted to register with the first named ear, and removable fastening means passing through the said alined ears.



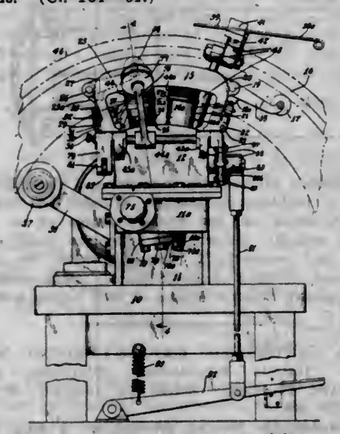
1,622,437. LENS SUPPORTING AND RETAINING MEANS. ROBERT R. FREUND, Denver, Colo., assignor to Shot-Lite Corporation of America, Denver, Colo., a Corporation of Colorado. Filed Feb. 18, 1924. Serial No. 693,657. 1 Claim. (Cl. 240—41.)

A lamp comprising a casing that has an open face encompassed by an enlarged seating rim which in cross-section embodies an annular outwardly turned flange section, having an approximately plane face, merging into a forwardly divergent intermediate annular section, having a bulging convexly arcuate forwardly disposed face, and a continuing forwardly converging concavely arcuate annular lip section that provides for a wedging face, the said plane face and a portion of said convexly arcuate face forming an obtuse angular inner annular recess while the other portion of said convexly arcuate face and the said concavely arcuate wedging face form an acute angular outer annular recess, with the minimum diameter of said outer recess being slightly greater than the maximum diameter of said inner recess, an annular lens peripherally seated snugly within said inner recess, an annular cushioning gasket seated within the angle of said outer recess, and a resilient ring seated within the forward portion of said outer recess in wedgingly held engagement with said cushioning gasket and said lens.



1,622,438. APPARATUS FOR VULCANIZING UNDER FLUID PRESSURE. ROY D. FRITZ, Barberton, Ohio, assignor, by direct and mesne assignments, to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Jan. 12, 1926. Serial No. 80,713. 11 Claims. (Cl. 18—6.)

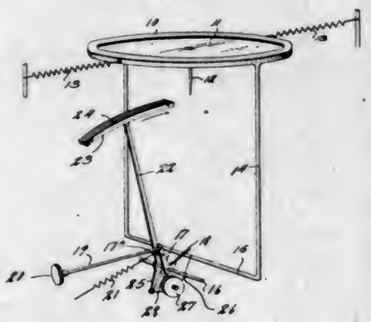
1. In an apparatus for vulcanising rubber articles under water at high temperatures and pressures, a vulcanizing chamber, a jacket surrounding the chamber, the capacities of the chamber and jacket being substan-



tially equal, and means to transfer water between the jacket and the chamber.

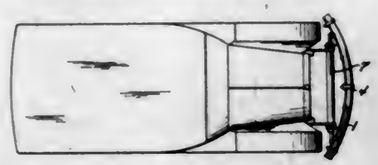
1,622,439. DEVICE FOR OPERATING SWITCHES. ALEXANDER C. FRUE, Detroit, Mich. Filed Dec. 14, 1925. Serial No. 75,262. 3 Claims. (Cl. 200—59.)

1. In a device of the class described in combination, means for actuating a circuit closer for operating vehicle lights, the said means including a loose play link, means to adjust the amount of loose play of said link, a flexible wire attached to a post, said post adapted to move in a slot of said link, a tube for guiding said flexible wire, said wire attached to a moving part of the steering gear of a motor vehicle and so arranged that the movement of the steering gear will be transmitted to the said circuit closer.



1,622,440. TIRE-TRIMMING APPARATUS. JOHN R. GAMMETER, Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y., a Corporation of New York. Filed Oct. 5, 1923. Serial No. 666,721. 27 Claims. (Cl. 164—61.)

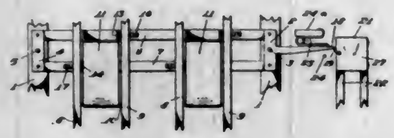
1. A tire-trimming machine comprising means for rotating a tire in its own plane, means for progressive-



ly flexing a side wall thereof laterally as it is so rotated, to cause a toe portion thereof to pass a trimming position, whereby said toe portion is swung away from the cavity within the tire, and means for progressively trimming a mold fin from said toe portion as the latter passes said trimming position.

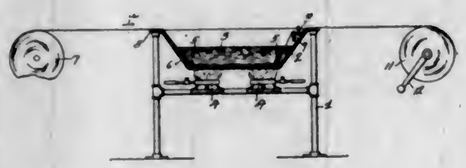
1,622,441. TALKING DOLL. OSCAR A GARLAND, Hot Springs, Ark. Filed Aug. 27, 1925. Serial No. 52,866. 7 Claims. (Cl. 274—17.)

5. A figure toy having therein a diaphragm and a mounting therefor, resilient means urging the diaphragm and mounting upwardly, a yoke carried by the diaphragm mounting and depending therefrom and having a cross bar, a bell crank lever mounted at right angles to the cross bar and having a resilient arm yieldingly engaging on top of the cross bar, a push button connected to the other arm of the bell crank lever, the last named arm of the bell crank lever having a laterally projecting finger, a phonographic record, an arm supporting the same and pivotally mounted upon the same axis as the bell crank lever and extending beyond said axis, a spring urging the bell crank lever rearwardly, a flexible connection attached to the lower end of said record carrying arm and to the cross bar, and a pulley beneath which the flexible connection passes.



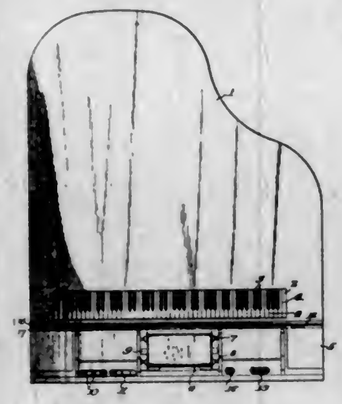
1,622,442. BUMPER FOR MOTOR VEHICLES. WALTER A. GUENTHER and THEODORE H. GUENTHER, Holyoke, Mass. Filed Jan. 22, 1926. Serial No. 83,042. 3 Claims. (Cl. 293—55.)

1. A bumper for vehicles comprising a normally bowed member of resilient material, a cylinder adapted to be rigidly mounted on the chassis frame of a vehicle, plungers slidably mounted in opposite ends of said cylinder and respectively connected with the ends of said bowed member for movement away from each other upon the inward flexing of said bowed member.



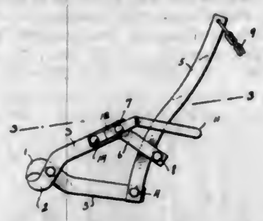
1,622,443. AUTOMATIC CATTLE-FEEDING MECHANISM. HALVAR HALVARSSON, Bjalverud, Sweden. Filed Apr. 17, 1926. Serial No. 102,771. 5 Claims. (Cl. 161—10.)

1. In automatic feeding mechanism, a pair of connected elements slidable in opposite directions, time controlled actuating mechanism for said elements, a plurality of invertible gravity actuated feed containers, and means releasably connecting said containers whereby they are held in upright position against the force of gravity



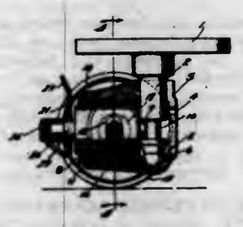
in the normal position of said elements and automatically released when the normal position of said elements is disturbed.

1,622,444. FABRIC TREATMENT. JOSEPH R. HOGATE and LEROY E. SPENCE, Bladen, Nebr. Filed June 11, 1926. Serial No. 115,301. 2 Claims. (Cl. 91—68.)



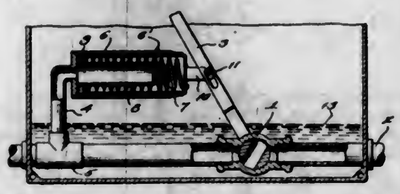
1. A composition of matter adapted to render fabric translucent comprising a mixture of paraffin, beeswax and petrolatum in such proportions that when applied to a fabric it will not crack and will be free of pin holes.

1,622,445. DEVICE FOR INDICATING POSITION OF PIANOS ON FLOORS OR OTHER SURFACES. BENJAMIN HIRAM JEFFERSON, Chicago, Ill., assignor to Lyon & Healy, Inc., Chicago, Ill., a Corporation of Illinois. Filed Feb. 3, 1923. Serial No. 616,666. 3 Claims. (Cl. 33—1.)



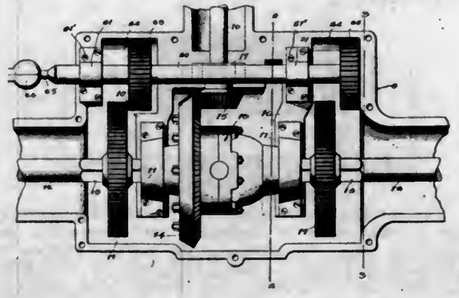
2. A device of the class specified, comprising a body part consisting of a flat full sized representation of the outline plan of a grand piano and a supplemental part consisting of a flat full sized similar representation of the reproducing mechanisms of such piano, said supplemental part having a hinge connection with a body part.

1,622,446. WIRE CUTTER. ROY E. JOURDAN, Rhinelander, Wis., assignor of one-fourth to Alvin S. Jourdan, one-fourth to Clarence C. Jourdan, and one-fourth to Ervin J. P. Lutzke, Rhinelander, Wis. Filed May 31, 1924, Serial No. 717,112. Renewed Aug. 14, 1926. 2 Claims. (Cl. 30—17.)



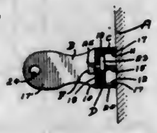
1. The combination with a cutting device comprising two pivotally connected jaws provided with operating levers, and means coacting with said levers for moving the jaws one toward the other of an arm adapted to overlie a lever of one of the jaws, means for securing said arm to the lever, an end of the arm being continued by an angularly related offset finger, and a lifting element engageable with the finger.

1,622,447. CASTER. GEORGE J. KALBERER, Hamilton, Ohio. Filed Oct. 15, 1925. Serial No. 62,676. 3 Claims. (Cl. 16—47.)



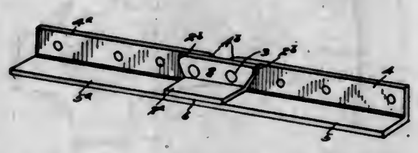
1. In a double wheel caster, a body, a swivelling bearing journalled in said body, an axle transversely extending through said bearing to swivel thereto and confine the bearing within the body, said axle carrying wheels respectively at its opposite ends, and a spindle for securing the caster in use, swivelled in said body transversely to said bearing and interlocking engagement therewith for confining the spindle against axial displacement from the body.

1,622,448. AUTOMATIC VALVE. LOUIS KALKBRENNER, Wall, S. Dak. Filed Nov. 23, 1925. Serial No. 71,001. 2 Claims. (Cl. 67—115.)



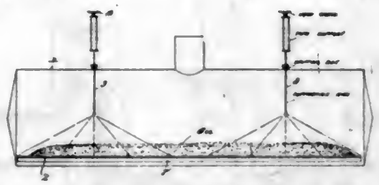
1. In combination with a gas main and its valve, a telescopic casing in communication with the main, a nipple in the casing of flexible material held expanded by the gas pressure, said expansion of the nipple moving the telescopic member of the casing, a spring for holding the telescopic member in contracted position and means for connecting said telescopic part with the valve.

1,622,449. DIFFERENTIAL LOCK FOR MOTOR VEHICLES. FREDERICK J. KATZ, Shreveport, La. Filed Oct. 5, 1921. Serial No. 505,516. 2 Claims. (Cl. 74—100.)



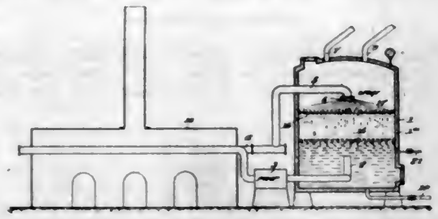
1. In combination with a differential through which a pair of aligned spindles are driven, a gear carried by each spindle, a longitudinally shiftable shaft, a plurality of pinions carried by said shaft, one for each spindle gear, said pinions being normally out of mesh with said spindle gears and arranged whereby with shifting of the shaft carrying the same in one direction the pinions will engage their respective pinions at different intervals.

1,622,450. ADJUSTABLE SHADE BRACKET. JOSEPH C. KLAPPENBERGH, Baltimore, Md. Filed June 21, 1923. Serial No. 646,908. 2 Claims. (Cl. 156—24.)



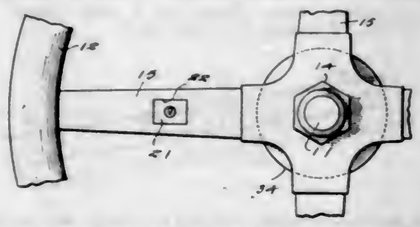
1. A shade roller bracket comprising, an elongated channel shaped base member having its flanges at right angles to the main body portion, a second elongated channel shaped member slidable longitudinally on said base member, said second member having its flanges at right angles to its main body portion and in embracing relation to said base member, and the free longitudinal marginal portions of the flanges of the base member projecting beyond the similar marginal portions of the flanges of the second member, means extending thru the web of said channel shaped base member for securing the same to a window casing and forcing the marginal portions of the flanges thereof into the material of the casing, means for adjustably retaining said second member on said base member, and a projection carried by said second member for supporting a shade roller.

1,622,451. SIDE STOP HINGE. LOUIS A. KROSCHEL, Los Angeles, Calif. Filed May 6, 1926. Serial No. 107,156. 3 Claims. (Cl. 16—163.)



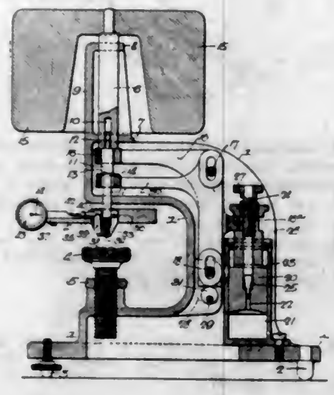
1. A hinge structure including a floating link of angle-section, a pair of leaves of angle-section having coplanar flanges lying against one flange of the link and tightly pivoted thereon; said leaves having flanges with end shoulders to mutually butt when the leaves aline.

1,622,452. STILL. HENRY M. LASHER, Kansas City, Kans., assignor to The Kansas City Gasoline Company, Kansas City, Kans., a Corporation of Kansas. Filed July 1, 1920. Serial No. 393,424. 1 Claim. (Cl. 196—104.)



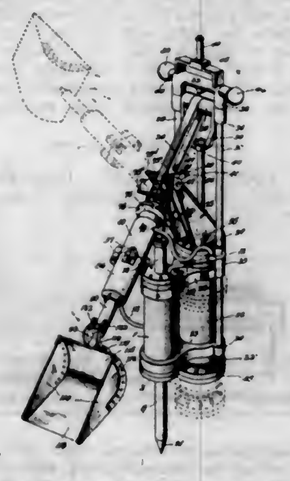
The combination of a still for cracking hydrocarbons and a rack, means for suspending said rack within the still and means for adjusting the vertical position of said rack, said adjusting means being operable from without the still, and stuffing boxes through which said suspending means pass.

1,622,453. METHOD OF TREATING HYDROCARBON OIL. HENRY MICHAEL LASHER, Kansas City, Kans., assignor to The Kansas City Gasoline Company, a Corporation of Kansas. Filed Nov. 16, 1920. Serial No. 424,471. 1 Claim. (Cl. 196—52.)



The method of cracking hydrocarbon oil which consists in heating and cracking the oil in separate chambers, while maintaining a uniform pressure and constant circulation through and between said chambers conveying the heat energy necessary for conversion and cracking in the oil itself from the heating zone to the cracking zone, and spraying said heated oil over a fixed catalyst in the cracking chamber in a position above the bottom thereof so as to leave a quiet zone in the lower part of the chamber whereby any carbon formed therein will fall by gravity to the lowest part thereof, and uncracked heavy portions of the oil will collect over said carbon, withdrawing the lighter cracked products from above the catalyst and returning the said heavier liquid products into circulation to and through the heating chamber from below said catalyst.

1,622,454. STEERING-WHEEL LOCK. LACEY LAXTON and CHARLES L. TROSPER, Black Joe, Ky. Filed May 29, 1926. Serial No. 112,039. 7 Claims. (Cl. 70—129.)

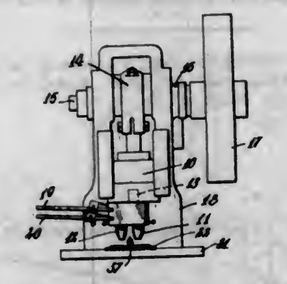


1. On a steering wheel lock, a steering post, a housing therefor having an inwardly directed flange provided at its inner face with lugs, a steering wheel mounted upon the post, a lock upon the steering wheel including a locking part which, in its locking position, has a portion extending between adjacent lugs of the flange and another portion extending beneath said flange to prevent vertical displacement of the steering wheel.

1,622,455. HARDNESS-TESTING MACHINE. ROBERT B. LEWIS, Philadelphia, Pa., assignor to Tinius Olsen Testing Machine Company, Philadelphia, Pa., a Corporation of Pennsylvania. Field Dec. 22, 1922. Serial No. 608,539. 18 Claims. (Cl. 265—12.)

1. The combination in a hardness testing machine of an anvil for supporting a test specimen; an indenting member; a weight for actuating said indenting member; means for automatically controlling the rate at which said weight is applied; means for removing the weight from the indenting member; and means for automatically indicating the amount of penetration of the indenting member.

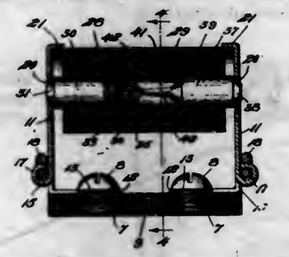
1,622,456. FLUID-PRESSURE-OPERATED SHOVELING MACHINE. AUGUST G. LIEBMANN, San Francisco, Calif. Filed Oct. 17, 1921, Serial No. 508,154. Renewed Aug. 20, 1926. 23 Claims. (Cl. 214—132.)



1. In a shoveling machine, a supporting means, a member supported thereon for tilting movement, means for tilting the member, a shovel, means carried by the tilting member and supporting the shovel for movement to elevated position upon tilting of the said member, the shovel supporting means being rotatable laterally to effect lateral tilting of the shovel supported thereby, and coacting means upon the first mentioned supporting means and the shovel supporting means for effecting such rotation, the last mentioned means comprising a relatively fixed abutment carried by the first mentioned supporting means, and means upon the shovel supporting means for coaction with the abutment in the tilting movement of the tilting member.

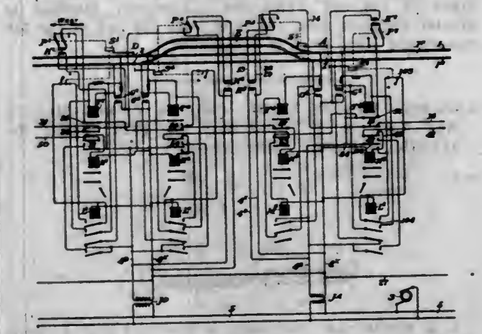
1,622,457. COMBINED MANUAL NIGHT-WATCH FIRE-ALARM BOX. WALTER S. LUDLOW, Jr., Cincinnati, Ohio. Filed Jan. 30, 1922. Serial No. 532,552. 6 Claims. (Cl. 177—364.)

1. An electric signal transmitting device, comprising a transmission mechanism, signal circuit controlling wheels operated by said transmission mechanism for distinguishable signal circuit control, signal circuit make and break mechanism operable by a selected one of said wheels, manually operable levers for controlling said transmission mechanism, each for a selective wheel cooperation with said circuit make and break mechanism, and means operative with said transmission mechanism for moving said wheels respectively into and out of cooperation with said circuit make and break mechanism.



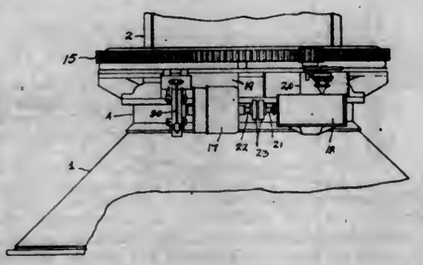
1,622,458. TWIN-LABEL PUNCHER. FRANK LUISA and JAMES DI MATTEO, New York, N. Y. Filed Apr. 3, 1925. Serial No. 20,330. 7 Claims. (Cl. 164—19.)

1. A label punching machine comprising a pair of hollow punching dies, a fibrous plate adjustably arranged beneath said dies, and a waste remover blade on said plate, and means for adjusting the relative positions of said fibrous plate and said waste remover plates.



1,622,459. RADIODETECTOR. BERNARD H. LUNDQUIST, Providence, R. I. Filed Feb. 29, 1924. Serial No. 695,925. 3 Claims. (Cl. 250—31.)

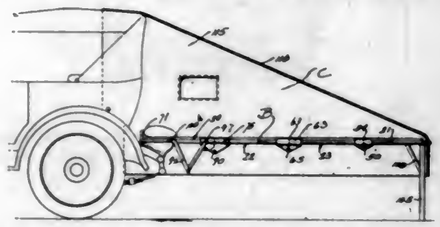
1. In a radiodetector, an insulating base, metallic supporting plates upon the base, an insulating block provided with a longitudinal bore, rods embedded in the block in the bore engaging the plates, a mineral element in the inner end of one rod, a needle carried by the inner end of the other rod engaging the mineral element, said



block being provided with a transverse opening extending to the bore in alignment with the mineral element, and a plug in the opening.

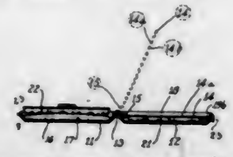
1,622,460. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. RONALD A. MCCANN, Swissvale, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Oct. 24, 1923. Serial No. 670,502. 11 Claims. (Cl. 246—34.)

7. In combination, a stretch of railway track comprising a rear and a forward section, a track circuit for said forward section, a relay controlled by traffic conditions in advance of said forward section, a transformer for supplying local train controlling current to said rear section, a primary circuit for said transformer controlled by said track circuit, and a pole changer included in said primary circuit and comprising contacts of said relay.



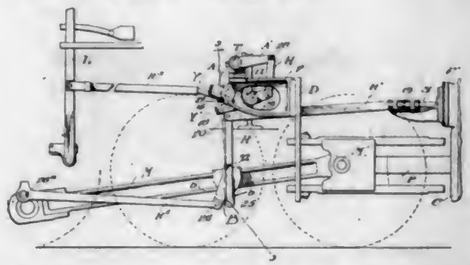
1,622,461. DISTRIBUTOR-DRIVING MECHANISM FOR BLAST-FURNACE STACKS. ARTHUR G. MCKEE, Cleveland, Ohio. Filed Apr. 25, 1925. Serial No. 25,892. 11 Claims. (Cl. 214—37.)

1. In blast furnace charging mechanism, the combination of a rotary distributor; a base ring providing an annular bearing for said distributor; integral brackets



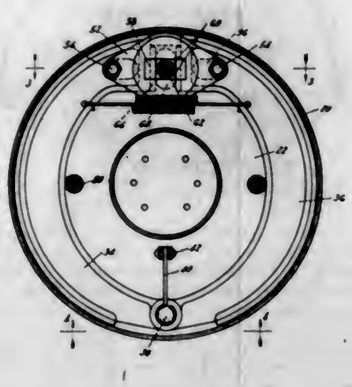
depending from said ring and presenting vertical clamping faces; a motor mounted on one such face; and a reduction gear mounted on the other such face, said gear being coupled to said motor and having driving connection with said distributor.

1,622,462. FOLDING BED FOR AUTOMOBILES. JOSEPH H. MCMANUS, Power, Mont. Filed Aug. 18, 1924. Serial No. 732,856. 6 Claims. (Cl. 5—119.)



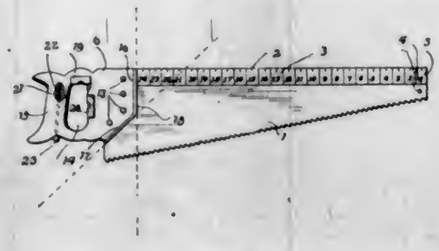
1. A collapsible bed comprising more than three sections each including side rail portions hingedly connected together so that when the sections are extended the rails will be in alignment at each side of the bed, said hinges including pivot points all offset to the same side of the plane of the bed which are successively disposed at greater distances from the rails from one end of the bed toward the other when it is extended.

1,622,463. VANITY CASE. CHARLES LIONEL MARCUS, New York, N. Y. Filed May 26, 1926. Serial No. 111,676. 4 Claims. (Cl. 132—83.)



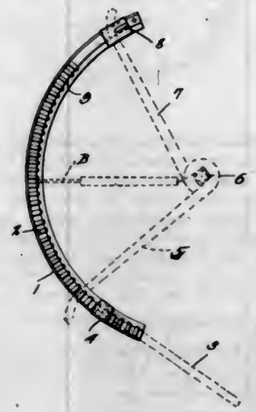
1. A vanity case comprising a container and a cover, said container and cover being substantially identical in shape and size and each adapted to hold a cosmetic, a hinge joining the cover to the container, and a double faced mirror secured to the hinge for swinging movement between the container and cover, said mirror having an offset portion to permit the mirror to be positioned a substantial distance into the cover whereby the available space over the container is increased as and for the purposes described and specified.

1,622,464. VALVE GEAR. MATHEW JOSEPH O'LEARY, Chickasha, Okla. Filed July 12, 1920. Serial No. 395,685. 3 Claims. (Cl. 121—163.)



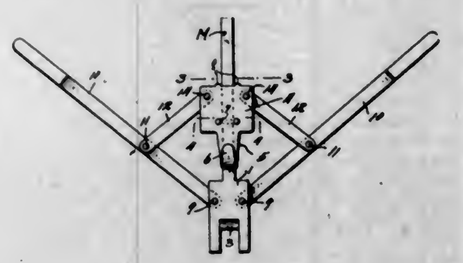
1. A valve gear comprising a valve stem, a frame, a compensating yoke of U-shaped formation fulcrumed on the frame, a motion yoke of U-shaped formation fulcrumed on the compensating yoke, a combination rod pivotally connected at its upper end to said motion yoke at one side of the latter's fulcrum point, a radius rod connected to the combination rod at a point below said motion yoke and to the valve stem, a bell crank lever fulcrumed on the main rod of a locomotive, said combination rod being pivotally connected at its lower end to one arm of said lever, a compensating rod pivotally connected at one end to an eccentric crank arm and pivotally connected to the other arm of said lever, and mechanism operatively connected to said motion yoke at the other side of its fulcrum point for adjusting the yoke, for the purpose described.

1,622,465. BRAKE. BEN G. PARSONS, Detroit, Mich., assignor to The Bendix Brake Company. Filed Feb. 18, 1925, Serial No. 10,018. Renewed Jan. 10, 1927. 12 Claims. (Cl. 188—194.)



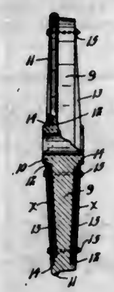
2. A vehicle having a swivelled wheel with a brake, and comprising, in combination therewith, a brake-applying device swivelling with the wheel and shiftable circumferentially of the brake to center itself, a non-swivelling brake-operating shaft, and a universal joint substantially in the swivelling axis of the wheel and connecting the shaft and said device and permitting not only the swivelling of the wheel but also the shifting of said device.

1,622,466. HANDSAW. CARL PATTERSON, Albuquerque, N. Mex. Filed July 14, 1926. Serial No. 122,419. 1 Claim. (Cl. 7—13.)



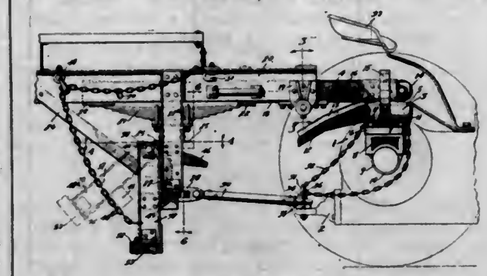
A saw comprising a blade, and a handle secured to one end portion of the blade, said blade having a straight rear edge, an auxiliary blade exteading transversely of the saw blade and having one end portion formed with a longitudinally extending slot providing arms to overlap opposite side faces of the saw blade, the saw blade having openings formed in its free end portion and the arms of the auxiliary blade being provided with alined openings to register with the openings in the saw blade, and fasteners passed through the registering openings of the blades to releasably secure the auxiliary blade to the saw blade at right angles to its back edge.

1,622,467. OIL-WELL JACK. HARRY W. RHINELANDER, Palembang, Sumatra, East Indies. Filed Oct. 20, 1926. Serial No. 142,976. 2 Claims. (Cl. 255—35.)



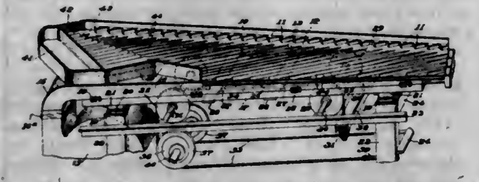
1. In an oil well jack an arcuate rack, and a longitudinal series of gear teeth upon the concave side of the rack.

1,622,468. TIRE SPREADER. ELMER H. SCHAEFFER and DAVID APPEL, Reading, Pa. Filed Nov. 6, 1926. Serial No. 146,765. 5 Claims. (Cl. 152—27.)



2. A tire spreader comprising a plate having an outstanding lug and provided with an elongated arm, a second plate slidably engaged with said arm, said plate having an arm disposed toward the first named plate and terminating in a return extension, operating members pivotally engaged with the first named plate, rigid links pivotally engaged with said operating members and with the second plate, and means for limiting the inward movement of the operating members, the pivotal connection between the links and operating members, when the operating members are at the limit of such inward movement, being disposed inwardly of the pivotal connection between said links and the second plate.

1,622,469. SOUND DEADENER. WALTER A SCOTT, Minneapolis, Minn. Filed May 24, 1926. Serial No. 111,470. 4 Claims. (Cl. 295—7.)



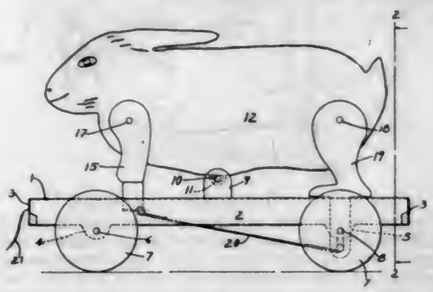
1. A sound absorbing wall comprising a multiplicity of substantially spherical ununited particles of non-resonant material and means to retain said particles in contacting relation.

1,622,470. HITCH FOR SEMITRAILERS. CALEB W. SHIPLEY and RUFUS B. JONES, Cincinnati, Ohio, assignors to The Trailmobile Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Sept. 27, 1922. Serial No. 590,804. 13 Claims. (Cl. 280—33.1.)

1. The combination of a two-wheeled trailer having a rigid load-bearing and trailer-steering tongue, and a tractor with its rear axle casing and differential gear-housing, a bridge supported near the ends of the casing, the trailer tongue being operatively supported upon a medial portion of the bridge immediately over the differential gear housing, and means constituting a draft connection between a rear portion of the tractor and a forward portion of the trailer.

1,622,471. CONCENTRATOR DECK. ALBERT H. STEBBINS, Los Angeles, Calif. Filed June 14, 1926. Serial No. 115,818. 9 Claims. (Cl. 209—467.)

1. A concentrator deck, comprising in combination, a deck casing having a deck surface that is supported at a transverse inclination, diagonally disposed riffles upon the deck surface and arranged to direct the concentrates toward the upper side of the deck while the tailings flow over the riffles toward the lower side of the deck, a feed hopper at one end of the deck, and a series of

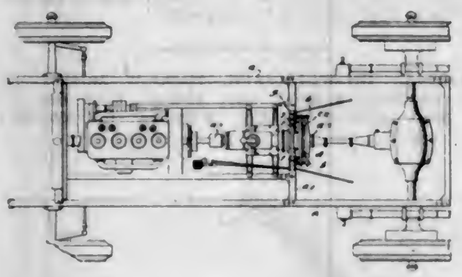


guide walls extending from the hopper over the deck surface toward the upper side of the deck and arranged to form canyons in which the material flows to predetermined portions of the deck surface, said walls having sufficient height to prevent the materials from flowing laterally over the walls.

1,622,472. PROPELLER. WILLIAM STELLNER, Collingwood, Melbourne, Victoria, Australia. Filed Jan. 4, 1926, Serial No. 79,152, and in Australia Feb. 26, 1925. 3 Claims. (Cl. 170—165.)

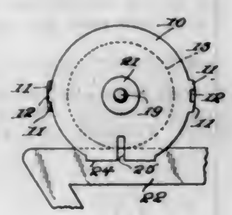
1. A marine propeller comprising a hub; and a plurality of inclined blades on said hub, each of which constitutes a sector of a circle defined by the outer edges or tips of the blades, the combined frontal area of said blades being substantially equal to the complete circular area between said outer edges of the blades and the periphery of the propeller hub the blades being arranged in sets on said hub.

1,622,473. FIGURE WHEELED TOY. EUGENE A. STIER, near Dayton, Ohio. Filed Oct. 20, 1925. Serial No. 63,756. 2 Claims. (Cl. 46—45.)



1. A figure toy comprising a base, wheels supporting the latter, a crank secured to the base and to which one pair of wheels is attached, a figure pivotally mounted at its middle portion upon said base, the latter being provided with front and rear parallel slots, a pair of legs projecting through the rear slots and pivotally connected between the rear portion of said figure and the crank, a U-shaped member whose legs project upwardly through the front slots for pivotal connection to the front part of said figure, and means connecting the crank and the cross portion of the U-shaped member, for the purpose specified.

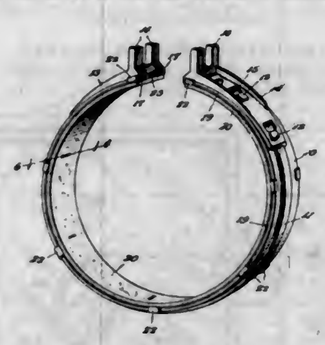
1,622,474. PROCESS OF EFFECTING AGGLOMERATION IN PAPER PULP AND OTHER SUSPENSIONS AND MIXTURES. KARL SVEEN, Aas Landbrukshoiskole, Norway. Filed July 17, 1925, Serial No. 44,355, and in Norway July 21, 1924. 8 Claims. (Cl. 92—40.)



1. Process of producing paper comprising the steps of incorporating into dilute paper pulp containing a mordant and being in the condition ready to be passed on to the wire cloth of the paper machine, a small proportion of an auxiliary substance of such a character as to become contracted or coagulated by interaction with mordants.

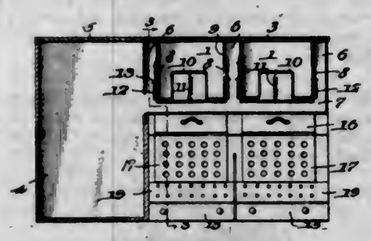
1,622,475. TRANSMISSION BRAKE. HORACE T. THOMAS, Lansing, Mich. Filed Aug. 6, 1921. Serial No. 490,226. 10 Claims. (Cl. 188—18.)

1. In an automobile, the combination of a transmission shaft with a disc fixed thereon against relative rotation, the automobile frame, a disc fixed on said frame against rotation relative thereto, one of said discs being provided with apertures therethrough and a plate having a frictional surface provided with lugs adapted to removably engage in said apertures for the purpose described and means for causing frictional engagement between said plate and the first mentioned disc.



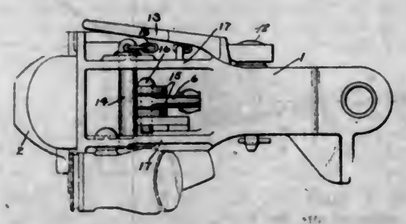
1,622,476. SKATE SHARPENER. STEVE TURI, New York, N. Y. Filed Mar. 6, 1926. Serial No. 92,812. 1 Claim. (Cl. 51—214.)

A sharpener for use upon ice skates comprising a pair of companion discs, each of which having spaced parallel inwardly extending fingers and correspondingly disposed lugs provided upon diametrically opposite sides thereof for interlocking engagement one with the other, a relatively small emery wheel fitting a bushing centrally thereof, an interiorly threaded sleeve providing keys upon diametrically opposite sides thereof and fitted within the corresponding sides of the bushing, and a bolt extending transversely and centrally through the discs and sleeve and a knurled nut upon its opposite end whereby guided by the runners and edge of a skate may be positioned and held between the discs for abrasive action against the emery wheel.



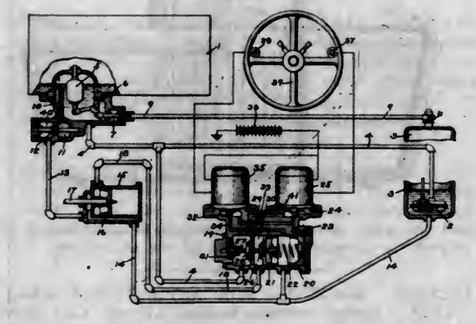
1,622,477. TRANSMISSION OR BRAKE BAND. JOHN C. WEBB, Tonawanda, N. Y. Filed Nov. 30, 1925. Serial No. 72,265. 5 Claims. (Cl. 188—249.)

3. In a transmission band, the combination of a strap, a removable lining carried thereby and slidably removable from the strap, freely detachable ear irons connected with the ends of the strap and provided with lugs to overlie the ends of the lining for locking the lining against endwise displacement, and an auxiliary lug carried by the strap at one end thereof to overlie the adja-



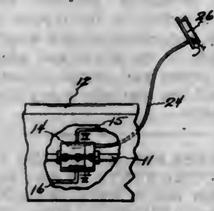
cent end of the lining for limiting the lining against displacement at said end of the strap.

1,622,478. REFRIGERATOR. CECIL O. WILLIAMS, Evansville, Ind. Filed May 17, 1926. Serial No. 109,617. 4 Claims. (Cl. 62—64.)



2. In a refrigerator, the combination with a compartment having an opening for the admission of cold air to the interior thereof, of a spring closure normally adapted to close said opening and provided with an actuating device arranged to be operated when an article is introduced into said compartment, and to be released when the article is removed from the compartment, whereby said closure is automatically opened to admit cold air into the interior of the compartment when an article is introduced into the compartment, and said closure is automatically closed to cut off the entry of the cold air into the compartment when the compartment is empty.

1,622,479. AUTOMATIC CAR COUPLER. HARRY F. WORRNLEY, Wilkinsburg, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed July 10, 1924. Serial No. 725,264. 1 Claim. (Cl. 213—100.)

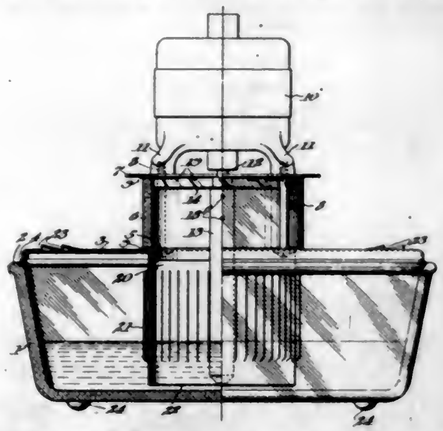


In an automatic car coupler, the combination with a coupler head having a rigid knuckle and a latch for engaging a counterpart coupler head to thereby lock the counterpart knuckles together, of lugs carried by said head and having apertures disposed in the path of said latch and a pin manually insertable in said openings to engage said latch and thereby prevent movement thereof from its locked position.

1,622,480. ELECTROHYDRAULIC BRAKE. BURTON S. AIKMAN, Milwaukee, Wis., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Apr. 25, 1925. Serial No. 25,790. 10 Claims. (Cl. 303—11.)

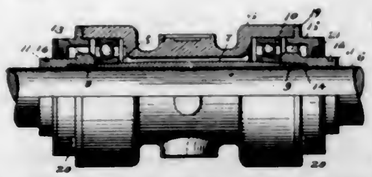
1. In a liquid pressure brake, the combination with a receptacle containing liquid under pressure and means for supplying liquid from said receptacle for controlling the brakes, of an internal combustion engine having a compression chamber, and means for supplying gases under pressure from said chamber to said receptacle.

1,622,481. DEVICE FOR MEASURING THE LUBRICATING VALUE OF OIL. JAMES B. ANNIS, Kansas City, Mo. Filed Aug. 3, 1925. Serial No. 47,853. 6 Claims. (Cl. 265—10.)



1. A device for measuring the lubricating value of oil comprising a housing having an oil inlet and an oil outlet, a rotatable shaft passing through said housing, a shaft-engaging member having a radially projecting cam within said housing, yieldable movement resisting means engaging said shaft engaging member and an indicating device having means operable by said cam.

1,622,482. HUMIDIFIER. FREDERIC F. BAHNSON, Winston-Salem, N. C. Filed Feb. 27, 1925. Serial No. 12,084. 11 Claims. (Cl. 183—22.)

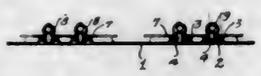


1. In an evaporating humidifier, a receptacle for holding water, a vertically arranged and substantially cylindrical surface having its lower end below the normal water level, means operative to deliver water from said receptacle to the upper portion of said surface, and means operative to establish a rotating tubular column of air

moving downwardly along said surface, the lower portion of said surface being provided with passages therethrough

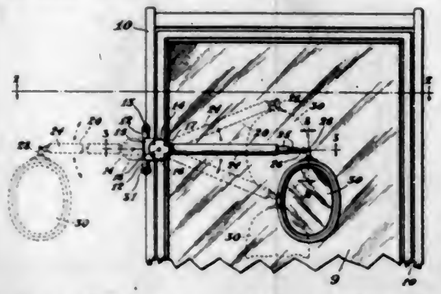
and the walls defining said passages being arranged to reverse the direction of rotation of the air current.

1,622,483. MOUNTING FOR ANTIFRICTION BEARINGS. JOSEPH OSWELL BAILEY, Atlanta, Ga. Filed Oct. 26, 1921. Serial No. 510,519. 7 Claims. (Cl. 308—189.)



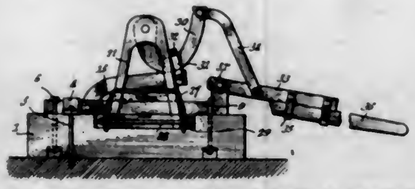
1. A hanger for anti-friction bearings, including a split adapter sleeve for engagement with a shaft, said sleeve being oppositely tapered to points spaced from the ends, the said untapered portions being externally threaded, bearings carried by the tapered portions of the sleeve, a housing, end covers for the housing, and means concealing the ends of the sleeve and adapted to extend through the end covers and engage the screw threads of said sleeve to hold the bearings in a predetermined position upon the sleeve.

1,622,484. PROCESS FOR IMPROVING THE TONE OF STRINGED INSTRUMENTS. PETER BAMBERGER, Denver, Colo. Filed Oct. 9, 1925, Serial No. 61,593, and in Germany Sept. 15, 1925. 6 Claims. (Cl. 134—26.)



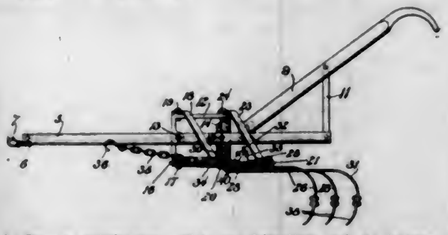
1. A medium for the treatment of stringed musical instruments to improve their tonal qualities comprising onion juice and a varnish vehicle.

1,622,485. ELECTRIC HEATING DEVICE. ALFRED BERSTED and MARTIN BERSTED, Chicago, Ill., assignors to Bersted Manufacturing Company, Chicago, Ill., a Copartnership composed of Martin Bersted and Alfred Bersted. Filed Feb. 13, 1925. Serial No. 8,869. 4 Claims. (Cl. 201—70.)



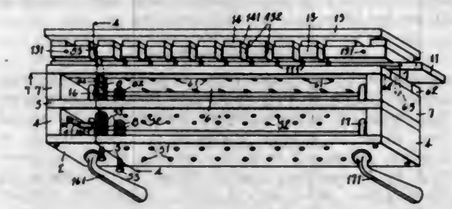
1. In a waffle iron, a base member having depressions in its lower face forming rising projections upon its upper face, U-shaped clips riveted upon said projections and insulated from said base, and a resistance coil confined in said clips, the arms of said clips being folded over said coil.

1,622,486. ADJUSTABLE MIRROR BRACKET. VICTOR BOURDON, Seattle, Wash. Filed Apr. 1, 1925. Serial No. 19,857. 5 Claims. (Cl. 45—97.)



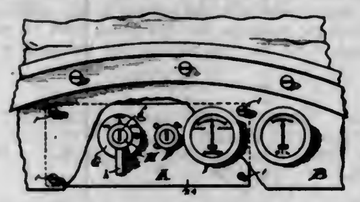
1. In an adjustable mirror-bracket, in combination, a fixed base, a vertically disposed hinge pin mounted therein, a horizontally swinging casing mounted upon said hinge pin, a vertically swinging mirror supporting arm pivotally connected within said casing for horizontal swinging movement therewith, and frictional means disposed within said casing for restrainingly engaging and retaining said arm in selective vertically adjustable positions relative to the casing.

1,622,487. METAL CUTTER. AMEDÉE BRETON, St. Louis de Nedelec, Quebec, Canada. Filed Nov. 17, 1925, Serial No. 69,654, and in Canada July 30, 1925. 6 Claims. (Cl. 164—6.)



1. A metal cutter comprising a body, a longitudinal bar lying on said body, a fixed knife secured to said bar, a movable knife pivoted to said bar, an upright bearing mounted in the body, a follower pivoted in said bearing and slidably engaging said movable knife, a lever pivoted to one end of the bar, and a yoke secured to the fixed knife and receiving said follower.

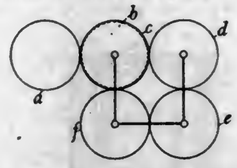
1,622,488. CULTIVATOR. ARTHUR BRIODEN, Tuscaloosa, Ala. Filed June 25, 1926. Serial No. 118,542. 6 Claims. (Cl. 97—175.)



1. In a cultivator, the combination of a beam, a block mounted on the beam, spreader bars supported by said block, arms supported by the block and the spreader bars respectively, and depending teeth secured to the arms, said block being angularly adjustable in a vertical plane to vary the pitch of said teeth.

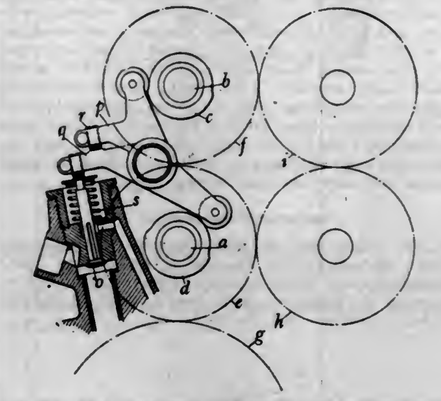
1,622,489. COMBINATION LOCK. BYRON J. CARNES, Charlotte, Mich. Filed Feb. 23, 1926. Serial No. 90,074. 6 Claims. (Cl. 70—54.)

1. In a combination lock, a casing, parallel plates at the front of the casing, a sliding lock bolt with transverse slots, yielding push pins disposed through the said plates, each provided with a collar and spring reacting against the same to hold it in the outer initial position, plates with transverse guides, a plurality of catch slides with transverse notches and catches at different locations, disposed in said guides with heads opposite the said push pins and movable into and out of engagement with said bolt, certain of the said slide catches being notched to engage the said bolt when in depressed position and others to engage said bolt when in initial position, whereby special manipulation of the push pins is required to release the lock bolt, coiled springs for holding said slides with their heads yieldingly in position whereby the said slides may be depressed by said push pins, a latch on each slide, a perforated latch plate adapted to be engaged by said latches when the slides are depressed, a release plate with apertures to receive said slide latches, a rock lever to manipulate the release plate with a handle at the front of said casing whereby the lock can be reset for manipulation and the bolt can be engaged and locked against movement when in the locking position, and a lock lever for manipulating the lock bolt, with handle at the front of said casing, coacting as described.



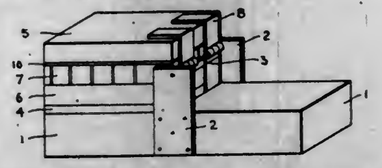
1,622,490. LOCK. CHARLES T. CHADWICK, Somis, and JOHN W. BOONE, Van Nuys, Calif. Filed Aug. 26, 1924. Serial No. 734,227. 4 Claims. (Cl. 70—127.)

1. Improvements in lock switches, including a casing, a cover for the casing, and a lock for locking said cover on the casing comprising cleats on the inside of said cover, locking bolts mounted in the casing, and means actuated by the tumbler of the lock for introducing said bolts under said cleats to prevent removal of the cover from the casing when the lock is locked, and for withdrawing said bolts from under said cleats when the lock is unlocked.



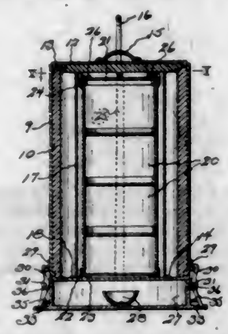
1,622,491. MECHANISM FOR VARYING THE ANGULAR RELATIONSHIP OF TWO SHAFTS RELATIVELY TO A THIRD. LOUIS COATALEN and STANLEY HERBERT ATTWOOD, Wolverhampton, England. Filed Apr. 26, 1926, Serial No. 104,788, and in Great Britain Apr. 6, 1925. 3 Claims. (Cl. 74—7.)

1. A mechanism for varying the angular relationship between two shafts relatively to a third shaft, comprising a driving shaft, two driven shafts, a gear train for driving said driven shafts from said driving shaft including three intermediate gears and a pinion secured to each driven shaft, a pair of said intermediate gears being carried by a linkage pivoted on said driven shafts and engaging each other, the third intermediate gear being freely and slidably mounted on one of said driven shafts and driven by the driving shaft, said third gear



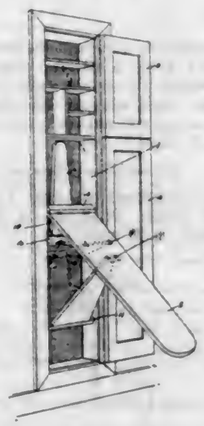
when in one position driving one of said driven shafts directly, the other driven shaft being driven through said pair of gears, the angular relationship between one of said driven shafts relatively to the other shafts being changed when the linkage is shifted angularly with respect to the driven shafts.

1,622,492. VALVE-OPERATING MECHANISM. LOUIS COATALEN, Wolverhampton, England. Filed Apr. 29, 1926, Serial No. 105,519, and in Great Britain Apr. 6, 1925. 5 Claims. (Cl. 123—146.)



1. In valve operating mechanisms, the combination of a valve operating lever, a pair of cams acting on said lever, means secured to one of said cams for rotating the other of said cams, whereby said cams rotate simultaneously, and means for angularly adjusting said cams relatively to each other.

1,622,493. EGG-DUMPING BOARD. CHARLES C. CRAIG, San Francisco, Calif. Filed Dec. 2, 1925. Serial No. 72,826. 1 Claim. (Cl. 226—14.)

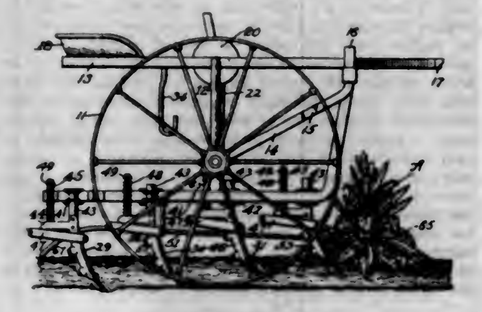


A device for handling eggs having in combination a base, uprights attached thereto, a bar held by said uprights, a board hinged to said bar by right angularly bent hinges and adapted to receive an egg tray, a tray also hinged to said bar by right angularly bent hinges and adapted to receive an egg separating member, a pad in said tray, the whole arrangement being such that the hinged portion with its contents may be inverted and the eggs thereby transferred from said egg tray into said egg separating member.

1,622,494. CONTAINER FOR TRANSPORTING HOT FOOD. LOUIE COLLIER CRANSTON, Kansas City, Mo. Filed Nov. 2, 1925. Serial No. 66,259. 2 Claims. (Cl. 126—262.)

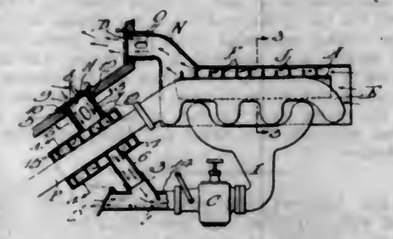
1. In a device of the character described, a main receptacle having an open top and an integral closed bottom, a lid for said open top, said lid and the side walls only of said receptacle being lined with heat retaining substance, means within said main receptacle for maintaining a stack of food containers spaced apart from said walls, and heating meats attachable beneath the bottom of said main receptacle, said spacing means comprising an annular continuous wall supported and retained in spaced relation by attachment to the bottom of said main receptacle and having its upper end closed by said insulated lid, said spacing wall providing a dead air space adjacent said heat retaining lining.

1,622,495. IRONING BOARD. EARLE W. CUMMINGS, Santa Barbara, Calif., assignor of one-half to Santa Barbara Lumber Company, Santa Barbara, Calif., a Corporation of California. Filed Jan. 9, 1926. Serial No. 80,142. 1 Claim. (Cl. 68—10.)



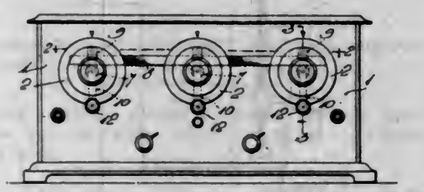
A cabinet, a board adapted to be extended horizontally therefrom, an inner and an outer brace pivoted at their forward ends to the underside of the board and at their rear ends to the cabinet, said inner brace extending approximately parallel to the board when in horizontal position and forming a stop to prevent downward movement of the inner end of the board when in said last named position, said board being wholly supported by said braces and adapted to be swung thereon from its horizontal position to a vertical, inoperative position, within the cabinet with its inner end uppermost and means to lock said board against said inner brace to hold the board in a horizontal position.

1,622,496. CELLULOSE-FIBER PRODUCT TREATED WITH A SIZE EMBODYING SOY-BEAN FLOUR AND PROCESS OF MAKING THE SAME. GLENN DAVIDSON, HUGH F. RIPPEY, CHARLES N. CONE, IRVING F. LAUCKS, and HARRY P. BANKS, Seattle, Wash., assignors to I. F. Laucks Inc., Seattle, Wash., a Corporation of Washington. Filed May 3, 1926. Serial No. 106,543. 5 Claims. (Cl. 92—21.)



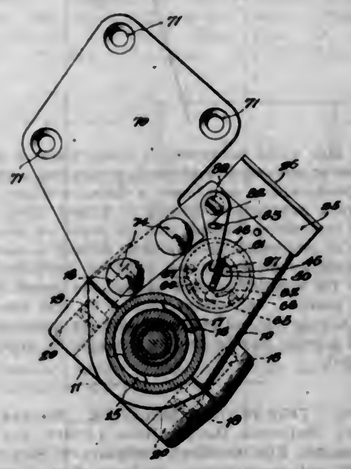
1. A cellulose fiber product treated with a size embodying soy bean flour.

1,622,497. LEAF-LIFTING DEVICE FOR RIDING CULTIVATORS. ALBERT C. DIBBLE, Southwick, Mass. Filed Jan. 17, 1922. Serial No. 529,904. 3 Claims. (Cl. 97—192.)



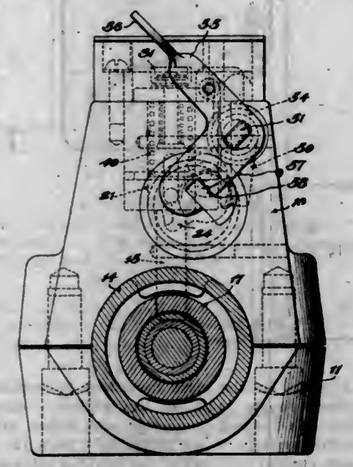
1. In a cultivator comprising gang frames, a plurality of shovels yieldingly secured to the said gang frames, a plant lifter comprising rods conuected to the front shovels and the frames for lifting the leaves of the plants out of the path of the dirt thrown up by the said shovels, and means for allowing the leaf-lifting rods to move in conformity with the front shovels for the purpose specified.

1,622,498. VEHICLE INCLOSURE HEATING AND VENTILATING MEANS. WILLIAM G. DUNN, Clarinda, Iowa. Filed Feb. 24, 1925. Serial No. 11,264. 5 Claims. (Cl. 123—122.)



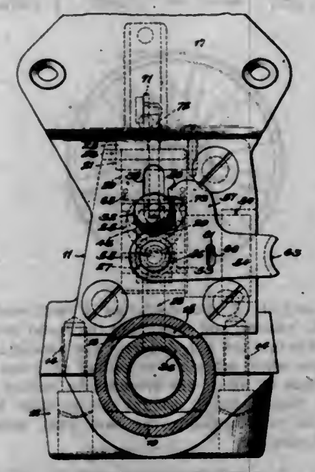
3. In a vehicle having an internal combustion motor, an occupant enclosure, a hot air inlet for said enclosure, and means for heating the air entering said inlet; a suction passage leading to the carbureter air intake of the motor and having one air inlet leading from the interior of the aforesaid enclosure to withdraw air therefrom and induce hot air to enter said enclosure through said hot air inlet for the purpose of heating the enclosure, said suction passage also having another air inlet leading from the air at the exterior of said enclosure, and damper means for said inlets of said passage under a common control and operative to totally or partially close one of said inlets and simultaneously effect total or partial opening of the other inlet, whereby at one operation, both the heating of the occupant enclosure and the temperature of the air entering the carbureter, may be regulated according to the temperature outside of said enclosure.

1,622,499. CONTROLLING MEANS FOR RADIO SETS. WILLIAM G. DUNN, Clarinda, Iowa. Filed Apr. 2, 1925. Serial No. 20,254. 8 Claims. (Cl. 74—7.)



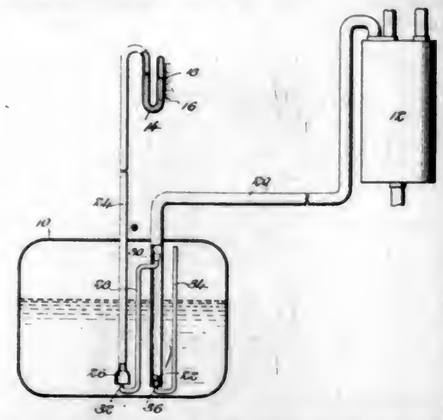
1. An adjusting means for a plurality of instrument shafts, said means comprising two members for each instrument, one rotatable with respect to the shaft and the other secured to the shaft, means for simultaneously rotating the rotatable members, and a driving connection from the rotatable member of any instrument to the shaft-carried member of such instrument, said driving connection having finger-operated means for simultaneously holding the rotatable member against turning and effecting an adjustment of the shaft-carried member.

1,622,500. LOCK. CHARLES N. FAIRCHILD, Milford, Conn., and FOSTER J. HULL, Hagerstown, Md., assignors to Fairchild Lock Corporation, New York, N. Y., a Corporation of Delaware. Filed Feb. 14, 1925. Serial No. 9,325. 12 Claims. (Cl. 70—127.)



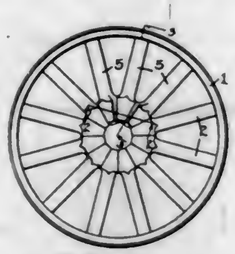
1. In combination, a bolt, means for advancing said bolt, a key operated lock mechanism for retracting said bolt, and means for preventing said bolt advancing means from operating until said key is removed from said lock.

1,622,501. TRIGGER CONTROL. CHARLES N. FAIRCHILD, Milford, Conn., assignor to Fairchild Lock Corporation, New York, N. Y., a Corporation of Delaware. Filed May 1, 1925. Serial No. 27,266. 9 Claims. (Cl. 70—127.)



1. In combination a spring pressed bolt, key operated means for retracting same, manually operated release mechanism for shooting said bolt to locked position, and means for preventing the operation of the release when the key is in the lock.

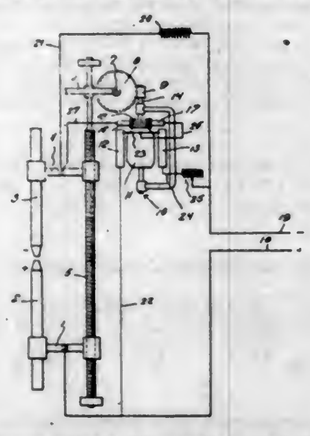
1,622,502. MANUALLY-CONTROLLED LOCK. CHARLES N. FAIRCHILD, Milford, Conn., assignor to Fairchild Lock Corporation, New York, N. Y., a Corporation of Delaware. Filed July 27, 1925. Serial No. 46,368. 17 Claims. (Cl. 70—127.)



9. In a coincidental lock, an ignition switch, a plunger, a locking member confined therein, mechanism connected to said plunger for controlling said switch, a spring-pressed bolt locking the plunger at each end of its travel, means for withdrawing said bolt, and means for moving said plunger.

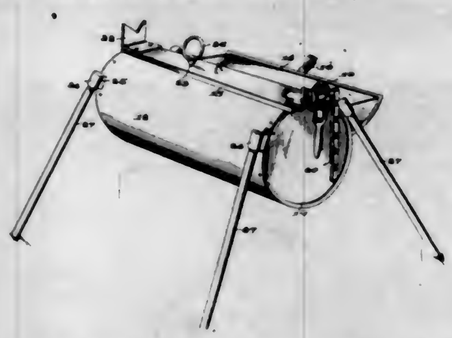
1,622,503. LIQUID-LEVEL GAUGE. JAMES FENTRESS, Chicago, Ill. Filed Apr. 6, 1925. Serial No. 21,102. 3 Claims. (Cl. 73—54.)

1. In a device of the class described, in combination with a liquid supply tank, an intermittently operating suction device, a conduit connecting said device with the tank whereby liquid is drawn periodically from the latter through said conduit and part of the liquid is allowed periodically to flow back to said tank; a gauge, a conduit connecting the gauge with the tank and terminating within the latter at the minimum depth to be gauged, means for supplying air to the liquid as it is drawn into the first mentioned conduit, and a tube having one end disposed in the first mentioned conduit and opening to receive back flow of liquid in said conduit, said tube having an outlet positioned to discharge entrained air passing through the tube during back flow of liquid into said second mentioned conduit.



1,622,504. METHOD OF MANUFACTURING SEMI-WOOD WHEELS. HENRY FLICK, Jackson, Mich., assignor to Hayes Wheel Company, Jackson, Mich. Filed Dec. 17, 1921. Serial No. 523,029. 2 Claims. (Cl. 157—1.)

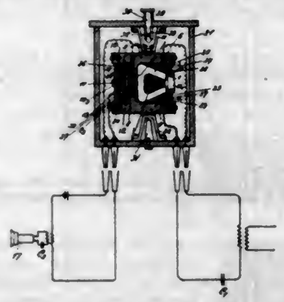
1. The method of manufacturing a semiwood wheel consisting in heating and expanding the metal felly, driving the spokes into the felly securely and arranging in the plane of the wheel with the exception of three spokes, the inner ends of which are arranged in arched relation with their tenons forced as far as possible into the mortises, and then pressing the said final spokes into position, as specified.



1,622,505. AUTOMATIC CONTROL FOR ARC LAMPS. CECIL M. FOX, Toledo, Ohio. Filed Aug. 6, 1925. Serial No. 48,575. 9 Claims. (Cl. 176—74.)

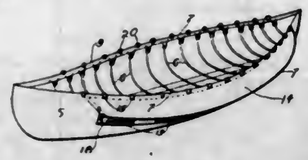
5. In an arc lamp, a Wheatstone bridge, electrodes adapted to form an arc in one leg of said bridge, a motor comprising an armature and two field windings, one of said field windings being in another leg of said Wheatstone bridge, the other of said field windings being in another leg of said Wheatstone bridge, the armature being connected across the meeting point of two legs of

said Wheatstone bridge and the meeting point of the other two legs of said Wheatstone bridge, and a source of power connected across the other two meeting points of said bridge legs, whereby the arc will be maintained at a constant value.



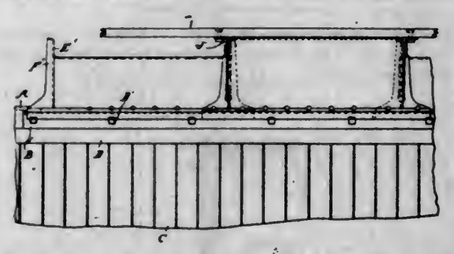
1,622,506. STEAM-FITTER'S APPLIANCE. WALTER L. GRAVES, Hatfield, Mass. Filed July 2, 1926. Serial No. 120,169. 3 Claims. (Cl. 81—41.)

1. A pipe stand comprising a bench block, a pipe vise arranged at one end of said block, a pipe rest arranged at the opposite end of said block, a casing attached beneath said block, said casing having a hinged cover portion having cooperative locking relation with an element arranged on said bench block, sockets formed on said casing at a plurality of points, leg members insertible in said sockets for supporting said casing and bench block in service position, and means carried by said bench block for anchoring one end of one of said leg members whereby said member may be used as a handle for transporting the stand.



1,622,507. VIBRATION AMPLIFIER. WALTER HAHNEMANN, HEINRICH HECHT, HUGO LICHTE, and LEONID ADELMANN, Kiel, Germany, assignors to Signal Gesellschaft mit beschränkter Haftung, Kiel, Germany, a Firm. Filed Oct. 24, 1922, Serial No. 596,648, and in Germany Sept. 18, 1922. 7 Claims. (Cl. 179—171.)

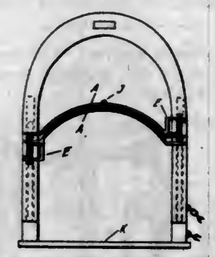
4. In an apparatus of the character described a substantial, common mass including an electromagnet, an armature for said electromagnet elastically connected to said common mass and a microphone elastically connected to said common mass, whereby said armature and



said microphone are acoustically coupled by said common mass.

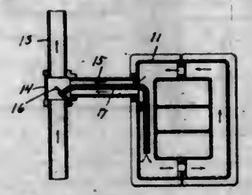
1,622,508. BOAT. ERNEST H. HARPER, Oakland, Calif. Filed Sept. 10, 1925. Serial No. 55,448. 3 Claims. (Cl. 9—8.)

1. A buoyant element for a boat comprising an elongated inflatable tube, in combination with a boat; a fabric flap attached by its bottom edge to the boat substantially parallel with the gunwale of the boat and having attaching members at its top edge to engage a covering member and a covering member having cooperating attaching means near its bottom edge to secure it to said flap and having hooks at its top edge to secure it to the gunwale of the boat.



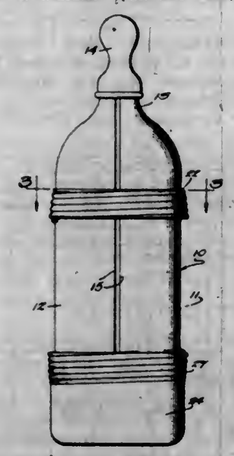
1,622,509. CAR ROOF. DAVID W. HAWKSWORTH, Detroit, Mich., assignor, by mesne assignments, to Hutchins Car Roofing Company, Detroit, Mich., a Corporation of Delaware. Filed Mar. 13, 1922. Serial No. 543,282. 12 Claims. (Cl. 108—5.4.)

1. A car roof comprising alternate roofing sheets having their bodies arranged in spaced planes, and overlapping angular flanges projecting from said sheets rigidly secured to each other.



1,622,510. SAFETY DEVICE FOR SADDLE STIRRUPS. MATHEW HENDRIKS, Ogema, Saskatchewan, Canada. Filed Jan. 22, 1926, Serial No. 85,073, and in Canada Apr. 29, 1925. 1 Claim. (Cl. 54—49.)

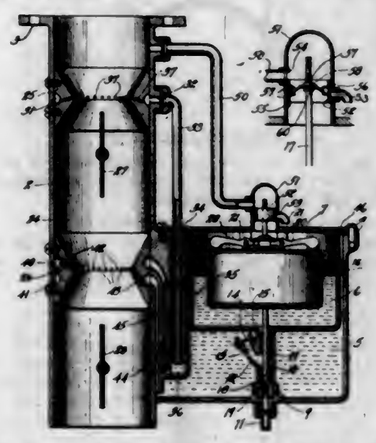
A safety stirrup comprising a yoke having tubular sides, a foot bar having upwardly projecting posts adapted to telescope in said sides, a pair of parallel bars, one end of each of which is pivoted to an opposite side of the yoke, means for causing the free ends of the bars to retain the posts in operative position, and



means on one of the said bars for causing both to move simultaneously to free said posts when pressure is applied to said first mentioned bar.

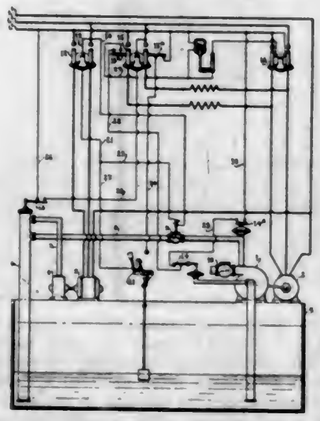
1,622,511. COOLING APPARATUS. NICOLAI H. HILLER, Carbondale, Pa. Filed Jan. 19, 1926. Serial No. 82,199. 7 Claims. (Cl. 257—21.)

3. In combination a header, a brine cell, a single pipe connecting said header and brine cell, a baffle within said header and provided with an aperture therethrough, and a second pipe within said first mentioned pipe and having one end extending through and supported by said baffle, and the opposite end disposed within said brine cell.



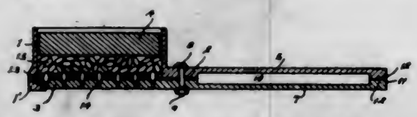
1,622,512. NURSING BOTTLE. ANNA MAUDE HOLLADAY, New York, N. Y. Filed Dec. 18, 1925. Serial No. 76,299. 3 Claims. (Cl. 215—11.)

1. A bottle divided longitudinally to form a pair of complementary sections, a gasket arranged between the edges of said sections and extending throughout the length thereof, said bottle being provided with an upper threaded portion tapered to increase in diameter toward its lower end, a clamping ring threaded internally to correspond to the upper threaded portion of the bottle and adapted to be threaded thereon, said bottle



being further provided with a lower threaded portion tapered to decrease in diameter toward its lower end, and a second clamping ring threaded to correspond to and adapted to engage the lower threaded portion of the bottle.

1,622,513. CARBURETOR. STANLEY B. HOLMES, Seattle, Wash. Filed Apr. 9, 1923. Serial No. 630,785. 2 Claims. (Cl. 158—36.2.)

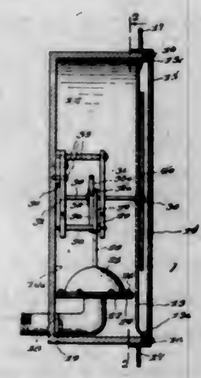


1. In a carburetor, in combination with a suction manifold, a float chamber, a fuel storage chamber adapted to be filled through a back check valve connection with the float chamber and having connection with a source of fuel supply, a valve in said fuel supply connection, a float for controlling said valve, a cylindrical dome opening into the top of the float chamber and having an opening in the side thereof to outside atmosphere, a suction conduit from the suction manifold opening into one side of the dome in offset relation above the opening to atmosphere, a sleeve slidably fitted in the dome and operable by the float between positions to cover either the opening to atmosphere or the opening to the suction manifold.

1,622,514. CONTROLLER FOR POWER-DRIVEN PUMPS. BAYARD M. HORTER, Kingston, Pa., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed Dec. 15, 1922. Serial No. 607,086. 29 Claims. (Cl. 103—26.)

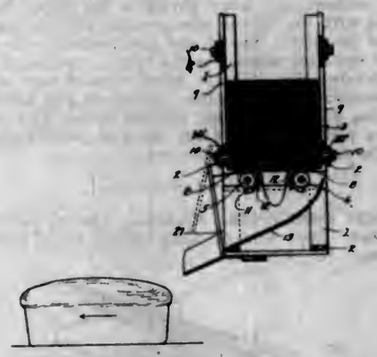
1. In a controller for hydraulic pumps, the combination with driving and control means and independently driven priming means for the pump, of control means for said priming means providing for starting thereof prior to starting of said pump and for stopping of said priming means but only upon given operation of said pump control means.

1,622,515. GRAIN TESTER. MARK ISAACS, Minneapolis, Minn. Filed May 18, 1925. Serial No. 31,225. 1 Claim. (Cl. 83—6.)



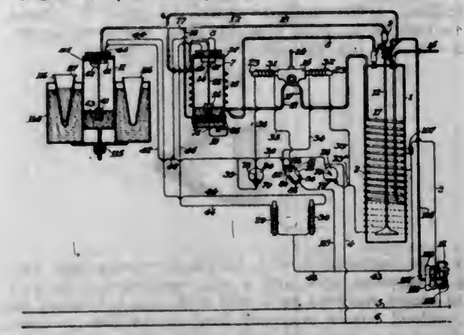
In a grain tester, a cup for receiving the sample to be tested having a perforated bottom and provided with an extending handle, a holder normally located beneath the cup and having pockets therein opposing the perforations, said holder being provided with an extending handle, a cutting knife interposed between the cup and the holder, said cutting knife being provided with an extending handle, a pin pivotally connecting the handles together, a weighted disc loosely inserted within the cup and a retaining finger carried by the cup at the side remote from the pin and receiving the adjacent edge of the closed holder.

1,622,516. ADJUSTABLE ECCENTRIC CHAIR FOR BRAKE BEAMS. WILLIAM JANUS, St. Louis County, Mo., assignor to Chicago Railway Equipment Company, Chicago, Ill., a Corporation of Illinois. Filed May 19, 1925. Serial No. 31,386. 17 Claims. (Cl. 188—213.)



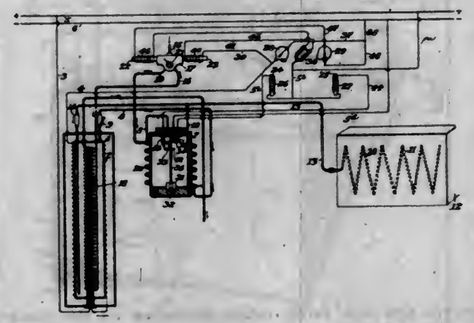
1. An eccentric support chair adapted to be mounted on a brake beam part, and adjustable eccentrically to vary in a vertical plane the points of engagement of said eccentric member with the parts with which it is associated.

1,622,517. PRESSURE GAUGE. JOHN H. JOHNSON, Chicago, Ill. Filed Oct. 8, 1923. Serial No. 667,330. 3 Claims. (Cl. 73—110.)



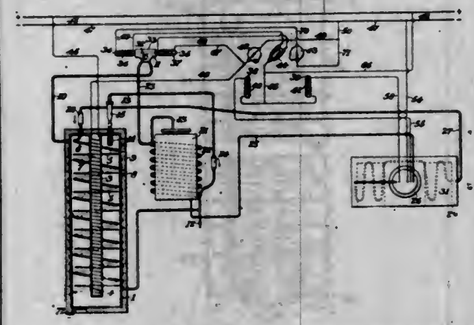
1. A pressure-responsive device comprising a rigid dome, a limp-material disk under the dome and hermetically attached to the rim thereof, and a fixedly supported air conduit leading into the dome by way of the center of the disk and supporting the disk and dome, said dome responding of its weight to a reduction of the pressure, and the said disk yielding to the fall of the dome.

1,622,518. CARD OR PAMPHLET HOLDING DEVICE. OLAF W. JOHNSON, Seattle, Wash., assignor, by direct and mesne assignments, to Bakeries Service Corporation, Chicago, Ill., a Corporation. Filed Aug. 5, 1925. Serial No. 48,235. 3 Claims. (Cl. 271—23.)



1. A device of the character described, comprising a frame structure provided at its lower end with a delivery chute, a pair of feed shafts extended in parallel relation and in the same horizontal plane through said frame, friction feed rollers on said shafts, a pair of vertically adjustable bars within the frame at opposite sides and having inturned ends adapted to support a stack of pamphlets from their opposite edges just above the shafts, and means for rotating the shafts at the same rate and in opposite directions to cause the feed rollers to engage with the bottom of the stack to feed the pamphlets therefrom downwardly between the shafts into the chute.

1,622,519. APPARATUS FOR PRODUCING REFRIGERATION. FREDERICK G. KEYES, Cambridge, Mass., assignor, by mesne assignments, to National Refrigerating Company, Boston, Mass., a Corporation of Massachusetts. Filed Feb. 19, 1920. Serial No. 359,882. 9 Claims. (Cl. 62—5.)

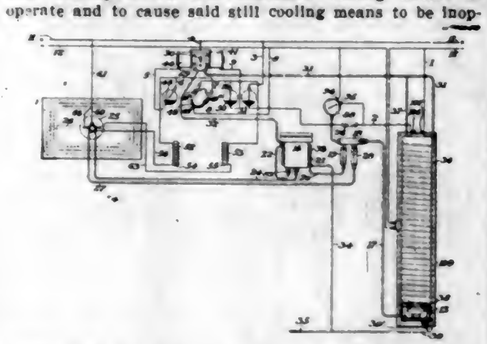


1. In a refrigerating apparatus, the combination of a distilling chamber, a condensing chamber, and a refrigerating chamber, of a cooling device for the still and the condensing chamber, of electrical means for starting the still into operation and simultaneously applying a cooling medium to the condensing chamber, means for shutting off the still and transferring the cooling medium thereto when sufficient refrigerant has been collected in the condensing chamber, and automatic means for cutting out the electrical means after each period of operation.

1,622,520. REFRIGERATING MACHINE. FREDERICK G. KEYES, Cambridge, Mass., assignor, by mesne assignments, to National Refrigerating Company, Boston, Mass., a Corporation of Massachusetts. Filed May 11, 1920. Serial No. 380,540. 9 Claims. (Cl. 62—5.)

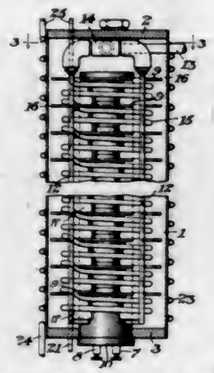
1. In a refrigerating apparatus, the combination with distilling and refrigerating chambers, of an intermediate condenser and condensing chamber, and electric means actuated by a variation of the level of liquid refrigerant in said condenser for controlling the cyclic operation of said apparatus.

1,622,521. REFRIGERATION. FREDERICK G. KEYES, Cambridge, Mass., assignor, by mesne assignments, to National Refrigerating Company, Boston, Mass., a Corporation of Massachusetts. Filed June 8, 1921. Serial No. 475,855. 5 Claims. (Cl. 62—5.)



1. In a refrigerating apparatus, the combination of a distilling chamber, a condensing chamber connected to said distilling chamber, a refrigerating chamber, a capillary tube connecting said condensing chamber to said refrigerating chamber, a one way fluid connection from said refrigerating chamber to said distilling chamber, and means in said refrigerating chamber for controlling the operation of the apparatus.

1,622,522. REFRIGERATION. FREDERICK G. KEYES, Cambridge, Mass., assignor, by mesne assignments, to National Refrigerating Company, Boston, Mass., a Corporation of Massachusetts. Filed Nov. 6, 1923. Serial No. 673,105. 4 Claims. (Cl. 62—5.)

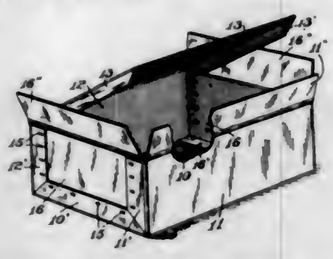


1. In refrigerating apparatus, in combination, a refrigerator chamber, a condenser, a still, pipe connection from said still to said condenser with a check valve therein permitting flow from said still to said condenser, pipe connection from said condenser to said refrigeration chamber, pipe connection from said refrigeration chamber to said still with a check valve therein permitting flow from said refrigeration chamber to said still, a refrigerant therein, heating means for said still, cooling means for

said still, cooling means for said condenser, means for controlling said beforementioned means for causing the still heating means and condenser cooling means to operate and to cause said still cooling means to be inop-

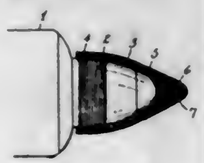
erative and vice versa, means controlled by the liquid level in said refrigerating chamber for controlling said first mentioned controlling means, and means in said condenser for repeatedly passing liquid to the refrigerating chamber during the distilling period.

1,622,523. GAS AND LIQUIDS STORING DEVICE. FREDERICK G. KEYES, Cambridge, Mass., assignor, by mesne assignments, to National Refrigerating Company, Boston, Mass., a Corporation of Massachusetts. Filed Dec. 4, 1923. Serial No. 678,537. 11 Claims. (Cl. 62—118.)



1. In a still, in combination, a closed outer casing, an inner casing sealed into the wall of said outer casing, an electric heating coil removably mounted in said inner casing, vane plates mounted in said outer casing, a coil of pipe mounted in said outer casing whose windings pass around said inner casing and between said vanes, said coiled pipe being sealed at either end through the wall of said outer casing, and a vapor delivery pipe sealed through the wall of the outer casing and connected to distributing pipes extending the length of the still and being perforated with a large number of small holes.

1,622,524. DRAFTING DEVICE. VÁCLAV KVASNIČKA, Prague, Czechoslovakia. Filed May 29, 1922. Serial No. 564,463. 1 Claim. (Cl. 33—76.)

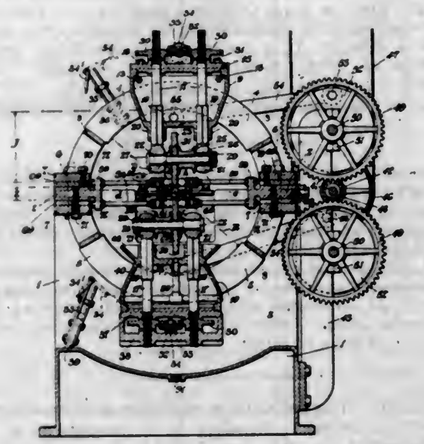


A device for drawing parallel lines on a drafting board, comprising a T-square having a head member and a longitudinal drawing blade, said head member having the upper face thereof disposed at an angle to the plane of the base thereof, an end portion on said blade extending over the upper face of said head or cross-member for rigid connection thereto and being disposed at an angle to the integral laterally extending drawing portion thereof, a guide rail for said head member comprising a body having an inclined upper surface extending longitudinally of said body and from one side to substantially the longitudinal center line thereof, a ledge integral with said inclined body portion extending longitudinally of said body below the elevated edge of the inclined upper surface, said ledge having a flat upper surface parallel with the bottom face of said body for the support of the under side of said head member, the inner face of said head member having sliding engagement with said elevated edge, and the upper inclined face of said head member and said inclined surface of said guide rail occupying a common plane, and the bottom face of the drawing portion of said blade being in plane alignment with the bottom of said guide rail.

1,622,525. CONTAINER. ROBERT L. LEMON, Indianapolis, Ind. Filed July 14, 1922. Serial No. 574,897. 7 Claims. (Cl. 229—23.)

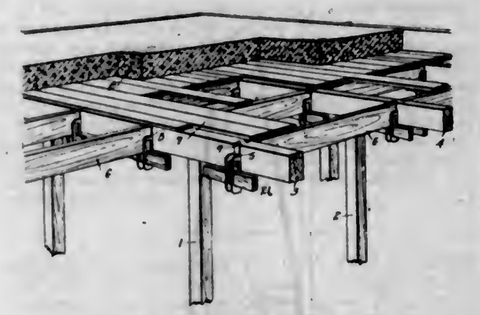
1. A shipping case made of fibre board or similar material, comprising a main body blank forming side and bottom walls and a cover wing, end blanks provided with top flaps folded at right angles to present reinforcing corners, said flaps being secured to the outside of the cover wing to complete the case, and flaps forming part of said cover wing and positioned parallel and adjacent to said end blanks to form corners of double thickness.

1,622,526. DISPENSING TUBE. SAMUEL J. LEWIS, Detroit, Mich. Filed Sept. 17, 1925. Serial No. 56,885. 3 Claims. (Cl. 221—60.)



1. The combination of a flexible dispensing tube having a threaded neck and a cap comprising a base of hard rubber threaded upon said neck, and a flattened tip of resilient rubber integrally fixed to the base and terminating in a relatively thick wall having a longitudinal slit-like orifice therein normally closed by the resiliency of the material.

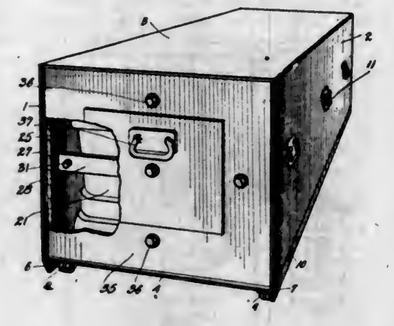
1,622,527. GRINDING MACHINE. ELOY F. MAAS, Long Branch, N. J. Filed Apr. 14, 1922. Serial No. 552,552. 27 Claims. (Cl. 51—88.)



7. A machine for grinding rollers, comprising in combination, two rotating elements, at least one of which is a grinding element, means for supporting said elements

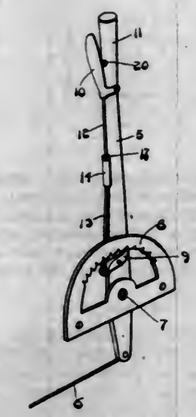
with their axes in a common plane, means for rotating said elements in opposite directions at the grinding point at substantially the same peripheral speed, means for automatically introducing rollers in succession into the space between the peripheral surfaces of said rotating

elements in a direction transverse to said common plane and with the axes of the rollers parallel to said plane, and means for guiding the rollers during their passage between said peripheral surfaces by engagement with the side faces of the rollers.



1,622,528. BRACKET FOR CONCRETE-FLOOR FORMS. EDWARD C. MARQUA, Kansas City, Mo. Filed Jan. 20, 1926. Serial No. 82,457. 5 Claims. (Cl. 25—131.5.)

1. A bracket for concrete floor forms comprising a hanger adapted for attachment to a major form element, a seat member adapted for removable support from the hanger and comprising a base and spaced parallel flanges, the flanges having registering openings, and a wedge adjustably seated on said member within the flange openings, to support a minor form element between the flanges.

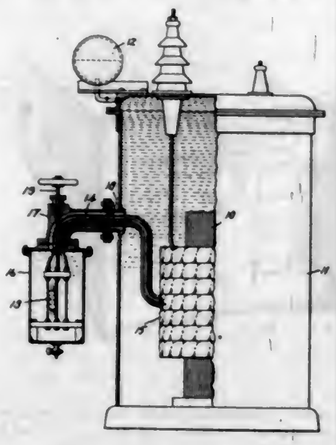


1,622,529. METALLIC COFFIN CASE. BENJAMIN G. MCMILLER, Kansas City, Mo. Filed Feb. 16, 1925. Serial No. 9,653. 4 Claims. (Cl. 27—35.)

1. A coffin case comprising an oblong metallic hollow memoer open at one end, a bead projecting inwardly from the sides, top and bottom of the case near the end, a locking spider comprising a pair of bars, the ends of which may abut against the inner face of the bead, means pivotally connecting said bars together, an end

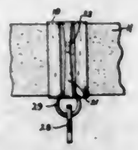
closing member co-extensive with the cross section of the case to bear against the bead and means on said bars for fastening the closing member to the spider.

1,622,530. BRAKE-LEVER-RELEASING DEVICE. OTTO MILLER, Cincinnati, Ohio. Filed Feb. 19, 1926. Serial No. 89,491. 3 Claims. (Cl. 74—39.)



1. A releasing device for brake levers, consisting in combination with a handled brake lever, a ratchet, and a pawl on the lever for operation on the ratchet, of a pawl operating means on the handle, and a yielding link operatively connecting the means and the pawl.

1,622,531. ELECTRICAL APPARATUS. WALTER S. MOODY, Pittsfield, Mass., assignor to General Electric Company, a Corporation of New York. Filed Nov. 4, 1925. Serial No. 66,839. 2 Claims. (Cl. 171—119.)



1. The combination with electrical apparatus having a winding, of a tap switch, a casing enclosing said apparatus, a separate casing enclosing said tap switch, said two casings containing insulating oil in which said apparatus and tap switch are immersed, there being a passageway between said two casings, said passageway

entering the side of said apparatus casing near said apparatus, tap leads extending through said passageway from said tap switch to the winding of said apparatus,

said passageway containing insulating oil surrounding said tap leads, and a seal to prevent interchange of oil between said two casings through said passageway.

1,622,532. QUICK-RELEASING KEY HOLDER. FRANK W. MORSE, San Fernando, Calif. Filed Jan. 11, 1926. Serial No. 80,487. 3 Claims. (Cl. 24—3.)

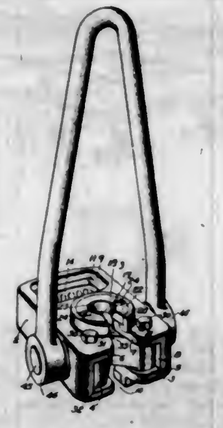
1. A key holder made from a single blank bent to form a hollow body portion including a front, a back, a top and a bottom, said front, back, top and bottom having parallel side edges, a pair of tongues arranged on said front, said tongues being narrower than said front and having parts thereof spaced from the front, said tongues being overlapped.

1,622,533. PROCESS OF PREPARING INTERIORLY-COATED CONTAINERS. JOHN H. MURCH, Portland, Oreg., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 11, 1924. Serial No. 692,198. 5 Claims. (Cl. 113—116.)

1. The method of preparing internally lacquered sanitary cans which consists in lacquering the body sheet metal while flat, hard-baking said lacquer, forming the said sheet metal into can bodies with soldered side seams, lacquering the sheet metal of the can ends and baking the lacquer thereon and then forming the same into can ends, then applying a second coat of lacquer on said ends and hard-baking the same and then seaming said ends to said can bodies.

1,622,534. ORGANIC SELENIUM COMPOUND AND METHOD OF MAKING THE SAME. PAUL I. MURRILL, Plainfield, N. J., assignor to R. T. Vanderbilt Co., Inc., New York, N. Y., a Corporation of New York. Filed Sept. 30, 1925. Serial No. 59,571. 9 Claims. (Cl. 260—11.)

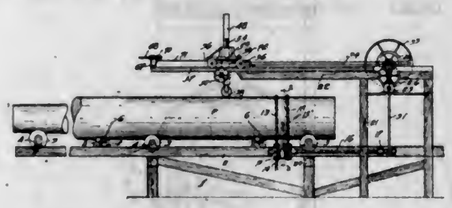
4. As a new product, selenium diethyl dithiocarbamate.



1,622,535. VULCANIZATION PROCESS AND PRODUCT. PAUL I. MURRILL, Plainfield, N. J., assignor to R. T. Vanderbilt Co., Inc., New York, N. Y., a Corporation of New York. Filed Sept. 30, 1925. Serial No. 59,573. 15 Claims. (Cl. 18—53.)

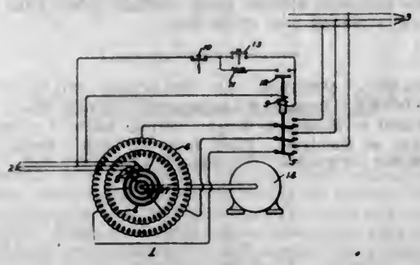
6. The method of vulcanizing rubber which comprises subjecting the rubber to vulcanization with the addition thereto of an organic selenium compound containing the following group: —CSS— as the vulcanizing agent without the addition of sulfur.

1,622,536. VULCANIZATION PROCESS AND PRODUCT. PAUL I. MURRILL, Plainfield, N. J., assignor to R. T. Vanderbilt Co., Inc., New York, N. Y., a Corporation of New York. Original application filed Sept. 30, 1925. Serial No. 59,573. Divided and this application filed Aug. 28, 1926. Serial No. 132,324. 10 Claims. (Cl. 18—53.)



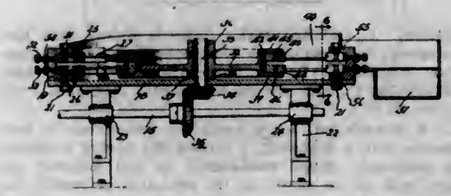
1. The method of vulcanizing rubber which comprises subjecting the rubber to vulcanization with the addition thereto of an organic selenium compound containing the following group: —CSS— as an accelerator together with sulfur.

1,622,537. SUCKER-ROD ELEVATOR. ALBERT H. NEILSON, Tulsa, Okla. Filed Feb. 12, 1926. Serial No. 87,802. 6 Claims. (Cl. 294—91.)



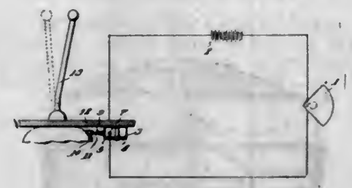
1. A clamp of the character described, comprising a body member having a throat and relatively large seat communicating with the throat, latch jaws pivoted on the body member forwardly of said seat, a handle slidable on the body member, toggle links connecting the latch jaws and handle member, and a spring urging the handle member and the links to locate the latch jaws in locking position in the throat, the spring being retractable by the handle to shift the latch jaws and free the throat.

1,622,538. PUNCTURING MACHINE. CHARLES S. NELSON, Sandpoint, Idaho, assignor of one-half to Malvern L. Bruce, Sandpoint, Idaho. Filed Nov. 23, 1925. Serial No. 70,969. 8 Claims. (Cl. 144—2.)



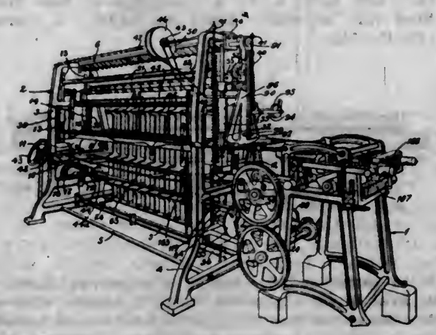
1. In a pole puncturing machine the combination with a supporting cradle, of pairs of spaced longitudinally disposed elevating rollers and means for oppositely reciprocating said rollers, means for partially turning the elevated pole when supported on said rollers, and means for restraining the pole against lateral displacement.

1,622,539. PROTECTIVE SYSTEM. FRANK H. PENNEY, Scotia, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Mar. 2, 1925. Serial No. 12,616. 5 Claims. (Cl. 175—294.)



1. The combination of an electric machine comprising a winding through which current is transmitted at a voltage and frequency which change in the same proportion, means comprising an operating coil for controlling the energization of said machine, and a resistor arranged to be connected to said winding in series with said coil whereby operation of said control means is produced when the voltage and frequency of said current are below a value predetermined by the relation existing between the resistance of said resistor and the impedance of said coil.

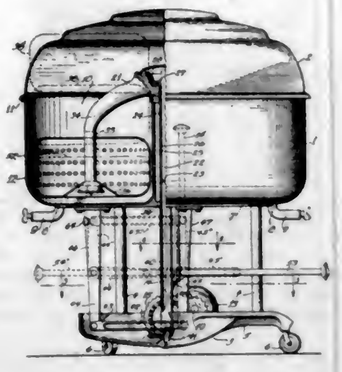
1,622,540. MACHINE FOR CURLING THE FLANGES OF CAN ENDS. JOHN F. PETERS, Rochester, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Sept. 1, 1922. Serial No. 585,627. 10 Claims. (Cl. 153—54.)



1. A can end flange curling machine, comprising a plurality of sets of grooved curling steels arranged in superposed relationship, means for moving the can ends successively through the grooves of said steels, and means for adjusting said steels individually to vary the extent of flange curling action by each thereof.

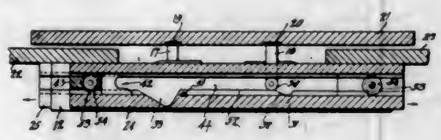
1,622,541. SWITCH. ODIS RALEY and GRAHAM APPERSON, Paragould, Ark. Filed Apr. 8, 1922. Serial No. 550,652. 1 Claim. (Cl. 200—59.)

A switch of the character described comprising a cylinder, a pair of converging contacts fixed at their remote ends in the cylinder and being insulated therefrom, a cap for one end of said cylinder, a relatively long rod passing through said cap and having one end terminating in said cylinder, a piston secured to the last mentioned end of said rod and including a pair of washers of insulating material, a disk of conducting material arranged in a recess formed in one of said washers and held therein by the other of said washers, said disk being adapted to bridge the adjacent end portions of converging spring contacts for a wiping engagement therewith, a spring surrounding the rod for normally holding the disk out of engagement with converging contacts, and the outer end of said rod being adapted to lie in the path of a movable part of an automobile transmission in a manner whereby said part is adapted to move said rod against the tension of said spring to provide the wiping engagement of the disk with the contacts.



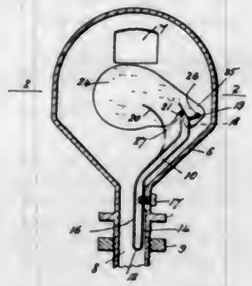
1,622,542. METHOD OF WEAVING NARROW-WIDTH WARE AND MACHINE FOR CARRYING OUT SUCH METHOD. BARTHOLOMEW RENSHAW, Glenbrook, Conn. Filed Apr. 29, 1926. Serial No. 105,355. 35 Claims. (Cl. 139—18.)

1. The combination with a weaving machine having a main frame, of a secondary frame, guide members on the main frame upon which said secondary frame is adapted to move, weaving needles mounted on said secondary frame, warp guide strips operably mounted in said main frame, woof packing devices slidably mounted on said



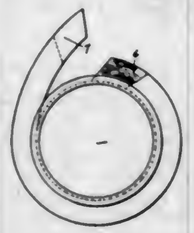
secondary frame, means to move the warp guide strips to form successive sheds, means to cause the packing devices to hold the woof after having crossed the warp and until after the warp has been caused to cross the woof, and means for actuating the secondary frame to cause the woof packing devices to pack the woof in place.

1,622,543. WASHING MACHINE. GEORGE WESLIN RYNDERS, Carpentersville, Ill. Filed Mar. 2, 1925. Serial No. 12,666. 5 Claims. (Cl. 68—18.)



1. In a washing machine, a carrying member, a sleeve for supporting said carrying member, means for raising and lowering said sleeve so as to raise and lower said carrying member, and manually controlled means for disconnecting said first named means from said sleeve and for raising said carrying member, containers carried by said carrying member and raised above the level of the washing fluid when said manually controlled means is actuated, and means for rotating said containers at a high speed when said containers are in their raised position.

1,622,544. EXTENSION TABLE. WALTER P SAUER, Forest Hills, N. Y., assignors to Theodor Sauer Co. Inc., New York, N. Y., a Corporation of New York. Filed Jan. 20, 1926. Serial No. 82,431. 4 Claims. (Cl. 45—113.)

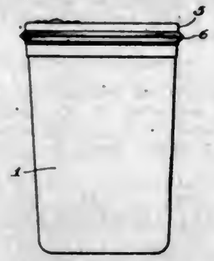


3. An extensible table having a supporting frame, a slide fixed to the supporting frame, a movable slide on either side of the fixed slide, leaves fixed to said movable slides, a table top overlying said leaves, a ledge on each of the movable slides having a recess therein, a plurality of rods fixed to the table top, a roller on each of the rods adapted to cooperate with the said recess in each of the ledges to permit the table top to be lowered into the same plane with the leaves when they are fully extended, and a member mounted within the said slides adapted to maintain the table top in raised position while the leaves are being retracted.

1,622,545. THERMOSTATIC SIGNAL. CHARLES G. SCHELLENBERGER, Battle Creek, Mich.; The Old National Bank of Battle Creek, Battle Creek, Mich., administrator of said Schellenberger, deceased. Filed Aug. 21, 1925, Serial No. 51,710. Renewed Feb. 10, 1927. 5 Claims. (Cl. 116—114.)

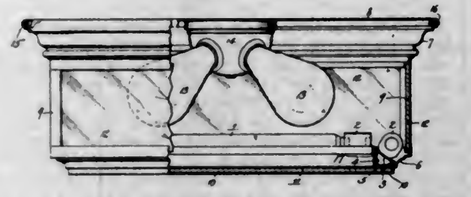
5. A thermostatic signal as set forth in claim 1, the said semaphore plate being pear-shaped in form and having its smaller end pivoted to the arm and provided on its lower edge with a notch which normally receives the end of the actuating part of the arm.

1,622,546. METHOD OF SPLICING SOLID-TIRE STOCKS. GEORGE W. SEIBERLING, Detroit, Mich., assignor to Morgan & Wright, Detroit, Mich., a Corporation of Michigan. Filed June 11, 1925. Serial No. 36,336. 7 Claims. (Cl. 154—12.)



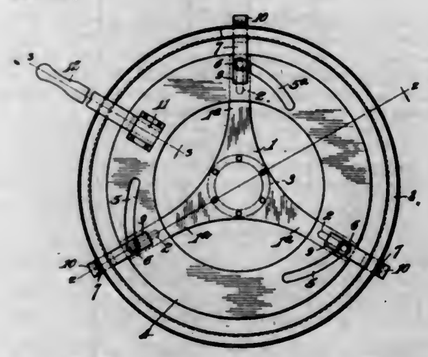
1. The method of preparing stock for the making of solid tires which consist in tubing the stock in a continuous strip and severing the strip at predetermined longitudinal intervals by cuts directed to form a combined transverse and longitudinal bevel on the cut edges of the severed sections.

1,622,547. CLOSURE SEAL. JOHN E. SHARP, New Kensington, Pa., assignor to Aluminum Company of America, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Oct. 1, 1925. Serial No. 59,815. 4 Claims. (Cl. 215—95.)



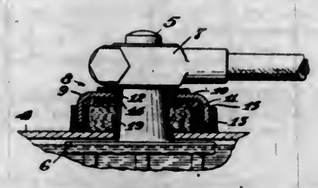
1. A closure seal for a container comprising in combination with a container, a closure cap having a depending peripheral flange conforming to and adjacent the outer wall of the mouth of the container, a readily disruptible continuous ring engaging the outer portion of the top of said cap and having a skirt depending below the lower edge of said cap flange, said skirt being provided with a gasket-retaining groove, and a sealing gasket

arranged in said groove between said flange and skirt and overlapping the lower edge of the flange, said skirt pressing said gasket inwardly upon the outer surface of



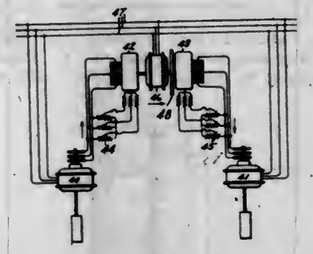
said flange and upon the outer wall of the container below the flange to seal the container and attach the closure to it.

1,622,548. LIGHTING FIXTURE. WILLIAM H. SPENCER, Bogota, N. J., assignor to I. P. Frink, Inc, New York, N. Y., a Corporation of New York. Filed Oct. 29, 1925. Serial No. 65,639. 18 Claims. (Cl. 240—78.)



1. In a lighting fixture, the combination with a housing provided with adjacently-disposed light-transmitting panels and a frame member supporting the adjacent edges of said panels, of a light source mounted upon said frame member, means for cutting off the direct light rays from said light source to one of said panels, and a reflector cooperatively arranged with respect to said light source and the last-mentioned panel.

1,622,549. TIRE-RIM EXPANDING AND COLLAPSING DEVICE. WILLIAM E. SPRINGFIELD, Martins Ferry, Ohio, and BAILIE W. FRAZIER, Wheeling, W. Va., assignors of one-third to J. W. Schultze, Wheeling, W. Va. Filed Feb. 1, 1926. Serial No. 85,131. 1 Claim. (Cl. 157—1.)

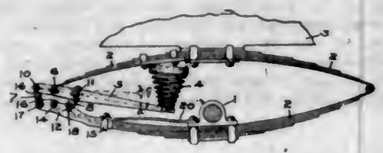


A tire-rim contracting and expanding device comprising a fixed member having therein radial slots, a member adapted for rotary movements with respect to said fixed member and having therein slots inclined with respect to the axis of its rotation and crossing the slots of said fixed member, one of said inclined slots being inclined at a steeper angle than the others thereof, rim seats having attaching means directed through registering portion of the slots of said fixed and rotary members, said means being movable inwardly and outwardly along the slots of said fixed member for relatively contracting and expanding said seats, and an inwardly facing hook carried by each of said seats engageable with an outer peripheral portion of a tire rim mounted on said seats.

1,622,550. AUTOMOBILE STORAGE BATTERY. OWEN C. TOWLE, Los Angeles, Calif., assignor to Eugene M. Brown, Los Angeles, Calif. Filed Aug. 11, 1925. Serial No. 49,632. 3 Claims. (Cl. 136—168.)

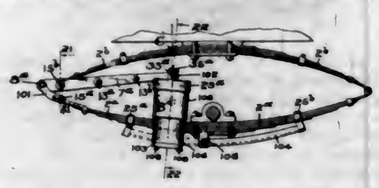
1. An attachment for the binding posts of storage batteries, comprising an annulus formed with an inturned marginal flange and a downwardly extending marginal flange, a resilient washer formed with a peripheral channel receiving the inturned marginal flange, said washer being adapted to encircle a binding post, and a second resilient washer formed with a top channel to receive the downwardly extending flange and adapted to seat on the top of the battery.

1,622,551. POWER-TRANSMITTING SYSTEM. LEONID A. UMANSKY, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed May 26, 1925. Serial No. 33,036. 16 Claims. (Cl. 172—287.)



1. In combination, a plurality of induction machines of the wound secondary type, a load regulating machine for each induction machine connected to control the slip energy thereof, said load regulating machines being mechanically connected together.

2. In combination, a plurality of induction machines of the wound second type, a load regulating machine for each induction machine connected to control the slip energy thereof, said load regulating machines being mechanically connected together, and a dynamo electric machine mechanically connected to said regulating machines for supplying energy to or absorbing energy from said regulating machines.

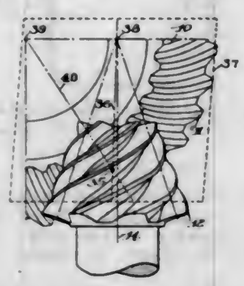


15. The method of utilizing the slip energy of a plurality of wound secondary mechanically independent induction machines which consists in operating said machines so that input slip energy is required by one machine and that out-put slip energy is delivered by another machine and transferring such slip energy from the secondary of one machine to the secondary of the other machine.

1,622,552. SPRING SUSPENSION FOR VEHICLES. FRANK L. O. WADSWORTH, Pittsburgh, Pa. Filed Feb. 16, 1920. Serial No. 358,817. 37 Claims. (Cl. 267—17.)

1. An elastic shock absorber organization for two relatively movable members which comprises a lever-actuated spring and a double fulcrum mounting for the lever arranged in such a manner that the lever and the spring are both actuated in the same direction by either compressive or rebound shocks.

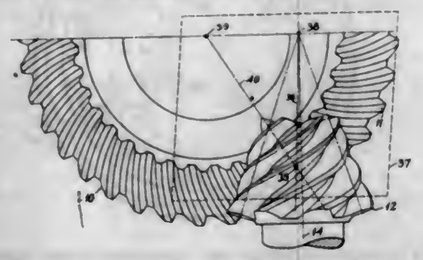
1,622,553. VEHICLE SHOCK ABSORBER. FRANK L. O. WADSWORTH, Pittsburgh, Pa. Filed June 16, 1920. Serial No. 389,337. 49 Claims. (Cl. 267—17.)



1. In a spring suspension system for two relatively movable members the combination of a lever flexibly engaged with both members, a double action spring supported on one of said members, and a dual connection between said lever and the ends of the said spring whereby the latter is subjected to increased flexure whenever the interengaged members move in either direction from the position of static equilibrium.

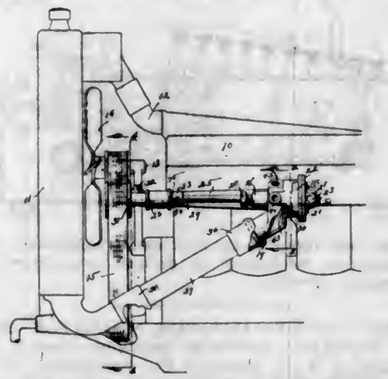
1,622,554. ADJUSTABLE MIRROR SUPPORT. ALEXANDER WALLACE, New Rochelle, N. Y. Filed Nov. 27, 1923. Serial No. 677,257. 1 Claim. (Cl. 45—97.)

In an adjustable mirror, the combination with a support, of a mirror frame, a mirror, horizontal trunnions supporting the mirror in the mirror frame, upper and lower centrally disposed studs secured to the support and each provided with an enlarged head having an opening therethrough, upper and lower pairs of intermediately hinged levers the forward ends of each upper and lower pair extending respectively to the top and bottom of the mirror frame, nuts pivotally connecting such forward ends of the levers to the mirror frame, and the rear ends of the upper and lower pairs of levers extending respectively above and below the enlarged ends of the studs, a vertical rod extending through the rear ends of the levers and through the openings in the enlarged ends of the studs, said rod having reduced threaded ends, and nuts threaded thereonto.



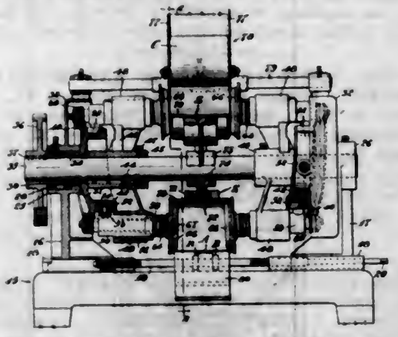
1,622,555. METHOD OF PRODUCING GEARS. ERNEST WILDHABER, Rochester, N. Y., assignor to Gleason Works, Rochester, N. Y., a Corporation of New York. Filed May 11, 1925. Serial No. 29,552. 16 Claims. (Cl. 90—4.)

1. The method of producing a pair of gears which consists in forming the teeth of one of said gears by moving a tool in a curved path across the face of a gear blank and in producing the teeth of the other gear by moving a gear blank and a tool representing the first gear relatively to each other to produce longitudinally curved teeth on the blank while imparting a relative movement between the tool and blank in the manner of a gear rolling with the first gear and maintaining the axis of the blank offset from the axis of said first gear.



15. The method of producing a pair of hypoid gears which consists in forming the tooth surfaces of one of said gears by moving a cutting edge in a curved path across the face of a gear blank while maintaining said edge in line contact with the finished tooth surface of the gear, and producing the other gear by moving a cutting edge, representing a tooth surface of the first gear, in a curved path across the face of a gear blank while imparting a relative rolling movement between said blank and cutting edge in the manner of a gear meshing with the first gear with its axis non-intersecting and non-parallel to the axis of the first gear, and proportioning the two gears so that the tooth spaces of one of said gears will be substantially as wide along the whole tooth space as the teeth of the mating gear are thick.

1,622,556. CURVED-TOOTH GEAR. ERNEST WILDHABER, Rochester, N. Y., assignor to Gleason Works, Rochester, N. Y., a Corporation of New York. Original application filed May 11, 1925, Serial No. 29,552. Divided and this application filed Mar. 4, 1926. Serial No. 92,167. 24 Claims. (Cl. 74—41.)

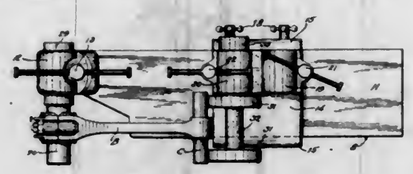


1. A pair of hypoid-gears provided with longitudinally curved teeth, one of said gears being provided with side tooth surfaces which are surfaces of revolution.

1,622,557. LIQUID-CIRCULATING APPARATUS FOR INTERNAL-COMBUSTION MOTORS. GEORGE W. WILSON, Algona, Iowa. Filed Mar. 3, 1926. Serial No. 91,969. 4 Claims. (Cl. 123—175.)

1. In combination with an internal combustion motor having a water jacket, a radiator, connections therebetween and an electric horn bracket, and a centrifugal fluid pump unit comprising a pump casing, an inlet pipe communicating with the radiator and pump casing, an outlet pipe communicating with the pump casing and water jacket, a rotor inside said casing, a means for propelling said rotor, a lug integrally formed on said casing and designed to engage one end of said horn bracket, and a stud for securing the said end of the horn bracket to the said lug.

1,622,558. MEANS FOR FORMING FLANGES ON CAN BODIES. RAY O. WILSON and ARTHUR D. SUMNER, Los Angeles, Calif. Filed May 12, 1925. Serial No. 29,701. 9 Claims. (Cl. 113—28.)

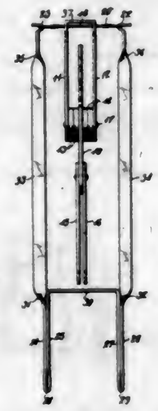


1. In a can body flanging machine, a pair of opposed flanging dies adapted to engage a can body, the axes of the flanging dies being canted with respect to the axis of the held can body, and means to rotate the flanging dies whereby the ends of the can body are flanged progressively from a starting point.

1,622,559. METALLIC JOIST. WILLIAM F. ZABRISKIE, Detroit, Mich., assignor to Gabriel Steel Company, Detroit, Mich., a Corporation of Michigan. Filed May 25, 1925. Serial No. 32,834. 5 Claims. (Cl. 189—37.)

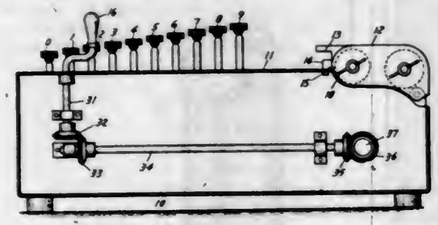
1. A metallic floor joist comprising a top chord formed of a structural shape possessing greater strength than required for compression only and adapted to resist bending in a vertical plane, a bottom chord having its ends attached to said top chord at points sufficiently spaced from the ends thereof to provide substantial bearing supports for limited variations in span, and diagonal web members spaced in their points of attachment to said upper chord members by at least one and one-half times the total depth of the truss.

1,622,560. ALIGNING MACHINE FOR CONNECTING RODS AND WRIST PINS OF INTERNAL-COMBUSTION ENGINES. WILLIAM AAB, New Ulm, Minn. Filed Oct. 5, 1925. Serial No. 60,474. 2 Claims. (Cl. 33—180.)



1. A machine of the kind described having a base with a work surface, a sliding head on the base, two bearings one of which is on the base and the other of which is on the head, the axes of said bearings being parallel to each other and the work surface and extend at right angles to the direction of travel of the head, an arbor for the crank hub of a connecting rod mounted in the bearing on the base, and a shaft mounted in the bearing on the head and having a pair of axially spaced discs, the peripheries of which are concentric to the axis of the shaft and afford testing surfaces for the wrist pin of said connecting rod.

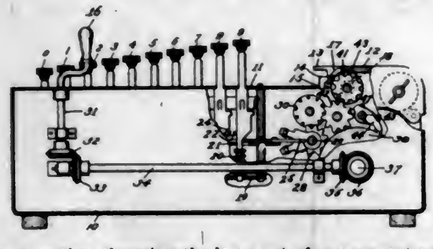
1,622,561. LIQUID-DISPENSING APPARATUS. LINNAEUS E. BAKER, Fort Wayne, Ind., assignor to Wayne Company, Fort Wayne, Ind., a Corporation of Indiana. Filed Jan. 28, 1924. Serial No. 689,031. 4 Claims. (Cl. 221—80.)



1. A measuring pump having in combination, a pump cylinder, a closed tubular housing for said cylinder, a rack, stop mechanism, a section of tubular housing for said rack and stop mechanism, driving mechanism, a substantially horizontal gear-plate to which the driving mechanism is secured seated upon the section of housing enclosing said rack and stop mechanism, and means for holding said housing sections and plate in fixed relation.

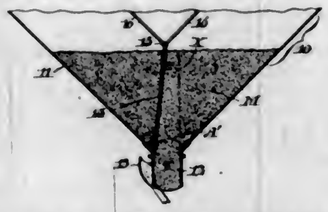
1,622,562. JUMPING JACK. IRVIN BALMER, Aledo, Ill. Filed May 24, 1926. Serial No. 111,247. 4 Claims. (Cl. 46—40.)

1. A frame for a jumping jack comprising handles of resilient strap material occupying substantially parallel planes, each handle comprising inner and outer connected members, a cross member integral at each end with one of said inner handle members, said cross member preserving a spacing of said handles and by its resilience tending to maintain the spacing thereof, side frame members comprising upward extensions of said handle members twisted into a common plane substantially opposite said cross member, and means carried by the extremities of said side members for attachment of a jumping jack.



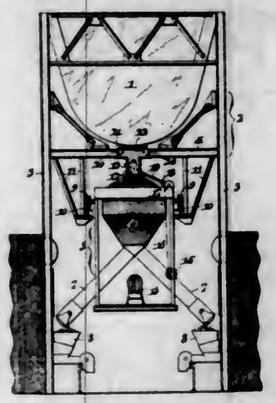
1,622,563. CARRYING-OVER MECHANISM FOR CALCULATING MACHINES. FRED W. BARKLEY, Winthrop, Mass., assignor to Alberto Barkley, Painted Post, N. Y. Filed Mar. 18, 1921. Serial No. 453,356. 9 Claims. (Cl. 235—133.)

1. In a calculating mechanism, the combination of a setting up mechanism, a selecting mechanism, and a registering mechanism, a working shaft parallel to the shaft carrying the registering dial and intermediate gears, an over-rotating mechanism mounted on the shaft, a transfer arm also mounted on the shaft, a means on the registering mechanism for operating the transfer arm in one direction, a locking means for the transfer arm on the intermediate gear shaft, a means on the transfer arm and the selecting mechanism for operating the next gear in the order of ten, and means on the transfer arm and selecting mechanism for operating the transfer arm in the opposite direction.



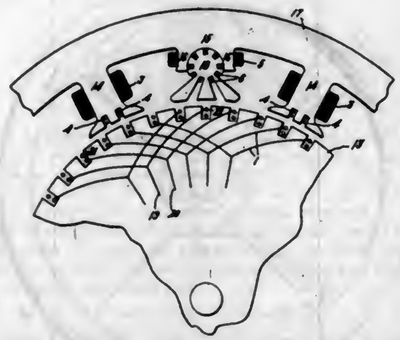
1,622,564. OVERROTATING CHECK FOR CALCULATING MACHINES. FRED W. BARKLEY, Winthrop, Mass., assignor to Alberto Barkley, Painted Post, N. Y. Original application filed Mar. 18, 1921, Serial No. 453,356. Divided and this application filed Mar. 18, 1921. Serial No. 453,357. 7 Claims. (Cl. 235—131.)

1. In a calculating machine, dial actuating mechanism therefor, a lever controlled by the actuating mechanism to prevent over-rotation in one direction, a spring controlled pawl on the lever and means for throwing the pawl in checking relation to the dial elements, and at



the same time throwing the lever out of engagement with the actuating mechanism to prevent over-rotation in the opposite direction.

1,622,565. FLOW-FACILITATING MEANS FOR GRAVITY HOPPERS. ROBERT H. BEAUMONT, Radnor, Pa., assignor to R. H. Beaumont Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 7, 1925. Serial No. 21,389. 2 Claims. (Cl. 221—120.)



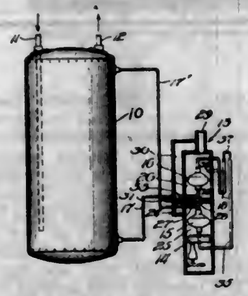
2. The combination with a sloping sided hopper having an outlet between them of an anti-bridging diaphragm suspended between the oppositely sloping hopper walls said diaphragm being free to swing toward either of them under the impulsion of material in the hopper so as to prevent arching of said material across the hopper outlet.

1,622,566. MATERIAL STORAGE AND HANDLING SYSTEM. ROBERT H. BEAUMONT, Radnor, Pa., assignor to R. H. Beaumont Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Apr. 22, 1925. Serial No. 25,012. 3 Claims. (Cl. 214—41.)

1. In material handling systems, the combination of a suspension bunker with an outlet, and a separate auxiliary outlet for directing gravity discharge from the bunker, said outlet being independently supported for security against positional displacement incidental to distortions of the bunker under varying or unevenly-distributed loads.

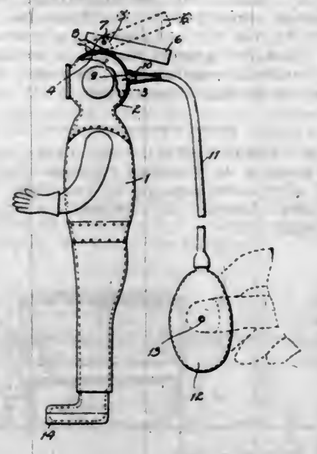
1,622,567. ALTERNATING-CURRENT MOTOR. SVEN R. BERGMAN, Nahant, Mass., assignor to General Electric Company, a Corporation of New York. Filed May 29, 1924. Serial No. 716,780. 5 Claims. (Cl. 172—276.)

1. A commutator type dynamo electric machine provided with commutating poles and polyphase exciting windings for each such pole embracing an integral magnetic core member thereof.



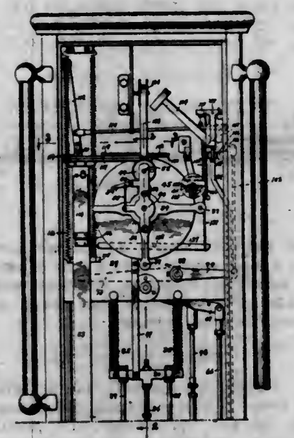
2. An electrodynamic machine wherein a plurality of armature winding coils are operably associated with a a commutator and wherein a commutating pole is arranged to produce a neutralizing voltage in an armature coil undergoing commutation, comprising a polyphase exciting winding embracing an integral magnetic core member of said commutating pole to produce a neutralizing voltage in said coil.

1,622,568. METHOD AND APPARATUS FOR RIVER CONTROL. EDWARD BIGNELL, Lincoln, Nebr., assignor to Concrete Piling Co., Seward, Nebr., a Corporation of Nebraska. Filed Apr. 2, 1923. Serial No. 629,445. 6 Claims. (Cl. 61—3.)



6. In combination, a retard of relatively open formation and a barrier of relatively close formation located above the bed of a flowing stream, the retard located at the up-stream side of the barrier and having anchorage independent of the barrier.

1,622,569. METHOD OF AND MEANS FOR HEATING LIQUIDS. FRED WILBUR BIRTCH, La Porte, Ind., assignor to Bastian-Morley Company, a Corporation of Indiana. Filed Feb. 3, 1923. Serial No. 616,867. 13 Claims. (Cl. 122—23.)

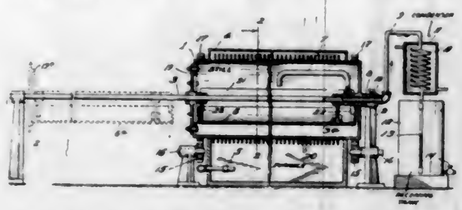


1. The method of initiating liquid flow in an open circulatory system upon a relatively-high rise of temperature, which consists in subjecting to heating conditions that will heat the liquid therein at different rates, a plurality of distinct heat-absorption areas of the circulatory system, these areas being so related that heat-absorption by the liquid in the area having the lesser absorption rate causes said liquid to resist flow to the heat-absorption area having the higher absorption rate.

1,622,570. AQUATIC TOY. CHARLES H. BUDDE, St. Louis, Mo. Filed May 10, 1924. Serial No. 712,188. 5 Claims. (Cl. 46—40.)

1. An aquatic toy, comprising a hollow body weighted to have one portion thereof remain uppermost in water and provided in said upper portion with an opening for the ingress and egress of water and with an air inlet and an air outlet, an automatic valve having a buoyant portion operated by gravity when out of water to open and by buoyancy when in water to close the air outlet, and means for supplying air under pressure to the body to expel water therefrom through said opening.

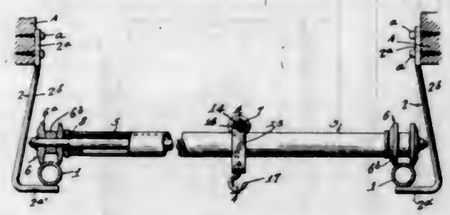
1,622,571. WEIGHING SCALE. ADOLPH A. CAILLE, Detroit, Mich. Filed Oct. 4, 1924. Serial No. 741,601. 11 Claims. (Cl. 265—9.)



1. In a weighing scale, a support, a scale base adapted to tilt up and down thereon and containing the scale levers and supporting a platform, weight indicating

mechanism embodying a printing wheel and means connecting said printing wheel to the levers, printing mechanism adapted to co-operate with said wheel, a weight to actuate the printing mechanism, means to retain the weight in elevated position, a second weight connected to the base and raised by the base when swung down by a person on the platform which weight in moving downward is adapted to raise the first weight, and means for releasing said first weight to actuate the printing mechanism.

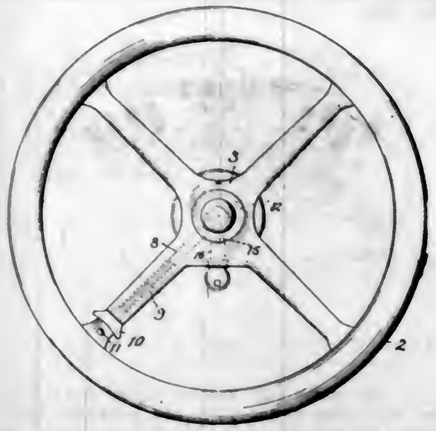
1,622,572. FUEL FOR AUTOMOTORS. EDWARD F. CHANDLER, Brooklyn, N. Y. Filed Dec. 23, 1924. Serial No. 757,731. 10 Claims. (Cl. 44—9.)



1. A liquid fuel adapted for use in an internal combustion engine, comprising a mixture of gasoline, dimethyl ketone, alcohol, and water.

1,622,573. COKING STILL. ROY CROSS, Kansas City, Mo., assignor to Gasoline Products Company, New York, N. Y., a Corporation of New York. Filed Apr. 12, 1924. Serial No. 706,020. 6 Claims. (Cl. 196—122.)

1. In an apparatus for coking petroleum hydrocarbons, the combination with a still adapted to be heated to sufficient temperature to distill off the volatile material, means for scraping the deposited carbonaceous substance from the still walls, and a container supported in the still for maintaining said removed carbonaceous material out of contact with the shell of said still, said scraping means mounted upon the container.



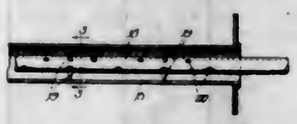
1,622,574. CRANE. FREDERICK W. DEADY, Cleveland, Ohio, assignor, by mesne assignments, to Augustus J. Gates, Cleveland, Ohio. Filed Apr. 21, 1926. Serial No. 103,463. 7 Claims. (Cl. 105—163.)

1. In an overhead crane, a carriage serving as a support for a load, consisting of a pair of concentrically arranged, relatively rotatable members and rolls at opposite ends of the members that travel on the stationary tracks for the carriage.

1,622,575. STEERING-WHEEL LOCK MECHANISM. DAVID J. DOLAN, Cleveland, Ohio. Filed Aug. 23, 1921. Serial No. 494,467. 14 Claims. (Cl. 70—129.)

1. A rotatable steering column member, a rotatable steering wheel member loosely mounted upon the steering column, a locking element carried by one of said members, the other of said members having an opening to receive a portion of said element whereby the said members will be connected together, an annular retaining

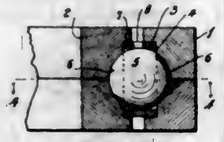
member adapted to move in front of said locking element when it is withdrawn, and means for moving the said retaining member.



1,622,576. ALLOY. JOHN N. EARLY, Pittsburgh, Pa. Filed July 21, 1926. Serial No. 124,105. 1 Claim. (Cl. 75—1.)

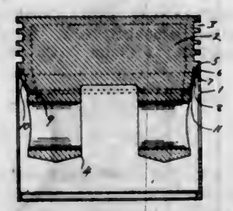
A ferrous metal alloy primarily suited for the making of castings having a hard chilled surface such as rolling mill rolls, and capable of forming a controllable chill in a sand mold without the use of chills, said alloy containing the following elements in substantially the following proportions—

	Per cent.
Silicon	.75 to 1.50
Sulfur	.05 to .35
Phosphorus	.25 to .75
Manganese	.20 to .70
Carbon	2.00 to 3.75
Nickel	.05 to .25
Chromium	.15 to .25
Molybdenum	.10 to .30



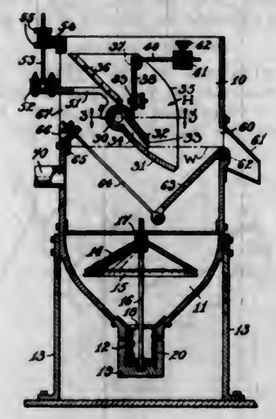
Iron approximately sufficient to complete 100%.

1,622,577. FIRE-TUBE BOILER. ALFRED J. EBNER, Chicago, Ill., assignor to Freyn, Brassert & Company, Chicago, Ill., a Corporation of Maine. Filed Jan. 15, 1923. Serial No. 612,637. 1 Claim. (Cl. 122—891.)



In combination, in a boiler, tubular flues of substantially uniform diameter extending therethrough, tubes of substantially uniform diameter mounted in said flues, said tubes being provided with spacing means for holding same in spaced relation with the inner walls of said flues, said spacing means comprising lugs disposed around the periphery of each of said tubes and being formed to provide substantially no obstruction to flow in the space between said tubes and their corresponding flue walls, said tubes being provided with openings through the walls thereof, said openings being inclined in the direction of the normal flow in said tubes.

1,622,578. BALL BEARING. FREDERICK ELLWEIN, Otter Creek, N. Dak. Filed Jan. 17, 1924. Serial No. 686,914. 3 Claims. (Cl. 308—196.)

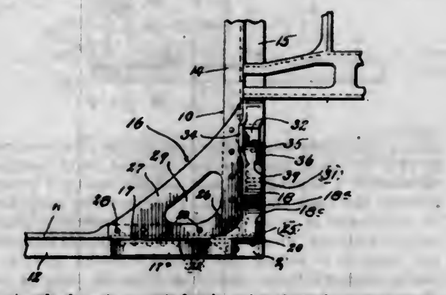


1. A bearing of the character specified comprising inner and outer collars having races in their opposing sides, a ring rigid throughout disposed between the collars and overlapped at its flat faces by the collar and provided with a plurality of openings, and balls retained by and loosely fitting said openings and projecting beyond opposite sides of the ring and entering the races of the respective collars, said balls being removable and replaceable unitarily with said ring.

1,622,579. PISTON. PHELPS M. FREER, Detroit, Mich. Filed Sept. 17, 1923. Serial No. 663,236. 14 Claims. (Cl. 74—108.)

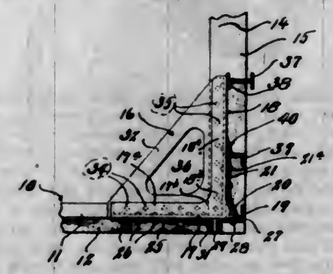
2. In a piston, the combination with a head having an annular groove and a skirt surrounding a portion of said head, said skirt having an inwardly extending flange, of a ring engaging in said annular groove and resiliently engaging said flange.

1,622,580. GRAIN WASHER, STONER, AND CONDITIONER. DAVID GEDDES, Berkeley, Calif. Filed Apr. 19, 1926. Serial No. 102,904. 8 Claims. (Cl. 83—27.)



1. A grain treating machine comprising a main hollow body having a hopper bottom, a grain receiving hopper mounted within the upper region of said main body and having an apron over which the grain may flow, means by which a treating fluid may be caused to transverse said apron and to contact the grain stream thereon, a conical valve arranged within and to cooperate with the hopper bottom, and a closure for said hopper bottom arranged to support said valve.

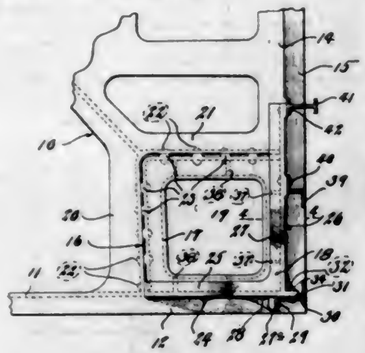
1,622,581. NUT LOCK. HERMANN GUNKEL, Newell, Pa. Filed July 26, 1926. Serial No. 124,904. 2 Claims. (Cl. 151—41.)



1. In a device of the class described, the combination with a bolt engaged through certain material, of a nut threadedly engaged on the bolt, and formed with ratchet teeth on the base portion thereof, a washer on the bolt, beneath the nut, and formed with a series of slotted perforations, and a series of other perforations, a locking element positioned beneath the washer, projecting portions from the locking element engaging in the latter mentioned perforations, outer marginally disposed and upwardly inclined stop members on said locking member, and passing through the said slotted perforations in the washer, and engaging the ratchet teeth of the said nut, and inner marginally disposed and downwardly inclined members on said locking member, and engageable against the said certain material to hold the locking member from gradually turning due to certain vibrations.

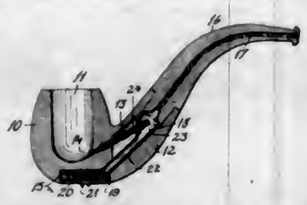
1,622,582. CAR CONSTRUCTION. FRANK H. HARDIN, Bronxville, N. Y. Filed Oct. 14, 1924. Serial No. 743,600. 11 Claims. (Cl. 105—411.)

1. A single piece reinforcing bracket for cars comprising a vertically disposed plate member having laterally disposed marginal flanges, and a horizontally disposed portion integral with the lower end of said plate and extending inwardly therefrom, a horizontally disposed inwardly projecting flange for engaging a part of a car underframe, there being vertically disposed recesses formed in said plate for receiving the lower ends of car posts.



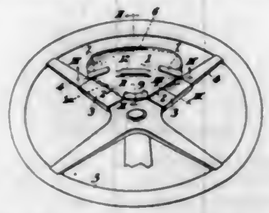
1,622,583. REENFORCING CAR BRACKET. FRANK H. HARDIN, Bronxville, N. Y. Original application filed Oct. 14, 1924, Serial No. 743,600. Divided and this application filed Sept. 27, 1926. Serial No. 137,982. 6 Claims. (Cl. 105—411.)

1. An integral reenforcing bracket for cars comprising a pair of plate members arranged at right angles to



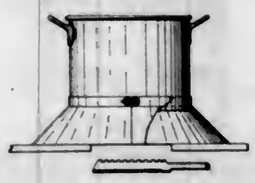
each other and provided with inwardly disposed marginal flanges, a gusset plate arranged between the lower ends of said plate members and adapted to be secured to a car underframe, vertically disposed flanges depending from said plate members and adapted to be secured to the sides of said car underframe, a vertically disposed flange extending laterally and outwardly from one of said depending flanges for receiving one face of a corner post, and a vertically disposed flange projecting laterally from the other one of said depending flanges and the corresponding plate member for receiving and having secured thereto certain other portions of said corner post.

1,622,584. REENFORCING CAR BRACKET. FRANK H. HARDIN, Bronxville, N. Y. Original application filed Oct. 14, 1924, Serial No. 743,600. Divided and this application filed Sept. 27, 1926. Serial No. 137,983. 8 Claims. (Cl. 105—411.)



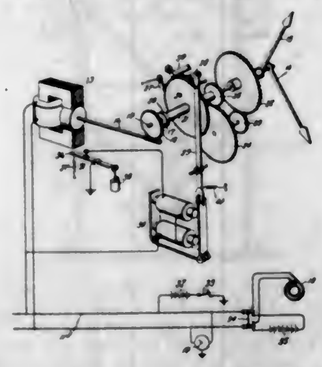
2. A one piece reenforcing bracket for cars comprising a pair of plate members arranged at right angles to each other, a rectangular base member arranged inwardly between the lower ends of said plate members and adapted to be secured in a car underframe, a vertically disposed flange extending laterally from one of said plate members and adapted to engage one face of a corner post, a vertically disposed flange extending from the meeting edges of said plate members at right angles to the first flange for engaging a corresponding face of said corner post, and vertically disposed pads arranged on one of said plate members for engaging an intermediate car post.

1,622,585. SMOKING PIPE. IVAN A. HARRISBERGER, Florence, Colo. Filed Mar. 16, 1926. Serial No. 95,038. 3 Claims. (Cl. 131—12.)



2. A smoking pipe comprising a body portion having a stem, a bowl in said body portion communicating with a bore in said stem, a downwardly-opening recess in said body portion beneath said bowl, a receptacle within said recess, a removable and replaceable cover on said receptacle, a tube formed with a bell-shaped end within said bore and communicating with said receptacle, a second tube intersecting and projecting within the bell-shaped end of said first tube and communicating with said bowl and a mouth-piece engaging said stem and formed with a duct adapted to register with the bell-shaped end of said first tube.

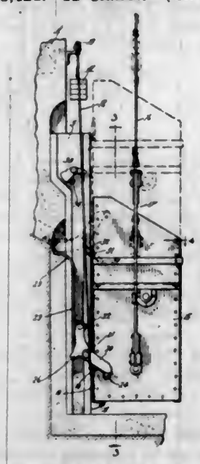
1,622,586. STEERING-WHEEL HOLDING DEVICE. JOHN W. HOFFMAN, Detroit, Mich. Filed July 26, 1926. Serial No. 124,825. 2 Claims. (Cl. 224—29.)



2. A device of the character described consisting of a plate having flexible projections adapted to be bent around adjacent spokes of a steering wheel, said plate having marginal projections bent back over said plate, and said plate having two transverse slots and an outwardly flared strap between said slots, said strap being integral with said plate, said marginal projections and said strap being adapted to hold an article on said plate.

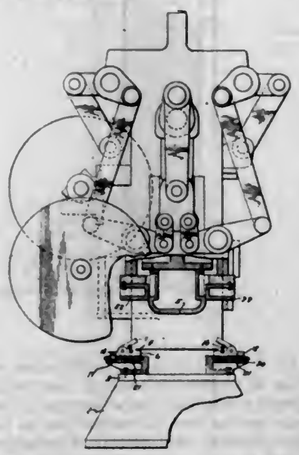
1,622,587. APPLIANCE FOR COOKING VESSELS. FRED L. HOUSEL, Brooklyn, N. Y. Filed Aug. 30, 1926. Serial No. 132,579. 1 Claim. (Cl. 53—8.)

An attachment for cooking vessels to prevent the contents of said vessels which boils over from reaching the heating means consisting of a divided annular band of sheet metal comprising a portion arranged substantially vertically adapted to engage the cooking vessel, an outwardly flared portion extending from said vertically arranged portion, lugs disposed upon the ends of said band, a screw joining said lugs and a disk upon said screw for manually adjusting the diameter of said band.



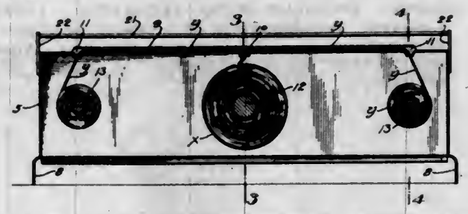
1,622,588. ELECTRIC CLOCK SYSTEM. CHARLES A. HOXIE, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Oct. 4, 1924. Serial No. 741,742. 8 Claims. (Cl. 58—35.)

1. An electric timing system comprising an alternating current distribution system, a plurality of secondary clocks having self-starting synchronous driving motors connected to said system, electrically operated means



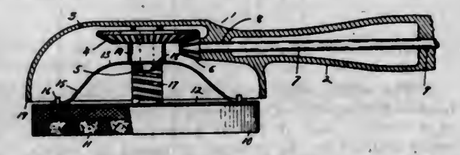
controlled over said distribution system for setting said clocks to a desired indication irrespective of variations in their previous indication, and electrically operated means connected to said system and responsive only to direct current for establishing the control circuit for said electrically operated setting means.

1,622,589. AUTOMATIC SELF-LOADING HOIST. WILLIAM E. HOWLETT, Moline, Ill. Filed Apr. 21, 1926. Serial No. 103,422. 12 Claims. (Cl. 214—125.)



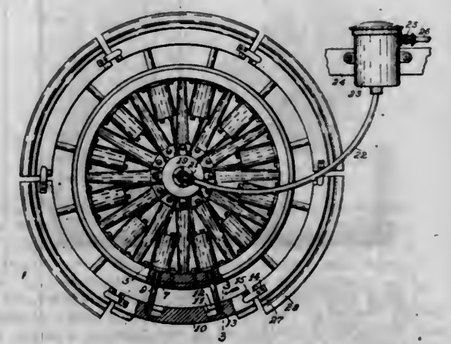
1. The combination in an automatic self-loading hoist of a receptacle having an opening through which the material to be hoisted may pass, a closure for said opening, a hoisting bucket adapted to be lowered to and to be raised from said opening, raising devices carried by said closure, means carried by the hoisting bucket for engaging said raising devices as the bucket is raised to move them toward disengaging position, and means for preventing said raising devices from moving to disengaging position until said closure reaches a substantially closed position.

1,622,590. STRETCHING DIE FOR SHEET METAL. TRYGVE JOLSTAD, Detroit, Mich., assignor to Michigan Stamping Company, Detroit, Mich., a Corporation of Michigan. Filed May 7, 1923. Serial No. 637,871. 18 Claims. (Cl. 113—38.)



1. In a device of the class described, a plurality of opposed slidably mounted jaws for clamping the metal to be stretched, a support for said jaws, means for actuating one of said jaws to clamp the metal while at the same time permitting said jaws to move upon said support with the metal in a direction substantially transverse to the direction of stretching of the metal and means carried by said support for regulating the sliding movement of said jaws.

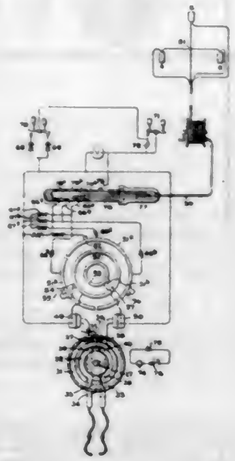
1,622,591. FLY-PAPER HOLDER. JOSEPH L. KILLION, Minneapolis, Minn. Filed Mar. 29, 1926. Serial No. 98,300. 4 Claims. (Cl. 43—115.)



1. In a holder of the kind described, the combination with a casing having a pair of guides, of a pair of spindles journaled in said casing, a roll of sticky fly paper mounted on one of said spindles and having its outer end attached to and arranged to be wound on the other thereof as the same is unwound from the roll, said paper between said spindles being held by said guides and supported on said casing, and guide flanges on the casing overlapping the longitudinal edges of the exposed portion of said paper.

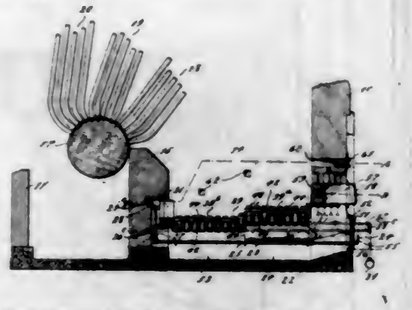
1,622,592. RUBBING MACHINE. ARTHUR B. KRATZ, Detroit, Mich. Filed Nov. 13, 1922. Serial No. 600,676. 4 Claims. (Cl. 51—170.)

1. In a device of the class described, the combination with a frame, of a rubbing element, loops secured to said rubbing element, a metallic spider having arms detachably connected to said loops, and actuating means for said rubbing element mounted within said frame and rigidly secured to said spider.



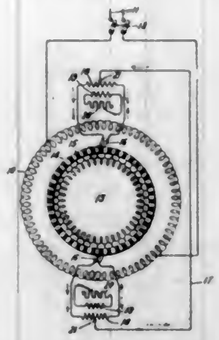
1,622,593. VEHICLE WHEEL. ELVIE LANDON, Waterloo, Iowa. Filed May 17, 1926. Serial No. 109,738. 4 Claims. (Cl. 230—31.)

1. In combination, a wheel having an apertured felly and tread members positioned concentrically around it,



closed cylinders mounted around the wheel, each cylinder having one apertured head and with valve-controlled inlet- and outlet-ports in its opposite head, an imperforate piston in each cylinder with stem projecting through its apertured head and terminally loosely connected to a tread member, a gathering chamber having an outlet-port and having communications with the cylinder outlet-ports, a reservoir, and means of communication between said reservoir and the outlet port of said gathering chamber.

1,622,594. SOUND-LOCATING APPARATUS. IRVING LANGMUIR, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed May 31, 1919. Serial No. 300,807. 35 Claims. (Cl. 181—26.)

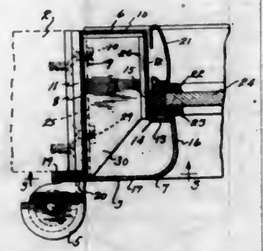


2. The combination with two sound transmission systems each composed of an electrical transmitter connected to a receiver and of an air path for transmitting the sound emitted by the receiver, of means for varying the relative lengths of said air paths to vary the phase relation of the sounds which traverse said air paths.

1,622,595. FURNACE. NATHAN E. LEWIS, Plainfield, N. J., and DOUGLAS WARD WILLIAMS, New Brighton, Staten Island, N. Y., assignors to the Babcock & Wilcox Company, Bayonne, N. J., a Corporation of New Jersey. Filed Sept. 29, 1921. Serial No. 504,230. 7 Claims. (Cl. 158—1.)

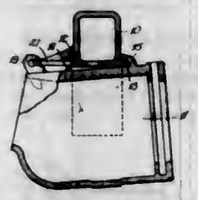
4. In a combined oil and gas burning furnace, an oil burner located at the rear of the furnace and constructed and arranged to project oil in the form of a spray into the furnace, a gas burner located in the bottom of the furnace and divided into a plurality of sections from the front to the rear of the furnace, independent air ducts located beneath said gas burner, each duct being arranged to supply air to one section of the gas burner, and independent means to control the air supply to each of said ducts, the air duct leading to the section adjacent the oil burner being arranged to supply air to the oil burner.

1,622,596. ALTERNATING-CURRENT COMMUTATOR MACHINE. CAMPBELL MACMILLAN, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Nov. 8, 1924. Serial No. 748,764. 3 Claims. (Cl. 171—228.)



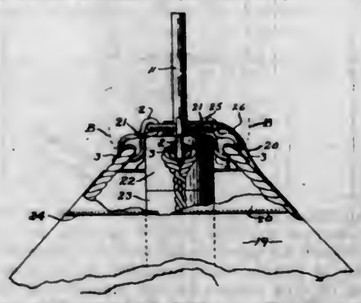
1. In combination, a dynamo-electric machine having a commutator composed of alternate live and dead segments, a plurality of separately insulated brushes spaced apart so as to bridge consecutive live commutator segments at the points of commutation of said commutator, a transformer having its primary winding connected between said brushes and a non-inductive resistance connected in the secondary circuit of said transformer.

1,622,597. CUP DISPENSER. WILLIAM B. MANGOLD, Chicago, Ill., assignor to Vortex Mfg. Co., a Corporation of Illinois. Filed April 2, 1924. Serial No. 703,638. 4 Claims. (Cl. 211—29.)



3. In a flat cup dispenser the combination with a container having a longitudinal slot in the rear thereof, a flanged aligner pivoted on the exterior of the container adapted to be swung into closed position to project into the container through said slot to tilt cups within the container, and means on the aligner adapted to engage the container for locking the aligner in closed position.

1,622,598. HINGE SUPPORT. WILLIAM MARSHALL, Detroit, Mich., assignor to Briggs Manufacturing Company, Detroit, Mich., a Corporation of Michigan. Filed Sept. 8, 1924. Serial No. 736,643. 6 Claims. (Cl. 296—44.)

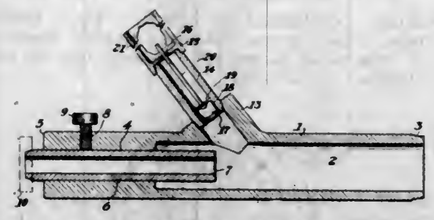


6. The combination with a post including a channel-shaped member, and a hinge having a portion extending along one side wall of said channel member, of means for reinforcing said post including a brace extending between two walls of said channel member, and a common securing means for said hinge and reinforcing member including elements extending through registering openings in said hinge, reinforcing member, and the first mentioned wall aforesaid of said channel member.

1,622,599. JOURNAL-BOX-SECURING MEANS. PAUL J. MCCULLOUGH, St. Louis, Mo., assignor, by mesne assignments, to Scullin Steel Co., St. Louis, Mo., a Corporation of Delaware. Filed May 15, 1926. Serial No. 109,209. 8 Claims. (Cl. 105—220.)

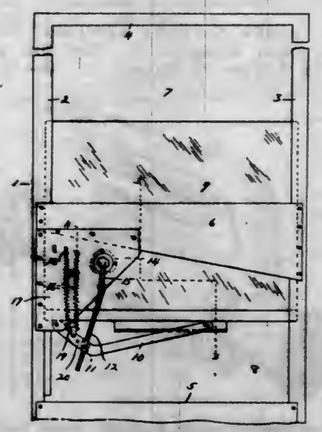
1. In combination, a side frame, a separable journal box cooperatively associated therewith, means upon said frame and journal box for preventing relative movement therebetween in a vertical direction, said journal box being provided with a closure member and means responsive to said closure member for preventing relative rotative movement between said journal box and said side frame.

1,622,600. TENT-POLE SHACKLE RING. MARION L. MCHUGH, Wichita, Kans. Filed Oct. 16, 1923. Serial No. 668,849. 9 Claims. (Cl. 135—15.)



4. In a tent, a tent top having a pike pin opening, a ring secured in the margin of said opening adapted to be supported upon a pole having a pike pin for extending through said opening, and means for elevating said ring from the top of said pole to relieve adjacent portions of the tent top from wear.

1,622,601. GOLF BALL AND METHOD OF MAKING THE SAME. THOMAS W. MILLER, Ashland, Ohio. Filed May 12, 1923. Serial No. 638,667. 3 Claims. (Cl. 154—17.)

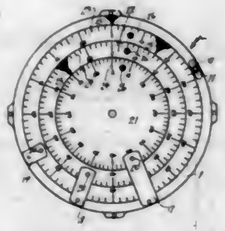


2. The method of manufacturing golf balls, which consists in first winding upon a suitable center a rubber thread under tension to form a wound body or core, then subjecting said wound body or core to rubber latex thoroughly to permeate said winding therewith, then evaporating therefrom the water, leaving a practically solid mass under tension, and finally applying thereto a cover.

1,622,602. TESTING DEVICE FOR CORED CASTINGS. GEORGE A. MOHR, Detroit, Mich. Filed Oct. 21, 1926. Serial No. 143,030. 6 Claims. (Cl. 73—51.)

1. In a testing device for cored castings, the combination of a tubular member having a longitudinal passage therein, a nozzle extending into said passage substantially in line with the latter, a lateral inclined branch opening into said passage, a plunger in said branch, and an indicating means connected to said plunger adapted to function when fluid under pressure passes successively through said nozzle and passage.

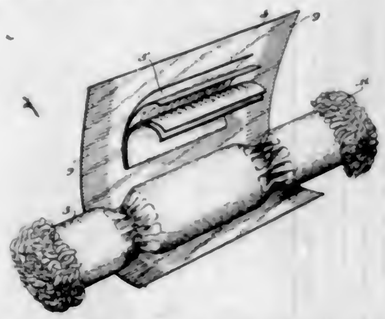
1,622,603. MOUNTING FOR WINDOW-CONTROL MECHANISM. STANLEY W. NICHOLSON, Toledo, Ohio, assignor to The Dura Company, Toledo, Ohio, a Corporation of Delaware. Filed Aug. 27, 1923. Serial No. 659,666. 2 Claims. (Cl. 268—126.)



1. The combination with a frame including an upright member and a lateral member and a window slidably engaging said frame, of a gusset plate extending across a corner between and connected to said upright and lateral members and secured to said members to reinforce said frame, a control arm pivotally mounted upon said gusset plate and operatively connected to said window, the pivotal end of said control arm being located between said gusset plate and the path of travel of said window, counterbalancing means for said window connected to

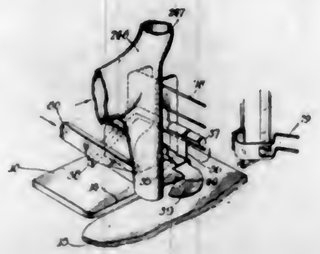
said gusset plate and control arm and located between said gusset plate and path of travel of said window and means of actuating said control arm located between said gusset plate and the path of travel of said window, said control arm, counterbalancing means and actuating means being mounted in connection with said gusset plate to form a unitary structure.

1,622,604. BERYLLIUM FILAMENT. ALEXANDER NYMAN, New York, N. Y., assignor to Dubilier Condenser Corporation, New York, N. Y., a Corporation of Delaware. Filed Nov. 7, 1924, Serial No. 748,464. Renewed Mar. 4, 1926. 1 Claim. (Cl. 250—27.)



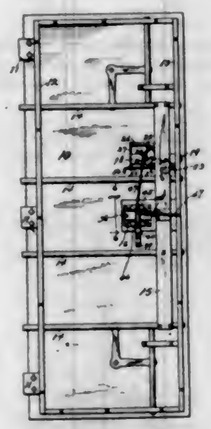
A filament for emitting electrons, said filament consisting essentially of beryllium.

1,622,605. COMBINATION LOCK. KNUT HELMER OBERG, Nelson, British Columbia, Canada. Filed Oct. 18, 1923, Serial No. 669,271. Renewed July 18, 1925. 4 Claims. (Cl. 70—53.)



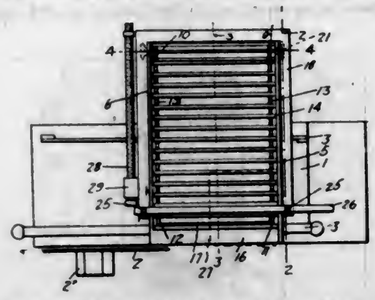
1. In a lock, a casing, a rack carried thereby, a span bar carried by said rack, a spindle carried by said span bar, a rotary rack centered upon said spindle within the first rack and formed with a peripheral recess, a bolt pivotally and slidably carried by said spindle, a lug carried by said bolt for disposal between said racks and capable of disposal in the said recess, means connecting said racks and said bolt whereby the latter is actuated, and a casing for said bolt.

1,622,606. PAPER NOVELTY ARTICLE. ARTHUR G. PALMER, Dover Plains, N. Y. Filed Dec. 21, 1926. Serial No. 156,166. 4 Claims. (Cl. 46—46.)



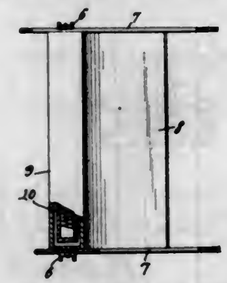
1. In combination with a party favor including a tubular container and a covering and finishing paper wrapped thereabout having the opposite ends extended beyond the ends of the container, a booklet embracingly engaged over a portion of the paper adjacent the container, and a transparent covering and retaining sheet wrapped completely about and over said booklet and said covering and finishing paper, the opposite longitudinal sides of said transparent sheet being jointed by an adhesive to adjacent portions of the covering and finishing paper.

1,622,607. WINDER. BURT A. PETERSON, Rockford, Ill., assignor to Barber-Colman Company, Rockford, Ill., a Corporation of Illinois. Filed Dec. 1, 1924, Serial No. 753,040. Renewed Aug. 27, 1926. 6 Claims. (Cl. 242—35.6.)



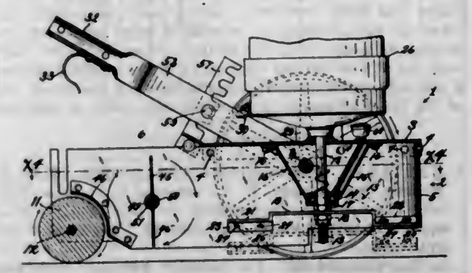
1. An automatic winder having, in combination, a series of winding units each comprising a yarn clearer, a detector and a reserve bobbin pocket, and a winder-tending mechanism arranged to travel along the series of units, said winder-tending mechanism including means to discharge an air blast against the winding units to blow lint therefrom, said means comprising two nozzles located near the forward end of said mechanism, one of said nozzles being directed toward the yarn clearer and the detector and the other nozzle being directed toward the reserve bobbin pocket.

1,622,608. BURGLARPROOF LOCK. FRANK O. PETERSON, Fort Dodge, Iowa, assignor, by mesne assignments, to Peoples Investment Company, a Corporation of South Dakota. Filed Aug. 18, 1924. Serial No. 732,593. 19 Claims. (Cl. 109—3.)



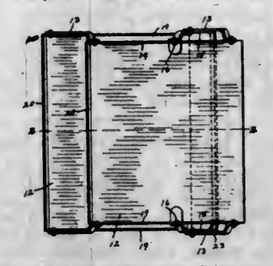
1. Auxiliary means for locking a vault or safe door which door is provided with a carrying bar, comprising a bracket mounted on the door and extending across said bar, a locking block arranged on one side of and pivoted to said bracket in the plane of movement of said bar, yielding pressure devices carried by the bracket and adapted to move the locking block into contact with said bar, trigger released means adapted to hold said locking block at times out of contact with said bar, and a dead-lock carried by the bracket and adapted to engage and lock the block to the bracket at times.

1,622,609. MEAT SLICER. JAMES JOSEPH QUINN, Mimico, Ontario, Canada. Filed Sept. 1, 1925. Serial No. 53,852. 5 Claims. (Cl. 146—110.)



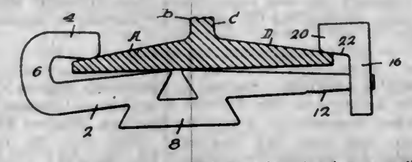
2. In a meat slicing machine, the combination with the main support, feed screw and rotating knife, of an endless conveyor forming a support for the piece of meat to be sliced by the cutting knife, a frame provided with side bars, means operated by the feed screw for moving the bars forward, and means operated by the forward movement of the frame for revolving the conveyor.

1,622,610. WATER MOTOR. ROBERT A. ROBERTSON, Rocksprings, Tex. Filed May 29, 1926. Serial No. 112,614. 1 Claim. (Cl. 170—102.)



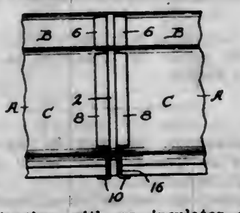
In a water wheel, a shaft, an elongated hub on the shaft, spokes secured to the ends of the hub and radiating therefrom, substantially wide circular members secured to the spokes adjacent to the outer ends thereof, housings supported between the circular members, each of said housings embodying a pair of spaced plates, one of the plates of each housing having a laterally extended flange curved to conform to the curvature of the circular members, said flanges being disposed adjacent to the peripheries of the circular members, and heating elements supported within the housings.

1,622,611. LAWN MOWER. RYUMATSU SERA, Glendale, Calif. Filed June 28, 1924. Serial No. 723,036. 1 Claim. (Cl. 56—25.)



The lawn mower set forth comprising a body; an axle extending through said body; wheels on said axle; a motor mounted on said body; a vertical shaft extending from said motor; a knife carrier adjustably secured to said shaft; razor blades secured to said carrier; a roller journalled at the rear of said body, a guard in advance of said roller, a saw tooth beater in advance of said guard; and means actuated by said wheels to rotate said beater.

1,622,612. FOLDING DISPLAY RACK. WILLIAM H. AVERILL, Boston, Mass., assignor to Joseph Pollak Tool and Stamping Company, Boston, Mass., a Corporation of Massachusetts. Filed Oct. 14, 1926. Serial No. 141,540. 3 Claims. (Cl. 211—14.)



1. A folding display rack comprising a plurality of shelves, parallel links connected by pivots with opposite ends of the shelves and adapted to maintain the shelves parallel with each other and at different distances apart, and a pair of braces connected by pivots with one of the shelves at points between the links and provided with slots in which the pivots connecting two of the links with another shelf are slidable, the shelves, links and braces being relatively arranged to form a rack which may be expanded and folded, one end of one of the shelves and the free ends of the braces being adapted to rest on a horizontal support when the rack is expanded and maintain the shelves inclined and spaced apart above the support.

1,622,613. RAIL ANCHOR. HARRY N. STAMOS, ALEXANDER N. STAMOS, and THOMAS W. BROWN, Centerville, Iowa. Filed Oct. 7, 1926. Serial No. 140,018. 3 Claims. (Cl. 238—329.)

1. A rail anchor comprising a bar having a rail engaging clip at one end and a loop intermediate its ends, and a removable clamp member adapted to slidably engage the free end of said bar and also the upper surface of one rail flange.

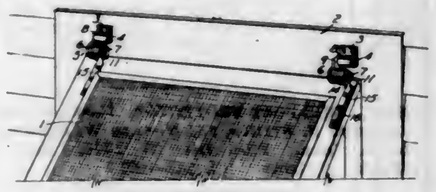
1,622,614. END-POST PROTECTOR. HARRY N. STAMOS, ALEXANDER N. STAMOS, and THOMAS W. BROWN, Centerville, Iowa. Filed Oct. 29, 1926. Serial No. 145,023. 4 Claims. (Cl. 238—152.)

1. In combination with an insulator adapted to be inserted between the ends of two rails, a protective de-

vice conforming to the shape of said insulator and adapted to be inserted between the latter and the adjacent end of one of said rails.

1,622,615. OPHTHALMIC MOUNTING. LOUIS J. TELLER, Providence, R. I. Filed Dec. 19, 1924. Serial No. 756,907. 5 Claims. (Cl. 88—53.)

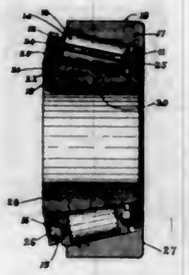
2. A temple hinge for an ophthalmic mounting, comprising pivotally-connected plates adapted to hinge a non-metallic temple member to its end-piece member, a single rivet for binding each plate in position, and a fastening spur on one of said plates at the hinge edge thereof adapted to be imbedded into the member on which it is mounted to assist in holding it in set position.



3. In an ophthalmic mounting, an end-piece, a temple having a longitudinal opening therethrough, pivotally-connected plates attached to said temple and end-piece to hinge the two together, a pair of spaced-apart fastening spurs on the temple plate imbedded into said temple located to straddle said longitudinal opening therein to assist in preventing a relative movement of said temple and plate.

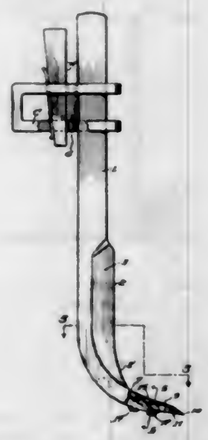
1,622,616. DEVICE FOR APPLYING OINTMENT TO THE GUMS. OLIVES TEMPLE, Dyersburg, Tenn. Filed Sept. 25, 1926. Serial No. 137,687. 3 Claims. (Cl. 128—261.)

1. In a device for applying ointment or the like to the gums, spaced arcuate bars conforming to the shaping of the inner and outer faces of the gums and substantially V-shaped arms connecting said bars, said bars having adjacent the free edges thereof longitudinally spaced openings adapted for the passage of portions of absorbent pads.



1,622,617. HINGE. TANDY B. THURMAN, Kansas City, Mo., assignor to The Arteraft Company, a Common-law Trust, composed of Tandy B. Thurman, Mildred Thurman, and Lena Joy Thurman. Filed Nov. 22, 1926. Serial No. 149,942. 7 Claims. (Cl. 16—172.)

2. A hinge comprising coils, one coil interiorly engaging the other, and means for attaching the coils to the elements to be hinged.

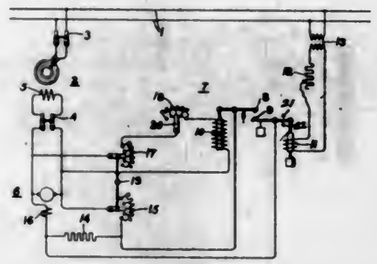


1,622,618. BEARING. LAMBERT H. VERVOORT, Coudersport, Pa. Filed Nov. 8, 1923. Serial No. 673,503. 7 Claims. (Cl. 308—218.)

1. In a bearing, in combination a frusto-conical roller cage comprising end plates stayed apart, one smaller than the other each being provided on its inner face with laterally spaced ball seats and laterally spaced stay rods connecting said end plates and having reduced ends whereby the latter are provided with shoulders, the faces of said end plates being mounted at right angles to said rods and

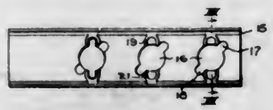
fitting snugly against said shoulders, frusto-conical rollers mounted between said plates, each roller being provided with ball seats in its ends, and balls mounted between said rollers and end plates and positioned in said seats.

1,622,619. CULTIVATOR TOOTH. WILLIAM C. WARREN, Philadelphia, Pa., assignor to S. L. Allen & Co., Inc., a Corporation of Pennsylvania. Filed Sept. 4, 1926. Serial No. 133,562. 2 Claims. (Cl. 97—202.)



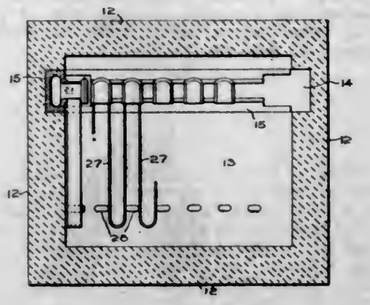
1. A cultivator tooth comprising a shank of rectangular cross section adapted to be supported under operative conditions in a substantially vertical position, the lower portion of the shank being formed to provide a sharp generally vertically extending cutting edge lying in advance of the adjacent face of the upper portion of the shank and being forwardly curved and transversely flattened at its extremity to provide a point-supporting toe having its upper face downwardly offset from the adjacent end of said cutting edge and lying in advance thereof, a generally spear-shaped point disposed on the upper face of the toe, and means for securing said point to said toe.

1,622,620. REGULATING APPARATUS. FRED H. WINTER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Sept. 28, 1924. Serial No. 739,415. 5 Claims. (Cl. 171—229.)



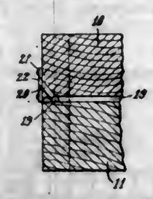
1. The combination of a machine provided with field and armature circuits, and a regulating apparatus comprising an element arranged to be energized in accordance

with the voltage of said armature circuit, an element arranged to be energized in accordance with the voltage of said field circuit, and means associated with one of



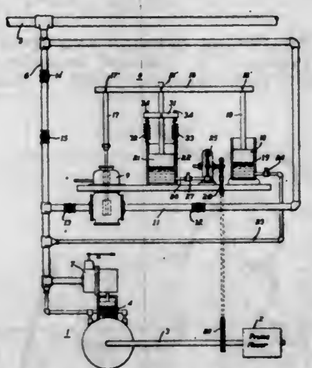
said elements for causing it to regulate the excitation of said machine independently of the voltage of said armature circuit.

1,622,621. ELECTRIC FURNACE. JAMES C. WOODSON, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 23, 1925. Serial No. 38,980. 12 Claims. (Cl. 204—64.)



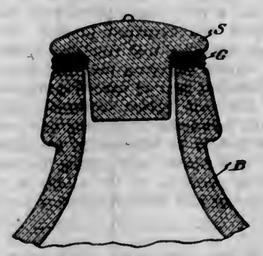
1. In an electric furnace, in combination, a member of substantially channel section, and a hanger block for supporting a resistor member extending into said member of channel section and held in proper operative position therein by the resistor.

1,622,622. ELECTRIC FURNACE. JAMES C. WOODSON, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 23, 1925. Serial No. 38,981. 6 Claims. (Cl. 204—64.)



1. In an electric furnace, in combination, a member of overhung channel section, and an elongated hanger block interfitting with said member and extending away from the face thereof, and constituting the sole support for a resistor member.

1,622,623. MOLDER'S FLASK. HAROLD D. BICKFORD, Waterville, Me. Filed May 20, 1926. Serial No. 110,361. 6 Claims. (Cl. 22—96.)



1. A molder's flask having a plurality of parts normally in superposed relation with contacting faces, one of each pair of adjacent parts being provided with a channel in its contacting face, one of each pair of adjacent parts having a vent connecting said channel with the open air.

1,622,624. REGULATOR SYSTEM FOR PULP GRINDERS. WILLIAM M. BRADSHAW and WALTER G. MYLIUS, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed July 20, 1922. Serial No. 576,401. 13 Claims. (Cl. 83—75.)

1. In a load-regulator system, the combination with a device the load upon which is to be maintained substantially constant and means for applying load thereto, of means for regulating the pressure in said system, said means being also adapted to prevent hunting action under all operative conditions.

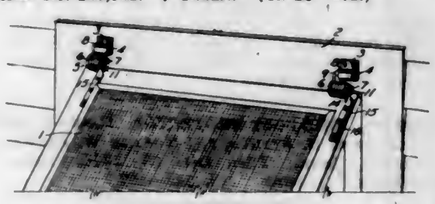
1,622,625. GASKET SEAL FOR LIQUID CONTAINERS. EVERETT E. BRAINARD, Arlington, Mass. Filed Aug 4, 1926. Serial No. 127,108. 4 Claims. (Cl. 215—37.)

1. In a shipping container for acids or the like, in combination, an acid bottle having an apertured neck, a stopper therefor, and a gasket interposed between said neck and said stopper, said gasket comprising a seamless cylinder of knitted fabric, turned back upon itself to provide a four-ply ring, one end of the fabric being contained within the turned-back gasket.

vice conforming to the shape of said insulator and adapted to be inserted between the latter and the adjacent end of one of said rails.

1,622,615. OPHTHALMIC MOUNTING. LOUIS J. TELLER, Providence, R. I. Filed Dec. 19, 1924. Serial No. 756,907. 5 Claims. (Cl. 88—53.)

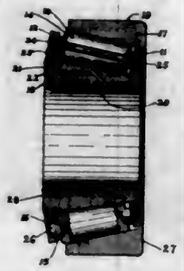
2. A temple hinge for an ophthalmic mounting, comprising pivotally-connected plates adapted to hinge a non-metallic temple member to its end-piece member, a single rivet for binding each plate in position, and a fastening spur on one of said plates at the hinge edge thereof adapted to be imbedded into the member on which it is mounted to assist in holding it in set position.



3. In an ophthalmic mounting, an end-piece, a temple having a longitudinal opening therethrough, pivotally-connected plates attached to said temple and end-piece to hinge the two together, a pair of spaced-apart fastening spurs on the temple plate imbedded into said temple located to straddle said longitudinal opening therein to assist in preventing a relative movement of said temple and plate.

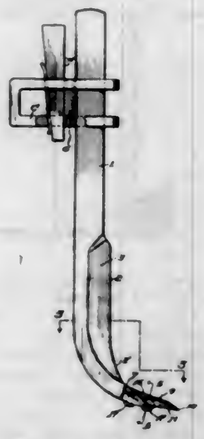
1,622,616. DEVICE FOR APPLYING OINTMENT TO THE GUMS. OLIVES TEMPLE, Dyersburg, Tenn. Filed Sept. 25, 1926. Serial No. 137,687. 3 Claims. (Cl. 128—261.)

1. In a device for applying ointment or the like to the gums, spaced arcuate bars conforming to the shaping of the inner and outer faces of the gums and substantially V-shaped arms connecting said bars, said bars having adjacent the free edges thereof longitudinally spaced openings adapted for the passage of portions of absorbent pads.



1,622,617. HINGE. TANDY B. THURMAN, Kansas City, Mo., assignor to The Artcraft Company, a Common-law Trust, composed of Tandy B. Thurman, Mildred Thurman, and Lena Joy Thurman. Filed Nov. 22, 1926. Serial No. 149,942. 7 Claims. (Cl. 16—172.)

2. A hinge comprising coils, one coil interiorly engaging the other, and means for attaching the coils to the elements to be hinged.

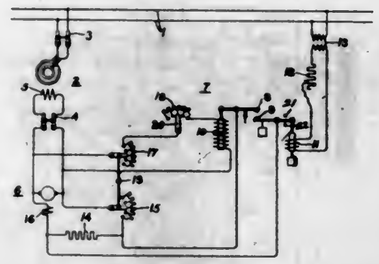


1,622,618. BEARING. LAMBERT H. VERVOORT, Coudersport, Pa. Filed Nov. 8, 1923. Serial No. 673,503. 7 Claims. (Cl. 308—218.)

1. In a bearing, in combination a frusto-conical roller cage comprising end plates stayed apart, one smaller than the other each being provided on its inner face with laterally spaced ball seats and laterally spaced stay rods connecting said end plates and having reduced ends whereby the latter are provided with shoulders, the faces of said end plates being mounted at right angles to said rods and

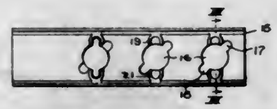
fitting snugly against said shoulders, frusto-conical rollers mounted between said plates, each roller being provided with ball seats in its ends, and balls mounted between said rollers and end plates and positioned in said seats.

1,622,619. CULTIVATOR TOOTH. WILLIAM C. WARREN, Philadelphia, Pa., assignor to S. L. Allen & Co., Inc., a Corporation of Pennsylvania. Filed Sept. 4, 1926. Serial No. 133,562. 2 Claims. (Cl. 97—202.)



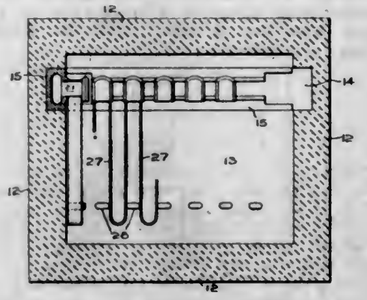
1. A cultivator tooth comprising a shank of rectangular cross section adapted to be supported under operative conditions in a substantially vertical position, the lower portion of the shank being formed to provide a sharp generally vertically extending cutting edge lying in advance of the adjacent face of the upper portion of the shank and being forwardly curved and transversely flattened at its extremity to provide a point-supporting toe having its upper face downwardly offset from the adjacent end of said cutting edge and lying in advance thereof, a generally spear-shaped point disposed on the upper face of the toe, and means for securing said point to said toe.

1,622,620. REGULATING APPARATUS. FRED H. WINTER, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Sept. 23, 1924. Serial No. 739,415. 5 Claims. (Cl. 171—229.)



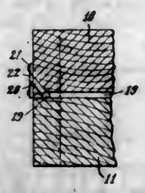
1. The combination of a machine provided with field and armature circuits, and a regulating apparatus comprising an element arranged to be energized in accordance

with the voltage of said armature circuit, an element arranged to be energized in accordance with the voltage of said field circuit, and means associated with one of



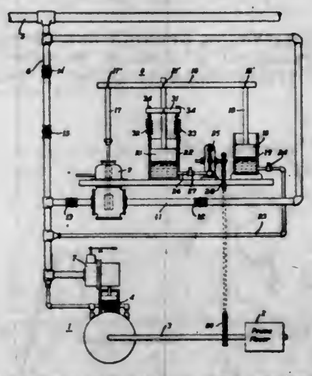
said elements for causing it to regulate the excitation of said machine independently of the voltage of said armature circuit.

1,622,621. ELECTRIC FURNACE. JAMES C. WOODSON, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 23, 1925. Serial No. 38,980. 12 Claims. (Cl. 204—64.)



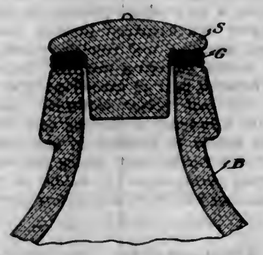
1. In an electric furnace, in combination, a member of substantially channel section, and a hanger block for supporting a resistor member extending into said member of channel section and held in proper operative position therein by the resistor.

1,622,622. ELECTRIC FURNACE. JAMES C. WOODSON, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 23, 1925. Serial No. 38,981. 6 Claims. (Cl. 204—64.)



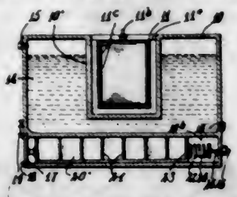
1. In an electric furnace, in combination, a member of overhung channel section, and an elongated hanger block interfitting with said member and extending away from the face thereof, and constituting the sole support for a resistor member.

1,622,623. MOLDER'S FLASK. HAROLD D. BICKFORD, Waterville, Me. Filed May 20, 1926. Serial No. 110,361. 6 Claims. (Cl. 22—96.)



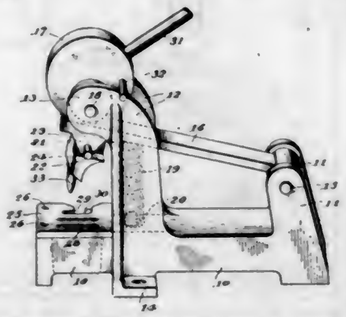
1. A molder's flask having a plurality of parts normally in superposed relation with contacting faces, one of each pair of adjacent parts being provided with a channel in its contacting face, one of each pair of adjacent parts having a vent connecting said channel with the open air.

1,622,624. REGULATOR SYSTEM FOR PULP GRINDERS. WILLIAM M. BRADSHAW and WALTER G. MYLIUS, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed July 20, 1922. Serial No. 576,401. 13 Claims. (Cl. 83—75.)



1. In a load-regulator system, the combination with a device the load upon which is to be maintained substantially constant and means for applying load thereto, of means for regulating the pressure in said system, said means being also adapted to prevent hunting action under all operative conditions.

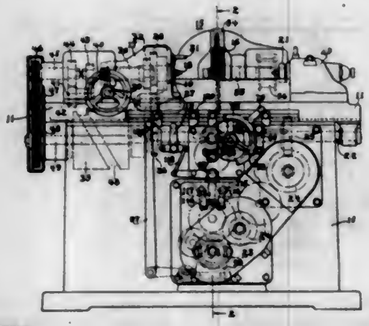
1,622,625. GASKET SEAL FOR LIQUID CONTAINERS. EVERETT E. BRAINARD, Arlington, Mass. Filed Aug 4, 1926. Serial No. 127,108. 4 Claims. (Cl. 215—37.)



1. In a shipping container for acids or the like, in combination, an acid bottle having an apertured neck, a stopper therefor, and a gasket interposed between said neck and said stopper, said gasket comprising a seamless cylinder of knitted fabric, turned back upon itself to provide a four-ply ring, one end of the fabric being contained within the turned-back gasket.

1,622,626. REFRIGERATING HOUSEHOLD UNIT. JULIUS G. BURNS and HERBERT S. DAVIS, New York, N. Y., assignors to Purecold Products of America, Inc., a Corporation of Delaware. Filed Feb. 23, 1926. Serial No. 90,094. 5 Claims. (Cl. 62—92.)

5. A refrigerator household unit, adapted to refrigerate ice for table use, comprising a housing, a sunk-in portion provided in said housing, a receptacle housing prepared solidified carbon dioxide snow supported in said sunk-in member, a brine chamber surrounding said sunk-in portion, a lower chamber formed in said housing, a door communicating with said lower chamber, a drawer formed with partitions housed in said lower chamber, and means to project said drawer upon the opening of said door, said means consisting of a spring acting between said drawer, and an adjustable resistance.

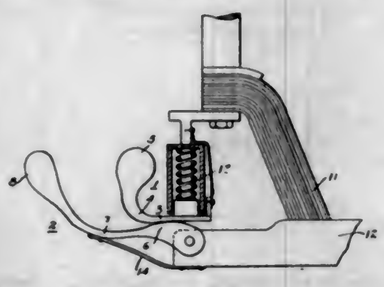


1,622,627. CHAIN-LINK OPENING AND CLOSING DEVICE. FREDERICK A. CALKINS, Waterbury, Conn. Filed Mar. 9, 1925. Serial No. 14,066. 1 Claim. (Cl. 81—15.)

In a machine of the class described, a frame including a base, a pair of uprights formed with the base and arranged as opposite sides thereof, a second pair of spaced uprights formed on the base in advance of the first pair of uprights, said base having a work supporting portion at its forward end, a pair of forwardly projecting ears formed on the second named pair of uprights and extending at opposite sides of the work supporting portion, a tool holder pivoted to the first named pair of uprights and arranged between the uprights of said pairs and having a tool receiving portion at its forward end, a spring engaging the tool holder at a point between the forward pair of spaced uprights for normally maintaining the tool holder elevated, and means supported by said forwardly projecting ears and contacting with the tool holder in advance of the point of contact between the tool holder and spring for depressing the tool by exerting pressure on the holder in vertical alignment with the tool and work supporting portion.

1,622,628. WORM-GRINDING MACHINE. HENRY E. DURKEE, Glastonbury, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 28, 1925. Serial No. 19,004. 17 Claims. (Cl. 51—95.)

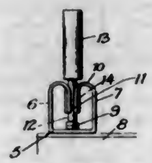
1. A worm grinding machine comprising in combination, a base, work supporting means slidably mounted thereon, an angularly adjustable wheel head movable toward and from the supporting means and having a rotatable abrasive wheel therein, a constantly rotating shaft, a cam thereon for reciprocating the work support-



ing means, and means for rotating the work simultaneously with the reciprocatory movements of the work supporting means.

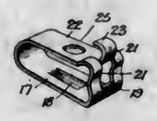
1,622,629. AIRCRAFT WITH SWINGING WINGS. ADOLF EHRLICH, Budapest, Hungary. Filed Apr. 8, 1926. Serial No. 100,726. 10 Claims. (Cl. 244—20.)

1. In an aircraft with swinging wings the combination of a power engine, cam disc fastened on the longitudinal extension of the driving shaft of said power engine, a groove on each side of each of the discs, a connecting rod between the disc and each wing, a pin on said connecting rod and a roller on said pin engaging in said groove, said connecting rod having an enlarged end, a slot in this enlarged end, a roller in said slot mounted on the driving shaft.



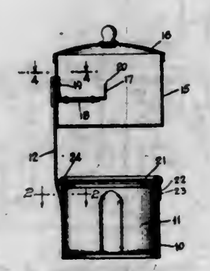
1,622,630. ARCING CONTACT. OTTO H. ESCHHOLZ, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 6, 1922. Serial No. 592,897. 7 Claims. (Cl. 200—144.)

5. In a circuit breaker, the combination with separable main contact members, of curved arcing tips of different lengths projecting laterally from said members to a spaced



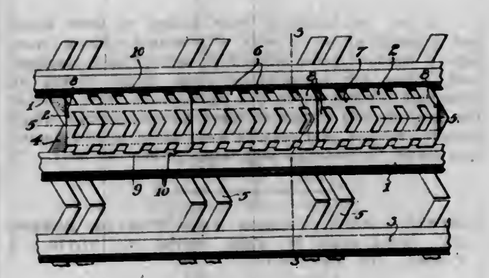
and approximately parallel relation in which their extremities are in a plane substantially parallel to the contact surfaces of the main members when in their circuit-closing positions.

1,622,631. SPRING TERMINAL CLIP. ARCHIE P. FAHNESTOCK, Long Island City, N. Y. Filed Oct. 27, 1923. Serial No. 671,183. 1 Claim. (Cl. 173—259.)



A terminal clip made from metallic band of uniform width comprising a centrally apertured securing base provided with flat, upright side members, said members having their ends turned first inwardly to form arcuate portions and then downwardly to form substantially parallel depending fingers, each finger being provided with a groove, the grooves facing each other and being arranged for receiving and clamping a pin terminal therebetween and extending along said fingers in the central length direction thereof and to the full extent of the fingers, and being located at the meeting faces thereof to provide a substantially circular opening at the top of the clips for holding the pin terminal centrally therein, and in upright position, the aperture in said base being adapted to engage with a screw-threaded plug, whereby said pin terminal is made to contact with said plug when gripped by the fingers, substantially as set forth.

1,622,632. SPRING TERMINAL CLIP. ARCHIE P. FAHNESTOCK, Long Island City, N. Y. Original application filed June 6, 1923, Serial No. 643,715. Divided and this application filed Mar. 27, 1924. Serial No. 702,435. 1 Claim. (Cl. 173—259.)

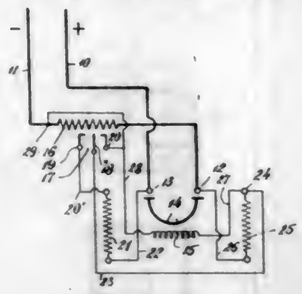


A clip adapted to receive an electrical conductor by single hand operation comprising a body portion, means on said body portion adapted to secure it to a base piece, spaced upstanding hook members at one end of the body portion, the other end of said body portion having formed thereon a back turned arm parallelly spaced therefrom and terminating with a hook member registering with said first hook members to grip the terminal of a conductor between them; said means including a tongue struck out from the body portion and bent to grip the edge of the base piece; an auxiliary securing device comprising a clamping element engaging said body portion and said base piece, said arm being provided with an aperture to give access to the clamping element, substantially as set forth.

1,622,633. SHAVING-CUP STAND. ANDREW FAIELLA, Jersey City, N. J. Filed Feb. 6, 1926. Serial No. 86,458. 3 Claims. (Cl. 126—43.)

1. A device of the class described comprising a ring-like base, a standard, the upper end of which is provided with a slot, a keeper detachably mounted in connection with the upper end of the standard and having a channel adapted to enter a slot in said standard, and a shelf member within a cup in spaced relation with the bottom thereof, a bracket therefor, and a single fastening means for the bracket and keeper.

1,622,634. GRATE BAR. JOHN J. FLEMING, Vineland, N. J. Filed June 18, 1925. Serial No. 37,919. 4 Claims. (Cl. 126—168.)

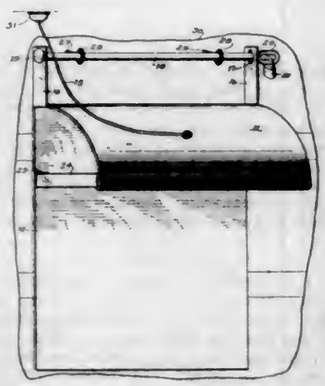


1. A grate structure including a plurality of grate bars arranged side by side, each consisting of longitudinal members, a series of transverse members, and a series of inclined extensions on the outer sides of the longitudinal members arranged to abut corresponding extensions on adjacent bars, in combination with a plurality of grate sections arranged in rows, one row being supported upon the transverse members of a grate bar and the adjacent row upon the extensions of adjacent bars.

1,622,635. ELECTRIC CONTROL DEVICE. EDWARD L. FONSECA, Newark, N. J., assignor to The Wilcolator Company, Newark, N. J., a Corporation of Delaware. Original application filed Aug. 6, 1925, Serial No. 48,501. Divided and this application filed Feb. 2, 1926. Serial No. 85,532. 14 Claims. (Cl. 219—20.)

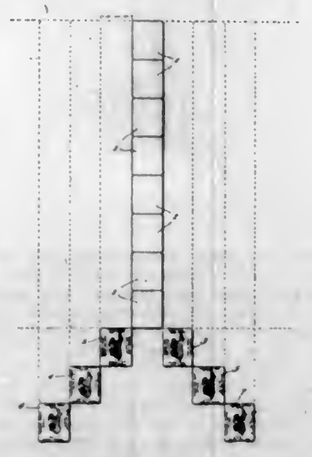
1. An electric control mechanism for controlling the flow of current from a source of supply to an energy-consuming device, which comprises the combination of an electrically operated circuit closer for making and

breaking the circuit through the device, a circuit for closing the circuit closer, a switch for controlling the flow of current through this closing circuit, and a circuit



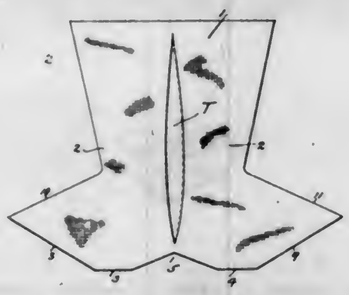
for maintaining the circuit closer in closed position, established through the circuit closer when the latter is closed.

1,622,636. TOY VEHICLE. MILTON FORCHHEIMER, Newark, N. J. Filed Nov. 24, 1926. Serial No. 150,450. 10 Claims. (Cl. 46—48.)



1. A toy car having a body formed of sheet metal and provided along its sides with spaced window openings, a window frame secured at each of said openings, each frame being formed of sheet metal having an outer flat portion which lies against the outer face of the car body and having an inner inclined portion which extends through said opening and means located behind said frame for securing said frame to the car body.

1,622,637. SIGN. CHARLES AMOS FORSYTH, Atlanta, Ga. Filed Sept. 21, 1925. Serial No. 57,770. 2 Claims. (Cl. 40—130.)

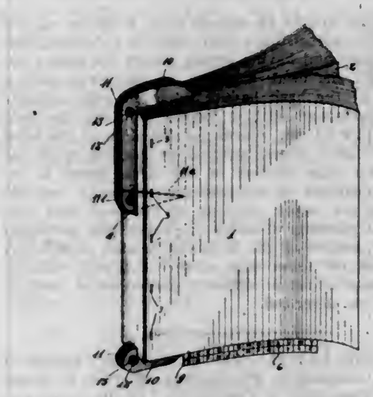


1. A sign comprising a signboard, a reflector mounting on said signboard and extending outwardly and downwardly therefrom, a brace connecting the opposite lower ends of said reflector and the signboard, said brace being integral with said reflector, said reflector being integral with said signboard, illuminating means mounted in the reflector, upstanding arms on said reflector and at the upper opposite ends thereof, and a suspension rod carried through said arms.

1,622,638. CARD GAME. KELMAN D. FROST, Swindon, England. Filed Sept. 29, 1926. Serial No. 138,545. 8 Claims. (Cl. 273—152.)

1. A game comprising a race course, entries individually movable along said course and marked to designate handicapped relation of each other when in initial positions, and means to indicate movements of the entries.

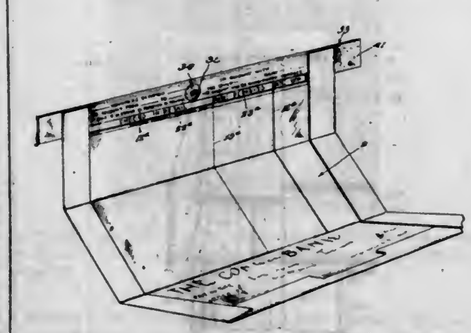
1,622,639. PROTECTOR. ELLA J. GILBERT, New York, N. Y. Filed Dec. 30, 1925. Serial No. 78,271. 1 Claim. (Cl. 36—2.)



A garment of the class described, comprising a tubular one-piece member composed of flexible waterproof material having the opposed portions of its lower end joined to each other to provide a straight integral instep receiving portion, the material of the garment at each end of the instep-receiving portion being cut slightly on the bias to provide toe and heel receiving portions the sides of which are substantially straight and cooperate with the instep-receiving portion to draw the garment snugly about the arch of the foot and the edges of the toe and heel receiving openings into engagement with the shoe throughout the length.

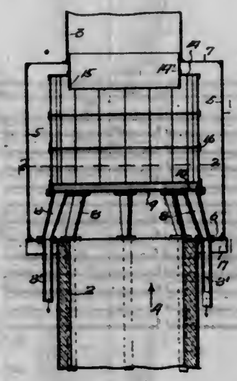
1,622,640. TYPEWRITING MACHINE. GEORGE G. GOING, Middletown, Conn., assignor to Remington Noiseless Typewriter Corporation, New York, N. Y., a Corporation of New York. Filed Aug. 28, 1925. Serial No. 53,101. 14 Claims. (Cl. 197—136.)

1. In a typewriting or like machine, the combination of a platen, a card clamp substantially coextensive with the length of the platen, and means for detachably connecting said card clamp to the face of the platen, said means comprising a locking projection on said clamp outwardly extending beyond one end of the platen when the clamp is in place, and two oppositely disposed spring-pressed catches carried by the platen and which are self-locking and positively engage said locking projection when the clamp is moved to effective position on the platen and positively prevent the detachment of the card clamp from the platen until said catches are hand released.



1,622,641. THUMB INDEX. FREDERICK P. GOBIN, Seattle, Wash., assignor of one-half to Horton S. Emerson, King County, Wash. Filed June 7, 1924. Serial No. 718,617. 14 Claims. (Cl. 129—15.)

1. An index made up of sheets having end extensions beyond the normal area of the sheets proper, the terminals of the extensions forming hooks to engage the rear edge of the book with which the index cooperates.

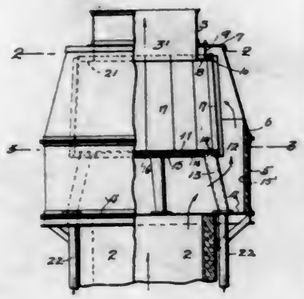


1,622,642. ACCOUNTING DEVICE. CHARLES R. HAST, San Antonio, Tex., assignor to Paul G. Villaret, San Antonio, Tex. Filed June 25, 1925. Serial No. 39,540. 6 Claims. (Cl. 283—66.)

1. An account statement sheet having indicia thereon for the entry of debits, credits, balances, and data relating to the account, the sheet, at one marginal portion having a space for the entry of the name and address of the customer or depositor, the sheet being weakened along lines parallel to said margin and extending inwardly from the contiguous margins, whereby, when the sheet is torn along said lines, the contiguous marginal portions may be folded inwardly as well as the marginal portion opposite the first mentioned marginal portion, and whereby projecting tabs will be provided at the ends of the first mentioned marginal portions adapted to be engaged about and secured to a portion of the sheet when the sheet is folded upon itself in the form of an envelope, and whereby the first

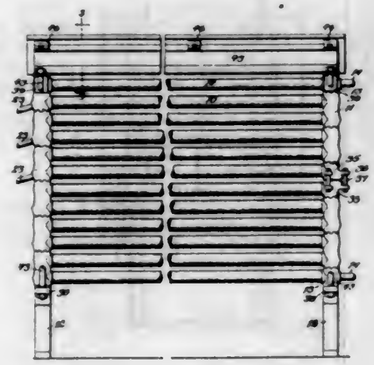
mentioned marginal portion which bears the name and address of the customer or depositor will be exposed at the exterior of the folded sheet.

1,622,643. CENTRIFUGAL DUST SEPARATOR. CHARLES GILBERT HAWLEY, Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio, a Corporation of Ohio. Filed May 4, 1925. Serial No. 27,835. 4 Claims. (Cl. 183—83.)



1. A vertical duct, in combination with a casing for receiving the gases therefrom, a centrifugal dust separating unit having an unobstructed central portion throughout the unit; positioned within said casing to in turn receive the gases from the outer parts of said unit, said unit and casing having a substantially common top containing the gas exit opening, and said unit being characterized by dust discharging means at its bottom.

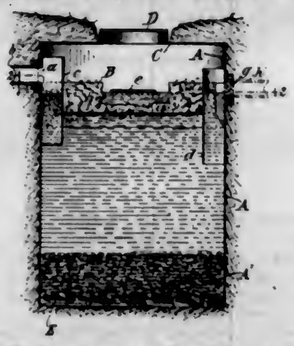
1,622,644. CENTRIFUGAL DUST CATCHER. CHARLES GILBERT HAWLEY, Chicago, Ill., assignor to Centrifix Corporation, Cleveland, Ohio, a Corporation of Ohio. Filed May 4, 1925. Serial No. 27,836. 2 Claims. (Cl. 183—91.)



1. The herein described apparatus comprising a stack, in combination with a casing at the top thereof, a central

outlet at the top of said casing, an upright tangential tuyère comprising tuyère blades suspended from the top of said casing, a suitable tuyère bottom suspended above

the top of the stack within the casing, and means for discharging the collected substances from the periphery of said bottom.

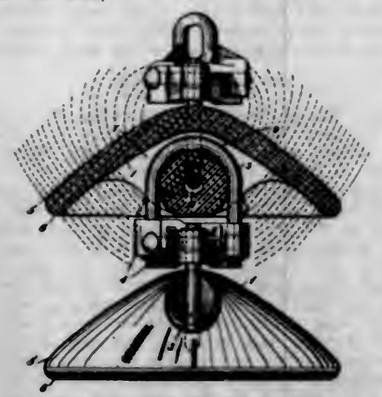


1,622,645. CONDENSER OR COOLER. NICOLAI H. HILLER and BROR F. SAFBERG, Carbondale, Pa., assignors to Carbondale Machine Company, Carbondale, Pa., a Corporation of Pennsylvania. Filed Feb. 11, 1924. Serial No. 691,927. 19 Claims. (Cl. 257—183.)

1. A zig zag conduit including a series of substantially parallel runs of pipe and return bends welded thereto and connecting said pipes in series, the upper and lower surfaces of said bends being imperforate and presenting irregularities adapted to interengage with complementary irregularities of the adjacent bend.

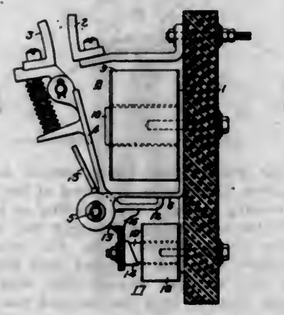
1,622,646. BACTERIAL SEWAGE TANK. LEONARD S. R. HOPKINS, New York, and HOWARD L. CORTHELL, Bronxville, N. Y., assignors to Bacterial Sewage Purification Company, New York, N. Y., a Corporation of New York. Filed May 13, 1926. Serial No. 108,809. 7 Claims. (Cl. 210—6.)

1. A sewage tank consisting of an upright vessel having at its upper part an annular gutter, an inlet to said vessel, an outlet conduit opening from the interior of the vessel and communicating with the gutter in the level



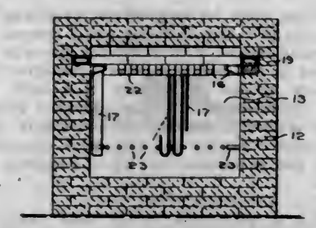
thereof to discharge sewage thereinto, and discharge openings from said gutter for discharging effluent around the tank.

1,622,647. HAIR-TRIMMING APPLIANCE. CARL W. JACKSON, Chicago, Ill. Filed Apr. 29, 1926. Serial No. 105,437. 3 Claims. (Cl. 132—45.)



1. As a new article of manufacture a device of the class described comprising a skull cap for the upper portion of the head and having spring means for secure engagement with the head, a guard for the lower portion of the back of the head having its lower edge suitably formed to correspond with a desired trim line for hair trimming, a pair of side guards for the sides of the head having their lower edges, adapted to register with the adjacent lower edge portion of the back guard to establish continuations of the trim line aforesaid, suitable buttoners on the upper portions of the back and side guards, and a plurality of series of co-operating buttoners on the lower portion of the skull cap located at different distances from the lower edge of the skull cap, whereby the guards may be set at different elevations as desired, substantially as described.

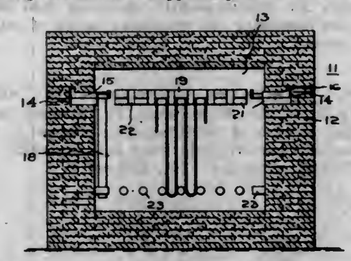
1,622,648. INSULATOR. RAY P. JACKSON, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 3, 1921. Serial No. 474,728. 2 Claims. (Cl. 173—366.)



1. An insulator comprising an insulating member having a portion of substantially paraboloid shape, the inner and outer surfaces of which are spaced substantially the same distance throughout, entirely within the paraboloid contour, and a substantially spherical body portion, having a central opening and walls of uniform thickness.

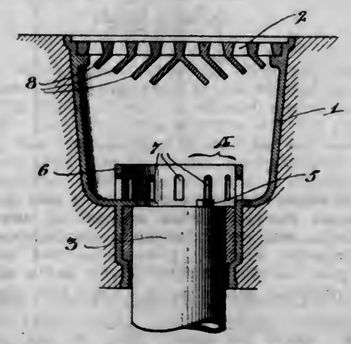
1,622,649. SWITCH. HENRY D. JAMES, Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 20, 1920. Serial No. 360,115. 4 Claims. (Cl. 200—94.)

1. The combination with a pair of relatively movable coacting contact members, of a movable magnetizable member operatively connected to one of the contact members, a winding adapted to normally exert a closing force on the magnetizable member, a second magnetizable member connected to the first named magnetizable member and movable relatively thereto, a winding adapted to normally exert a force on the second magnetizable member to restrain both members, and means automatically movable to reduce the reluctance of the magnetic circuit through the first named magnetizable member when the magnetic force exerted thereon exceeds the magnetic force exerted upon the said second magnetizable member.



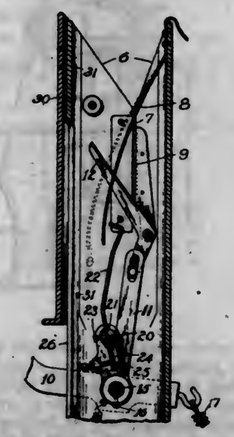
1,622,650. ELECTRIC FURNACE. ALVIN D. KEBNE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 24, 1925. Serial No. 25,614. 9 Claims. (Cl. 204—64.)

1. In an electric furnace, the combination with a wall of refractory material and a refractory resistor-supporting member located in said wall and having a portion projecting into the furnace, said resistor supporting member having a groove therein, of a locking means, interfitting with said groove, for holding said member in said wall.



1,622,651. ELECTRIC FURNACE. ALVIN D. KEBNE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 24, 1925. Serial No. 25,615. 8 Claims. (Cl. 204—64.)

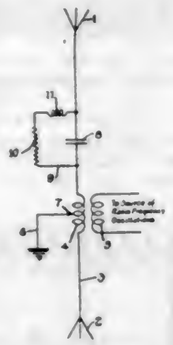
1. In an electric furnace, the combination with a furnace wall, a resistor-supporting member supported by said wall, and a resistor supported by said member, of means for holding said resistor-supporting member in its proper



operative position in said wall, said holding means being prevented from longitudinal movement by said resistor member.

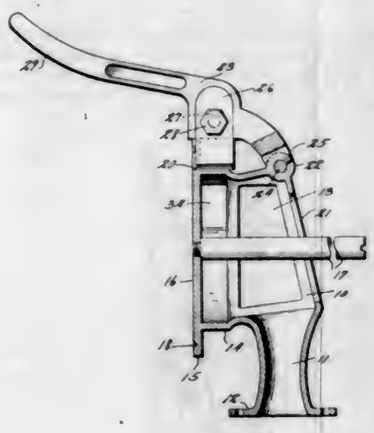
1,622,652. INLET BOX FOR DRAINS. GEORGE H. LANG, Philadelphia, Pa. Filed May 1, 1926. Serial No. 106,000. 4 Claims. (Cl. 182—31.)

1. An inlet box for drains including a box of larger diameter than the drain pipe, a grate adapted to be seated upon the box, and an inclined baffle depending from each grate bar and adapted to direct the flow of the incoming water toward the periphery of the box.



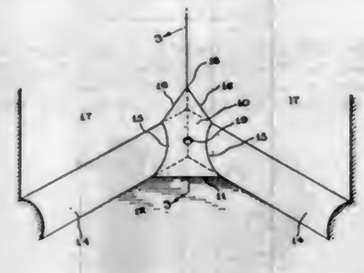
1,622,653. FLOATING-THREAD CUTTER. MORRIS LEISTER, Reading, Pa., assignor to Weinerth Knitting and Machine Company, Inc., Reading, Pa., a Corporation of Pennsylvania. Filed Nov. 8, 1926. Serial No. 146,973. 5 Claims. (Cl. 26—11.)

1. A float-thread cutter mechanism for tubular hosiery comprising a longitudinally slotted tubular member, shear-



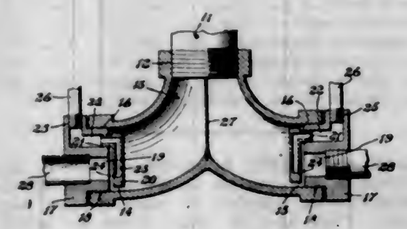
ing devices adjacent the slotted portions thereof, a float-thread tensioning member within said tubular member, and means for simultaneously operating said shearing devices and increasing the tensioning action of said float-thread member.

1,622,654. WIRELESS TRANSMISSION SYSTEM. DONALD G. LITTLE, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 20, 1922. Serial No. 576,178. 2 Claims. (Cl. 250—17.)



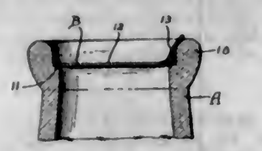
1. In a wireless transmission system, a pair of spaced antennæ, an electrical circuit conductively associating said antennæ, said circuit including a capacitive reactor and an inductive reactor, a ground connection extending from a point on said inductive reactor and a high impedance discharge path shunted around said capacitive reactor.

1,622,655. PACKING CUTTER. GEORGE E. LONG, Chattanooga, Tenn. Filed Aug. 5, 1926. Serial No. 127,389. 5 Claims. (Cl. 164—57.)



1. A packing cutter comprising a flanged guideway for the packing and having graduations, a stop adjustable along the guideway in accordance with said graduations, a knife operating across the guideway, and a spindle upon which a roll of packing may be mounted, the guideway having an aperture through which the packing may extend and be pulled out onto the face of the guideway.

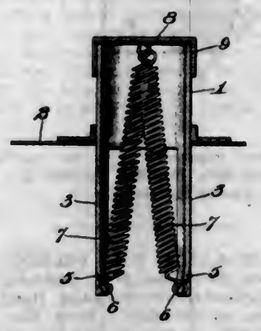
1,622,656. CORNER PLATE. LAWRENCE C. MACDONALD, Alamosa, Colo. Filed May 24, 1926. Serial No. 111,454. 2 Claims. (Cl. 20—76.)



1. A corner guard plate whose surface is plane and of general arrow head shape, the head of the arrow comprising converging straight lines meeting at an apex, the edge opposite the head being a straight line, and the connecting edges being curved lines, the straight edges forming contacts with the floor and wall plane surfaces of a corner of a room or compartment, and the curved edges forming contacts with the rounded base shoes situated at the meeting lines of the floor and walls.

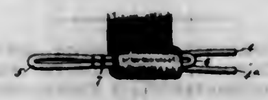
1,622,657. SAND VALVE FOR LOCOMOTIVES. SNOW FREEMAN MACDONALD, Isle Maligne, Quebec, Canada. Filed Sept. 25, 1925. Serial No. 58,658. 2 Claims. (Cl. 291—11.)

1. A sanding valve for locomotives comprising a valve with an intake port and discharge ports, closures for the discharge ports formed with restricted openings therein, a passageway in the closure member communicating with the periphery thereof, a suitably bent baffle member adapted to communicate with the aforesaid passageway and having an opening therein registering with the opening in the closure member and means for supplying compressed air and compressed air pipes connected to said passageway.



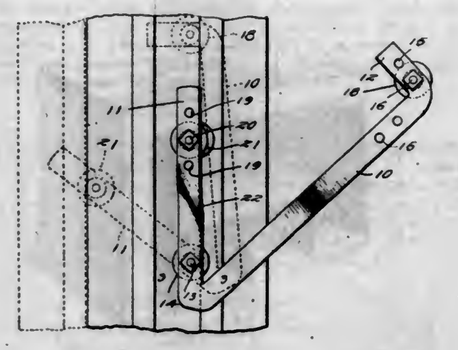
1,622,658. BOTTLE STOPPER. WILBUR G. MCBURNEY, Altoona, Pa. Filed Dec. 16, 1925. Serial No. 75,815. 3 Claims. (Cl. 215—51.)

1. A bottle stopper comprising a disc shaped body provided with an integrally formed upwardly struck tab having the base of the outer face thereof conforming



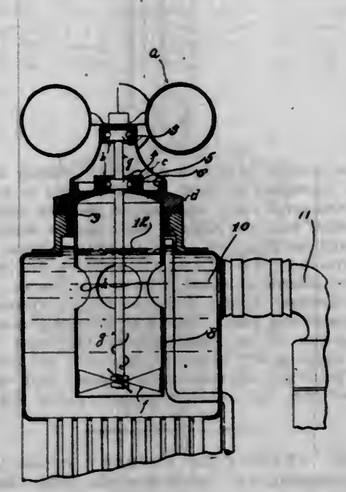
to the circumferential edge of the body portion and having the side edges of the tab merging in fillets into the upper face of the body portion wholly within the circumferential edge of the disc.

1,622,659. FILLER CAP. PATRICK E. MALONE, Kellogg, Idaho. Filed Nov. 29, 1924. Serial No. 752,907. 2 Claims. (Cl. 220—86.)



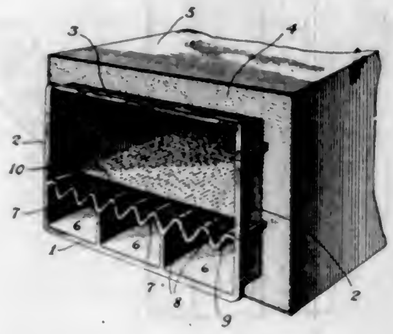
1. A device of the class described comprising, in combination, a tubular member adapted to be inserted through and supported by a wall of a container, the inserted end of the member being open at all times and provided at diametrically opposed points with elongated arms, a slip cap adapted to be engaged over the outer end of the tubular member, the outer end portions of the arms being provided with inwardly disposed tongues, and retractible members connected to said tongues and to substantially the axial center of the cap.

1,622,660. HAIR CURLER. MILTON D. MESEROLE, Milford, Conn., assignor to The Hayes-Meserole Manufacturing Co., Inc., Milford, Conn., a Corporation of Connecticut. Filed July 12, 1924. Serial No. 725,579. 1 Claim. (Cl. 132—43.)



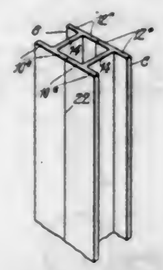
A unitary hair curler comprising a solid body, a tongue, a plurality of legs, a rear end constituting a continuation of the legs, said body, legs and rear end being normally in the same plane, and the tongue lying normally substantially parallel to the body and leg portions and secured to the body inside of the ends thereof and to one side of the transverse center line thereof; said body, tongue and ends being made of fabric covered flexible material and being bendable in all directions, fastening means fixing one end of the tongue to the body and forming with the body means to hold the end of the hair between them, the middle portion of the tongue being covered by the hair as winding proceeds and the extreme end of the tongue during the winding of the hair projecting fully beyond the curled hair and affording means to depress the tongue in order to retain the end of the hair between said tongue and the body thereof.

1,622,661. TIRE SPREADER. WILLIAM A. MIELKE, Bancroft, Nebr. Filed July 15, 1926. Serial No. 122,645. 4 Claims. (Cl. 152—27.)



2. A tire spreader comprising short and long arms arranged at an acute angle to one another and rigidly connected, the long arm being arcuately curved to approximate the curvature of the bead face of a tire, pivots projecting from corresponding faces of the free ends of the long and short arms, a further pivot mounted adjacent the connection between the arms and at the same side of the arms and rollers mounted upon said pivots for engagement with the beads of the tire, the first named pivots being adjustable longitudinally of the arms.

1,622,662. DRAFT-ACTUATED CIRCULATING PUMP AND INDICATOR. ABRAM MOSES, Baltimore, Md. Filed Mar. 26, 1926. Serial No. 97,486. 6 Claims. (Cl. 123—175.)

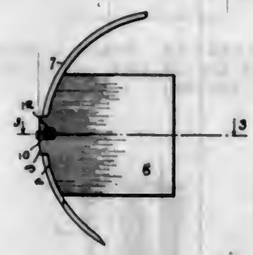


1. The combination of a draft operated wheel, a shaft carrying the wheel, a motor vehicle radiator cap having a bearing for the shaft, the shaft extending downward from the cap and having projecting blades below the cap for circulating cooling fluid.

1,622,663. APPARATUS FOR ANNEALING GLASSWARE. VERGIL MULHOLLAND, West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Sept. 29, 1925. Serial No. 59,319. 7 Claims. (Cl. 49—47.)

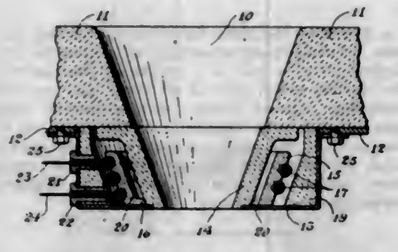
1. Apparatus for annealing glassware comprising a tunnel having a ribbed floor, and a conveyor extending through said tunnel and supported by the ribs of said floor.

1,622,664. HOLLOW STRUCTURE AND METHOD OF MAKING THE SAME. THOMAS E. MURRAY and THOMAS E. MURRAY, Jr., Brooklyn, N. Y. Filed Apr. 21, 1923. Serial No. 633,611. 4 Claims. (Cl. 29—148.2.)



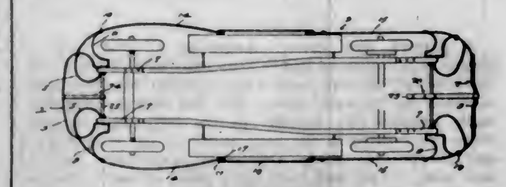
1. The method of making a multiple cellular structure for the circulation of fluids, which consists in arranging rolled structural steel H-shapes or the like adjacent to one another with the edges of their flanges abutting and electrically welding such edges together to form a fluid-tight structure with adjacent cells which are separated from one another by single webs of said shapes.

3. A multiple cellular structure for the circulation of fluids comprising rolled structural steel H-shapes or the like adjacent to one another with the edges of their flanges abutting and integrally united to one another to form a fluid-tight structure with adjacent cells which are separated from one another by single webs of said shapes.



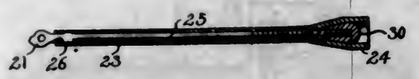
1,622,665. CULTIVATOR FENDER. GEORGE E. NIX, Phil Campbell, Ala. Filed Sept. 23, 1925. Serial No. 58,183. 2 Claims. (Cl. 97—188.)

1. A cultivator shield comprising a plate having means at its rear vertical edge for slidably associating the same with a cultivator tooth, and means engageable with the cultivator tooth for releasably securing the plate in any desired position relative to the tooth, the means for slidably associating the plate with the tooth comprising lateral tongues rigid with the plate and engageable with the forward and rear surfaces of the said tooth, and the means for securing the plate in adjusted position embodying a bolt slidable through the plate and having a



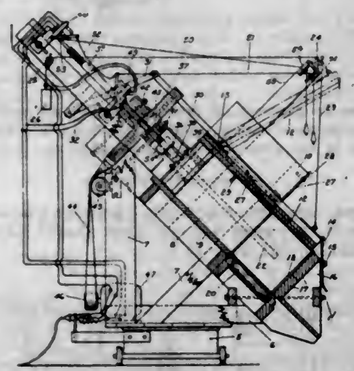
hook on one end engageable with the cultivator tooth, said bolt having nuts threaded thereon and engageable with the outer side of the plate.

1,622,666. APPARATUS FOR FEEDING MOLTEN GLASS. KARL E. PEILER, West Hartford, Conn., assignor to Hartford-Empire Company, Hartford, Conn., a Corporation of Delaware. Filed Mar. 31, 1925. Serial No. 19,567. 11 Claims. (Cl. 49—55.)



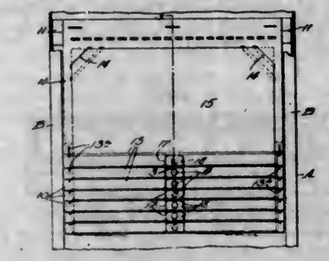
6. The combination with a receptacle for molten glass having a discharge nozzle, of a removable heater unit comprising a refractory support surrounding said nozzle and spaced therefrom, electrical heating means mounted on said support, and a casing surrounding said support, the said casing being detachable to permit removal of said heater unit.

1,622,667. COMBINATION BUMPER AND FENDER. THOMAS C. PHALIN, Connellsville, Pa. Filed Oct. 26, 1926. Serial No. 144,285. 5 Claims. (Cl. 293—55.)



1. In a structure of the class described, front and rear bumpers including main and supplemental sections, means for attaching said bumpers to an automobile chassis, keepers adapted to be connected with the running boards of the automobile, and swingably mounted side fenders connected with the respective bumpers, and cooperable at their inner ends with said keepers.

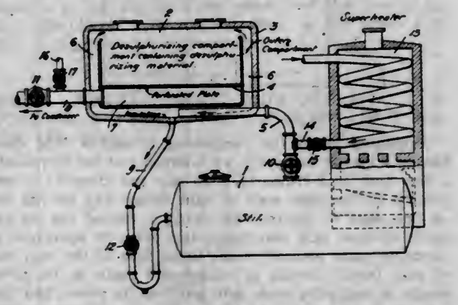
1,622,668. OPHTHALMIC MOUNTING. LAWRENCE POETON and FRANK A. MOREY, Southbridge, Mass., assignors to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Nov. 6, 1924. Serial No. 748,157. 4 Claims. (Cl. 88—52.)



1. A spectacle temple comprising a nonmetallic tube provided with a helical grove intermediate its ends, the rear ungrooved extremity of the tube being expanded to a larger cross sectional area, a shape retaining plug secured in the expanded extremity, and a metallic cord extending through the tube, said core having a flexible portion substantially coextensive with the helical groove.

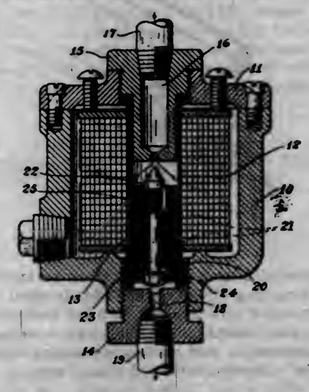
1,622,669. PACKING PRESS. WILLIAM G. PRICE, Yakima, Wash. Filed Aug. 6, 1924. Serial No. 730,440. 5 Claims. (Cl. 100—57.)

1. Pressing apparatus comprising a chute, means adjacent to the lower end of the chute for supporting a container, a pivoted member for bracing one side of said container against internal pressure, a brace member for another side of said container, means for raising said pivoted member to a position to serve as portion of a hopper through which the chute may be fed, and connections whereby said movement withdraws said brace member to inoperative position.



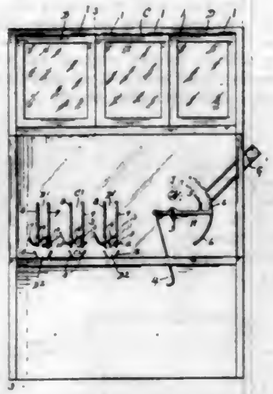
1,622,670. CARD INDEX DEVICE. JAMES H. RAND, Jr., Tonawanda, N. Y., assignor to Rand Kardex Bureau, Inc., Tonawanda, N. Y., a Corporation of Delaware. Filed Apr. 14, 1923. Serial No. 632,179. 6 Claims. (Cl. 129—16.)

1. In an index device, the combination of a card holder having means for attachment to a support, and parts for releasably holding a card on one side thereof, said holder having an opening therein whereby a portion of said card at one side of said holder may be viewed from the opposite side of the holder without moving said holder.



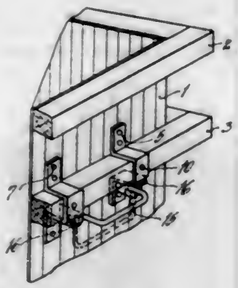
3. In an index device, the combination of a plurality of separate index cards, and means for releasably attaching said cards to a support, said cards being arranged in pairs, the cards of each pair being in substantially coincident superposition, the upper card of each pair having an opening in a portion thereof, whereby the presence of the card therebeneath may be noted without lifting the upper card or moving said attaching means.

1,622,671. METHOD OF REACTIVATING DESULPHURIZING AGENTS FOR HYDROCARBON OILS. JAMES B. RATHER, Brooklyn, and FREDERICK S. SHEPARD, New Rochelle, N. Y., assignors to Standard Oil Company of New York, New York, N. Y., a Corporation of New York. Filed April 16, 1924, Serial No. 706,858. Renewed Aug. 12, 1926. 5 Claims. (Cl. 252—2.)



1. The process of desulphurizing metallic sulphides carrying oil, which includes removing the oil from the sulphides without burning the oil, and then converting the metallic sulphides to metallic oxides.

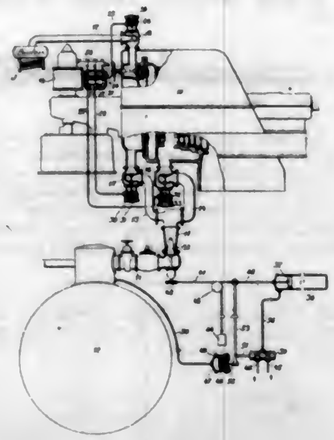
1,622,672. MAGNETICALLY-CONTROLLED FLUID VALVE. WARD RAYMOND, Easton, Pa., assignor to Pennsylvania Pump & Compressor Company, Easton, Pa., a Corporation of Pennsylvania. Filed May 3, 1926. Serial No. 106,302. 5 Claims. (Cl. 137—139.)



3. A magnetically controlled valve comprising in combination, a body member, an electro-magnetic coil therein, a tube within said coil, caps closing the ends of said tube and having openings therethrough, a fluid conduit directly connected to said tube and caps, an armature within said tube, and a valve resiliently mounted on said armature whereby movement of said armature will move said valve to its open and closed position.

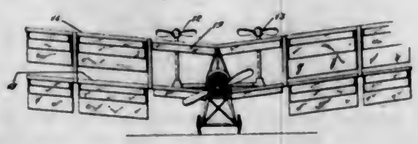
1,622,673. GAMING APPARATUS. CHARLES H. REILLEY, Salt Lake City, Utah. Filed Mar. 8, 1926. Serial No. 93,067. 1 Claim. (Cl. 273—138.)

A gaming apparatus comprising a narrow thin frame having a glazed side wall; an inclined slot for introducing a coin into said frame through one end thereof; a lever pivoted to the rear wall of said frame and having lugs on one edge to receive said coin; a curved lug on said lever to close said slot when said lever is operated; an eccentric plate pivoted to the inner face of the rear wall of said frame; means to rotate said plate on its pivot; means to manually move said lever on its pivot; and slots into which a coin may be thrown from its position on said lever.



1,622,674. HANDLE FOR SHIPPING BASKETS. FRANK A. REISS, Medimont, Idaho. Filed May 10, 1926. Serial No. 108,117. 1 Claim. (Cl. 217—125.)

The combination with a basket having an exterior cleat, of spaced attaching straps, bow plates integral with said straps, perforated ears integral with the respective straps and plates and located below the cleat, a swinging loop handle supported in said ears, and angular stop ends on said loop for co-action with said bow plates.

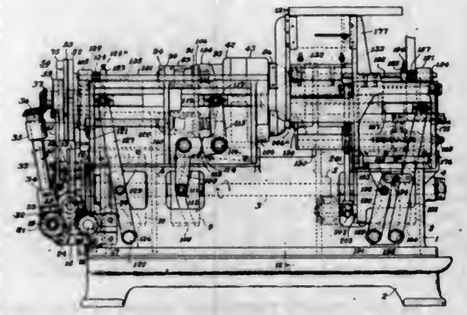


1,622,675. STEAM PLANT. JOHANNES RUTHS, Djursholm, Sweden, assignor to Aktiebolaget Vaporackumulator, Stockholm, Sweden, a Corporation of Sweden. Filed Apr. 13, 1925, Serial No. 22,896, and in Germany May 21, 1924. 6 Claims. (Cl. 60—43.)

1. In a steam plant, in combination, a steam generator, a motor, means to conduct steam from said generator to said motor, a steam accumulator normally operating under relatively great variations of pressure, a passage for steam from said accumulator to said motor, a valve in said passage and control means for said valve operating in

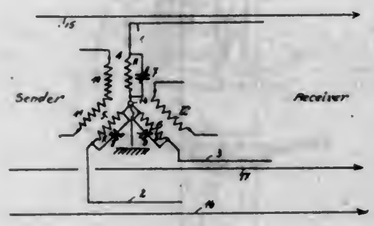
response to changes of pressure in the accumulator to change the area of flow through said valve in inverse proportion to the pressure in the accumulator.

1,622,676. FLYING MACHINE. ACHILLE SARTINI, New York, N. Y. Filed Nov. 18, 1925. Serial No. 69,891. 15 Claims. (Cl. 244—15.)



1. In a flying machine, the combination with a body, of a supporting wing structure therefor, said wing structure comprising a frame and a plurality of plane sections in front to rear serial arrangement at each side of said body, pivotally mounted on said frame transversely of the longitudinal axis of said body, and elastic retaining members for said sections tending to maintain said sections in a downwardly directed position from their respective pivotal points of attachment.

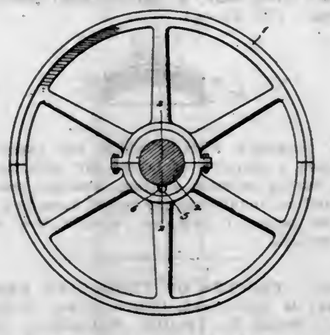
1,622,677. CONTROL APPARATUS. SAMUEL B. SCHENCK, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 11, 1923. Serial No. 667,925. 16 Claims. (Cl. 177—311.)



1. A control system for vehicles comprising a warning signal, a door, and means, operable upon a predetermined weight being placed in said vehicle for operating said signal and for closing said door.

1,622,678. CENTERING MACHINE. CARL SCHRAMM, West Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 8, 1924. Serial No. 691,400. 15 Claims. (Cl. 77—5.)

2. In a machine tool for centering blanks, the combination with a rotating roughing drill, a rotating finishing drill, and a turret carrying a plurality of blanks, of automatic means for loading and unloading the blanks, automatic means for indexing the turret, automatic means for moving the drills into engagement with the blanks, and means for so advancing the drills as to effect a yielding engagement with the blanks.

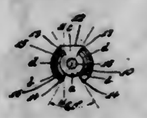


1,622,679. ARRANGEMENT OF CONNECTIONS FOR SENDING AND RECEIVING ELECTRIC WAVES. CARL SCHWARZ, Charlottenburg, near Berlin, Germany, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 31, 1921, Serial No. 511,831, and in Germany May 26, 1921. 4 Claims. (Cl. 177—352.)

4. In a signaling system, two stations, a sending device and a receiving device at each station, a line including a plurality of conductors between said stations, means for establishing a balanced relation at each station whereby the signals sent by the sending device at that station will be without effect on the receiving device at the same station, and one of the conductors being so arranged that signaling frequency energy is attenuated more therein than in certain of the other conductors, whereby the balancing means at one station will not prevent the sending means there from affecting the receiving device at the other station.

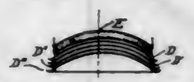
1,622,680. LOCKING DEVICE FOR PULLEYS. LOUIS SHAUB and OSCAR I. FARRINGTON, Salem, Mass. Filed Sept. 23, 1925. Serial No. 58,177. 1 Claim. (Cl. 287—52.)

The combination with a shaft and a pulley thereon having a U-shaped groove extending throughout the length of the wall of the opening through which the shaft passes to form a keyway of a depth less than its width, of a key of uniform oval cross sectional outline throughout and



insertable in the keyway from either end and having its minor and major axis corresponding to the depth and width of the key way, respectively.

1,622,681. BRAKE. EDWARD SLADE, New York, N. Y. Filed Apr. 16, 1925. Serial No. 23,445. 18 Claims. (Cl. 188—249.)

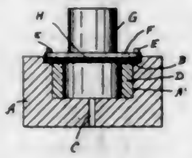


9. The method of forming a braking element which includes a lining and a backing consisting in forcing stitches into the lining from the backing and depressing portions of the backing to house portions of the stitches, and clinching the ends of the stitches in the lining.

1,622,682. PAPER CLIP. CHARLES W. SPONSEL, Wethersfield, Conn. Filed Mar. 26, 1924. Serial No. 701,977. 2 Claims. (Cl. 24—259.)

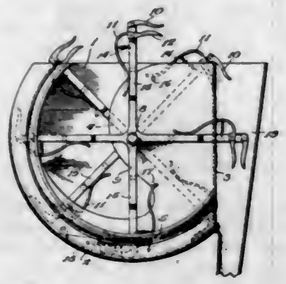
1. A paper clip having a central circular portion adapted to lie against one side of superposed sheets of paper, a narrow neck extending upwardly from the upper edge of the central portion, and a pair of arcuate arms carried at one end by the neck for engagement against the opposite side of said superposed sheets of paper, said arcuate arms extending downwardly from said neck in spaced relation to the opposite edges of the central circular portion and terminating at their lower ends in widely spaced apart relation to provide a space through which the sheets of paper may be introduced against the lower ends of the central circular portion.

1,622,683. METALLIC LAYER FOR UPPER DENTURES. WILLIAM MONELL STANBROUGH, Newburgh, N. Y. Filed May 1, 1925. Serial No. 27,161. 8 Claims. (Cl. 32—4.)



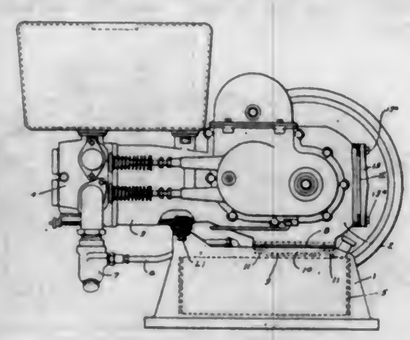
1. A composite metallic sheet for upper dentures, comprising a plurality of layers cut from metallic foil, having curved anterior portions, straight posterior portions, and an angular slotted cutout extending from midway the posterior portions towards the curved anterior portion.

1,622,684. PROCESS OF PRODUCING FERTILIZER. ALBERT G. STILLWELL, Coscob, Conn. Filed Oct. 21, 1924. Serial No. 745,013. 9 Claims. (Cl. 71—9.)



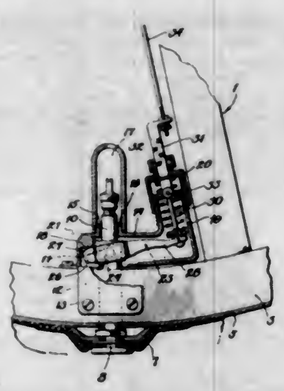
1. The method of producing a fertilizer material, which consists in mixing waste water containing a fertilizer constituent with calcium acid phosphate to form a mechanical mixture, and dehydrating the mixture.

1,622,685. APPARATUS FOR MAKING PACKING CUPS. BENJAMAN STOLTZ and DAVID A. LILLIE, Montpelier, Ind. Filed Apr. 22, 1926. Serial No. 103,814. 5 Claims. (Cl. 18—34.)



1. An apparatus of the kind described, comprising a chuck block having a circular well shaped bore, a machined circular sleeve to rest free in said bore, a guide member having central bore concentric with and of diameter less than the inner diameter of the sleeve, said guide member being adapted to rest at removable position centrally above the said sleeve, and a pressure head adapted to be passed through the said guide member and lowered into said well.

1,622,686. POTATO FEEDER. BAINBRIDGE P. SUTHERLAND, Del Norte, Colo. Filed Dec. 21, 1925. Serial No. 76,799. 2 Claims. (Cl. 221—127.)

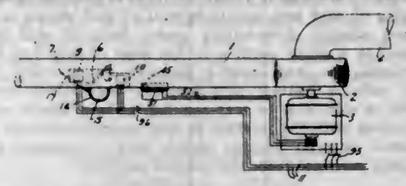


1. In a potato planter, the combination of a hopper, arms provided to travel through the hopper and having an offset, fixed and pivoted jaws at the ends of the arms, the pivoted jaws having levers extending across the spaces of the arms provided by the offset portions thereof, and trips disposed in the path of the levers and the said spaces of the arms.

1,622,687. INTERNAL-COMBUSTION ENGINE. OTTO E. SZEKELY, Moline, Ill. Filed Nov. 12, 1925. Serial No. 68,702. 4 Claims. (Cl. 123—195.)

1. In an internal combustion engine, a crank-shaft casing, and fixed base therefor, provided in its upper part with a lubricant container, and adapted to hold said casing in a horizontal position, one of the ends of said casing being fitted for mounting in a vertical position.

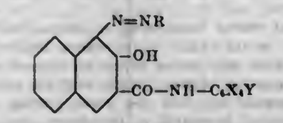
1,622,688. AUTOMATIC TIRE GAUGE. LEWIS O. VAN RIPER, Seattle, Wash. Filed Oct. 13, 1922. Serial No. 594,349. 1 Claim. (Cl. 152—11.5.)



A tire pressure indicator, including a housing secured to the felly of a wheel and having the valve stem of a pneumatic tire projecting through aligned openings therein, a lever having a pivotal connection with the valve stem and fulcrumed at one end in the housing, a spring interposed between the other end of the lever and the housing normally under compression and acting to push the valve stem outwardly, and indicating means operated by the lever and controlled by the air pressure in the tire through the axial movement of the valve stem for indicating the pressure in the tire.

1,622,689. FLUID-PRESSURE REGULATOR. FLOYD H. VIETS, Alhambra, Calif., assignor to International Precipitation Company, Los Angeles, Calif., a Corporation of California. Filed July 6, 1925. Serial No. 41,630. 8 Claims. (Cl. 230—24.)

1. An apparatus for fluid pressure regulation comprising in combination with means defining a fluid passage, fluid moving means adapted to produce flow of fluid in said passage, variable speed driving means for

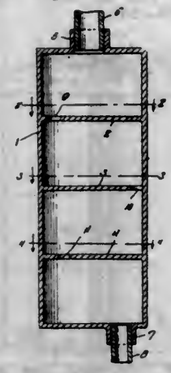


said fluid moving means, a flow controlling device situated in said passage, a regulating device operatively connected to said flow controlling device and provided with control means connected to said passage so as to be

responsive to variations in pressure therein, speed controlling means for said variable speed driving means and means operatively connected to said flow controlling means for controlling the operation of said speed controlling means, whereby movement of such flow controlling means beyond a prescribed position is adapted to cause operation of said speed controlling means.

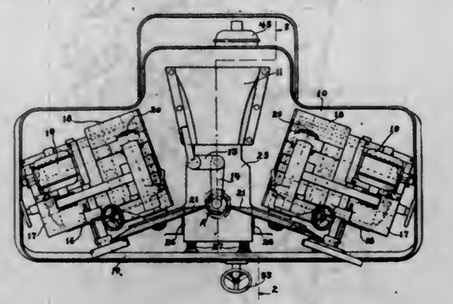
1,622,690. MANUFACTURE OF AZO DYESTUFFS DERIVED FROM 2-HYDROXYNAPHTHALENE-3-CARBOXYLIC-ACID-ARYLAMIDES. HERMANN WAGNER, Hochst-on-the-Main, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed Mar. 17, 1922. Serial No. 544,613. 2 Claims. (Cl. 260—95.)

1. As new products the azo dyestuffs of the general formula:



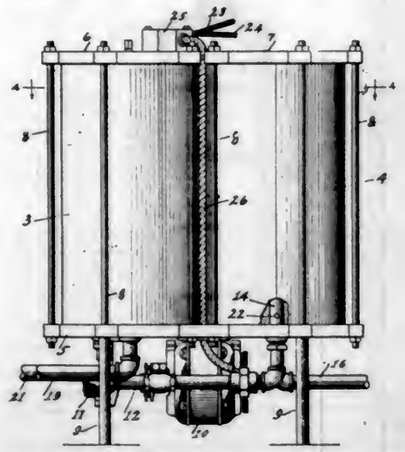
wherein R may be any mononuclear aromatic residue, X may be hydrogen, halogen or any substituent, Y is a methyl group in ortho position to the nitrogen.

1,622,691. TACKLING DUMMY. GLENN S. WARNER, Palo Alto, Calif., assignor to A. G. Spalding & Bros., New York, N. Y., a Corporation of New Jersey. Filed Sept. 17, 1926. Serial No. 136,078. 6 Claims. (Cl. 273—55.)



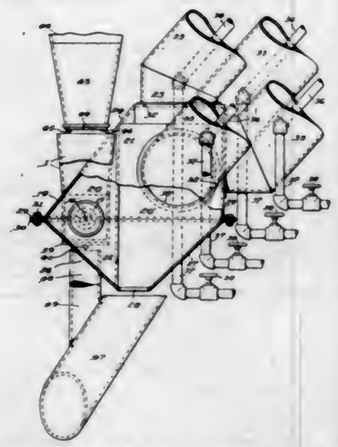
1. In a tackling dummy, a supporting structure, a block carried thereby, a dummy, a rope secured to the dummy and passing over the block, a weight carried by the block and secured to the other end of the rope, for returning the dummy to normal position, and means for passing the rope end between the block and the dummy through the weight.

1,622,692. EXHAUST MUFFLER. ALBERT GEORGE WENDLING, Kitchener, Ontario, Canada. Filed May 12, 1926. Serial No. 108,579. 1 Claim. (Cl. 137—160.)



In a muffler of the class described, a closed cylindrical shell, an inlet pipe attaching nipple associated with one end of said shell and arranged centrally of said end, an exhaust pipe attaching nipple associated with the opposite end of the closed shell and arranged adjacent the edge portion thereof, central and end partitions arranged transversely within the shell and being cast integrally therewith for dividing the shell into a plurality of compartments, the partition adjacent the inlet being formed with a series of exhaust apertures adjacent its edge, the central partition being formed with a series of exhaust apertures at a point diametrically opposite the aforementioned exhaust apertures, the other end partition which is disposed adjacent the outlet having a series of exhaust apertures formed therein adjacent its edge, the same being arranged at a point diametrically opposite the second mentioned series of exhaust apertures, the apertures of the several partitions decreasing in area toward the discharge end of the shell.

1,622,693. GEAR-TOOTH GRINDER. ARTHUR L. WILDER, Wethersfield, Conn., assignor to Pratt & Whitney Company, New York, N. Y., a Corporation of New Jersey. Filed Aug. 2, 1923. Serial No. 655,305. 11 Claims. (Cl. 57—52.)

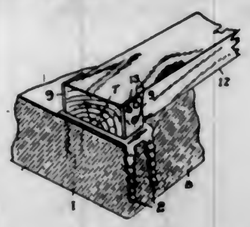


1. A machine for generating tooth curves of gears comprising in combination, a base, a cutting wheel thereon, a work supporting spindle adapted to be moved to any position while its axis is retained in parallel positions, a cam adapted to impart a four-way motion to one end of an arm, means to rotate said cam; means positioned at an intermediate point of said arm adapted to engage said work spindle, and means to rotate said spindle simultaneously with its motion induced by said cam.

1,622,694. PUMPING UNIT. WALTER W. WILLIAMS, Bloomington, Ill., assignor to Williams Oil-O-Matic Heating Corporation, Bloomington, Ill., a Corporation of Illinois. Filed July 25, 1925. Serial No. 45,978. 3 Claims. (Cl. 103—26.)

1. A pumping unit for transporting and delivering liquid comprising two enclosed chambers, a pumping element connected on opposite sides to the respective chambers, pipes in each chamber from the pumping element extending adjacent the tops of said chambers, an intake pipe from the source of liquid leading into the chamber communicating with the intake side of the pumping element extending adjacent the top of said chamber and a delivery pipe leading from adjacent the bottom of the other chamber, the pipe leading to the intake of the pumping element provided with an opening adjacent the bottom on the interior of that chamber whereby the liquid is allowed to pass into the pumping element and form a liquid seal therefor.

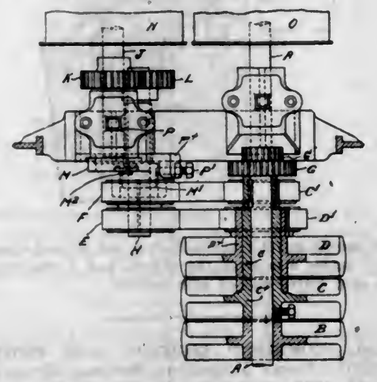
1,622,695. IMPACT PULVERIZER. ALFRED B. WILLOUGHBY, Philadelphia, Pa. Filed Jan. 31, 1925. Serial No. 5,927. 6 Claims. (Cl. 83—46.)



1. In an impact pulverizer in which two alined and opposed streams of material to be pulverized are discharged against each other impelled by jets of superheated steam under high temperature, pressure and velocity whereby the impact of the pieces against each other reduce them to a powder, the combination of a casing, forming an impact chamber and enclosing said jets and having an opening through the bottom thereof, below and offset horizontally from the vertical passing through the axes of said jets, a bottom wall of said casing being inclined sharply downwardly under both of said jets, disposed in a plane parallel to the axes of said jets and terminating in said opening whereby unpulverized material striking against said inclined wall slides downwardly on said wall to said opening, and an ejector communicating with the interior of said casing to remove the powdered material floating therein and to separate said powdered material from the heavier particles.

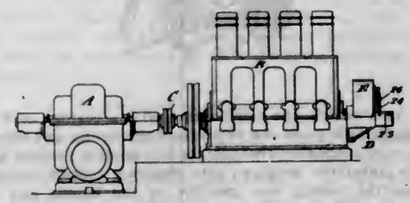
1,622,696. INLET VALVE FOR TOILET-FLUSHING MECHANISM. CHARLES ARTHUR WULF, Indianapolis, Ind., assignor to American Valve and Enameling Corporation, Indianapolis, Ind., a Corporation of Indiana. Filed Aug. 20, 1925. Serial No. 51,296. 2 Claims. (Cl. 137—104.)

1. An inlet valve comprising a nozzle having a delivery orifice in its end, a valve sleeve telescoped thereover, the nozzle and sleeve being so formed as to produce a fluid passage between them, and the sleeve having a portion adapted to close the nozzle orifice, a toothed operating element journaled in the sleeve, and teeth carried by the nozzle and meshing with the operating element whereby the sleeve and nozzle may be relatively shifted axially to open and close the orifice.



1,622,697. FLOOR CLIP. ROBERT W. BAILY, Pittsburgh, Pa. Filed Apr. 7, 1924. Serial No. 704,729. 2 Claims. (Cl. 72—101.)

1. A floor clip or the like comprising a single piece of sheet metal having at opposite ends tongues bent at an angle from the portion of the clip connecting the tongues, and also having between the said ends a pair of tongues normally in the plane of the said portion of the clip and enclosed thereby and adapted to be bent from said plane to receive between them a nailing strip after the clip has been placed in use with the first tongues inserted in a cement body.

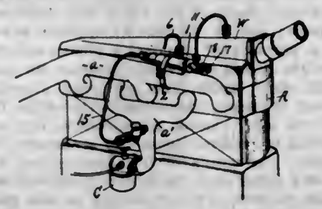


1,622,698. DRIVING MECHANISM FOR SPINNING, DOUBLING, AND THE LIKE MACHINES. JOHN GEORGE BARKE, Stockport, and FREDERIC HARDMAN, Bramhall, England. Filed Jan. 31, 1923. Serial No. 616,009. 2 Claims. (Cl. 74—21.)

1. In a machine of the class described, the combination of a pair of shafts disposed in parallelism, a pair of driving pulleys carried by one of said shafts, one secured to the shaft for rotation therewith and the other rotatable independently of the shaft, a pair of intermediate pulleys also carried by said shaft one for rotation by the fast driving pulley and the other for rotation by the loose driving pulley, one of said intermediate pulleys being of larger diameter than the other, a compensating shaft disposed between said pairs of shafts and in parallelism therewith, said compensating shaft being mounted in a

movable bearing thereby to permit variation of the distance between it and the pulley-carrying shaft, a pair of pulleys of equal diameter secured to the compensating shaft each in alinement with one of said intermediate pulleys, belts connecting the pulleys on the compensating shaft with said intermediate pulleys, and gearing between said compensating shaft and the other shaft of the pair for transmitting motion to the latter.

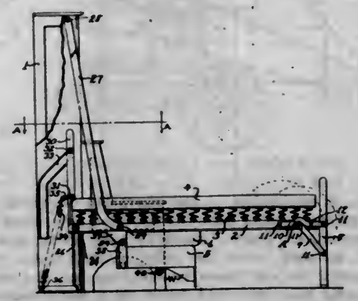
1,622,699. OIL-ENGINE-DRIVEN CENTRIFUGAL AND SIMILAR PUMP. PHILLIPS P. BOURNE, Winchester, Mass., assignor to Worthington Pump & Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Nov. 13, 1923. Serial No. 674,437. 3 Claims. (Cl. 123—140.)



1. A fuel feeding device for internal combustion engines comprising a fuel pump, a fuel by-pass valve, means for operating the fuel by-pass valve including a fuel control shaft determining the point and duration of the opening of said fuel by-pass valve, a governor connected to the fuel control shaft, and an adjustable stop coacting with the fuel control shaft to provide an adjustably fixed maximum fuel limit to the fuel increasing movement of the fuel control shaft.

1,622,700. CURTAIN-ROD BRACKET. JAMES H. BOYE, Chicago, Ill., assignor to James H. Boye Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed June 5, 1926. Serial No. 113,846. 5 Claims. (Cl. 156—22.)

1. A supporting bracket for a plurality of curtain rods, comprising a plurality of bracket arms hinged to each other to swing in a vertical plane and provided respectively with rod-engaging seats at their forward ends disposed one in front of another in the lowered position of said arms.

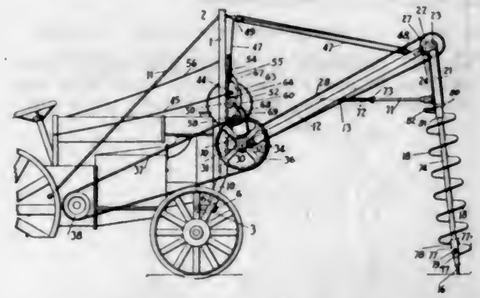


1,622,701. MIXING DEVICE FOR INTERNAL-COMBUSTION ENGINES. FRANCIS A. BREWER, Eastwood, N. Y. Filed Jan. 3, 1925. Serial No. 399. 2 Claims. (Cl. 123—25.)

1. A moisture and air mixing device for internal combustion engines, comprising a horizontally extending valve-case having a lengthwise mixing chamber provided with co-axial end ports and an intermediate restricted air inlet constantly open to the atmosphere, means for connecting one of said ports to a source of moisture supply, means for connecting the other port to the fuel intake manifold of the engine for producing suction in the mixing chamber, a valve extending lengthwise of and within the mixing chamber co-axial with said ports and controlling the moisture inlet port independently of the suction port and air inlet, said valve being adapted to be opened by suction toward the suction port, and a spring for closing said valve when the suction ceases.

1,622,702. COMBINED FOLDING BED AND COUCH. WILLIAM W. BROWN, Arkansas City, Kans. Filed May 10, 1924. Serial No. 712,331. 2 Claims. (Cl. 5—167.)

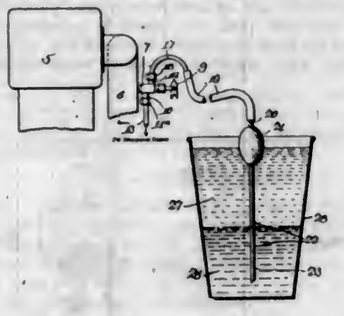
1. In a folding bed and couch, a vertical cabinet, bars pivotally connected at the top of said cabinet, channels in the side walls of said cabinet, a leaf spring positioned in said channels, a bed frame supported by said bars and pivotally connected thereto a spaced distance from the end of said frame adjacent to said cabinet, a counter balance spring, said spring attached to the base of said cabinet and to the end of said bed frame, rollers on the end of said bed frame slidably engaging in said slots and adapted to rest on the end of said leaf springs functioning as resisting means for said counter balance spring



when said frame is transversely positioned to said cabinet, means operable from the foot of the bed for disengaging said leaf springs from said rollers prior to folding the bed in the cabinet.

1,622,703. DEPHLEGMATOR. JULIAN A. CAMPBELL, Long Beach, Calif. Filed July 30, 1925. Serial No. 46,972. 2 Claims. (Cl. 257—29.)

1. In a dephlegmator, a relatively long and shallow pan having a central partition extending from one end to a point somewhat short of its other end, headers in the first mentioned end of the pan at opposite sides of the partition, a plurality of circulation pipes extending from one header the length of the pan, crossing the end of the pan to the other header, the pan being arranged horizontally and the pipes extending horizontally from one header to the other, means to introduce vapors to one header, means to remove vapors and condensate from the other header, and means to introduce cooling liquid to the path at a point near the second mentioned header to flow toward the other end of the pan on one side of the partition and then back toward the first mentioned end of the pan on the opposite side of the partition, and a separator embodying a vertical tubular shell with a tangential opening near its upper end communicating with the second mentioned header, and a gas and vapor outlet at the center of the shell, said gas and vapor outlet embodying a central slotted pipe with a surrounding screen wall composed of a plurality of layers of screen.



1,622,704. POSTHOLE DIGGER. OTTO COIL, Fayette County, Ohio. Filed Mar. 7, 1925. Serial No. 13,679. 17 Claims. (Cl. 255—19.)

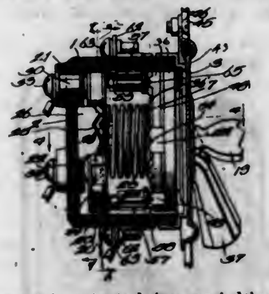
4. In a mechanism of the character described, an upright frame, a boom pivotally mounted on a fixed axle on said frame, an auger carried by said boom, means supported by said boom for rotating said auger, hoisting mechanism for said boom mounted on said frame, means for rigidly mounting said frame on a motor vehicle, and detachable means for operatively connecting said rotating means and said hoisting mechanism with the motor of said vehicle.

1,622,705. DECARBONIZER. WILLIAM DAVIS, Chicago, Ill. Filed Feb. 23, 1926. Serial No. 89,927. 4 Claims. (Cl. 123—198.)

1. A decarbonizer comprising a casing having communication with the intake manifold of a motor and the vacuum tank of an automobile, a controlling valve for said casing, a conduit connected at one of its ends to said casing, the other end of said conduit being orificed and supplied with a plurality of openings in the wall of the

conduit spaced apart from said end, one of said openings being of larger size than the others, and a container to receive said latter end of said conduit.

1,622,706. COMBINED LIGHTING AND IGNITION SWITCH. HARRY A. DOUGLAS, Bronson, Mich. Filed Jan. 27, 1926. Serial No. 84,093. 12 Claims. (Cl. 200—44.)

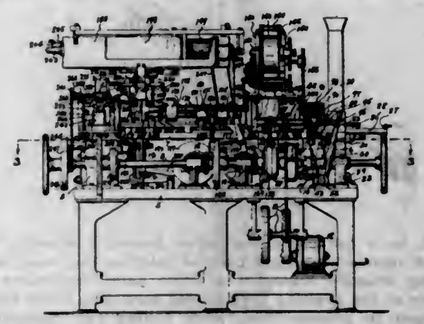


1. In a switch, the combination with a casing; of a rotatable handle upon the exterior of the casing and formed with a lock opening through its hub portion; a lock having a rotatable member; two floating contact carriers within the casing, one operable by the handle and the other by said rotatable lock member; contacts upon said carriers; contacts complemental to the aforesaid contacts; cam members upon said contact carriers; cam members upon and within the casing and complemental to the aforesaid cam members; and a spring interposed between the first aforesaid cam members to yieldingly maintain them respectively in engagement with the other cam members.

1,622,707. COMBINED LIGHTING AND IGNITION SWITCH. HARRY A. DOUGLAS, Bronson, Mich. Filed Jan. 27, 1926. Serial No. 84,094. 12 Claims. (Cl. 200—44.)

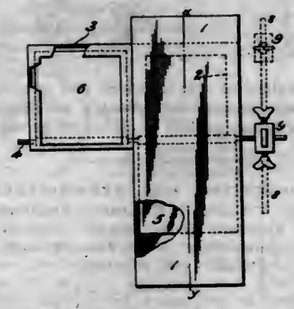
1. A switch structure including a casing; two contact actuators within the casing; a handle upon the exterior of the casing and mounted to turn, said handle having a connection joining it with one of said actuators and passing through an opening formed in an end wall of the casing and having its hub portion formed with a lock

opening; a lock in line with said lock opening and having a rotatable member in turning connection with the other contact actuator; contacts upon said actuators; and contacts complemental to the aforesaid contacts, some of



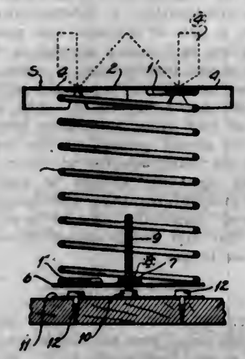
said complemental contacts being carried by the side wall of the casing and projecting laterally of the casing into the circle of rotation of the contacts to which they pertain and being spring pressed longitudinally of the casing.

1,622,708. BRANCH CONNECTER. REUBEN ECKSTEIN, New York, N. Y. Filed Apr. 9, 1921. Serial No. 460,086. 1 Claim. (Cl. 173—338.)



A branch connecter, comprising a block of insulating material provided with a pair of channels each extending throughout the entire length of the block, said block being further provided with a branching channel extending laterally from each of said first mentioned channels, so that each of said first mentioned channels and the branching channel extending from it form collectively a substantially T-shaped channel, said block of insulating material being further provided with a pair of edge portions extending in opposite directions and each overhanging one of said T-shaped channels, a substantially T-shaped clip mounted in each of said T-shaped channels, and a pair of plates of insulating material connected with said block of insulating material and covering said T-shaped channel, said plates extending out substantially flush with the outer edges of said extending portions of said block.

1,622,709. CARTONING MACHINE. HARRY L. EVANS and GEORGE I. HOHL, Newport, R. I. Filed July 10, 1924. Serial No. 725,177. 14 Claims. (Cl. 93—6.)

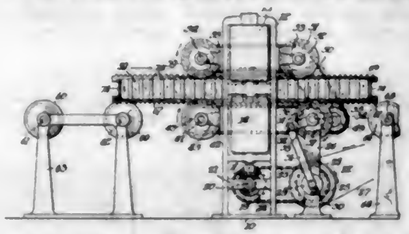


1. In a machine of the kind described, a slideway in horizontal plane, means to supply collapsed cartons at one end of said slideway, means to square said collapsed cartons and means to close one end thereof, means to intermittently and progressively move the thus set-up cartons flatwise on said slideway, and means at one side of said slideway to pre-form linings and insert the same within said cartons while supported on said slideway.

1,622,710. AUTOMATIC DAMPER. HARRY L. FETTERLY, Philadelphia, Pa. Filed Dec. 26, 1923. Serial No. 682,632. 12 Claims. (Cl. 236—45.)

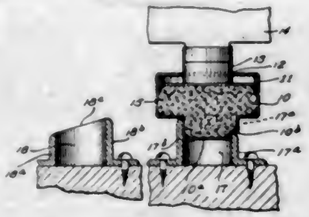
1. The combination consisting of a smoke pipe having an air check inlet; a valve support; a valve secured to the valve support and adapted to the air check inlet; and another valve secured near one of its edges to the valve support and adapted to the smoke pipe between the air check inlet and the furnace.

1,622,711. SPRING. JOHN WALTER FRYER, St. Louis, Mo. Filed Apr. 3, 1926. Serial No. 99,564. 1 Claim. (Cl. 5—258.)



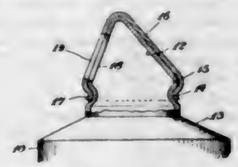
A resilient member comprising a base plate, a stem projecting upwardly therefrom, a disc mounted on said stem and rotatable to effect a vertical movement of the disc with relation to said base plate, a coiled spring secured to said disc, a plate secured to the upper turn of said spring and lying substantially within a circle defining said spring, and triangular corner plates hinged to the sides of the last mentioned plate, the hypotenuse of each corner plate coinciding with the side of the plate to which it is secured.

1,622,712. HARNESS FOR HANDLING MATTRESSES. JOHN F. GAIL, Evanston, Ill., assignor to Simmons Company, Kenosha, Wis., a Corporation of Delaware. Filed Dec. 26, 1922. Serial No. 608,995. 12 Claims. (Cl. 112—3.)



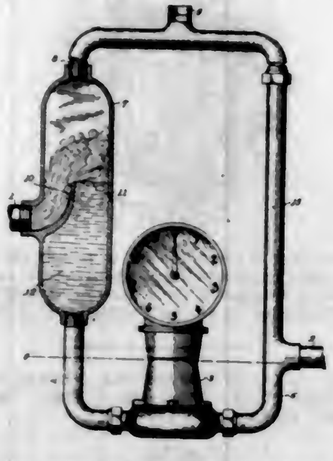
1. For mattress making, the combination of stitching mechanism, a mattress harness comprising confining members respectively located at the top and bottom of the

mattress and adjacent opposite edges thereof and means for connecting the members at each edge to confine the mattress therebetween, spacing means for maintaining



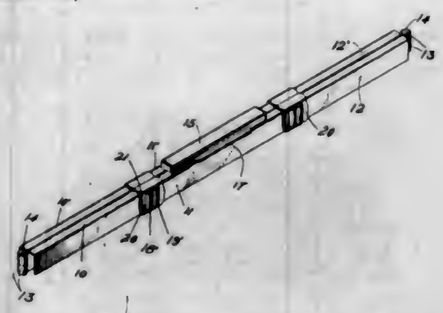
the spaced relation of said members, and means co-operating with said harness for effecting advancing movement of the mattress relative to the stitching mechanism.

1,622,713. MOUNTING FOR TYPEWRITERS AND THE LIKE. WILLIAM F. GILLESPIE, Stamford, Conn., assignor to Stamford Rubber Supply Company, a Corporation of Connecticut. Filed Jan. 24, 1925. Serial No. 4,447. 2 Claims. (Cl. 45—137.)



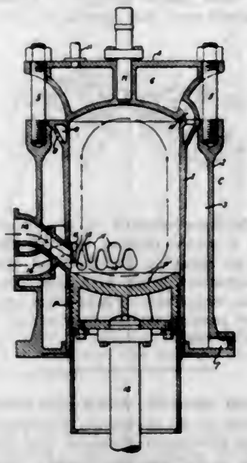
1. A device for supporting a typewriter or the like comprising, in combination, a substantially cup-shaped casing member, a pad of resilient and porous material substantially filling said casing member, a tightly fitting cover for said casing member, and a solid and substantially rigid plate member resting freely within said casing between the upper surface of said pad and the inner surface of said cover, said cover having an opening of a size to permit passage of the typewriter leg, the typewriter leg being adapted to enter said opening and rest freely upon the surface of said plate, said plate being of greater area than said opening and closing said opening upder the upward urge of said resilient pad so that said pad is completely enclosed when the device is not in use.

1,622,714. DISPENSING TOP FOR CONTAINERS. SIGMUND GREENFIELD, now by judicial change of name Edward S. Grandt, New York, N. Y. Filed Sept. 11, 1925. Serial No. 55,657. 5 Claims. (Cl. 221—60.)



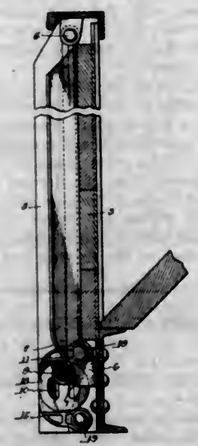
1. In a dispensing closure member for collapsible tube containers, an outwardly converging nozzle member having an elongated port in a side wall thereof, a cap member rotatably mounted in enclosing relation to the nozzle member and having a port arranged to be placed in registration with the port in the nozzle member, said nozzle member and said cap member being unsymmetrically formed whereby relative rotation of the parts to a non-discharging position will produce a sealing effect.

1,622,715. LIQUID-MEASURING APPARATUS. JOHN J. HAWXHURST, Brooklyn, N. Y., assignor of one-fourth to M. Jay Sage, one-fourth to Frederick W. Lang, Brooklyn, N. Y., and one-fourth to George W. Stedwell, New York, N. Y. Filed May 11, 1926. Serial No. 108,242. 2 Claims. (Cl. 137—78.)



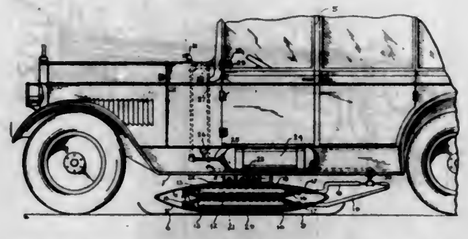
1. In liquid measuring apparatus, an enlarged settling and de-airing chamber having a liquid inlet in one side, an air vent in the top and a liquid outlet in the bottom of the same, a liquid meter connected with said outlet and a non-siphoning discharge connection from said meter, the connections from the settling chamber and the outlet from the meter being formed as the arms of an upwardly extending loop for retaining a liquid seal at both sides of the meter, the liquid entrance in the settling chamber being disposed at a level above the level of the discharge outlet from the meter and arranged to enable the fluid entering the same to flow upwardly and to then settle back and form a relatively deep well of solid liquid providing a head for operating the meter.

1,622,716. COLLAPSIBLE BAG FRAME. WILLIAM C. HEBBING, Newark, N. J., assignor to J. E. Mergott Co., Newark, N. J., a Corporation of Delaware. Filed Jan. 22, 1926. Serial No. 82,943. 2 Claims. (Cl. 150—45.)



1. In a collapsible bag frame having a plurality of bars arranged in opposed paired relation, the outer bars being hingedly connected at their outer extremities, a plate at the abutting ends of said bars, said plates being shaped to produce three slots having two connecting ribs therebetween, and curled extensions on each of the abutting ends of said bars to pivotally encircle appropriate ribs in the adjacent plates.

1,622,717. TWO-CYCLE INTERNAL-COMBUSTION ENGINE. REINHARD HILDEBRAND, Webster Groves, Mo. Filed May 25, 1925. Serial No. 32,586. 1 Claim. (Cl. 123—65.)

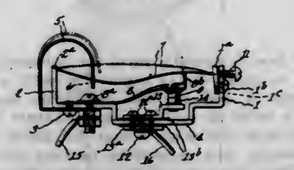


A two-cycle internal combustion engine of the loop scavenging type comprising a cylinder, a piston adapted to reciprocate within said cylinder, said cylinder having a plurality of exhaust ports arranged in a row, and a plurality of inlet ports arranged in a row through which scavenging air is passed into said cylinder, said rows of ports being so arranged that said exhaust ports and said inlet ports overlap each other, thereby providing a double row of ports on one side of said cylinder in which said exhaust ports and said inlet ports alternate with each other, and said double row of ports being arranged circumferentially of said cylinder and being extended over a portion only of the circumference of said cylinder, the side of the cylinder wall opposite said double row of ports being closed to provide the scavenging loops.

1,622,718. LATCHING DEVICE FOR CAR DOORS. DAVID HINDAHL, Chicago, Ill., assignor to Rodger Ballast Car Company, Chicago, Ill., a Corporation of Maine. Filed Aug. 6, 1926. Serial No. 127,541. 5 Claims. (Cl. 105—308.)

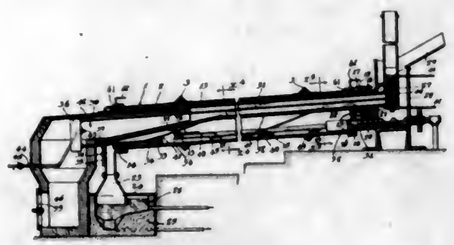
1. In combination with a door, a shaft mounted to slide laterally, a locking bearing on the door receiving the shaft in its sliding movement, and means for developing, at will, said sliding movements in said shaft, comprising a rotatable eccentric mounted on said shaft and means confining said eccentric in the direction of said sliding movement.

1,622,719. AUTOBOGGAN. LEO HOFMEISTER, Milwaukee, Wis. Filed Feb. 19, 1926. Serial No. 89,371. 4 Claims. (Cl. 280—9.)



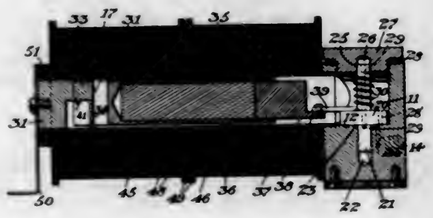
1. In combination with a vehicle, a yielding toboggan member mounted under the vehicle body, compressed air means for moving said toboggan member to operative position, and spring means for returning the toboggan member to inoperative position.

1,622,720. METHOD OF PRODUCING FUR PELTS. LEO HOFMEISTER, Milwaukee, Wis. Filed Mar. 1, 1926. Serial No. 91,549. 4 Claims. (Cl. 149—28.)



1. The method of producing fur pelts which consists of binding together under normal temperatures a mass of fur on a living animal, then removing the mass from the animal close to its skin, and then securing the fur to a suitable backing.

1,622,721. ELECTRIC THERMOSTATIC SWITCH. ARLEY U. HOOK, New Washington, Ohio. Filed Dec. 7, 1925. Serial No. 73,833. 2 Claims. (Cl. 200—139.)



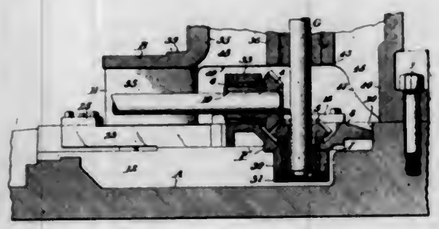
1. A thermostatic electric switch comprising a frame, a spring secured to the frame and carrying a movable contact member and tending to open the same, another contact member secured to the frame, another spring the ends of which are secured to the frame, an expansible thermostatic element secured to the frame and having a slot in one end through which the second-mentioned spring extends, the second-mentioned spring being supported independently of the first-mentioned spring and normally pressing against the first-mentioned spring in opposition to its opening tendency, to hold the contact members together, the thermostatic element being adapted to expand and effect a release of said pressure, whereby the movable contact member is moved by the first-mentioned spring to open position.

1,622,722. PROCESS OF AND APPARATUS FOR DISTILLING BITUMINIFEROUS MATERIAL. JAY J. JAKOWSKY, Los Angeles, Calif. Filed Aug. 12, 1920. Serial No. 403,097. Renewed Jan. 11, 1926. 12 Claims. (Cl. 202—15.)

3. In the process of distilling solid bituminiferous material, the steps of progressively heating only the upper surface portions of a mass of the material by direct radiation to the required temperatures while said mass is moving, stirring the material to bring other portions of it to the surface, and drawing the resulting hydrocarbon vapors from the material and upwardly from the surface portions thereof.

1,622,723. VALVE. PHILIP M. JOHNSON, Newton, Mass., assignor, by mesne assignments, to National Refrigerating Company, New Haven, Conn., a Corporation of Massachusetts. Filed Sept. 3, 1924. Serial No. 735,551. 1 Claim. (Cl. 137—139.)

A liquid flow controlling valve for automatic operation comprising a closed casing connecting with a valve seat and outports at one end and having an inport at its other end, a valve on said seat, an armature in said casing spaced from the wall thereof for liquid flow therethrough thereby, link connection between said armature and said valve, means in said casing for limiting the extreme positions of said armature therein to corresponding registry of said valve with two of said outports, electromagnetic coils about said casing adapted, when severally energized, to move said armature to its respective limiting positions, and adapted when jointly and equally energized to move and hold said valve into outport closing position.

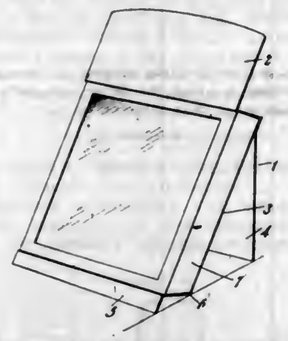


1,622,724. PINCE-NEZ AND SPECTACLES. PERCY KIRK and SIDNEY MORTIMER KIRK, London, England. Filed Feb. 5, 1926, Serial No. 86,110, and in Great Britain Mar. 12, 1925. 1 Claim. (Cl. 88—42.)

A device of the character described, comprising in combination, a pair of lenses, metal fittings therefor, an elongated metal plate carried by each fitting and offset therefrom at that end thereof which is to be connected to another member, said member having an opening therethrough and a pair of depressions of less depth than the thickness of the member and disposed in alinement with said opening, said plate having a threaded opening adapted to register with the opening in said member and

a pair of projections adapted to be seated in said depressions, and a screw passing through the opening in said member and engaging the threaded opening in said plate, the organization being such that when the device is assembled the major axis of said plate extends at right angles to a line passing transversely across the lenses at the center line thereof.

1,622,725. ARM MOUNT WITH ACCESSIBLE GEAR UNIT. DAVID C. KLAUSMEYER, Cincinnati, Ohio, assignor to the Cincinnati Bickford Tool Company, Cincinnati, Ohio, a Corporation of Ohio. Filed June 27, 1921. Serial No. 480,653. 31 Claims. (Cl. 77—28.)



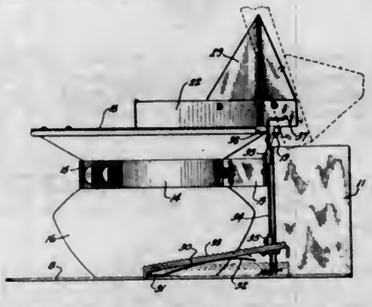
1. A radial drill combining a base; an arm extending horizontally therewith; an upright post carried by said base and arranged to support one end of said arm, said post being formed of nested tubular portions integrally connected by radial vanes, certain of said vanes having their lowermost ends flat and radiating inwardly flush with the lowermost end of the outer tubular portion; and means for effecting a relative adjustment between said arm and said base.

24. A radial drill combining a horizontally disposed base formed with a recess; an upright column secured to said base; a driven shaft journaled lengthwise within said column; a driving shaft arranged transverse to the driven shaft; mating gears rotatable with said two shafts to transmit power from the driving shaft to the driven shaft; a minor frame removably secured to said base and located mainly within the recess therein; and bearings carried by said minor frame rotatably to support said gears independent of the driving and driven shafts.

1,622,726. DISPLAY HOLDER. PHILIP JOHN KNORPP, Brooklyn, N. Y., assignor to N. D. Q. Specialty Corporation, Brooklyn, N. Y., a Corporation of New York. Filed July 29, 1925. Serial No. 46,741. 1 Claim. (Cl. 211—24.)

A display holder having top and bottom portions and a body portion, said body portion adapted to hold in frictional engagement a container, top and bottom sides to said body portion, said top and bottom sides extending the thickness of the top and bottom portions beyond

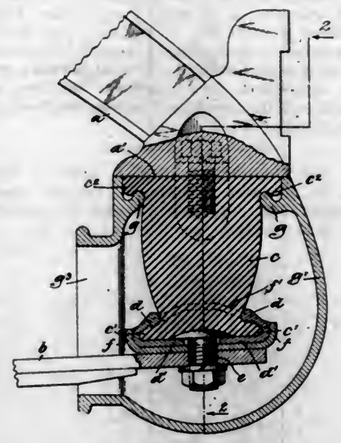
said container to permit of stacking and to protect the container in shipment, and a flat support secured to said body portion to support the display holder at an angle



to the vertical, said flat support adapted to be bent back to rest flat on the back of the body portion to permit of stacking and shipment.

1,622,727. VEHICULAR LEAF SPRING. ALBERT PAUL KOEBCKE, Mount Violet, Victoria, Australia. Filed Mar. 9, 1926. Serial No. 93,890. 7 Claims. (Cl. 267—47.)

1. A vehicular leaf spring attachment consisting of, in combination, a saddle to be mounted on the spring, a stirrup bar pivoted to the saddle, and extending along the spring outwards over steps formed by spring leaves, the bar foot bearing on the spring; and, fixed to the said bar, a stirrup which embraces the spring, but allows the latter to slide through it when the spring curvature changes.



1,622,728. RECEPTACLE. EMIL KORSETZ, Milwaukee, Wis. Filed Sept. 11, 1926. Serial No. 134,897. 12 Claims. (Cl. 4—272.)

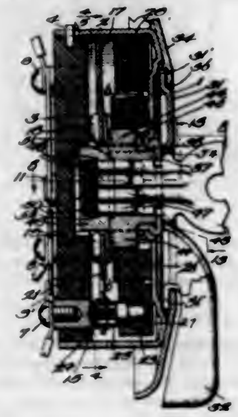
1. A receptacle, comprising a main container, a lid hinged thereto, and an auxiliary container to receive deposits from the lid when the same is raised.

1,622,729. CUSHION CONNECTION FOR VEHICLE CONSTRUCTION. AUGUST H. LEIPERT, College Point, N. Y., assignor to International Motor Company, New York, N. Y., a Corporation of Delaware. Filed May 17, 1926. Serial No. 109,480. 3 Claims. (Cl. 267—30.)

1. In a cushion connection of the character described, in combination with two metallic parts, a single column of yielding non-metallic material positively connecting the parts and supporting the load of one directly on the

other, means carried with the respective parts positively clamping spaced portions of the yielding non-metallic material thereto, and a housing for the connection.

1,622,730. COMBINED SIGNALING AND ADVERTISING DEVICE. ELOF H. MEDÉN, Short Hills, N. J., assignor to American Gasaccumulator Company, Elizabeth, N. J., a Corporation of New Jersey. Filed Sept. 12, 1921. Serial No. 500,022. 1 Claim. (Cl. 40—133.)

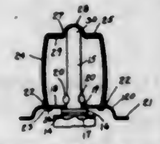


A combined highway signaling and advertising device, comprising oppositely disposed walls which are spaced from each other and which face in the direction of the length of the highway on or adjacent to which the said device is located, one at least of the said walls being opaque and provided with openings therethrough to indicate any information desired to be conveyed and the other one of which is adapted to indicate information of different character which it is desired to convey, an inclosing wall interposed between the said first named walls, the outer surface of which faces in directions transversely of the length of the said highway, and the said inclosing wall being provided with an opening therethrough which is closed by a plate through which light is adapted to be transmitted, the said plate having thereon information conveying media, and means for illuminating the space within the said walls.

1,622,731. PROCESS FOR PRODUCING AQUEOUS SOLUTIONS OF FREE CYANAMID. ANTHONY MOULTRIE MUCKENFUSS, Woodbridge, N. J., assignor to The Roessler & Hasslacher Chemical Co., New York, N. Y., a Corporation of New York. Filed Aug. 14, 1924. Serial No. 731,985. 7 Claims. (Cl. 23—190.)

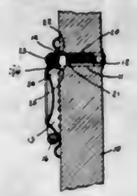
1. The process of producing a solution of cyanamid consisting in treating a solution of metal cyanamid with sulphurous acid under such conditions that the liquid remains substantially neutral in reaction and metal sulphite is precipitated.

1,622,732. LOCKING MECHANISM. JOHN H. NELSON, Chicago, Ill., assignor to Harry A. Douglas, Bronson, Mich. Filed Nov. 9, 1925. Serial No. 67,857. 8 Claims. (Cl. 70—47.)



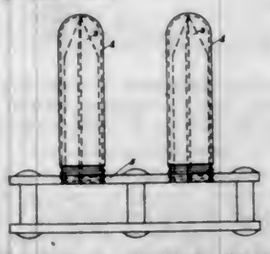
1. The combination with a casing having an opening formed through an end wall thereof; of a hollow lock member fixed upon said casing end wall and in register with said opening, this lock member projecting into the interior of the casing; a pin carrier within the casing and secured to the inner end of said lock member; a pin upon said pin carrier and spring pressed toward said casing end wall; a key operated lock member disposed to turn in said hollow lock member and located between said pin carrier and said casing end wall; a key operated tumbler in said key operated lock member and adapted to be located in and out of register with the aforesaid pin upon turning said key operated lock member, the aforesaid pin projecting into the space occupied by said tumbler when the tumbler is in register with the pin and in the absence of the key, said tumbler being key operated to position said pin and tumbler each within the part carrying the same to permit the key to turn the key operated lock member; a handle mounted to turn upon the exterior of the casing, said key operated lock member being in line with the axis of the handle, the handle being formed to permit passage of the key; and mechanism within the casing having one member coupled, within the casing, with the key operated lock member and another member coupled with the handle.

1,622,733. NOZZLE. LEWEN R. NELSON, Peoria, Ill. Filed June 9, 1924, Serial No. 718,722. Renewed Feb. 10, 1927. 3 Claims. (Cl. 299—152.)



1. In a hose nozzle, in combination with a tubular fitting threaded at one end to receive into it a hose connection, and recessed to create an inner end wall, a structure including a tubular part inserted in the fitting adapted for a relative movement therein in use and having a flange at one end to engage said inner end wall of said fitting and extending at its other end from the other end of the fitting, said part being reduced in diameter outside the fitting creating a shoulder substantially flush with the end of the latter, and a member threaded upon the said reduced portion abutting against the said shoulder and said fitting securing the latter and part from relative movement other than a rotary one.

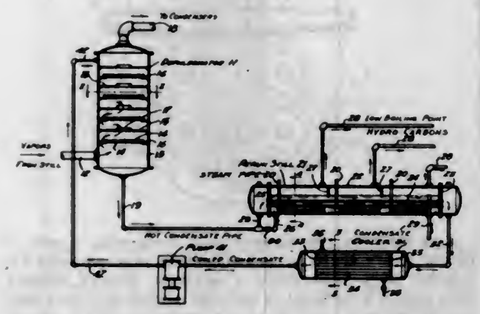
1,622,734. TOP BEARING CASTER. WILLIAM H. NOELTING, EMIL A. SMITHFIELD, and CLARENCE B. NOELTING, Evansville, Ind., assignors to Faultless Caster Company, Evansville, Ind., a Corporation. Filed May 18, 1923. Serial No. 639,753. 4 Claims. (Cl. 16—39.)



1. A caster for tubular legs including a centrally apertured leg supporting plate having a plurality of openings therein provided with a plurality of projections extending downwardly and angularly thereof, a pintle extending through said plate, and a U-shaped inverted resilient standard cooperating with the top and having its ends extending through said openings and angularly thereof for direct and permanent connection to the plate and engageable by said projections for wedging action under load.

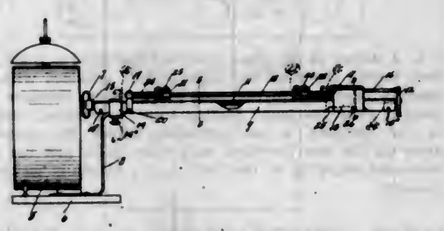
1,622,735. FURNITURE TRIM AND KEEPER. WILLIAM H. NOELTING, Evansville, Ind., and ANDREW I. BROKAW, Cincinnati, Ohio, assignors to Faultless Caster Company, Evansville, Ind., a Corporation. Filed Feb. 2, 1926. Serial No. 85,548. 3 Claims. (Cl. 16—126.)

1. A combination keeper and mounting, comprising a tubular body, an encircling extension connected to one end of the body, the extension axis being substantially transverse to the body axis, and an anchoring end on said extension positionable adjacent said body.



1,622,736. STEAM BOILER. JOHN POMFRET, Sr., Paterson, N. J. Filed Mar. 19, 1926. Serial No. 95,831. 2 Claims. (Cl. 122—305.)

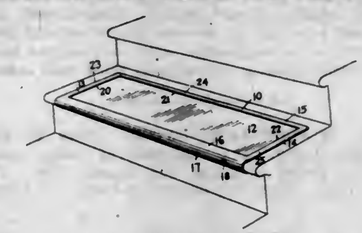
1. In a steam boiler, a cylindrical tube on the heating surface, closed and convex on one end, the other end being open and having a thread cut round its outer edge



and screwed into the boiler plate; having therein a diaphragm comprising three or more equal planes with one edge in common and converging at the closed end, forming three or more chambers in the tube which have separate openings into the boiler and a common sac at the closed end, substantially as described.

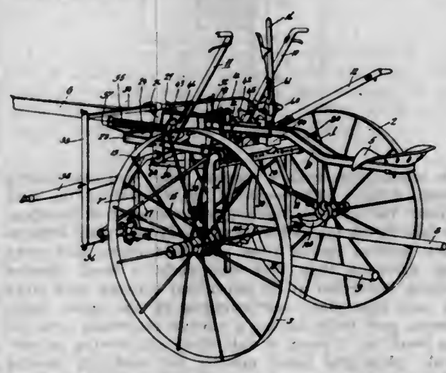
1,622,737. PROCESS OF SEPARATING HYDROCARBON FRACTIONS. DANIEL PYZEL, Piedmont, Calif., assignor to Simplex Refining Company, San Francisco, Calif., a Corporation of California. Filed Aug. 23, 1923. Serial No. 658,910. 6 Claims. (Cl. 196—94.)

1. A process of separating hydrocarbon fractions from a heated mixture of said fractions in a liquid state which comprises: lowering the partial vapor pressure on a portion of said mixture by injecting therein vapor having a different vapor tension; supplying heat to said portion from the remainder of said mixture, said remainder being held under its initial vapor tension; and removing the mixture of vapors produced by said injection and heating.



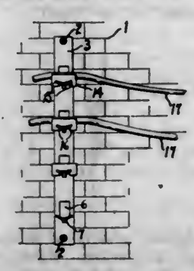
1,622,738. AUTOMATIC FIRE LIGHTER. WALTER RICHARDSON, Bay City, Mich. Filed Mar. 18, 1926. Serial No. 95,655. 5 Claims. (Cl. 44—36.)

1. A match igniting device comprising the combination with an alarm clock, of a supporting member, a shaft journaled therein and having engagement with said clock and adapted to be driven thereby, a friction wheel mounted on the outer end thereof, and a spring tensioned longitudinally adjustable match block slidably mounted on said supporting member.



1,622,739. STAIR PLATE. HARRY ROSENBLUM and MURRAY SCHNEIDER, New York, N. Y. Filed July 10, 1926. Serial No. 121,518. 11 Claims. (Cl. 20—79.)

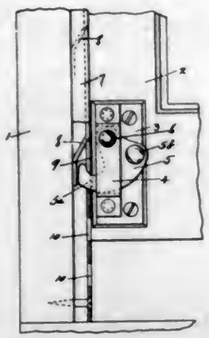
1. In a stair plate, a rectangular sheet of floor covering material, a frame enclosing three of the edges of said sheet and the peripheral portions of the upper and lower surfaces of said sheet adjacent to said edges, a nosing



continuous and integral with the upper surface of said frame, and hidden means for securing said frame to a stair tread.

1,622,740. SEAT-GUIDE CULTIVATOR. JOHN P. SEAHOLM, Moline, Ill., assignor, by mesne assignments, to Moline Implement Company, a Corporation of Illinois. Filed May 22, 1924. Serial No. 715,128. 4 Claims. (Cl. 97—154.)

1. A cultivator having a wheeled frame including an arched axle, drag bars pivoted at their forward ends to move both laterally and vertically on stationary pivots carried by the frame, a drag bar spacing means connected to said frame and to the drag bars so as to permit the latter to move freely in a vertical direction but acting to prevent them from moving laterally, and a lever mechanism mounted on the arched axle and connected to the drag bar spacing means for operating it to move the drag bars to and from one another.

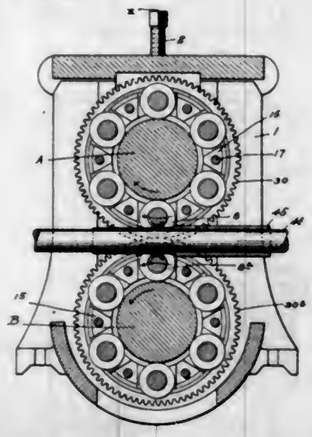


1,622,741. CABLE CARRIER. ADOLPH M. SEEGER, Toledo, Ohio. Filed Sept. 8, 1925. Serial No. 55,068. 1 Claim. (Cl. 248—34.)

A cable supporting bracket having a reduced neck portion and head broader than the neck portion and extending therefrom, in combination with a primary support

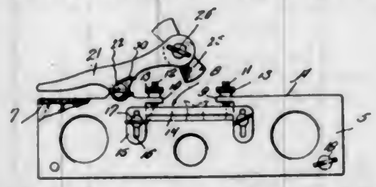
having a rectangular shaped opening corresponding substantially to that of the said neck portion and the diagonal of said opening greater than the width of said head, whereby said head may be inserted therethrough by tilting said bracket on its longitudinal axis, said bracket having a strut tongue engaging said support below said opening.

1,622,742. WINDOW-SASH LATCH. JOHN D. SHIPMAN, San Angelo, Tex., assignor, by mesne assignments, to Emma Shipman, San Angelo, Tex. Filed Nov. 5, 1925. Serial No. 66,997. 1 Claim. (Cl. 292—136.)



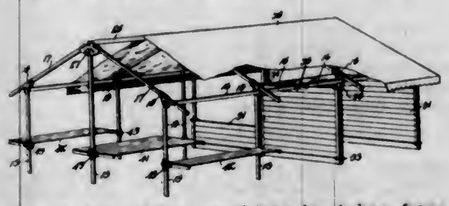
In combination with a window frame and sash sliding therein, a base plate mounted on the side of the sash adjacent the window frame, a strap secured at its opposite ends to the top and bottom of said base plate with its middle portion spaced from said base plate, said strap being narrower than said base plate, a latch member pivotally connected at its upper end between said strap and said base plate and swinging in the space therebetween, said latch having a portion projecting over the base plate not covered by said strap and having an outwardly projecting finger member for manually moving said latch, the opposite edge of said latch having an upwardly projecting hook portion normally swinging toward said window frame, and a rack made of channel iron with struck-in portions attached at their upper ends and bent inwardly to form cam portions to move said hook portion away from the frame as said sash moves upwardly and prevent it from catching, some of said struck in portions being omitted and holes being formed in the outer face of said channel iron, whereby said hook portion will catch by its lower side or by its upper side and prevent said window from moving up or down, as the case may be, substantially as shown and described.

1,622,743. HOOK AND EYE TAPE. DAVID SILBERMAN, New York, N. Y. Filed July 28, 1924. Serial No. 728,645. 1 Claim. (Cl. 2—265.)



Eye tape comprising a strip of integrally woven tape having a single ply at one edge divided into two plies at about its median line, a plurality of spaced eyes secured to one of the latter plies, the operative portions of said eyes extending over the single ply and adapted to have a garment edge inserted between the two plies.

1,622,744. TUBE-FORMING MILL. RALPH C. STIEFEL, Ellwood City, Pa. Filed Apr. 5, 1926. Serial No. 99,777. 4 Claims. (Cl. 80—11.)

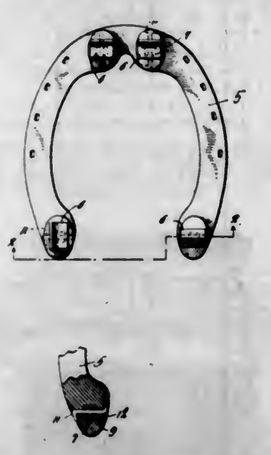


4. A seamless tube-forming mill, comprising a pair of driven rotary shafts, a roll-supporting cage mounted for rotation upon each shaft, a series of grooved forming rolls rotatably mounted in bearings arranged in each cage for movements radially of its contained shaft, means acting through said bearings for holding peripheral portions of said rolls in bearing contact with a cylindrical face of said shaft within the cage, and means for causing the cages to continuously move at uniform angular rates about the axes of their respective supporting shafts.

1,622,745. SWAGE AND RAKER GAUGE. DURWARD DOUGLAS THOMAS, Beckwith, Calif. Filed Apr. 1, 1926. Serial No. 99,015. 4 Claims. (Cl. 76—46.)

1. A device of the class described including a U-shaped body having the sides and bight portion provided with an opening intermediate the ends of the body, brackets extending from the bight portion into the opening, screws in the brackets, a bar extending across the opening, arms on the bar provided with slots, bolts piercing the slots and engaging in the body, and a pivotally mounted hammer.

1,622,746. PORTABLE BUILDING. JOHN C. TRUEMPER, Indianapolis, Ind. Filed Nov. 25, 1924. Serial No. 752,204. 10 Claims. (Cl. 135—3.)

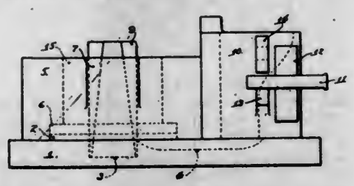


10. A portable building comprising a knock-down framework made up of individually rigid parts of varying sizes, and means for securing the parts together comprising fastening elements having means for frictionally holding each rigid part in fixed relation said means being adapted to be loosened to release all of the individual parts to permit them to be withdrawn, substantially as set forth.

1,622,747. METHOD OF MAKING CLOTH STENCILS. ROGER TULL, Los Angeles, Calif., assignor to Western Lithograph Company, Los Angeles, Calif., a Corporation of California. Filed June 28, 1926. Serial No. 119,040. 10 Claims. (Cl. 101—129.)

1. The method of making stencils consisting in making a negative from the colored original that is to be reproduced, making a plurality of photographic prints on sensitized bolting cloth from said negative, and blocking out on the several prints the portions that are to be impervious to paint and that correspond respectively to the different colors.

1,622,748. HORSESHOE. WILLIAM VAN TASSEL, Redwood, N. Y. Filed Apr. 19, 1926. Serial No. 103,160. 2 Claims. (Cl. 168—40.)



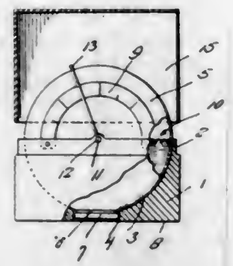
2. In a horseshoe, a horseshoe body provided with a vertical opening and having a transverse opening intersecting said vertical opening and extending transversely of the shoe body, the ends of the said transverse opening terminating in oppositely extending longitudinal grooves in the edges of the shoe body, a calk provided with a tenon adapted to fit within said vertical opening and provided with a transverse opening adapted to aline with the transverse opening of the shoe body, and a cross-pin extending through the transverse openings of the shoe body and calk tenon, the ends of the cross-pin being bent to fit longitudinally in the grooves formed in the edges of the shoe so as to extend flush with the outer shoe edges.

1,622,749. NECKTIE. OTTO WEINSTEIN, Boston, Mass., assignor to Standard Neckwear Company, a Corporation of Massachusetts. Filed July 22, 1926. Serial No. 124,175. 6 Claims. (Cl. 2—146.)

1. A four-in-hand tie comprising, throughout the tying area, a main fabric and a backing fabric only, said fabrics being coextensive and united at the margins of their edges and ends, the strands of the backing fabric extending at an angle to those of the main fabric.

1,622,750. BUSHING MOLD. AUSTIN D. WILLIAMS and FRANK B. GILLETT, Sacramento, Calif. Filed Apr. 12, 1926. Serial No. 101,330. 4 Claims. (Cl. 22—151.)

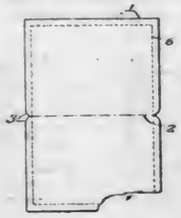
1. A mold comprising a base member having in its upper surfaces a pouring channel; a body member separably supported upon said base member overlying the inner portion of said channel and constituting the outer wall of the mold space; a core member, separably supported upon the base member and constituting the inner wall of the mold space, said mold space at its base communicating with the inner end of the pouring channel of the base member; and a hopper member separably supported upon said base member overlying and in communication with the outer portion of the pouring channel thereof.



1,622,751. WOOD PRESERVATIVE. KARL HEINRICH WOLMAN, Berlin-Grunewald, FRITZ PETERS, Berlin, and HANS PFLUG, Berlin-Steglitz, Germany. Filed Jan. 30, 1926, Serial No. 85,017, and in Germany Jan. 2, 1926. 2 Claims. (Cl. 134—78.6.)

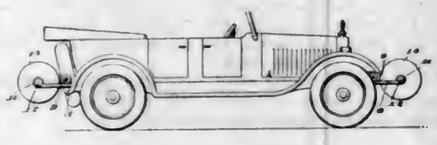
1. A preservative for wood, consisting of an oil of mineral origin and of a complex salt of tartaric acid with arsenic and an organic base dissolved in it.

1,622,752. INCLINATION INDICATOR. GEORGE J. YAKESH, Bloomer, Wis. Filed May 5, 1926. Serial No. 106,894. 1 Claim. (Cl. 33—212.)



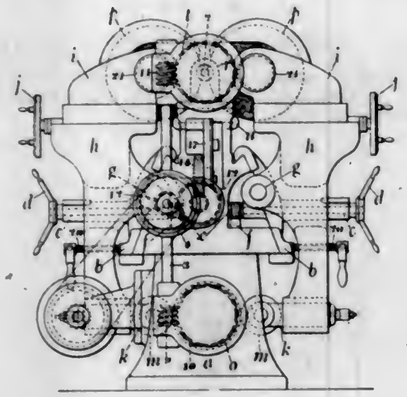
An inclination indicator comprising a body having a flat underside and a rabbeted upper edge and also having a chamber the bottom of which is arcuate and an aperture

in communication with said chamber and formed in the underside of the body, a circular transparent receptacle partially filled with a liquid disposed in said chamber of the body and having a neck pendent in said aperture and also having a neck closure disposed in the aperture



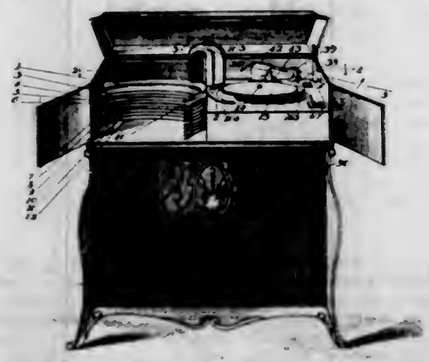
and above the underside of the body, the said receptacle being provided at its opposite sides with arcuate scale graduations, a bail-shaped pointer pivotally connected to the body and straddling the receptacle, and a cover of hollow form adapted to seat in the rabbet of the body and to enclose the receptacle and the pointer.

1,622,753. VERTICAL FILE POCKET. EUGENE F. AHLQUIST, Minneapolis, Minn., assignor to Gaw-O'Hara Envelope Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 14, 1925. Serial No. 75,450. 3 Claims. (Cl. 129—16.7.)



1. A vertical file pocket including a side wall comprising a sheet of material folded upon itself to form a closed top edge, and a bottom and end walls having their margins interposed between the plies of said side wall, said margins and the plies of the side wall being secured together to form a unitary structure.

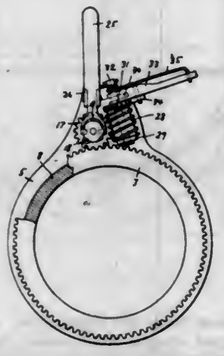
1,622,754. VEHICLE BUMPER. LUCIANO AMATO, South Berkeley, Calif., assignor of one-third to Justice Lloyd Selden, Oakland, Calif., and one-third to John Amato, South Berkeley, Calif. Filed Nov. 30, 1926. Serial No. 151,740. 3 Claims. (Cl. 293—17.)



2. A device of the character described comprising a pair of longitudinally extending bumper bars adapted to be secured to the side frames of a vehicle and extending forwardly and rearwardly at each end thereof, forked heads at each end of the bumper bars and a resilient impact member mounted between the forked ends of said heads.

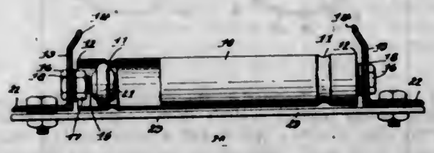
1,622,755. CAM-GRINDING MACHINE. HARRY HALES ABBRIDGE, Ashton-on-Mersey, England. Filed July 27, 1925, Serial No. 46,412, and in Great Britain Aug. 18, 1924. 1 Claim. (Cl. 51—33.)

In a cam grinding machine, in combination, a bed, horizontally traversible slides located at the opposite sides of said bed, with means for traversing said slides, arms each fulcrumed about a pivot on a slide, grinding wheels heads each carried by an arm, and means for traversing said heads upon said arms, a master cam carrying shaft located in the base of the machine, rollers upon said arms bearing upon the master cams, a table longitudinally traversible upon said bed, means upon said table for rotatably supporting the cam shaft, the cams of which are to be ground, grinding wheels upon the grinding heads in vertical alignment with the rollers aforesaid, means imparting longitudinal reciprocating movement to said table, a fixed head upon the machine bed, a drive shaft journalled in said head, means connecting said shaft with the cam-shaft-supporting means for rotating the cam shaft and means for rotating the master cam shaft and the cam shaft being ground in timed relation.



1,622,756. MULTIPLE-RECORD PHONOGRAPH. DANIEL DETRICH BEENKEN, Santa Barbara, Calif. Filed Jan. 29, 1923. Serial No. 615,662. 34 Claims. (Cl. 274—10.)

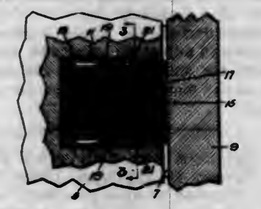
1. A phonograph comprising a turntable adapted to rotate in the raised one of two positions, a clutch associated with the shaft of the turntable, means which both holds the turntable raised and the clutch in engagement so that there may be rotation, a carrier occupying a waiting position beneath the turntable, means setting the



holding means into operation to lower the turntable, deposit a record on the carrier and unclutch the turntable shaft so that rotation stops, and means connected with the foregoing operating means becoming operative after these acts are performed to swing the carrier to one side.

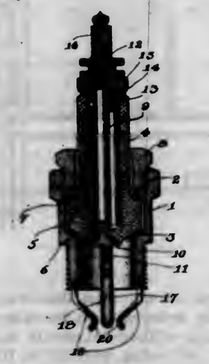
1,622,757. WARP LET-OFF MECHANISM FOR LOOMS. JOHN BERNINI, Allentown, Pa. Filed Sept. 14, 1926. Serial No. 135,335. 6 Claims. (Cl. 139—100.)

6. A mechanism of the class described including, in combination, a gear adapted to be secured to a warp beam, tensioning means associated with said gear for urging it in one direction, an annulus on the gear, a ring about the annulus, a stud projecting from the ring, a pinion meshing with the gear, a lever pivoted on the ring, means for rotating the pinion by oscillations of the lever and spring means associated with the lever for holding it in a predetermined position, a striker bar operable by moving part of a loom for engaging said lever to rock t in one direction.



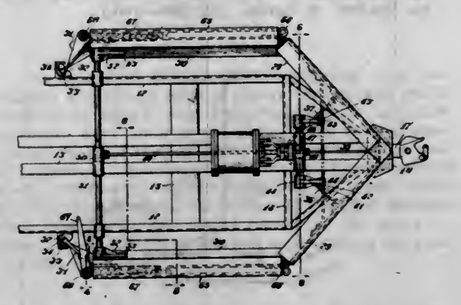
1,622,758. ROLLER FOR GRAVITY CONVEYERS. GORDON W. BEULKE and PETER C. WEGO, St. Paul, Minn., assignors to Standard Conveyor Company, a Corporation of Minnesota. Filed Aug. 6, 1923. Serial No. 655,843. 4 Claims. (Cl. 193—37.)

3. In a conveyer roller, a pair of spaced rails, a tubular body extending transverse said rails between the same, pintles extending axially into said body from said rails, annular flanges on the outer periphery of said body adjacent to said rails, offset guide portions formed on said rails to overhang the flanges on said body, and bearings for said body on said pintles disposed a substantial distance from the ends of said body within the same.



1,622,759. BUFFER. DAVID BOURQUE, Amesbury, Mass., assignor to G. W. J. Murphy Company, Amesbury, Mass., a Corporation of Massachusetts. Filed Oct. 12, 1922. Serial No. 594,018. 12 Claims. (Cl. 16—86.)

1. A buffer of the class described comprising a casing having an open top and an open end and interior teeth at the sides, a resilient block received in the casing and adapted to project from the end thereof and a spring

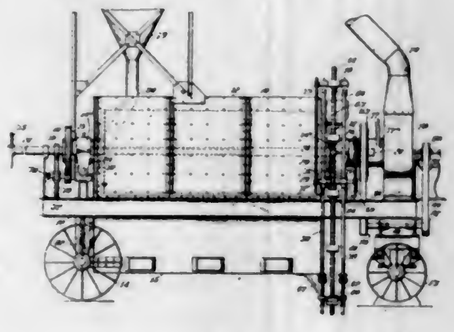


imbedded in the block and having its ends projecting to engage the teeth.

1,622,760. SPARK PLUG. ALBERT BOUBRIEU, Chicago, Ill. Filed Aug. 4, 1923. Serial No. 655,676. 3 Claims. (Cl. 123—169.)

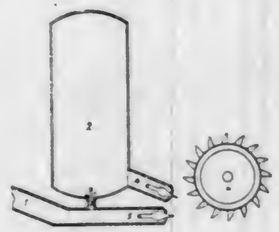
1. A spark plug comprising a shell, a hollow insulator carried thereby, an electrode adapted to extend through said insulator, the interior portion of said insulator being exhausted of air, a mercury filled tube detachably secured to the lower end of said electrode and a pair of grooved positive electrodes adjacent the lower end of said mercury filled tube.

1,622,761. GRADER CAR. ROBERT E. BRESSLER, Aurora, Ill., assignor to Western Wheeled Scraper Company, Aurora, Ill., a Corporation of Illinois. Filed Sept. 10, 1921. Serial No. 499,641. 13 Claims. (Cl. 37—105.)



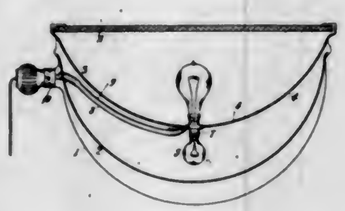
1. The combination with a car, of a vertically-adjustable plow mounted opposite one end thereof, said plow comprising two diagonally-arranged plates, a side wing pivotally connected on a vertical axis with said plow at

the rear end of one of said diagonal plates and adjustable to form an extension of such plate and bodily movable vertically therewith, and means mounted on the car for adjusting said plow vertically.



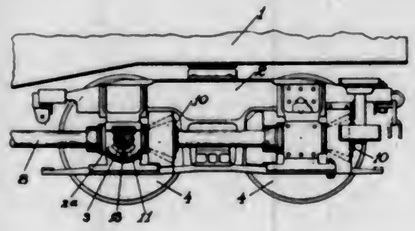
6. The combination with a car, of a plow mounted at one end thereof and adjustable vertically, braces pivotally connected with the side portions of the plow and with the car, and means mounted on the car for adjusting the plow vertically.

1,622,762. MACHINE FOR TREATING EARTHY MATERIAL. ROBERT E. BRESSLER, Aurora, Ill., assignor to Western Wheeled Scraper Company, Aurora, Ill., a Corporation of Illinois. Filed Feb. 5 1923. Serial No. 617,091. 36 Claims. (Cl. 94—42.)



1. In a machine of the class described, the combination of a rotatable drum open at its ends for the receiving and discharging of material, means opposite the said receiving end for delivering material to the drum, a fire-box below the drum, a casing rising from the fire-box and partially surrounding said drum and located at a distance therefrom and having an end wall located at a distance from the discharge end of the drum, baffle plates at opposite sides of the drum extending inwardly from said end wall, whereby the products of combustion will be deflected toward the receiving end of the drum before passing into the said delivery end of the drum, and means communicating with the other or receiving end of the drum for conducting away such products of combustion.

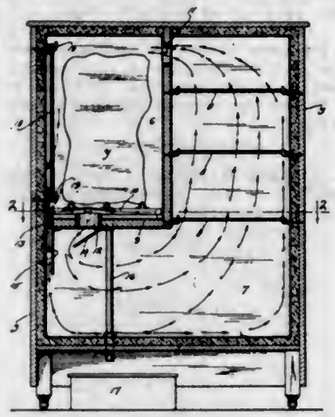
1,622,763. DEVICE USED FOR CONTROLLING THE SPEED OF WATER WHEELS. HUBERT VINTON CARPENTER, Pullman, Wash. Filed Jan. 9, 1922. Serial No. 528,092. 3 Claims. (Cl. 253—140.)



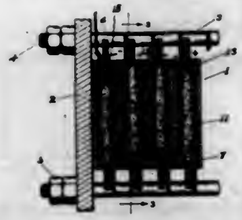
1. A combination, with a water wheel unit of the impulse type, of a storage tank which receives water from the penstock of the unit, a check valve which restricts any flow of water back from the storage tank to the penstock, and an additional nozzle which receives water from the storage tank and delivers it to the wheel; substantially as shown and described.

1,622,764. GLARELESS LAMP. ARNOLD VIVIAN CASSELS, South Brisbane, Queensland, Australia, assignor of three-eighths to James Milne Stewart, South Brisbane, Australia. Filed Aug. 29, 1925, Serial No. 53,414, and in Australia Oct. 6, 1924. 3 Claims. (Cl. 240—41.)

1. In a glareless lamp the combination of a shell, two colored translucent electric light lamps disposed in said shell, a plain reflector also arranged within the shell and coacting with one of said lamps, and a perforated double sides reflector coacting with both of said lamps.



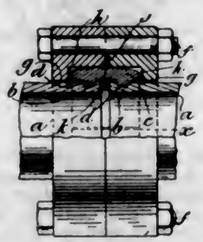
1,622,765. GEARED LOCOMOTIVE. ALBERT CLAYPOOLE, Portland, Oreg., assignor to Willamette Iron & Steel Works, Portland, Oreg., a Corporation of Oregon. Filed May 14, 1925. Serial No. 30,342. 4 Claims. (Cl. 105—117.)



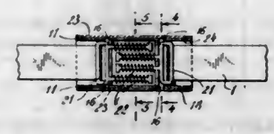
1. In a geared locomotive, the combination of a truck frame having bearing cavities therein; an axle; wheels on the axle; a driven gear locked with the axle; a longitudinal drive shaft; bearings on the frame for the drive shaft; a driving gear on the drive shaft meshing with the driven gear; bearing plates in the cavities resting on the axle and supporting the frame; and means below the axle locking the frame against lifting on the axle through the thrust of the driving gear.

1,622,766. REFRIGERATOR. HARRY S. CLEVELAND, Minneapolis, Minn. Filed July 12, 1926. Serial No. 121,867. 2 Claims. (Cl. 62—51.)

1. A refrigerator comprising a case having therein an ice chamber located above its bottom and at one side of the upper portion of its provision chamber, said ice chamber having in its bottom at least two cold air ports spaced transversely the one being closer to the outer wall of the ice chamber than the other, and deflectors applied to and depending from the bottom of said ice chamber, both deflectors directing the cold air into the same provision chamber of said case, the one directing the cold air downward close to the outer wall of said case and the other directing the cold air toward the outer or first noted deflector.

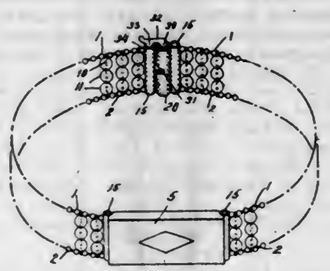


1,622,767. SECONDARY BATTERY. THEODORE S. COLE, New Haven, Conn., assignor to Engineers Development Company, a Partnership composed of Frederick E. Pernot and Carl Kingsley. Filed July 25, 1921. Serial No. 487,456. 7 Claims. (Cl. 136—111.)



1. A secondary battery comprising a plurality of juxtaposed electrically connected self-contained unit cells, insulating diaphragms fixed on and extending outwardly in all directions from the wall of each of said cells, and clamping means for said cells separately engageable with the edges of the diaphragms for releasably securing the cells in their juxtaposed electrically connected relation, and for holding said diaphragms and the cells on which they are fixed against lateral displacement.

1,622,768. PIPE JOINT AND CONNECTION. HENRY DENMAN COOK, Kingsway, London, and GUSTAF HARALD LUNDGREN, Putney, London, England. Filed Oct. 6, 1924. Serial No. 741,984, and in Great Britain June 4, 1924. 5 Claims. (Cl. 285—132.)

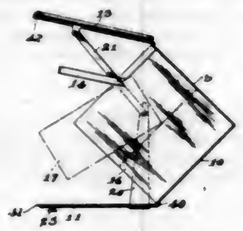


1. A pipe joint comprising a cylindrical housing, a locating ring wholly enclosed by said housing and having an external diameter less than the internal diameter of said housing whereby said ring is freely receivable into said housing, parallel internal annular projections spaced apart along said locating ring and adapted for having free revoluble engagement with annular surfaces of the pipe ends to be jointed, and packing rings confined between ends of the locating ring and annular housing.

1,622,769. BRACELET. EDWARD A. COOMBS, Plainville, Mass., assignor to Whiting Chain Company, a Corporation of Massachusetts. Filed May 7, 1924. Serial No. 711,579. 3 Claims. (Cl. 267—73.)

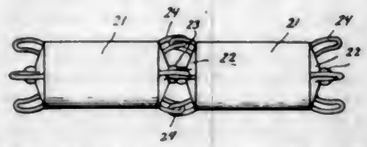
1. For use in combination with an ornamental article of the encircling type, a take-up device comprising a casing, plunger members having portions thereof slidable into said casing and having ends adapted for attachment to the ends of the encircling article, springs within the casing for normally holding the plunger members in retracted position, and a cover member overlying the casing and plunger members adapted to conceal the same even through the plunger members be in their extended position.

1,622,770. BRACELET. EDWARD A. COOMBS, Plainville, Mass., assignor to Whiting Chain Company, a Corporation of Massachusetts. Filed Jan. 21, 1926. Serial No. 82,643. 3 Claims. (Cl. 63—4.)



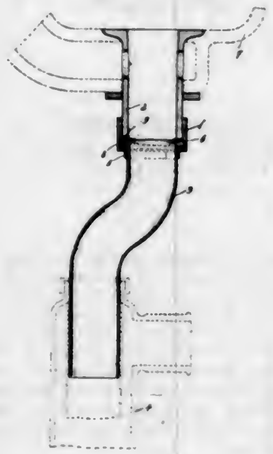
1. An article of jewelry of the encircling type comprising a plurality of pairs of chains, each of said chains consisting of hollow balls connected together by dumb-bell-shaped links, rigid members connecting corresponding alternate links of the respective chains in each pair, said rigid members maintaining said chains in substantially parallel relation throughout their lengths, beads strung upon the rigid members, the beads and the rigid members filling substantially the entire portion of the space between the pairs of chains, and means for holding the pairs of chains together.

1,622,771. SHOW CASE. FRANK DAVIS, Portland, Oreg. Filed Apr. 5, 1924. Serial No. 704,485. 1 Claim. (Cl. 211—25.)



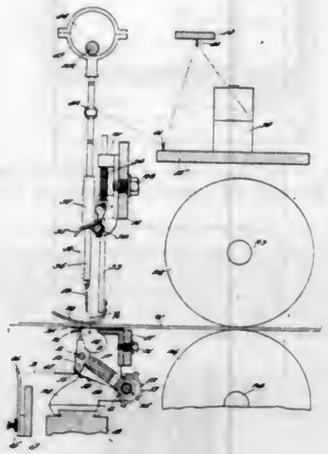
In a show case, having a supporting stand, a plurality of case supporting racks adjustably supported thereby,

a plurality of carton receiving cases detachably secured in said racks, pivoted interconnected tops and shelves attached to each of said cases, a pivoted band attached to



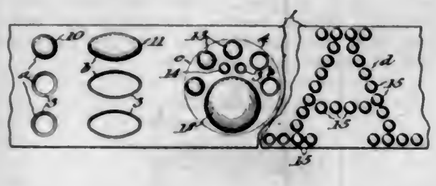
the top of each of said cases and positioned below said main tops or covers, and means for supporting said shelf when in lowered position to limit the movementa thereof.

1,622,772. FLEXIBLE SHAFTING. JOHN T. DUNN, North Attleboro, Mass. Filed June 29, 1926. Serial No. 119,346. 1 Claim. (Cl. 64—30.)



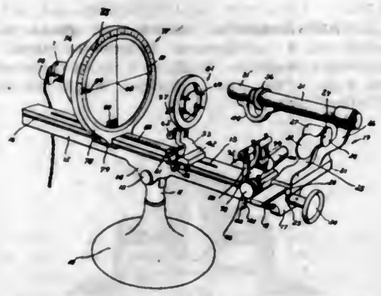
A flexible shafting of the class described including a plurality of sections, each section including a body having outwardly projecting conical-shaped ends, eyes at the apices of said ends, a series of arcuate elongated loops at the base of each end, the loops and the eyes of the sections being interlinked for connecting the sections together.

1,622,773. SCREW-CONNECTION FOR SIPHONS OF WASHBASINS, FOUNTAINS, AND THE LIKE. HANS FAHNENSCHMIDT, Cassel, Germany. Filed June 4, 1925, Serial No. 34,997, and in Germany Sept. 24, 1923. 1 Claim. (Cl. 285—122.)



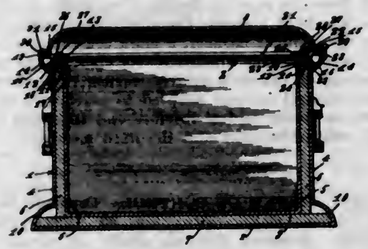
A screw-cap connection for pipes, of which one is to be adjustable relatively to the other, comprising, in combination with the connection-ends of said pipes, a flange pertaining to one of said ends and contacting at its tightening surface with the tightening end surface of the other pipe, and having an oblique bottom surface; a cap-nut screwed upon the end of said other pipe and having its inwardly directed flange located opposite said oblique bottom surface of the first-mentioned flange, and remote therefrom; and an annular member comprising a ring located in the space between the two flanges and having opposite the said oblique surface a corresponding oblique surface, and a tubular extension extending outwardly along the flanged pipe between it and the flange of the said screw-cap.

1,622,774. SEWING MACHINE. LEWIS F. FALES, Walpole, Mass. Filed Mar. 24, 1924. Serial No. 701,249. 4 Claims. (Cl. 112—200.)



1. In a sewing machine, in combination, a needle, means for feeding the work substantially continuously independently of said needle, means for moving said needle toward and from the work to penetrate the latter and in the direction of feed to cause said needle to move with the work while in engagement therewith, a looper cooperating with said needle, and means for moving said looper without reversal in a closed substantially elliptical path surrounding the path of movement of the needle.

1,622,775. ORNAMENTAL BODY. EDWARD J. FINK, Bronx, N. Y. Filed Sept. 12, 1925. Serial No. 56,097. 3 Claims. (Cl. 41—30.)

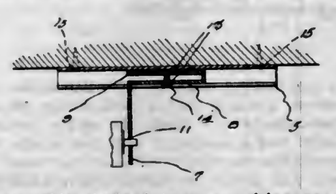


1. An ornamental structure of the character described, comprising a plate having substantially plane surfaces and an opening extending from one plane surface to the other, and a body of vitreous material in said opening, having portions preventing removal of the body in either direction, one end portion presenting a symmetrically rounded surface having the characteristics of a highly polished cabochon surface.

1,622,776. LENS-TESTING INSTRUMENT. LYLE H. FISHER, Kansas City, Mo., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Sept. 13, 1924. Serial No. 737,565. 15 Claims. (Cl. 88—56.)

1. In a device of the character described, a support, a centered target on the support, a member carrying a centering sight and a focusing sight and means for moving said member to align either the centering sight or the focusing sight with the target as described.

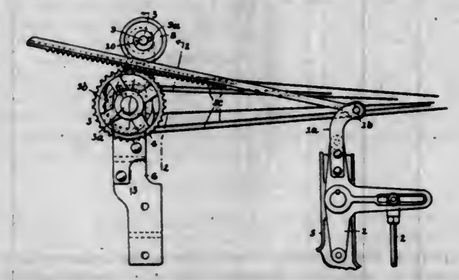
1,622,777. BURIAL CASKET. WILLIAM J. FLEEMAN, St. Joseph, Mo. Filed June 19, 1926. Serial No. 117,083. 5 Claims. (Cl. 27—3.)



1. A burial casket comprising a body portion formed of an outer and an inner section of metallic material and a non-metallic insert interposed throughout between said sections, said inner section provided at its top with an outwardly directed flange seated on the top of said insert and arranged below the top of said outer section, a compressible element mounted on said flange, a transparent inner closure for said body portion hinged at its rear to the top of said outer section, said closure seated on said element, interengaging means anchored against said insert by said flange and further extending through said closure, element and flange for fixedly securing said closure in air tight position, and an outer closure for said body portion.

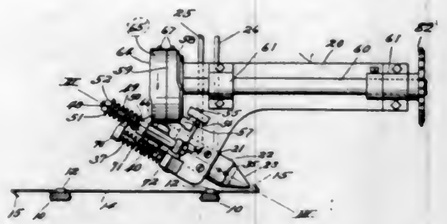
1,622,778. BY-PASS VALVE STRUCTURE. PAUL L. FOWLER, Spokane, Wash., assignor to Arthur-Fowler Co., Spokane, Wash., a Corporation of Washington. Filed Sept. 15, 1925. Serial No. 56,506. 1 Claim. (Cl. 236—93.)

A circulation controlling by-pass valve structure, comprising, a substantially vertically disposed hot water circulation by-pass pipe, a valve interposed in a vertical portion of said pipe, a floating closure for said valve opening downwardly and closing upwardly therein, and a thermostatic strip in said valve having its upper end loosely connected with said closure and its lower end anchored in said pipe, and said thermostatic strip being constructed to lengthwise contract to un-seat said closure downwardly against ascending water when the latter is relatively hot and substantially lengthwise expand to seat said closure upwardly against descending water when the temperature of the latter is relatively cold, thereby preventing hot water from backing downwardly in said pipe.



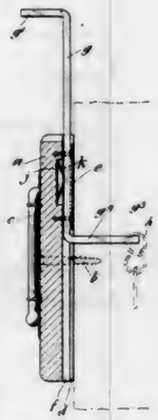
1,622,779. ADJUSTABLE SHADE BRACKET. LOUIS FRASCA, Torrington, Conn. Filed Oct. 29, 1923. Serial No. 671,391. 1 Claim. (Cl. 156—24.)

An adjustable shade fixture comprising an attaching member including a base provided along its upper and lower longitudinal edges with guide channels, an adjustable shade bracket embodying a U-shaped portion slidably positioned in said guide channels, the opposed walls of said U-shaped portion being in equally spaced parallelism from end to end and the outer wall of the same frictionally engaging the outer wall of said channels, the inner walls being spaced from said base plate, both of said walls being provided with alined screw-threaded holes, a laterally and outwardly extending arm carried by the outer wall of the U-shaped member and provided with upper and lower notches for reception of the outer walls of said guide channels, and a screw threaded through said holes for bodily moving the U-shaped portion into binding contact with the outer wall of said channels.



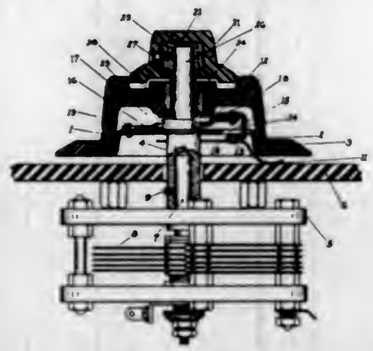
1,622,780. MOTION-TRANSMITTING MECHANISM. GEORGE GOODLINE, Pawtucket, R. I. Filed July 31, 1926. Serial No. 126,136. 2 Claims. (Cl. 74—14.)

1. In combination, supporting means, an oscillatory member journaled therein, means in the supporting means to oscillate said member including a reciprocating mem-



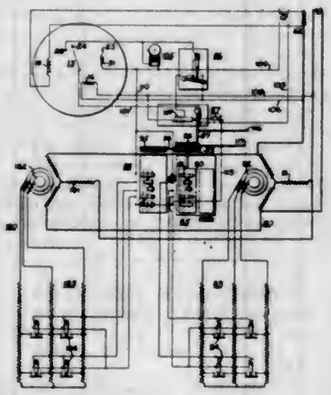
ber in tractive peripheral engagement with the first member, and keeper means to hold the reciprocating member bearing against the oscillatory member rotatively adjustable in said supporting means on an axis substantially parallel with that of the oscillatory member and having an eccentric portion to bear against the reciprocating member at a side thereof opposite to the oscillatory member, and said keeper means being also adjustable lengthwise of its axis of rotary adjustment and its said portion and the reciprocating member being interlocked for adjustment together on adjusting said keeper means lengthwise of its said axis.

1,622,781. SOLDERING FLUX AND CEMENT APPLYING DEVICE FOR CAN-MAKING MACHINES. DEWEY C. HANSEN, Kansas City, Mo. Filed June 9, 1926. Serial No. 114,860. 9 Claims. (Cl. 113—95.)



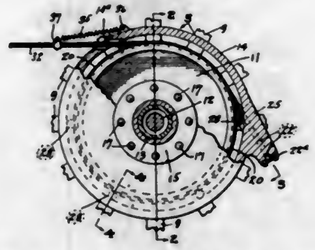
1. In a can making machine, the combination of blank feeding means, a nozzle having its discharge point in the path of one edge of the blank, air supply means and a liquid supply means connected with said nozzle, separate valves controlling the flow of said air and liquid through said nozzle, and means for automatically actuating said valves in timed relation with said blank feeding means for starting and stopping the flow through the nozzle at the opposite sides, respectively, of the blank as the latter passes beneath the discharge point of the nozzle.

1,622,782. DRAFT CONTROL. HORACE W. HEYMAN, Maplewood, N. J. Filed Aug. 31, 1926. Serial No. 132,712. 4 Claims. (Cl. 126—286.)



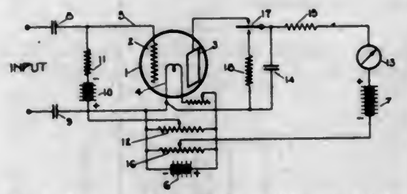
1. In a draft control, a base, means for securing it to a wall, a manually operated slide for controlling the draft regulator of a heating plant, an outwardly projecting arm at the top of the slide for manual operation, an inwardly projecting arm at the bottom of the slide, means to connect the last named arm to the draft control means of a heating plant, a channel in the rear face of the base to receive the slide, and a countersunk plate secured to the rear face to slidably secure the slide to the base.

1,622,783. VERNIER ADJUSTMENT MEANS FOR ELECTRICAL INSTRUMENTS. NICHOLAS HEYMAN, Buffalo, N. Y., assignor to Federal Telephone Manufacturing Corporation, Buffalo, N. Y., a Corporation of New York. Filed Dec. 19, 1924. Serial No. 756,895. 8 Claims. (Cl. 74—7.)



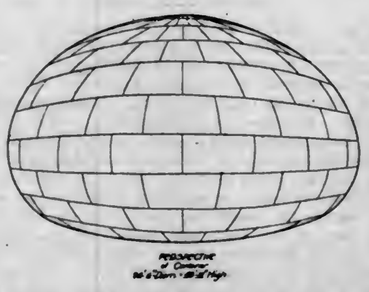
1. In an adjustment control apparatus, a fixed member, a shaft rotatable relative thereto, a resilient member slidable on the fixed member, the shaft being rotatable relative to the resilient member, a main control member fixed to the shaft, a lever pivoted at its ends to the resilient member and to the main control member respectively, and a second control member adapted to coact with the lever to move the main control member and the shaft relative to the resilient member and the fixed member.

1,622,784. SYSTEM OF CONTROL. FREDERIC W. HILD, Los Angeles, Calif. Filed Jan. 25, 1923, Serial No. 614,939. Renewed Dec. 17, 1925. 31 Claims. (Cl. 255—19.)



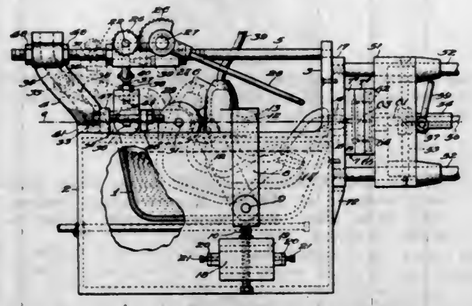
1. In a control system for a variable load, the combination with driving means for said load, of means for maintaining a definite limiting power difference from the changing maximum value of said load in the operation of said driving means.

1,622,785. CABLE BRAKE. WILLIAM FAY HOLLINGSWORTH, San Francisco, Calif., assignor of one-half to John Henry Blair, San Francisco, Calif. Filed June 21, 1926. Serial No. 117,448. 4 Claims. (Cl. 188—77.)



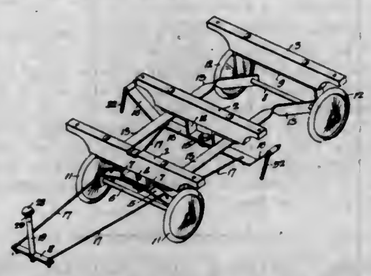
1. A cable brake comprising a brake drum and a cable wrapped more than once around said drum and a retractive spring for each end of the cable tending to pull it towards said drum.

1,622,786. VACUUM-TUBE VOLTMETER. LAWRENCE C. F. HORLE, Newark, N. J., assignor to Federal Telephone Manufacturing Corporation, Buffalo, N. Y., a Corporation of New York. Filed June 27, 1925. Serial No. 40,055. 6 Claims. (Cl. 175—183.)



1. In a vacuum tube voltage measuring system, an anode, a cathode, an output circuit including the cathode and anode, a voltage indicating device associated with said circuit, an impedance of predetermined calibration value adapted to be connected into said circuit in place of the anode and cathode, and means comprising the voltage indicating device and the impedance for redetermining the original calibration conditions of the system.

1,622,787. CONTAINER. GEORGE T. HORTON, Chicago, Ill. Filed Nov. 5, 1925. Serial No. 67,094. 11 Claims. (Cl. 220—1.)



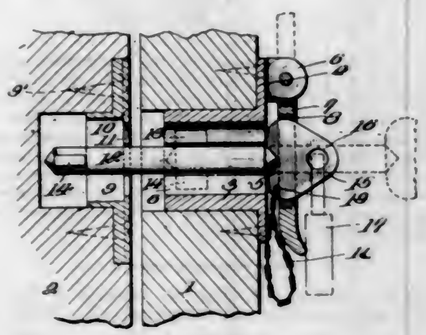
1. A closed container substantially in the shape of a solid of revolution about a vertical axis and having a supported bottom, said container so shaped that when substantially filled with a normal liquid and containing a normal internal or vapor pressure, the radius of curvature at each point on the shell above the supported bottom in a vertical plane, through a line normal to the shell at that point, equals the vertical tension at such point times the square of the radius of curvature in a plane at right angles to the first mentioned plane and also passing through said normal line, divided by the pressure at such point times the square of said second mentioned radius minus said vertical tension times said first mentioned radius.

1,622,788. DIE-CASTING APPARATUS. EDWARD HOTTER, Chicago, Ill. Filed Nov. 24, 1924. Serial No. 751,779. 24 Claims. (Cl. 22—69.)

1. In a die casting apparatus, the combination with a pot and a die having an inlet opening, of a pivotally supported container having a nozzle, and means having a cam action on the container for moving its nozzle end into and out of the inlet opening of the die and for submerging the nozzle end of the container in the molten metal in the pot for charging the container, said means automatically establishing a horizontal line lock for holding the container engaged with the die on the container reaching discharging position.

1,622,789. SLED AND WAGON. EDWARD H. KENNEY and ELIZABETH KENNEY, Philadelphia, Pa. Filed Apr. 14, 1925. Serial No. 23,008. 4 Claims. (Cl. 280—8.)

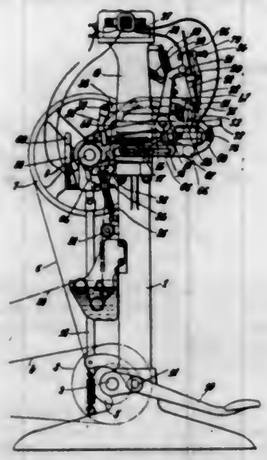
1. An attachment, for a sled provided with a steering element, comprising a wheeled frame adapted to be secured to the under side of the sled body intermediate the runners of the sled, whereby the sled is supported with the runners in an elevated position; a pair of forward wheels and a pair of rear wheels mounted on the frame; and guiding means on said frame and adapted to be attached to the sled steering element for directing the forward wheels of the frame to direct the vehicle.



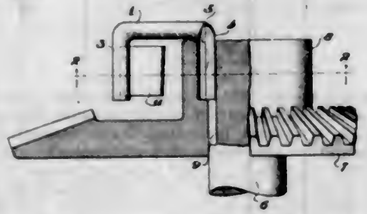
1,622,790. CASH REGISTER. JOSEPH J. KLOSTERMAN, Dayton, Ohio, assignor to The National Cash Register Company, Dayton, Ohio, a Corporation of Maryland. Filed June 14, 1926. Serial No. 115,910. 4 Claims. (Cl. 235—138.)

1. In a transfer mechanism, the combination of a totalizer element, a carrying pawl, a trip pawl, a restor-

ing pawl for the carrying pawl, and means for tripping the trip pawl and the restoring pawl, said trip pawl being adapted to be tripped as the totalizer element reaches its zero position and the restoring pawl being adapted to be tripped prior to the trip pawl.



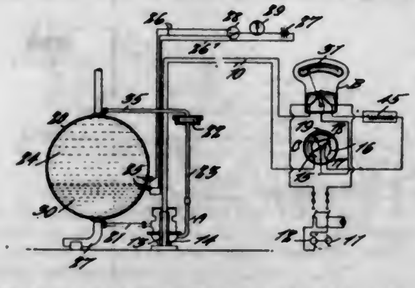
1,622,791. DOOR BOLT. PHILIP LANG, Cedar Falls, Iowa, assignor to Wagner Manufacturing Company, Cedar Falls, Iowa. Filed Sept. 24, 1925. Serial No. 58,369. 8 Claims. (Cl. 292—59.)



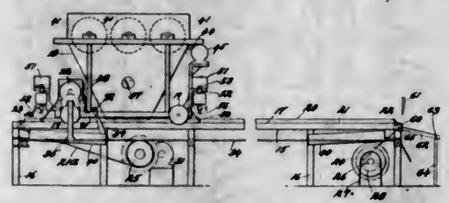
1. A door bolt comprising a tubular body portion having a key slot therethrough, a keeper having a key slot therein, a key having oppositely arranged wings at one end, adapted to pass through the key opening and to be turned so that the wings engage the rear face of the keeper, and a pivoted lever carried by the tubular body portion, and having a slot to allow the flattened head of the key to pass therethrough, and having an opening to receive the hasp of the padlock, whereby the lever prevents the turning of the key.

1,622,792. MACHINE FOR ELECTRIC WELDING, SOLDERING, OR THE LIKE. JACQUES EMILE JULES LANGUEPIN, Paris, France. Filed May 18, 1926, Serial No. 109,967, and in France May 23, 1925. 2 Claims. (Cl. 219—4.)

1. An automatic machine for electric welding, soldering and the like, for joining metal wire and the like to a member of any shape, said machine comprising a shaft rotating at a suitable speed such that one turn corresponds to one complete joining operation, cams on said shaft, a welding electrode, a welding transformer, an electrode holder, a claw on said electrode holder, an adjustable tension spring, a lever adapted to move said electrode holder through the action of said tension spring, said electrode holder claw being adapted to enable use to be made of a long electrode which is moved down as it wears away, said cams controlling the movements of said lever, means for gripping the wire and a cam and a set of levers for advancing the wire, a knife adapted to cut the wire to the desired length, said knife acting under the control of said cams, a switch connected in the primary of said transformer, said cams controlling said switch, a piece of work upon which the point is to be made, a member holding said piece of work in place and adapted to let said piece of work fall at the completion of an operation.



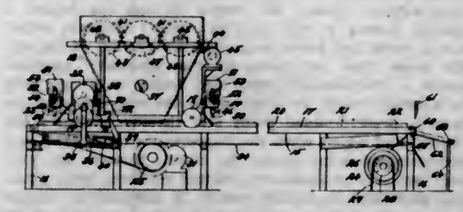
1,622,793. SAFETY KEY DEVICE. FREDERIC M. LYON, Pontiac, Ill. Filed Jan. 17, 1925. Serial No. 3,138. 2 Claims. (Cl. 192—56.)



1. The combination with a shaft, of a wheel turnably mounted on the shaft, and means for interlocking under tension the shaft and wheel, said means comprising a slotted U-shaped key member and a tension spring adapted to hold one leg of the U-shaped member under tension until the exertion of a predetermined force.

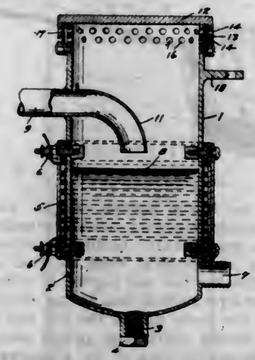
1,622,794. FLUID-PRESSURE-OPERATED MEANS FOR INDICATING THE QUANTITY AND SPECIFIC GRAVITY OF THE LIQUID CONTENTS OF TANKS. HAROLD MARTIN, Portsmouth, England. Filed Aug. 7, 1926, Serial No. 127,932, and in Great Britain Mar. 4, 1925. 2 Claims. (Cl. 177—351.)

1. A manometric fluid pressure operated means for indicating the quantity of the liquid contents of a tank in which the fluid being measured, as oil, is replaced by another fluid, as water, comprising a differential pressure device, means for connecting one side of the device to the upper part of the tank and means for connecting the other side of the device to the lower part of the tank, a variable resistance, means whereby the resistance is controlled by the differential pressure device, and means for indicating the value of the variable resistance to thereby indicate the level of the oil in the tank, said means comprising a source of energy, a ratio coil indicator having two coils, a circuit including the variable resistance and one of the coils of the indicator and the source, a second circuit between said source and the other coil of the indicator, and means for compensating for variations in the specific gravity of oils of different densities which may be placed in the tank comprising a variable resistance included in each one of said circuits, and a common operating means for said variable resistance including a scale calibrated for specific gravity, whereby proportional amounts of said last named variable resistances may be simultaneously included in or excluded from the respective circuits.

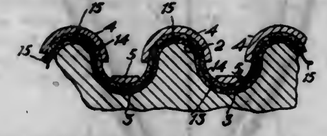


1,622,795. APPARATUS FOR FORMING COMPOSITE MICA SHEETS. LOUIS MCCARTHY, Boston, Mass., assignor to The Macallen Company, Boston, Mass., a Corporation of Massachusetts. Filed Nov. 6, 1922. Serial No. 599,248. 25 Claims. (Cl. 154—2.5.)

1. A machine of the character described comprising, in combination, a bed, means for showering plates or flakes of mica or the like by gravity upon said bed, means for relatively moving said bed and showering means, means for applying a binder in liquid form to the plates or flakes upon the said bed, and means for rolling said plates or flakes and binder upon said bed.



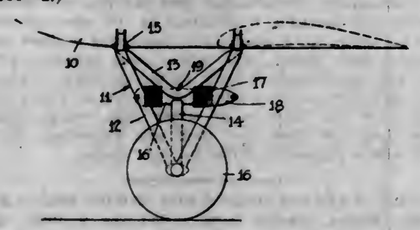
1,622,796. METHOD OF FORMING COMPOSITE MICA SHEETS. LOUIS MCCARTHY, Boston, Mass., assignor to The Macallen Company, Boston, Mass., a Corporation of Massachusetts. Filed Nov. 6, 1922. Serial No. 599,249. 6 Claims. (Cl. 154—2.6.)



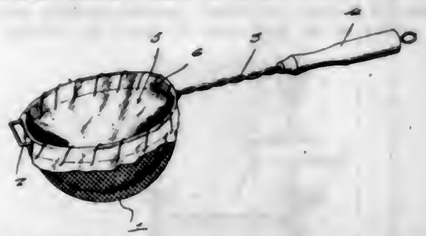
1. The herein described method of making composite sheets which includes showering the constituent flakes from an elevated source upon a suitable surface and, as the showering progresses, adding a binder in liquid form and rolling the whole upon said surface.

1,622,797. OIL BURNER. FRED MCCLOSKEY, Vallejo, Calif. Filed May 4, 1925. Serial No. 27,943. 3 Claims. (Cl. 261—12.)

1. A vaporizing apparatus of the character described, comprising a vessel partly filled with oil and having an oil inlet passage and a vapor outlet passage, a second fluid-tight vessel surrounding the same, partly filled with water, in which the first named vessel is wholly immersed, means for heating the water, pressure-operated means for cutting off the heat when the water has attained a predetermined temperature, said means being wholly exposed to the interior of the second chamber, and means for discharging air under pressure against the surface of the oil allowing the air to absorb vapors from the oil and to rise with the same through the vapor outlet passage.

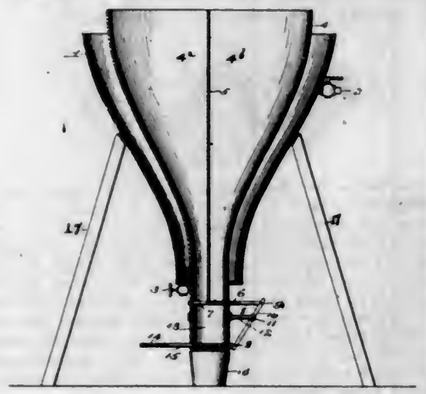


1,622,798. HAIR-WAVING DEVICE. VELERIE JULIA MOUGIN, Springfield, Mass. Filed July 7, 1926. Serial No. 120,944. 7 Claims. (Cl. 132—32.)



1. A device for the purpose described comprising a mold member which is formed with a plurality of elevations and depressions, clamping members pivotally attached to the mold member at one edge and releasably secured to the opposite edge of the mold, means for retaining a layer of the hair in place while being treated comprising an upper and lower layer of chemically treated fabric material for moistening the hair between the layers, the clamping bars being designed to engage the upper side of the upper layer of moistened fabric material, and means for heating the mold member for imparting heat to the hair being treated.

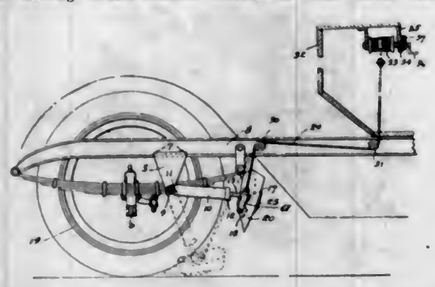
1,622,799. AEROPLANE LANDING GEAR. HARVEY C. MUMMERT, Hammondsport, N. Y., assignor to Aerial Service Corporation, a Corporation of New York. Filed Dec. 17, 1925. Serial No. 75,896. 6 Claims. (Cl. 244—2.)



1. A landing gear for aeroplanes including a pair of substantially triangular relatively movable frames, and a shock absorber connection between said frames for resisting such relative movement.

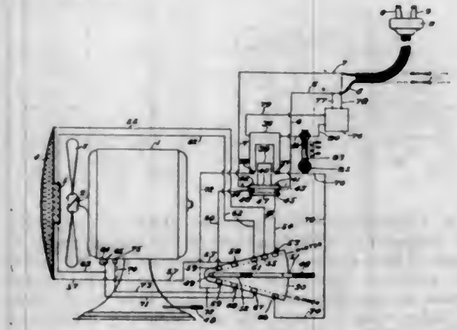
1,622,800. JELLY STRAINER. IDA M. MUINCH, Rockport, Mo. Filed Aug. 4, 1925. Serial No. 48,094. 1 Claim. (Cl. 210—162.)

A device for use in the making of jelly, comprising a rim, a handle fixedly connected to and extending radially from the rim, a semi-globular portion of reticulated material carried by and pendent from the rim, a straining cloth dished within the rim and portion of reticulated material and draped over the rim and having an exterior portion pendent at the outer side of the rim and reticulated portion, and a thread stitched or passed above the rim and through opposed portions of the straining cloth and also through interstices of the reticulated portion, whereby the straining cloth is maintained in working position with its bottom above and in spaced relation to the bottom of the reticulated portion.



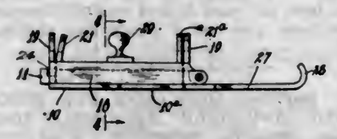
1,622,801. FUNNEL. PIERCE T. MURPHY, New Orleans, La. Filed Nov. 9, 1925. Serial No. 67,804. 2 Claims. (Cl. 221—112.)

1. In a measuring and dispensing funnel, a downwardly tapering receptacle provided with a vertical partition forming compartments in said receptacle, said funnel terminating in a measuring receptacle, said measuring receptacle being provided with sliding valves extending horizontally therethrough near the top and bottom thereof, said partition terminating at the upper of said valves, a jacket for a temperature regulating medium surrounding said funnel, said valves being provided with ports and controlled by a lever, by the operation of which lever said ports may be selectively opened or closed and portions of the contents of either funnel-compartment drawn into and discharged from said measuring receptacle, and a supporting-frame for said device.



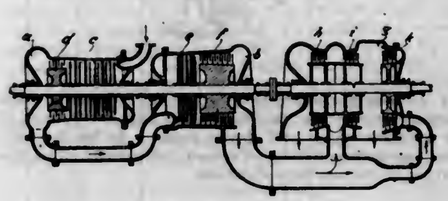
1,622,802. PARKING DEVICE FOR MOTOR VEHICLES. JOHN MYERS, Oroville, Calif. Filed Nov. 9, 1925. Serial No. 67,987. 3 Claims. (Cl. 180—1.)

1. In combination with a motor vehicle, an extensible support pivotally connected at one end to the frame of the vehicle and disposed rearwardly of the front axle thereof and adapted to swing upwardly and rearwardly from a substantially vertical position, shoe members carried by the support and constructed and arranged to extend under the rear lower segments of the front wheels and having frusto-conical rollers in their lower faces



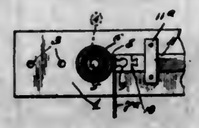
adapted to make contact with the ground when the support extends downwardly whereby the front wheels of the vehicle are caused to ascend the shoes upon rearward movement of the vehicle.

1,622,803. ELECTRICAL HEATING AND COOLING APPARATUS. WILLIAM J. NOONAN, Mansfield, Mass. Filed May 19, 1923. Serial No. 640,098. 6 Claims. (Cl. 219—20.)



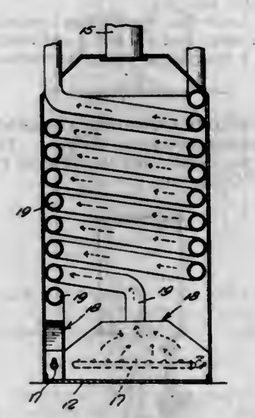
5. In a device of the character described, an electric circuit, a motor within said circuit, a fan driven by said motor, a shunt circuit having a heating coil therein, a manually controlled switch which is adapted to be moved to close the circuit through both the motor and heating coil and which may also be manually moved in another direction to close the circuit through the motor alone without closing the circuit through the heater, a solenoid having a core carrying contact members which form a make and break in a different portion of the circuit from that controlled by the manually operated switch, a thermostatic make and break in circuit with the solenoid which is closed when the temperature rises above a predetermined point and thereby energizes the solenoid and which when the temperature falls below said predetermined point breaks the circuit through the solenoid, two sets of stationary contact members with which said manually controlled switch is adapted to engage when set in different positions in one of which it is adapted to close the circuit through the motor and heater when the solenoid is de-energized and in the other of which it is adapted to close the circuit through the motor alone when the solenoid is energized, the energizing of the solenoid when said manually controlled switch is in engagement with one set of said stationary contacts being operative to break the circuit through the motor and heater and the energizing of said solenoid when the said manually controlled switch is in engagement with the other set of stationary contacts being operative to close the circuit through the motor.

1,622,804. SLIDING LOCK. JOSÉ PALACIOS, New York, N. Y. Filed Mar. 27, 1924, Serial No. 702,302. Renewed Aug. 25, 1926. 6 Claims. (Cl. 292—153.)



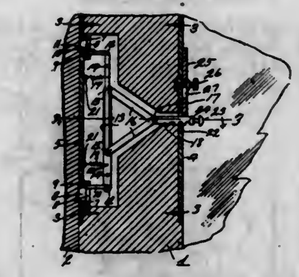
1. A lock comprising a casing element, a bolt slidable therein, a frame hinged to the rear end of said bolt and adapted to surround the casing element, and registering ears on said frame and said casing adapted to receive the shackles of padlocks.

1,622,805. STEAM TURBINE. WILHELM PAPE, Berlin, Germany, assignor to Bergmann-Elektricitäts-Werke, Aktiengesellschaft, Berlin, Germany, a Corporation. Filed Feb. 10, 1925, Serial No. 8,251, and in Germany Feb. 8, 1924. 2 Claims. (Cl. 60—70.)



2. A multiple stage turbine consisting of two turbine sections with counteracting axial thrusts, wherein the turbine sections have both impulse and reaction stages and are mounted in separate housings, as well as a third turbine section with three reaction turbines in a separate housing, two of which are transversed with steam in opposite directions, while the axial thrust of the third reaction turbine counteracts the axial pressure of the two first turbines.

1,622,806. HAND PRESS. WILLIAM PAPKE, Cincinnati, Ohio. Filed May 18, 1922. Serial No. 562,028. 1 Claim. (Cl. 153—49.)

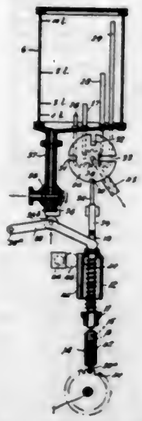


In a hand-press for producing circular rule and the like, the combination of a base-member, and adjustably-mounted block on said base-member, a stationary work-table mounted on said base-member, a removable nest of concentric former or anvil circle-dies on the work-table, a longitudinal screw-member projecting forwardly from the said block into threaded engagement with said work-table and adapted to propel the said block into compensated position along said base-member in relation to said work-table and nest of circle-die formers, a plunger or ram reciprocally movable on the work-table, a shaper or former die mounted at the fore end of the plunger, and a toggle-jointed hand-lever pivotally connected to the rear end of the said plunger, substantially as shown and described.

1,622,807. HEATING APPARATUS. THOMAS JEFFERSON PEACE, Nevada, Mo. Filed May 29, 1926. Serial No. 112,684. 1 Claim. (Cl. 126—116.)

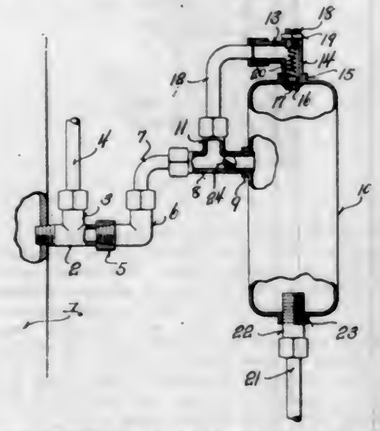
In a heating apparatus of the class described, a substantially rectangular casing, a hot air conducting pipe connected with the top of the casing, a plurality of burners disposed in the lower portion of the casing and associated with said front and side walls thereof, a substantially frusto-conical jacket for each burner, and a combustion and gas conducting tube connected with the flattened apex portion of each jacket, these tubes being coiled upwardly through the casing and the branches of the coils being disposed in proximity to the interior of the walls of the casing, and each tube being connected at its top with a flue, the coils of the several sets being arranged in nested relation.

1,622,808. WINDOW FASTENER. JOHN RETZLAFF, Omaha, Nebr. Filed Apr. 20, 1925. Serial No. 24,607. 3 Claims. (Cl. 292—45.)



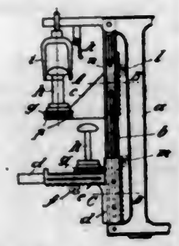
1. The combination with a window sash, of a sash holding device, said sash holding device comprising a notched bar, a holding means cooperating with the notched bar for holding the same in adjusted position, diverging links pivotally connected to the notched bar, pivoted overlapping rock levers, said diverging links being pivotally connected to the overlapped ends of the rock levers, pivoted window frame engaging members, said window frame engaging members extending towards each other, link connections between the rocking levers and the adjacent ends of the window frame gripping members, and spring means cooperating with the rock levers and normally maintaining the gripping members out of engagement with the window frame.

1,622,809. INSULATING LIQUID. CLARENCE J. RODMAN, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 25, 1921. Serial No. 510,317. 8 Claims. (Cl. 252—1.)



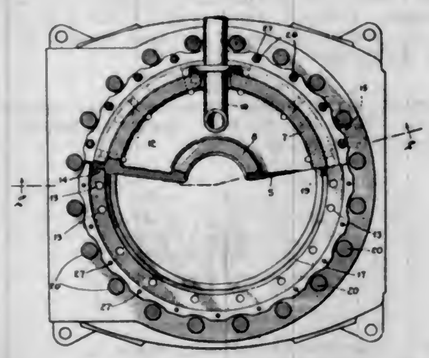
1. A liquid insulating composition comprising hydrocarbon mineral insulating oil and a chlorinated methane derivative and a chlorinated benzol derivative therein.

1,622,810. LIQUID-DISPENSING APPARATUS. CARL ADOLPH SCHAEFFE, Hamburg, Germany. Filed Feb. 19, 1925, Serial No. 10,324, and in Germany Feb. 6, 1924. 4 Claims. (Cl. 221—100.)



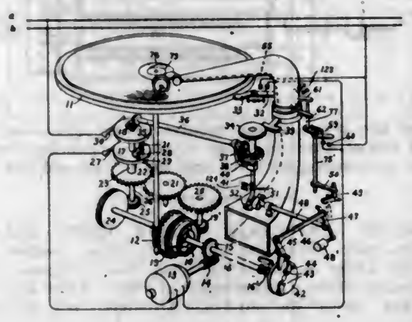
1. In a liquid dispensing device, a measuring chamber, means for limiting the height of liquid in said chamber to any of several values, a delivery pipe leading from said chamber, a valve in said delivery pipe, a registering device, actuating means for said registering device, means associated with said limiting means for defining the movement of said actuating means, and means associated with said valve for operating said actuating means.

1,622,811. AIR-INLET DEVICE FOR MANIFOLDS. ERNEST R. SCHATZ, Racine, Wis. Filed June 5, 1925. Serial No. 35,140. 2 Claims. (Cl. 123—124.)



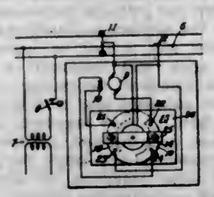
1. The combination of an intake manifold of an internal combustion engine, of an air heating device comprising a tank, a pipe leading directly from said tank to said intake manifold, a valve interposed between said tank and said intake manifold and adapted to be manually controlled, a pipe connecting said tank and said first mentioned pipe at a point between said valve and said intake manifold, a spring urged valve controlling communication from said tank to said manifold through said second mentioned pipe and a supply pipe opening into said tank.

1,622,812. DOFFING MECHANISM FOR SPINNING, TWISTING, AND LIKE MACHINES. HEINRICH SCHNEIDER, Lenzburg, Switzerland. Filed July 30, 1924, Serial No. 729,130, and in Germany Feb. 5, 1924. 12 Claims. (Cl. 118—18.)



1. In doffing mechanism for spinning, twisting and like machines in combination, bobbin rails disposed in front of the machine frames and special guide rails for the spinning and doffing motion, disposed independent from the spacing of the machine standards.

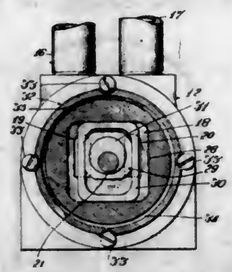
1,622,813. CYLINDER AND HEAD CONSTRUCTION. RUDOLPH SCHNEIDER, St. Louis, Mo., assignor to Busch Sulzer Bros.-Diesel Engine Co., St. Louis, Mo., a Corporation of Missouri. Filed July 16, 1923. Serial No. 651,746. 7 Claims. (Cl. 123—173.)



1. In an internal combustion engine, a cylinder and a cylinder head having water jackets in communication by passages within said members, and which cylinder makes with said cylinder head distinct and separately packed and tightened annular joints, respectively within and without the water space for respectively preventing escape of gaseous products to the cooling water and of water to the atmosphere, compression of the inner joint being effected by tightening the cylinder head bolts, and axially adjustable means for compressing the packing of the outer joint.

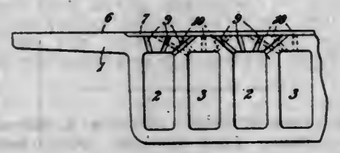
1,622,814. PHONOGRAPH. FRANK J. SEABOLT, Schenectady, N. Y., assignor, by direct and mesne assignments, to The Phonograph Company, a Corporation of Delaware. Filed Sept. 23, 1919. Serial No. 325,766. 50 Claims. (Cl. 274—10.)

1. The combination with a phonograph or the like for playing disc records of a stack of records arranged adjacent to the phonograph, means for biasing the records towards a position to be shifted, a stop engaged by the exposed record in shifting position so that when that record is removed the stack of records will automatically move to bring the next record to shifting position, and means for automatically shifting the exposed records successively from the stack to playing position on the table and then shifting them from playing position.



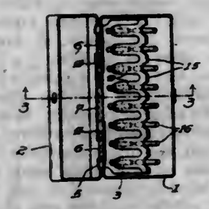
1,622,815. CONTROLLING DEVICE. HARRY P. SPARKES, Pittsburgh, Pa., assignor of one-half to B. H. Smith, Swissvale, Pa. Filed Dec. 17, 1923. Serial No. 681,216. 5 Claims. (Cl. 104—151.)

1. In a toy electric train system, the combination with two uninsulated rails and an insulated third rail, a locomotive having a current collector for the third rail, a motor and a reversing switch connected to the current collector, of a pawl and ratchet device for actuating the reversing switch, an electromagnet connected to the current collector for actuating the pawl and ratchet device, and a manually operable switch normally biased to the closed position for controlling the energization of the third rail whereby the motor may be started, stopped and reversed solely by the opening and closing of the last-mentioned switch.



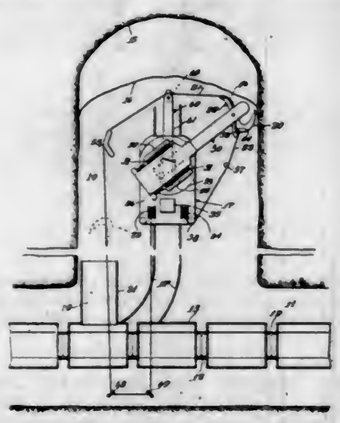
1,622,816. ROTARY PUMP. FRANK EARL SPERRY, Batavia, Ill. Filed Mar. 20, 1924. Serial No. 700,553. 15 Claims. (Cl. 103—160.)

1. In a pump, the combination with a casing having a substantially flat bearing surface provided with inlet and outlet ports, and a cover overlying said bearing surface and forming a pressure chamber thereover, of a rotor comprising a member arranged to bear laterally against said bearing surface and providing a chamber overlying



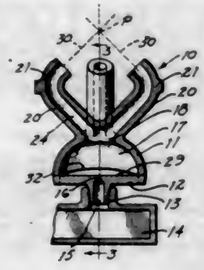
said ports, and pistons in the latter chamber actuated by the rotation of the rotor to move transversely of the axis thereof and angularly relatively to each other.

1,622,817. METHOD AND APPARATUS FOR PRODUCING A CONTINUOUS STRIP OF GLASS. FREDERIC BARNES WALDRON, Prescot, England, assignor to Pilkington Brothers Limited, Liverpool, England. Filed Nov. 1, 1924, Serial No. 747,159, and in Great Britain Nov. 9, 1923. 11 Claims. (Cl. 49—17.)



1. In apparatus for producing a continuous strip of glass comprising a bed adjacent to which the glass passes, means operative to prevent the glass coming into contact with the bed, consisting of a layer of air in motion between the glass and bed through which the latter air is supplied and mainly removed.

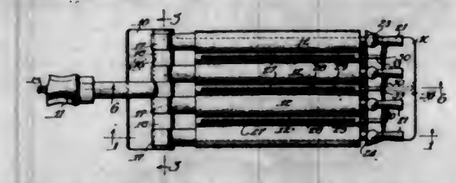
1,622,818. CASE OR BOX. SAMUEL H. WISMER, Palmyra, and JOHN HENRY THAIDIOSMAN, Delanco, N. J., assignors to Victor Talking Machine Company, a Corporation of New Jersey. Filed Aug. 21, 1924. Serial No. 733,285. 8 Claims. (Cl. 206—16.)



1. In a container for small articles, the combination of a box, a lid and a holder all pivoted together so that when the lid is opened the free edge of the holder swings above the edge of the box, said holder being provided with means to frictionally hold a small article with one end thereof projecting beyond the free edge of said holder and also with relatively rigid means to prevent the projecting end of said article from being substantially moved in a direction transversely to the axis of the article.

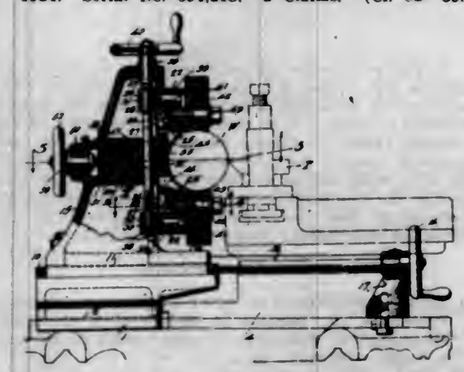
1,622,819. SCRAPER LOADING APPARATUS. ROBERT J. WOOD, Spring Hill, W. Va., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Mar. 17, 1923, Serial No. 625,752. Renewed Sept. 7, 1926. 6 Claims. (Cl. 37—115.)

1. In a scraper apparatus, in combination with a base, a projecting beam movable angularly respective to said base, a rocking member on said beam, a scraper, and draft means for reciprocably moving said scraper extending about said rocking member whereby said scraper is movable into lateral engagement with said rocking member during a portion of its reciprocable movement.



1,622,820. GAS BURNER. WILLIAM B. BASTIAN, Los Angeles, Calif. Filed June 30, 1926. Serial No. 119,572. 3 Claims. (Cl. 158—106.)

1. A gas burner, comprising: a substantially hemispherical mixing bowl; a cross-bar formed across the mouth of said bowl, the mouth of said bowl being open on opposite sides of said bar; a nipple formed upon said cross-bar, there being a passage for gas formed through said nipple and said cross-bar whereby a stream of gas is projected into said mixing bowl; and a plurality of burner tubes connecting with the upper portion of said mixing bowl and diverging from their point of connection, the ends of said tubes being turned inward so that all the burning streams of gas directed from said tubes meet at a point upon the axis of said burner.



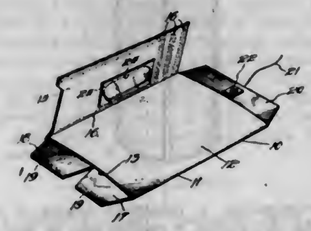
1,622,821. MARCEL WAVER. CORA G. BEESLEY, Chicago, Ill. Filed July 18, 1924. Serial No. 726,656. 17 Claims. (Cl. 132—32.)

1. A Marcel waver including an iron, means for heating the iron, a comb like device co-operating with the iron, means connecting the iron adjacent one end and the said comb like device for pivotal movement one with relation to the other, means mounting the comb like device for bodily adjustment in directions lengthwise of the iron and within the confines of the ends of the iron, and means for locking the iron and the said

comb like device against relative pivotal movement, the last recited means including a yielding catch like formation co-operating with the free end of the said iron.

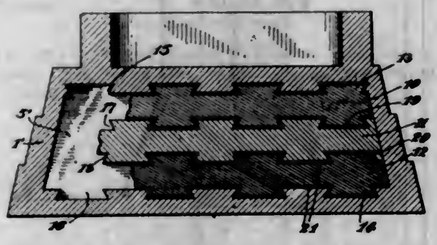
1,622,822. UNIVERSAL FOLLOW REST. FRANCIS BEAUFORT COCKBURN, Cincinnati, Ohio, assignor to The Lodge & Shipley Machine Tool Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Feb. 21, 1924. Serial No. 694,218. 2 Claims. (Cl. 82—39.)

1. A follow rest for engine lathes in combination with a carriage, a slide rest adapted for mounting upon the cross slideway of the carriage, a standard slidably mounted upon said slide rest, a pair of opposing jaws vertically slidable upon said standard, a single screw journaled in said standard cooperating with said jaws for simultaneously adjusting said jaws in opposing directions, a jaw slidable in said standard transversely to said pair of jaws and disposed intermediate thereof, screw means journaled in said frame for adjusting said jaw, and a feed screw journaled on said carriage and engaged with said standard for moving said standard upon said slide rest, whereby the standard and jaws as a unit can be moved toward and from the work.



1,622,823. SCRAPER LOADING APPARATUS. EDWARD J. DOBERSTEIN, Chicago, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 29, 1922, Serial No. 609,570. Renewed Sept. 7, 1926. 6 Claims. (Cl. 214—110.)

1. In a scraper loading apparatus, in combination, a movable frame adapted to span a track and provided with a passageway therethrough for cars, an inclined

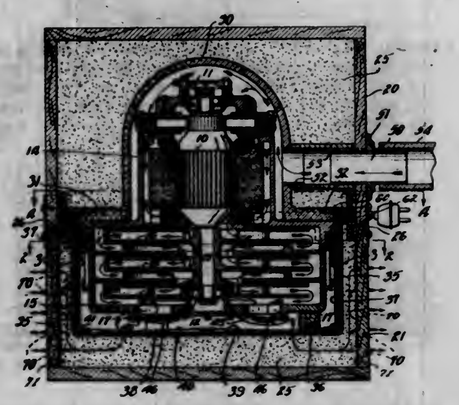


runway extending laterally from above said passageway to engage the ground, a draft operated scraper device arranged for movement along said runway, means permitting discharge of said scraper in position over said passageway, means for temporarily fixing said frame against lateral movement, and supplementary means movable on said track, adapted to support said frame bodily for transportation when said temporary fixing means are inoperable.

1,622,824. MAILING DEVICE. WILLIAM DOUGLAS MCGANN, Ravinia, and JAMES GEORGE MCGREEVY, Chicago, Ill., assignors to Ontario Company, Chicago, Ill., a Corporation of Illinois. Filed Jan. 14, 1922. Serial No. 529,124. 12 Claims. (Cl. 229—72.)

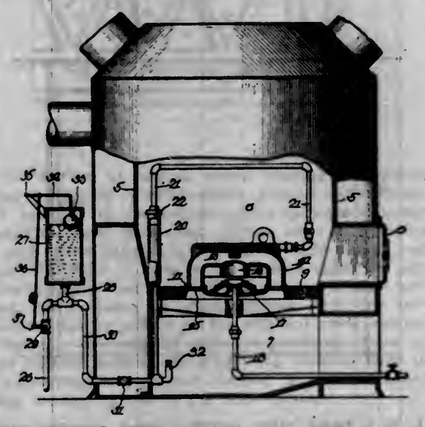
9. An article of the class described comprising, in combination, a main body portion; flaps connected to said body portion and cooperable therewith to form a plurality of compartments; means for sealing one of said compartments; and means cooperable with said sealing means for closing one end of another of said compartments.

1,622,825. CONSTRUCTION OF VAULT OR SAFE DOORS AND THE LIKE. GUSTAVE M. GOLDSMITH and CARL BARTELS, Hamilton, Ohio, assignors to The Mosler Safe Company, Hamilton, Ohio, a Corporation of New York. Filed Aug. 18, 1923, Serial No. 658,004. Renewed Aug. 12, 1926. 9 Claims. (Cl. 109—1.)



1. In safe wall construction, in combination, a metallic body portion having a central chamber, a metallic insert loosely fitted in said chamber, and flowed-in binding material intermediate said insert and adjacent portions of said body portion, filling cracks and crevices therebetween.

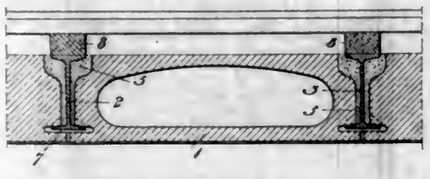
1,622,826. GAS-FILLED INCANDESCENT ELECTRIC LAMP WITH FILAMENT HAVING INCREASED STRENGTH. DANIEL SNYDER GUSTIN, East Orange, N. J., assignor to Westinghouse Lamp Company, a Corporation of Pennsylvania. Filed Nov. 29, 1924. Serial No. 752,942. 9 Claims. (Cl. 176—16.)



1. An incandescent, metallic filament electric lamp of the gas-filled type, containing an organic material improving the resistance of the filament to shock.

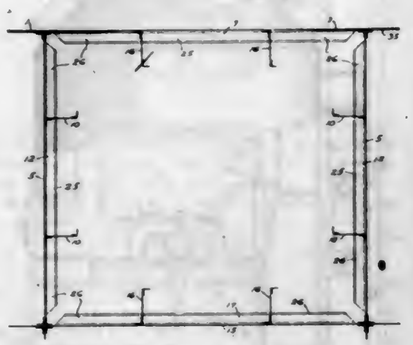
1,622,827. MEANS FOR ACTUATING PLAYER PIANOS. CLINTON H. HANSON, Chicago, Ill., assignor to The Motor Player Corporation, Chicago, Ill., a Corporation of Illinois. Filed Sept. 6, 1922. Serial No. 586,450. 19 Claims. (Cl. 230—11.)

1. In a vacuum producing device for operating player pianos, the combination with a vacuum producing unit, of a casing enclosing the unit, an enclosing housing spaced from the casing and having a vertical wall, a flexible inlet conduit connecting the housing and casing, said housing having outlet openings in said vertical wall, means acting independently of the conduit for preventing rotation of the casing with reference to the housing when the unit is placed in operation, and said housing embodying material having a different rate of sound wave conductivity than the casing material.



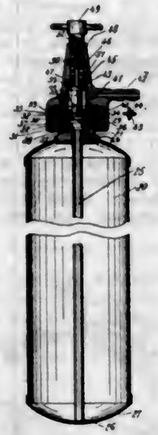
1,622,828. OIL-BURNING FURNACE. CHARLES I. HOAG, Oak Park, Ill., assignor to Standard Oil Friction Burner Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 18, 1924. Serial No. 707,360. 3 Claims. (Cl. 158—92.)

1. In a furnace, the combination of a fire-box, an oil burner comprising a burner plate, and a manifold for delivering air to the plate and which is heated by the combustion of oil on said plate, means for delivering oil to said plate, a water-chamber in the fire-box and heated by the burner, means integral with said manifold and forming a sinuous duct, said duct being connected at one



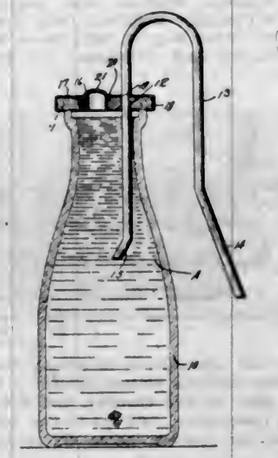
end to discharge into the air passing through the manifold and at the other end to the water-chamber to receive vapor therefrom, said duct being heated by the burner and adapted to superheat the vapor passing therethrough, and means for maintaining a column of water in the water-chamber.

1,622,829. METHOD AND ARRANGEMENT FOR MAKING NAKED FLOORING. VALTER KONSTANTIN HULTIN, Stockholm, Sweden. Filed Sept. 16, 1924, Serial No. 737,965, and in Sweden Sept. 29, 1923. 1 Claim. (Cl. 72—66.)



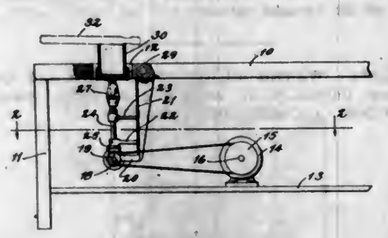
A method of constructing flooring of iron joists with a filling of bricks between them, which consists in first erecting the walls only to the height at which the flooring is to be placed and thereafter alternately laying a row of bricks upon a suitable removable support and placing a joist in contiguous relation to said row of bricks and simultaneously laying said joist in its definite places on the walls, said rows of bricks having recesses approximately corresponding in shape to the contiguous sides of the joinsts, pouring a binding liquid into the space between the bricks and the iron joists and between the bricks in contiguous rows, and continuing the erection of the walls to the height where the next flooring is to be constructed thereby to secure the iron joists therein.

1,622,830. CONSTRUCTION OF FLOATING VESSELS. JOSEPH W. ISHERWOOD, Chislehurst, England. Filed June 12, 1924, Serial No. 719,575, and in Great Britain July 17, 1923. 7 Claims. (Cl. 114—79.)



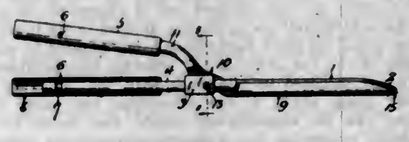
1. In a liquid cargo carrying vessel provided with a tank having walls, the combination of longitudinally and horizontally disposed stiffening members secured to said walls and of lengths insufficient for their ends to reach to the corners of said tank; and vertically disposed stiffening members secured to said walls and to said first named members, the ends of said stiffening members being devoid of brackets.

1,622,831. DISPENSING DEVICE. GEORG KIRKEGAARD, Brooklyn, N. Y. Filed Aug. 27, 1921, Serial No. 496,044. Renewed Jan. 27, 1927. 8 Claims. (Cl. 220—27.)



1. In combination, a receptacle having a neck, said neck having an opening, a sealing disc in said neck and adapted to seal the opening, a member having an opening registering with the opening in the neck and adapted to cooperate with the disc to seal the opening in the neck and means for normally positioning the disc out of sealing relation with respect to said member.

1,622,832. CREAM REMOVER. EDWARD G. LAMBERT, Ottumwa, Iowa, assignor of one-half to Leon Lambert, Wichita, Kans. Filed Apr. 24, 1925. Serial No. 25,601. 2 Claims. (Cl. 137—20.)



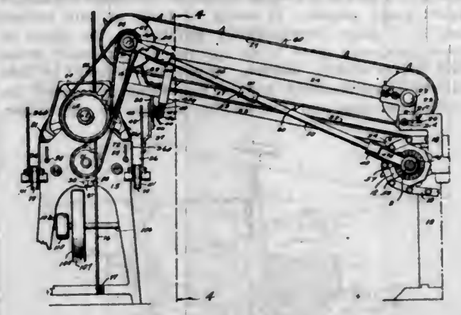
1. In a cream remover of the kind described, a closure device adapted to seal with a container top adapted to be actuated for compressing the air in the container, a siphon tube having one arm adjustably mounted in said closure member by a tight joint therewith, said closure member having a relatively stiff peripheral portion adapted to rest on a bottle top and a relatively yieldable portion, comprising an upwardly covered cup-shaped member connected at its lower part with the lower part of the closure member.

1,622,833. SPATULATING MACHINE. THOMAS J. LEWIS, New York, N. Y. Filed June 19, 1926. Serial No. 117,110. 3 Claims. (Cl. 226—22.)

1. Spatulating machine comprising a support, brackets on said support, a stub shaft held in said brackets, means for rotating said stub shaft, a chuck on said stub shaft, a seat having a depending stem adapted to be held in said chuck, said seat adapted for the reception of jars of varying diameters, and a means adapted to be guided over the upper edge of said jars for wiping the surplus of material from said jars during their rotation with said seat.

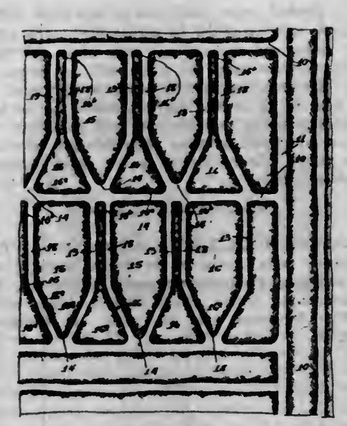
1,622,834. CURLING IRON. FRANÇOIS RENÉ MARCEL, Brooklyn, N. Y. Filed June 12, 1924. Serial No. 719,507. 4 Claims. (Cl. 132—37.)

1. A curling iron comprising a rod member, and a concave member pivotally connected and cooperating to engage the hair between them and wave the hair, said members each having handle members for operating them, and a block of comparatively large cubical content disposed between said rod member and its handle for reducing the conduction of heat from said rod member to said handle.



1,622,835. PROPELLER. CHARLES O. MARSHALL, Toledo, Ohio. Filed Sept. 8, 1921. Serial No. 499,150. 4 Claims. (Cl. 170—172.)

1. In a device of the class described, in combination, a high speed bladed propeller having passages therein and discharge nozzles for said passages, said nozzles being substantially smaller in cross sectional area than said passages and slightly flared at their discharging ends and being located only adjacent the tips of the propeller blades, and means for introducing motive fluid into said passages.

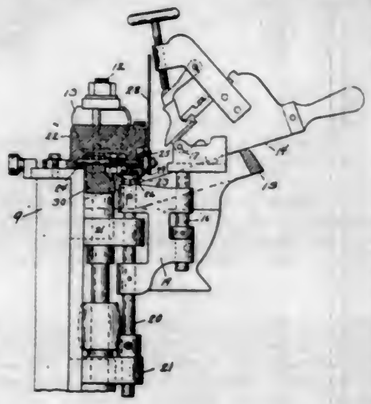


1,622,836. FEEDING MACHINE. SEBN MADSEN, Clinton, Iowa, assignor to Curtis Companies, Incorporated, Clinton, Iowa. Filed Apr. 23, 1924. Serial No. 708,483. 13 Claims. (Cl. 198—27.)

1. A feeding machine having a pair of inclined carrier bars and a pair of chains above the carrier bars for advancing stock thereon, means for vertically adjusting the carrier bars at one end, and means for vertically adjusting the chains at their other ends.

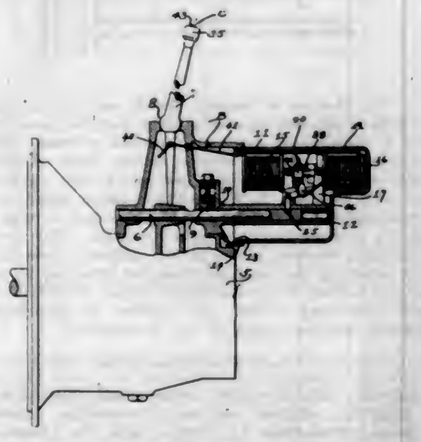
2. In a feeding machine of the class described, means for receiving stock lying flat and advancing it transversely, and means for turning said stock on edge and advancing it longitudinally to either of two spaced operative devices.

1,622,837. SYSTEM FOR MINING. JAMES W. PEARCE, Chicago, Ill., assignor to Goodman Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Dec. 26, 1924. Serial No. 754,262. 2 Claims. (Cl. 262—1.)



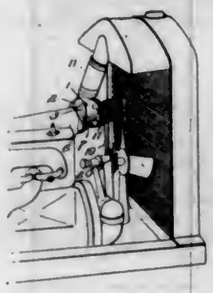
1. The method of mining, which consists in initially forming a plurality of substantially parallel cross-entries, and a plurality of connecting entries between adjacent cross-entries, said connecting entries being nonparallel with each other through a portion of their length and arranged in pairs to meet at a common point at said cross-entries, the common meeting points of the connecting entries being in offset relation with the corresponding meeting points in the adjacent cross entries, and removing the material from the resulting blocks by scraper loading devices extending along working faces in said connecting entries and loading at predetermined common meeting points in the cross-entries.

1,622,838. GUARD FOR WOOD-HEEL-TURNING MACHINES. RALPH HOWARD PETTENGILL, Haverhill, Mass. Filed June 17, 1926. Serial No. 116,684. 10 Claims. (Cl. 12—87.)



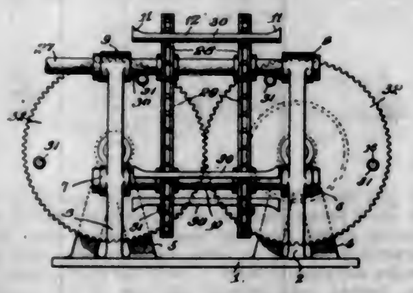
7. In a machine of the character described, a pair of cutters mounted to rotate about parallel axes, a work

holder mounted to swing about a center intermediate said axes to carry the holder in either direction from a middle position in front of said cutter to positions in which it presents the work to one or the other thereof, a guard plate mounted to swing in front of said cutters and in a plane approximately parallel to the plane of their axes, said plate being adapted and arranged, when held in its middle position, to extend in front of both cutters simultaneously and in a position interposed between the same and the middle position of the holder,



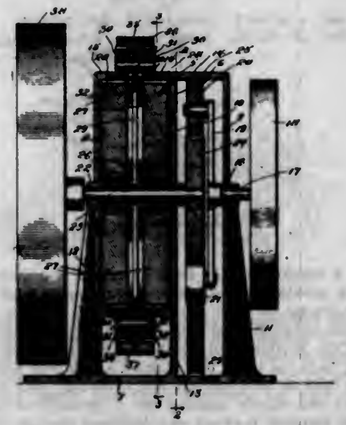
and inter-meshed gears connected to said plate and holder respectively and arranged to rotate about the respective axes of movement thereof, so that when the holder is swung in one direction the plate will be swung in the opposite direction, said plate being so arranged that it will be held in its middle position when the holder is in the middle position thereof, and will be moved thereby out of its interposed position with relation to the cutter towards which the holder is moved when moved from said middle position.

1,622,839. VEHICLE LOCK. ELMER CLYDE PETERSON, Cleveland, Ohio, assignor, by mesne assignments, to The Motobile Products Company, Cleveland, Ohio, a Corporation of Ohio. Filed June 9, 1922. Serial No. 567,231. Renewed Aug. 26, 1926. 11 Claims. (Cl. 70—127.)



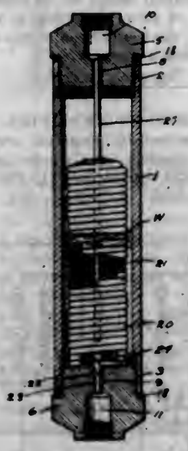
1. The combination with a motor vehicle, a movable operating portion, and an ignition switch, of a lock including locking pins, an electromagnet for operating said pins, the pins being adapted to be forced into engagement with the movable portion of the vehicle for preventing the actuation thereof, and means for closing the circuit through the electromagnet upon the opening of the ignition circuit by said switch.

1,622,840. WATER PUMP. JOHN POPP and GEORGE POPP, Buffalo, N. Y. Filed Aug. 30, 1923. Serial No. 660,206. 1 Claim. (Cl. 123—175.)



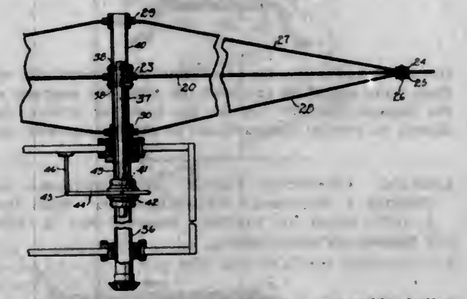
The combination in an internal combustion engine having parallel spaced water pump and fan shafts each having a pulley thereon disposed out of alinement, of a separable suplemental pulley having grooves in its inner and outer faces, the inner face groove being adapted to engage a rim of the fan shaft pulley whereby the supplemental pulley is disposed in alinement with the pulley on the water pump shaft, a belt connecting the pump shaft pulley and the supplemental pulley, and means for detachably connecting the separable supplemental pulley in assembled posttion on the fan shaft pulley rim.

1,622,841. MECHANICAL MOVEMENT. ALVAH L. POWELL, Miles City, Mont., assignor to The A. L. Powell Power Company, a Corporation of Montana. Original application filed Dec. 10, 1919. Serial No. 343,958. Divided and this application filed Nov. 9, 1923. Serial No. 673,853. 4 Claims. (Cl. 74—14.)



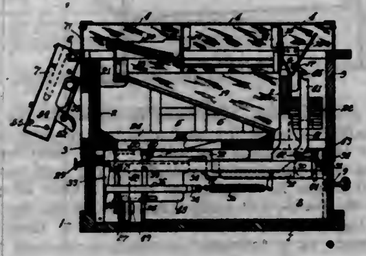
1. In a mechanical movement a drive shaft, a countershaft, wheels carried by each of said shafts, flexible means passing over said wheels, transmission bars carried by said flexible means, each of said transmission bars having curved projections at their outer extremities, a driven shaft and power transmission means interposed between said driven shaft and said tranmission bars, said curved projections being adapted to cam said transmission means inwardly and downwardly.

1,622,842. MECHANICAL MOVEMENT OF THE PLANETARY-GEAR TYPE. ALVAH L. POWELL, Miles City, Mont., assignor to A. L. Powell Power Company, Incorporated, a Corporation of Montana. Filed Nov. 9, 1923. Serial No. 673,854. 6 Claims. (Cl. 74—34.)



1. In a mechanical movement of the planetary gear type, a stationary ring gear, a rotatable shaft, a gear carried by said shaft, a planetary gear adapted to mesh with the ring gear and with the gear on the shaft, a gear operatively connected with said shaft and adapted to mesh with the said planetary gear at a diametrically opposite point from the gear carried by the shaft and means whereby power may be taken from the gear operatively connected with the shaft at a point diametrically opposite from the point of contact with the planetary gear.

1,622,843. PRIMARY GAUGE STABILIZER. HOWARD W. PRICE, Swarts, La., and JOSEPH B. MERIAM, Cleveland, Ohio, assignors to Meriam Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 16, 1924. Serial No. 732,416. 10 Claims. (Cl. 73—31.)

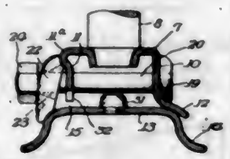


1. A pressure gauge stabilizer comprising in combination, an upright casing perforated closure members at each end thereof, and a tube leading from the perforation in the bottom closure to within the casing and coiled therewithin into a compact unit, the opening of said coil being disposed adjacent the bottom closure and rigidly attached thereto and a second tubing entering the casing at the opposite closure and extending downwardly to within a short distance from the opening in said first named coil.

1,622,844. AEROPLANE. ALBERT D. RAY, Cleveland, Ohio. Filed Apr. 22, 1926. Serial No. 103,819. 2 Claims. (Cl. 244—14.)

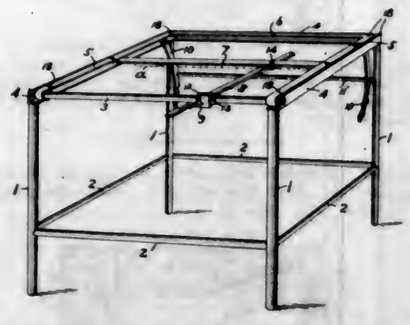
1. An aeroplane wing embodying a rotatable hollow member having a diaphragm adjacent the central portion thereof, the diaphragm projecting beyond the marginal edges of the hollow portion and being movable with reference thereto.

1,622,845. AMUSEMENT DEVICE. ALBERT S. ROSS, Dallas, Tex. Filed July 30, 1926. Serial No. 125,884. 5 Claims. (Cl. 194—81.)



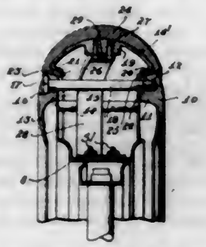
1. The combination of a section cabinet including an encased section, the latter having a trough in its top to define a compartment having a token chute; a separated compartment formed in alinement with said first compartment having an exterior opening; a tiltable target mounted in said latter compartment and arranged to restrict said opening when tilted; means to project a token into an indeterminate one of said compartments; a merchandise receptacle in said encased section provided with an inclined chute having an opening; a closure for said opening; an operating handle protruding exteriorly of said cabinet having co-operable connection with said target; means to permit the projected token to travel down said chute to lock said closure and operating lever in operative relationship to effect release of a quantity of said merchandise when said lever is actuated, and means to control the quantity of merchandise so released.

1,622,846. VEHICLE WHEEL. CHARLES F. RUBSAM, Jackson, Mich., assignor to Rubsam Corporation, Jackson, Mich., a Corporation of Delaware. Filed Feb. 12, 1926. Serial No. 87,734. Renewed Feb. 1, 1927. 3 Claims. (Cl. 301—10.)



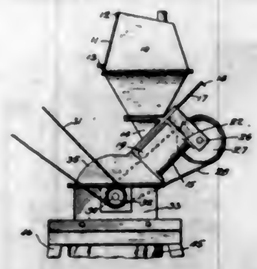
1. In a vehicle wheel, the combination of a fixed channel shaped rim, an integral flange on the outer side, a demountable rim provided with inwardly projecting supports of limited length and adapted to engage the outer

periphery of said flange on the fixed rim and leaving circumferential clearances between them, removably clamping devices arranged circumferentially between said supports, the fixed rim being provided with a hole for a



tire-valve, and means for preventing the demountable rim from being placed on the fixed rim when the supports on the demountable rim are on the inner or vehicle side thereof to prevent misplacement of the demountable rim.

1,622,847. DRAFTING TABLE. JOHN RUNDGREN and CHESTER A. BILLETDOUX, Philadelphia, Pa. Filed June 1, 1923, Serial No. 642,756. Renewed Nov. 9, 1926. 2 Claims. (Cl. 45—109.)

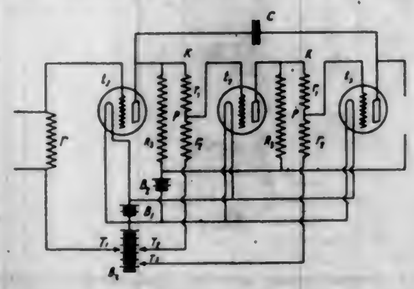


1. A drafting table comprising in combination a tubular metallic leg structure and metallic top rails constituting a stand, metallic end and side bars constituting a swinging frame pivoted to one of the top rails, notched quadrant means for holding the frame, a hand lever pivoted to the frame, and a catch turnable on the last mentioned top rail and adapted to engage the hand lever and operate as a fulcrum.

1,622,848. VEHICLE TIRE. FRANK E. RUSH, Detroit, Mich. Filed Feb. 27, 1926. Serial No. 91,082. 4 Claims. (Cl. 152—32.)

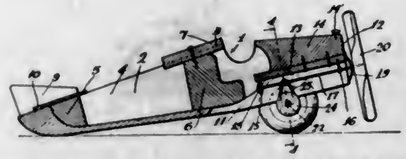
2. A vehicle tire adapted for mounting on a vehicle wheel comprising a pair of rings, each having inclined bearing surface at its outer edge; a tread supporting annular member having bearing surfaces at its opposite edges in engagement with the aforesaid bearing surface; resilient means for connecting said annular member to said vehicle wheel; a tread positioned detachably on said annular member and having its edges turned inwardly toward each other; and means for clamping said inturned edges between said engaging surfaces.

1,622,849. METHOD OF AND MACHINE FOR GRINDING. LOUIS RUPARCHT, Montclair, N. J., and ALFRED G. KOLLSTEDE, New York, N. Y. Filed July 16, 1924. Serial No. 726,254. 4 Claims. (Cl. 83—11.)



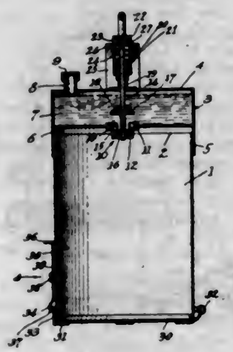
1. A machine of the class described, comprising a main casing providing a cylindrical chamber, a high speed rotary grinder in said chamber, a feed conduit extending radially outward from said chamber at a substantial angle from the vertical and having a supply opening at a distance from the inner end thereof, and a feed screw mounted to turn in said conduit and extending into the conduit beyond the supply opening for a distance at least equal to the distance between two adjacent threads of the feed screw and the inner end of the feed screw being close to the periphery of the rotary grinder.

1,622,850. COMBINED SINK STOPPLE AND SOAP DISH. WILLIAM F. SCHACHT, Huntington, Ind. Filed July 23, 1925. Serial No. 45,567. 1 Claim. (Cl. 4—293.)



An article of manufacture adapted for use as a sink stopple and as a soap dish, and comprising a thin flexible rubber disk having a flat under surface and an integral circumferential marginal flange on its upper side of varying width adapted to prevent curling of the thin central portion of the disk; the top portion of the disk surrounded by said flange forming a receptacle.

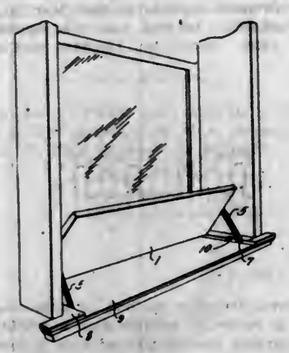
1,622,851. THERMIONIC AMPLIFIER. SIDNEY BERTRAM SMITH, Chelmsford, England, assignor to Radio Corporation of America, a Corporation of Delaware. Filed June 3, 1926, Serial No. 113,370, and in Great Britain May 18, 1925. 6 Claims. (Cl. 179—171.)



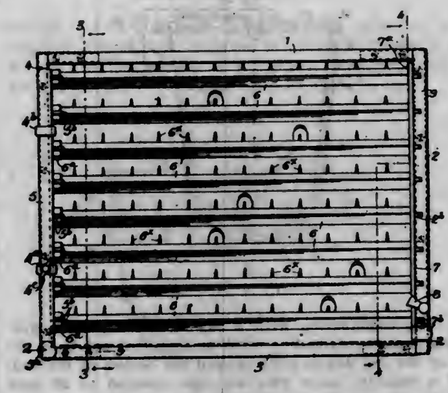
1. In a multi-stage thermionic amplifier, a plurality of tubes, each provided with an anode circuit including a resistance, a source of positive anode potential, a potentiometer and high potential biasing body in parallel with said resistance and potential source, and a means associated with said potentiometer for obtaining a negative bias on the grid of each tube of the amplifier.

1,622,852. WHEELED TOY. REW TROXELL, Los Angeles, Calif. Filed July 28, 1926. Serial No. 125,403. 7 Claims. (Cl. 46—48.)

1. An aeroplane toy comprising in combination a fuselage structure, a loosely mounted axle having a pulley and wheels secured thereto, a propeller shaft, a propeller secured thereto, and a band passing over the pulley and the propeller shaft, said band retaining the axle in position.



1,622,853. SANITARY GARBAGE CAN. ANDREW TURNBULL, Santa Ana, Calif. Filed Jan. 19, 1926. Serial No. 82,192. 2 Claims. (Cl. 220—87.)

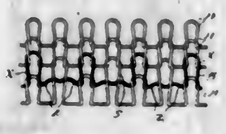


1. A cover for a sanitary garbage can comprising in combination a top wall having a depending substantially circular skirt, a partition across the skirt forming a container above the partition, a valve seat threaded in the partition, a tubular stem secured to the top, a valve plunger slidable through the stem and through the valve seat there being an annular space between the stem and the seat, a valve washer below the seat secured to the plunger, a second valve washer above the seat secured to the plunger, a packing nut secured to the tubular stem, a bracket secured to the top having a cross member with a hole therethrough, a cupped sleeve secured to the upper end of the plunger slidable through said opening and over the packing nut and a compression spring between the cupped sleeve and the said packing nut.

1,622,854. WINDOW VENTILATOR. STEWART V. VAN BERSCHOT, Chicago, Ill. Filed Apr. 26, 1926. Serial No. 104,729. 5 Claims. (Cl. 98—99.)

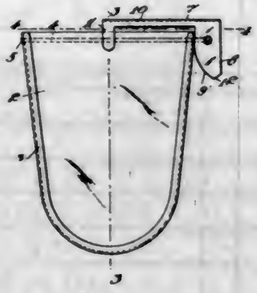
1. A combined window-sill and window ventilator comprising a sill having a depression therein, a plate normally disposed in said depression and hinged along its edge nearest the window, said plate adapted in its normal position to provide the upper surface of the window-sill, and means for maintaining said plate in divers positions when moved upon its hinges.

1,622,855. WORK HOLDER. BENJAMIN S. WARNER, Endicott, N. Y., assignor to Endicott Johnson Corporation, Endicott, N. Y., a Corporation of New York. Filed Aug. 9, 1926. Serial No. 128,156. 14 Claims. (Cl. 91—60.)



1. A work holder of the character specified comprising a frame; a plurality of parallel work-carrying bars each provided with a series of spikes rotatably mounted in the frame; and means for simultaneously rocking said bars.

1,622,856. ORTHODONTIC APPLIANCE. EDWARD H. ANGLE, Pasadena, Calif. Filed Aug. 28, 1926. Serial No. 132,071. 4 Claims. (Cl. 32—19.)

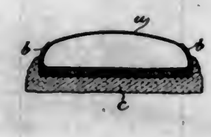


1. An orthodontic appliance comprising a tooth-band having an arch-bar receiving bracket, and having means spaced from said bracket affording an attachment with which a ligature may be engaged to hold the arch-bar engaged with said bracket.

1,622,857. METHOD OF KNITTING HOSIERY. ABRAHAM J. BEUCUS, Waupun, Wis., assignor to Paramount Textile Machinery Co., Chicago, Ill., a Corporation of Illinois. Original application filed Mar. 11, 1926, Serial No. 93,950. Divided and this application filed Sept. 29, 1926. Serial No. 138,551. 4 Claims. (Cl. 66—41.)

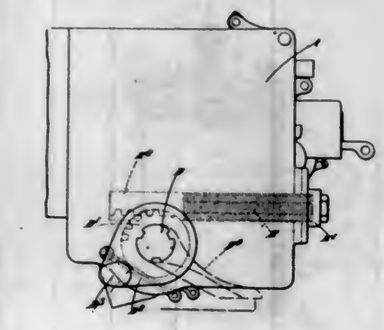
2. The herein-described method of producing seamless hosiery on a series of needles and web-holders, which consists in varying the coactive relation of these knitting instrumentalities and increasing the amount of yarn drawn in each stitch during the formation of an anti-raveling round in which a reduced number of stitches is produced, whereby a uniform diametral extensibility of the fabrics is secured.

1,622,858. CUP. JOSEPH BLAUSTEIN, Brooklyn, N. Y. Filed May 22, 1925. Serial No. 32,044. 15 Claims. (Cl. 65—13.)

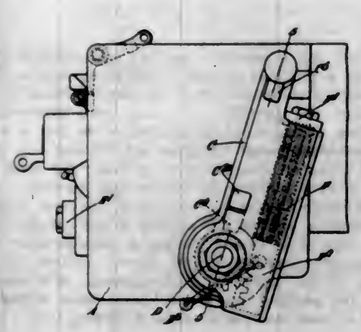


1. The combination with a cup having a portion providing a groove extending between separated points of the top of the cup downwardly toward the bottom of the cup, and a separate plate with an edge adapted to fit said groove, of means for springing said grooved portion into engagement with said edge of the plate.

1,622,859. AUTO HEEL PROTECTOR. VIGGO CHRISTENSEN, Los Angeles, Calif. Filed Apr. 20, 1926. Serial No. 103,234. 7 Claims. (Cl. 36—72.)

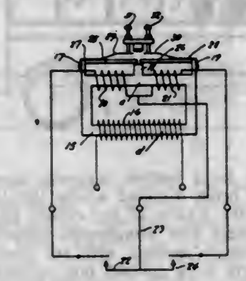


1. In a heel protector, the combination of a shoe and a sheet material protector of transparent material molded to shape to fit over the back part of the shoe and the heel, the sides of the shoe and the sides of the heel, the material being molded to fit partly on the front of the heel and partly under the shank of the shoe, said material being of a resilient nature sufficient to hold the protector on the heel and back of the shoe.

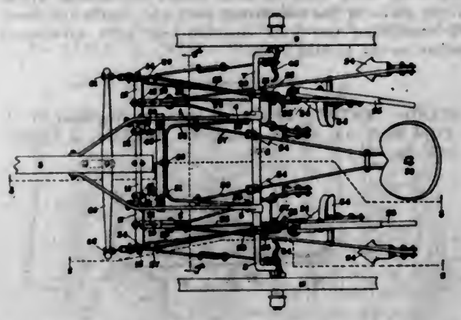


1,622,860. RUBBER-SOLE SHOE. DAVID A. CUTLER, Wollaston, Mass., assignor to Alfred Hale Rubber Company, Atlantic, Mass., a Corporation of Massachusetts. Filed Sept. 22, 1926. Serial No. 136,911. 1 Claim. (Cl. 36—14.)

A shoe having an upper of leather, a rubber latex-treated strip of material secured thereto and extending above the welt line, and a sole of unvulcanized crepe rubber secured to the rubber latex-treated strip of material with a permanent and homogeneous union of the latex.

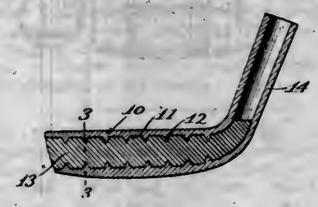


1,622,861. ORDNANCE BREECH MECHANISM. ARTHUR TREVOR DAWSON and GEORGE THOMAS BUCKHAM, Westminster, London, England, assignors to Vickers Limited, Westminster, London, England. Filed Aug. 25, 1926, Serial No. 131,490, and in Great Britain Sept. 16, 1925. 3 Claims. (Cl. 89—4.)



1. In ordnance breech mechanism of the vertically sliding block type for semi-automatic guns convertible at will into quick-firing guns, the combination of two springs one of which is in action during both the semi-automatic and the quick-firing operations and which is of such a strength as to approximately balance the weight of the breech block, and the second spring is in action together with the former spring during the semi-automatic operation only.

1,622,862. ELECTRIC AUDIBLE SIGNAL. FRED E. DETMERS, Los Angeles, Calif. Filed May 12, 1925. Serial No. 29,720. 2 Claims. (Cl. 177—7.)



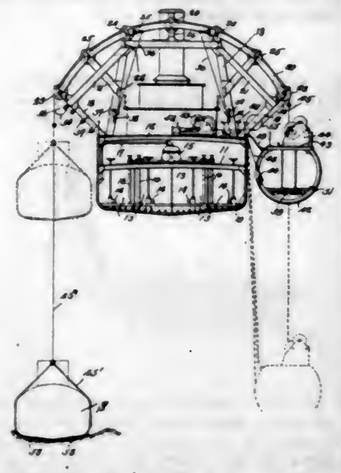
1. In a signal, a magnetic core, a primary winding thereon, a plurality of secondary windings on said core spaced from said primary winding, and spaced from each other, magnetic core projections extending from said magnetic core adjacent the ends of said secondary winding, a plurality of resiliently mounted movable armatures corresponding to said plurality of secondary windings extending across the corresponding pairs of magnetic core projections, and disposed with respect thereto and cooperating therewith so as each to form a magnetic shunt across the portion of the magnetic core surrounded by the corresponding secondary winding, connectors corresponding to each of said secondary windings, and a permanently closed electrical connection between the corresponding connectors and each of said secondary windings; said connectors being adapted to be connected with suitable low tension signalling circuits, and said primary winding being adapted to be directly and permanently connected with a high tension alternating current supply circuit.

1,622,863. CULTIVATOR. FREDERICK J. FARRINGTON, Omaha, Nebr., assignor to Deere & Company, Moline, Ill., a Corporation of Illinois. Filed Mar. 23, 1925. Serial No. 17,485. 5 Claims. (Cl. 97—147.)

1. In a cultivator, the combination with the main frame, an axle and supporting wheels, of a horizontally disposed arch pivotally supported at its rear ends on the frame, a seat frame rockably supported on the axle and pivotally connected to said arch forward of the pivot of the latter, a seat on the rear of said frame, a rocking member extending transversely beneath the main frame and pivotally mounted centrally on said arch, beams carrying gangs of cultivating devices supported on the main frame, and means connecting said member with said beams.

1,622,864. GOLF PUTTER AND METHOD OF FORMING THE SAME. DAVID H. FINDLAY, Pasadena, Calif. Filed Sept. 22, 1926. Serial No. 137,043. 2 Claims. (Cl. 273—77.)

1. The method of making a golf club head which consists in casting a shell having a neck portion extending therefrom, allowing the same to cool, heating the same to a temperature just below the melting point of the metal forming the shell, pouring heavy metal into the shell through the neck to said body portion, and allowing the shell and heavy metal to cool.



1,622,865. CULTIVATOR STANDARD. GEORGE O. FRANKE, Thrall, Tex., assignor to Albert E. Probst and P. A. Franke, Thrall, Tex. Filed June 20, 1925. Serial No. 38,529. 1 Claim. (Cl. 97—198.1.)

A device for connecting a shovel standard to a beam, comprising a clamping block having a transverse groove on its lower side and longitudinal U-shaped groove on its upper side, inwardly extending flanges carried by the upper side forming a channel with the U-groove, a slotted tail piece adapted to slide in said channel, a bolt engaging the block and the tail piece through said slot for adjustably clamping the tail piece to the block, a head at the free end of the tail piece adapted to carry a shovel standard, the block having openings disposed at the ends and on opposite sides of the transverse groove, U-shaped bolts adapted to engage through said openings for clamping the block to a beam.

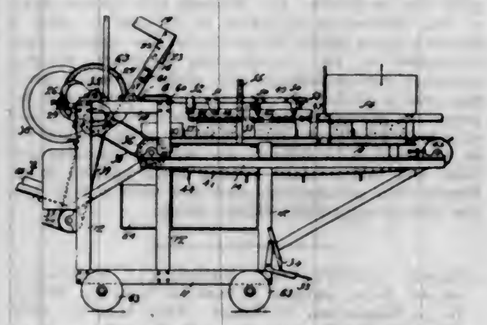
1,622,866. DEVICE FOR RAISING SUNKEN SUBMARINES. LEONARD T. GARDNER, Baltimore, Md., assignor of one-half to Charles A. Jording, Baltimore, Md. Filed Apr. 7, 1926. Serial No. 100,211. 22 Claims. (Cl. 114—53.)

1. A device of the kind described, including a ship having a hull, a plurality of cables extending athwartships of said hull, sheaves supported by the hull on

which said cables run, a submergible pontoon counterweight at one side of said hull, means carried by the pontoon and having one end of each cable connected

thereto, flood valves for said pontoon controllable from the ship, and means controllable from the ship for expelling admitted water from the pontoon.

1,622,867. RESILIENT ROAD WHEEL. HUGO C. GIBSON, Philadelphia, Pa. Filed Mar. 24, 1926. Serial No. 96,939. 8 Claims. (Cl. 152—44.)



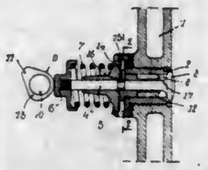
4. In a device of the character stated, a road wheel comprising a hub, a hub flange connected thereto, a wheel plate, an inner ring secured to said hub flange, a bowl shaped structure secured to said wheel plate, a star shaped disc mounted on said hub so as to rotate in unison therewith but adapted to slide longitudinally thereon, an abutment on the outer portion of said hub, and a spring interposed between said abutment and said star shaped disc, said inner surface of said bowl being provided with alternating flats and flutes, and the juxtaposed surface of said disc being provided with alternating noses and flutes.

1,622,868. LIFEGUARD OR OBSTRUCTION REMOVER FOR MOTOR PROPELLED AND SIMILAR VEHICLES. BEATRICE LYDIA GRAFHAM, Catford, England. Filed Dec. 16, 1925, Serial No. 75,677, and in Great Britain Oct. 15, 1925. 8 Claims. (Cl. 293—54.)

1. In a guard for a vehicle, vertically movable members capable of being disposed across the track to be passed over by the wheels of the vehicle and provided at their lower edges with attachments adapted to serve as squeegees when in contact with the surface of the road, the members being pressed into contact with the road surface by springs, and means for moving the members away from the road surface in opposition to the springs, for the purpose specified.

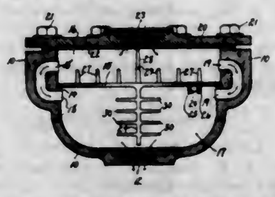
1,622,869. BRICK HANDLING AND CLEANING MACHINE. JIM A. GRANT and GEORGE A. LOWRY, New York, N. Y. Filed May 15, 1926. Serial No. 109,262. 8 Claims. (Cl. 125—26.)

1. In a brick cleaning machine, the combination of an oscillating brick cleaning tool, means for moving bricks in the plane of the oscillating tool, and means for forcibly contacting the brick cleaning tool with extraneous matter on the moving brick.



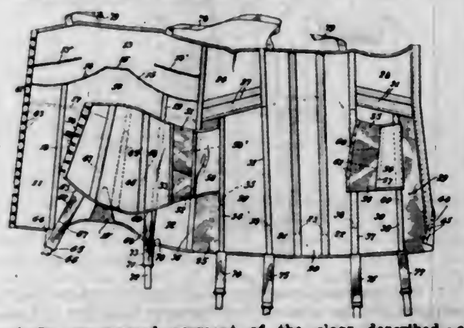
1,622,870. KNIFE. EDWARD P. HULSE, Westfield, N. J. Filed Sept. 14, 1926. Serial No. 135,310. 2 Claims. (Cl. 30—10.)

1. As a new article of manufacture, a knife comprising a blade and a handle, said handle consisting of a socket portion and a cover portion, means in said socket portion permitting the blade to be inserted endwise therein, interengaging flanges on the said two handle portions for forming the same into a handle for the blade and to



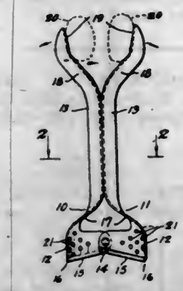
clamp the latter within said socket and means in the latter in engagement with serrations provided in the edge of the blade for preventing accidental longitudinal movement thereof.

1,622,871. METHOD AND MEANS FOR THE IGNITION IN INTERNAL-COMBUSTION ENGINES. MARIUS JEAN-BAPTISTE BARBAROU, Paris, France. Filed June 10, 1925, Serial No. 36,238, and in France July 26, 1924. 6 Claims. (Cl. 123—143.)



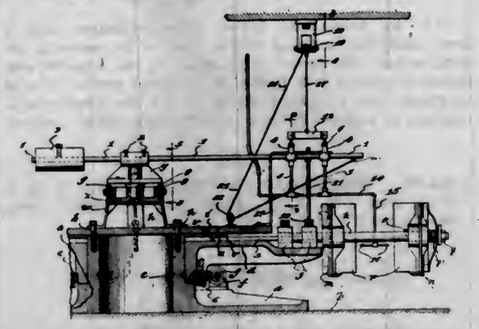
3. A catalytic ignition device for internal combustion engines comprising a chamber containing the catalyst and communicating with the engine cylinder, a spring controlled valve adapted to automatically afford the communication between said chamber and the engine cylinder during the suction stroke, a cam adapted to open again said valve substantially at the end of the compression stroke, and means whereby communication is afforded between said chamber and the atmosphere during a portion of said suction stroke.

1,622,872. SEPARATOR. BENJAMIN T. JONES, New Haven, Conn. Filed Apr. 24, 1926. Serial No. 104,386. 4 Claims. (Cl. 183—113.)



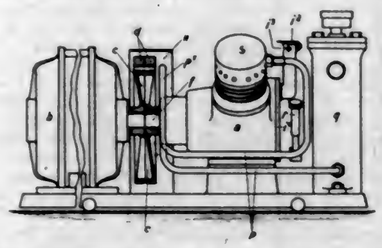
1. A separator, comprising a cup-shaped casing formed with an internal annular shoulder and at the rear with a discharge-opening and at the bottom with a drainage-opening, a baffle-plate removably-seated on said shoulder and formed with baffles, a cap secured to the edge of the casing and formed with a central inlet-opening, and a by-pass extending from front to rear of said baffle-plate.

1,622,873. APPAREL GARMENT. WALDEMAR KOPS, New York, N. Y., assignor to Kops Bros., Inc., a Corporation of New York. Filed Jan. 16, 1926. Serial No. 81,617. 5 Claims. (Cl. 2—27.)



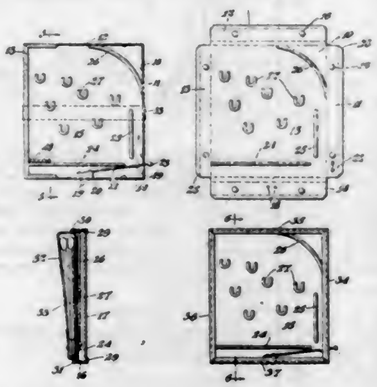
4. In an apparel garment of the class described, a front member, a back member, a side member comprising an inelastic section connected to the back member and an elastic section connected to the front member, a second side member also comprising an inelastic section connected to the back member and an elastic section, means for detachably connecting the free edge of the front member to the last aforesaid elastic section of the side member, and an abdominal support comprising a front member, anchor straps, sets of tension straps, one anchor strap being connected to the inelastic section of the first aforesaid side member and one set of tension straps extending between and connecting this anchor strap with the adjacent edge of the front member of the abdominal support, while the other anchor strap is connected to the inelastic section of the last aforesaid side member and the other set of tension straps is secured to this anchor strap, and means for connecting the free edge of the front member of the abdominal support to the last aforesaid set of tension straps to provide a yielding support for the abdomen of the wearer.

1,622,874. GRAPEFRUIT CORER. JOHN KOVATS, Bridgeport, Conn., assignor to Lorraine Metal Manufacturing Company, Bridgeport, Conn., a Corporation of New York. Filed Aug. 18, 1926. Serial No. 129,987. 10 Claims. (Cl. 146—3.)



1. A grapefruit corer comprising a pair of similar members which in general configuration are substantially T-shaped with the cross portion curved to form a concavo-convex portion provided with a cutting edge and the longitudinal portion forming a handle, and pivotal means connecting the free ends of said curved portions of the members about which the cutting edges may be swung toward and from each other.

1,622,875. MOLDING MACHINE. HARRY S. LEE, Plymouth, Mich. Filed Jan. 31, 1925. Serial No. 5,988. 7 Claims. (Cl. 22—77.)

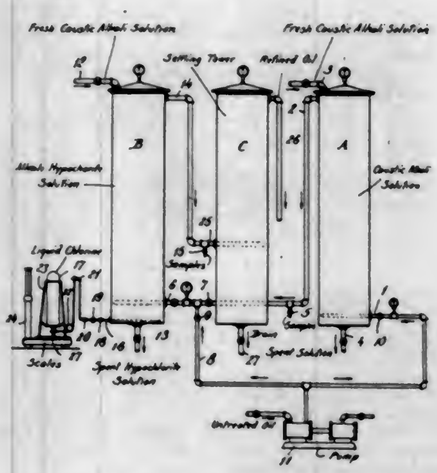


1. In a molding apparatus, the combination of a pair of mold section carriers which have straight relative movement toward and away from each other in closing and opening, and mechanical means having connection with one of the mold section carriers at the geometric center for applying the thrust and the draft in closing and opening the sections.

1,622,876. AIR PUMP. HERMANN LEO, Cera-Reuss, Germany. Filed June 13, 1925. Serial No. 36,917. 2 Claims. (Cl. 230—6.)

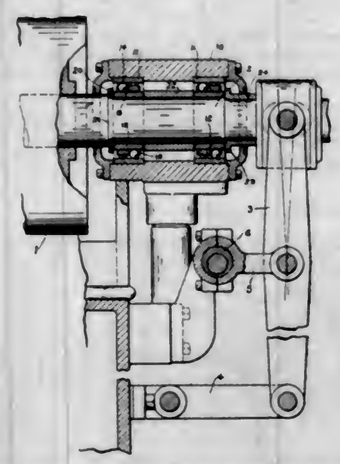
1. In a motor-operated air pump, a fan for coupling pump and motor, a weighted part on said fan for carrying it over the dead center, an oil containing chamber into which one end of the pump shaft extends, a disc on said shaft within said chamber, an eccentrically arranged bolt on said disc, a ball bearing on said bolt, an operating member on said ball bearing, a head on said operating member, a pump cylinder piston and a bolt on said piston to which said head is movably engaged, and a means for cooling the parts.

1,622,877. AMUSEMENT DEVICE. MARGARET H. McMANN, New York, N. Y. Filed May 13, 1926. Serial No. 108,768. 7 Claims. (Cl. 273—119.)



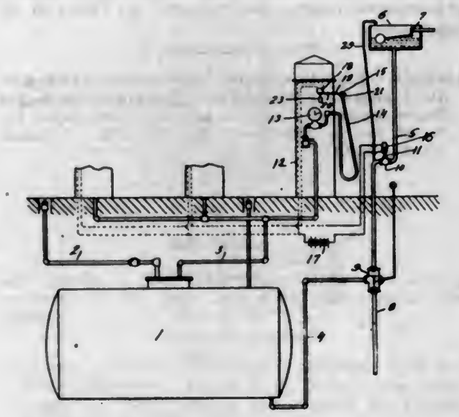
1. In an amusement device the combination with a sheet stamping having a folded portion for securing objects to one side thereof, of a game on the opposite side having a playing area formed by a folded portion of said stamping, and a transparent cover for the playing area retained in position by said second named folded portion.

1,622,878. WIRE-STRAP FASTENER. EDWIN F. MURDOCK, New York, N. Y. Filed Aug. 29, 1925. Serial No. 53,248. 2 Claims. (Cl. 24—29.)



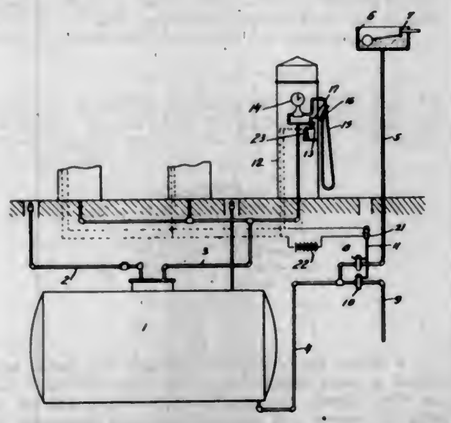
1. A separable fastener for the free ends of round wire straps said fastener comprising a flattened helical section the convolutions whereof are spaced apart and form a transversely elongated passage therethrough, the short diameter of said passage approximating the width of the strap to be secured thereby, and the longer diameter of said passage being approximately twice the diameter of said strap.

1,622,879. REFINING OILS. HARRISON O. PARKER, Tulsa, Okla., assignor to The Mathieson Alkali Works, New York, N. Y., a Corporation of Virginia. Filed Jan. 22, 1925. Serial No. 3,983. 4 Claims. (Cl. 196—42.)



1. An improved method of refining hydrocarbon oils in a continuous manner which comprises passing the oil through a body of aqueous hypochlorite solution containing an excess of caustic alkali, introducing chlorine into the solution in the proximity of the point at which the oil is introduced, whereby additional quantities of hypochlorite are formed and the oil is subjected to that portion of the solution containing the highest concentration of hypochlorite first.

1,622,880. RADIAL BEARING. HIRAM A. PERKINS, Rochester, N. Y., assignor to American Woodworking Machinery Company, Rochester, N. Y., a Corporation of Pennsylvania. Filed Feb. 18, 1925. Serial No. 10,059. 5 Claims. (Cl. 308—180.)

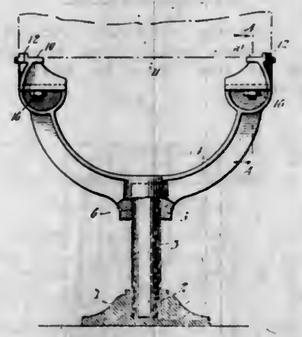


1. The combination with a rotary spindle and means for reciprocating the same intermittently, of a series of balls, and inner and outer ball engaging members having straight surfaces permitting movement of the balls endwise of the spindle as it reciprocates.

1,622,881. PRESSURE CONTROL FOR HYDRAULIC OIL STORING AND DELIVERING SYSTEMS. WILLIAM J. PETER, New York, N. Y. Filed Oct. 16, 1925. Serial No. 62,925. 23 Claims. (Cl. 221—67.)

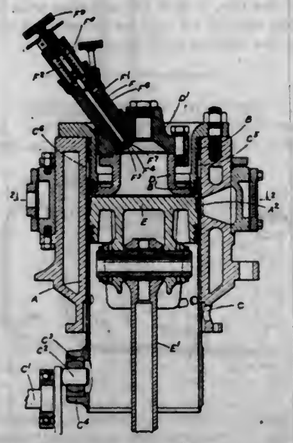
14. In an oil storage and delivery system, the combination of a tank, an oil delivery hose receiving oil from the tank, a source of pressure designed to be connected with and disconnected from the tank, a support for the hose when not in use, and means controlled by the support for disconnecting the source of pressure from the tank when the hose is on the support.

1,622,882. PRESSURE CONTROL FOR HYDRAULIC OIL STORING AND DELIVERING SYSTEMS. WILLIAM J. PETER, New York, N. Y. Filed Oct. 16, 1925. Serial No. 62,926. 8 Claims. (Cl. 221—67.)



1. In an oil storage and delivery system, the combination of a tank, an oil delivery hose receiving oil from the tank, a source of pressure designed to be connected with and disconnected from the tank, a swinging arm for connecting the source of pressure with and disconnecting it from the tank, said arm acting when swung into such position that the pressure is disconnected as a support for the hose, and means rendering said arm incapable of supporting the hose when the arm is swung into such position that the pressure is connected.

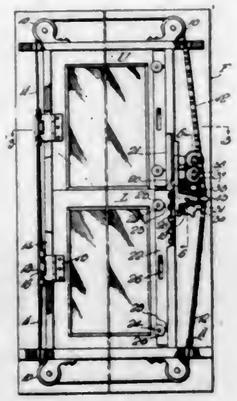
1,622,883. MERCURYLESS HAIR-SECRETING PROCESS FOR FELT-MAKING. CHARLES PICHARD and EMILE PICHARD, Paris, France. Filed Feb. 12, 1926. Serial No. 87,977, and in France Feb. 28, 1925. 4 Claims. (Cl. 8—21.)



1. A carroting process, comprising the step of treating hair with a substance containing urea.

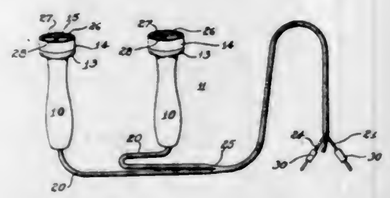
1,622,884. BOILER STAND. OSGOOD M. REDLON, Bath, Me. Filed Feb. 6, 1926. Serial No. 86,620. 1 Claim. (Cl. 248—41.)

A stand of the character described, comprising a U-bracket, means for supporting the U-bracket, flat plates at the ends of the U-bracket having tapering edges, boiler supporting brackets having grooves in their under faces fitting the plates, bolts projected through the boiler supporting brackets and through the plates, nuts on said bolts, and one of said parts having longitudinal slots accommodating the bolts connected thereby whereby the boiler supporting brackets are capable of adjustment toward and away from each other.



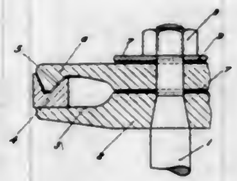
1,622,885. INTERNAL-COMBUSTION ENGINE. HARRY RALPH RICARDO, London, England. Filed Apr. 29, 1926, Serial No. 105,558, and in Great Britain May 21, 1925. 12 Claims. (Cl. 123—32.)

1. An internal combustion engine of the liquid fuel injection type including in combination a cylinder, a cylinder head, a piston reciprocating within the cylinder, a



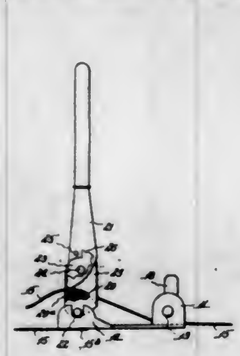
combustion chamber in the cylinder head of substantially circular cross section in a plane at right angles to the axis of the cylinder, the diameter of the combustion chamber where it opens into the cylinder being less than that of the cylinder bore, means for admitting a charge of air to the cylinder, means for causing this charge of air to rotate about the axis of the combustion chamber, and at least one fuel injection device disposed a substantial distance from the axis of the combustion chamber and adapted to deliver a spray the mean direction of which has a substantial component in a direction parallel to the axis of the combustion chamber.

1,622,886. CLOSURE MOUNTING AND OPERATING MEANS. LENHART GEORGE SILLER, Sacramento, Calif. Filed Jan. 28, 1926. Serial No. 84,430. 6 Claims. (Cl. 268—128.)



1. In an operating means for a closure slidable within a frame; cable guides mounted at the four corners of the frame, a flexible line trained around said guides, said line having a chain portion at one side of said frame, means connecting said line to the closure at the other side of the frame, a sprocket mounted at said one side of the frame and meshing at one side of its axis with said chain portion of the line, a rack bar meshing with said sprocket at the other side of its axis and connected to the closure, and means for driving said sprocket.

1,622,887. METHOD OF DIAGNOSTIC ANAYLSIS. WILLIAM SMITH, Yonkers, N. Y. Filed Aug. 3, 1925. Serial No. 47,670. 2 Claims. (Cl. 174—89.)

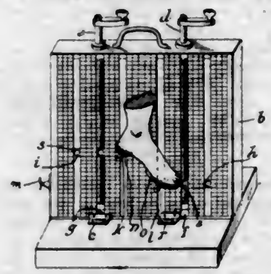


1. The herein described method of diagnostic analysis using a pair of thermocouples and a galvanometer, which consists in applying the thermocouples to two separated healthy tissue portions of the body spaced vertically from the afflicted portion to give a zero reading on the galvanometer, then removing one of said thermocouples and applying it to the portion of the body under observation and note the direction and degree of deflection of the galvanometer, and removing the other thermocouple and applying it to another portion of the body substantially horizontal with the portion under observation to obtain a galvanometric reading and determine the extent of inflammation.

1,622,888. PACKING DEVICE FOR USE WITH PISTONS AND PISTON VALVES. THEODORUS SMITS, The Hague, Netherlands. Filed Mar. 26, 1926, Serial No. 97,745, and in Netherlands Mar. 30, 1925. 4 Claims. (Cl. 74—100.)

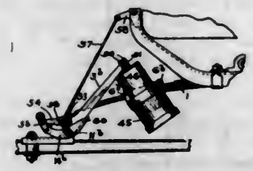
1. A piston or piston valve of the type including a rod, a pair of discs thereon adapted to be secured at different distances from each other, and a resilient split ring between said discs, characterized by the fact that said ring and one of said discs have cooperating conical surfaces arranged at such inclination to the axis of the rod that the movement of said discs towards each other contracts the ring.

1,622,889. BINDING DEVICE FOR MOLDS, ETC. ELMER E. SPEER, Ballston, Va. Filed Feb. 15, 1926. Serial No. 88,418. 5 Claims. (Cl. 24—25.)



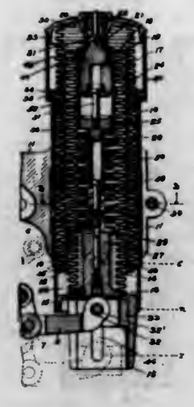
1. A device for connecting the ends of a metal strap around a mold comprising a base-plate having a narrow slot therein through which a looped end of the strap is passed and flattened on said base-plate for connecting it thereto, and a cam pivoted between ears on the base-plate and cooperating therewith for securing the other end of the strap to the device.

1,622,890. APPARATUS FOR MEASURING LIMBS. ANTON THIEL and WILLY SCHMIDT, Bremen, Germany. Filed Aug. 8, 1925, Serial No. 49,030, and in Germany Nov. 22, 1924. 10 Claims. (Cl. 33—3.)



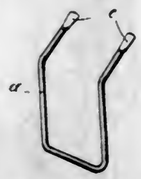
1. An apparatus for measuring the length of a leg, comprising a pedestal, a vertical measurement chart

mounted thereon, a threaded spindle, bearings for said spindle on said pedestal, an adjustable nut mounted on



said spindle, a foot support carried by said nut in proximity to the chart and means for rotating said spindle.

1,622,891. SPRING SUSPENSION SYSTEM FOR MOTOR VEHICLES. FRANK L. O. WADSWORTH, Pittsburgh, Pa. Filed July 30, 1920. Serial No. 400,256. 32 Claims. (Cl. 267—17.)

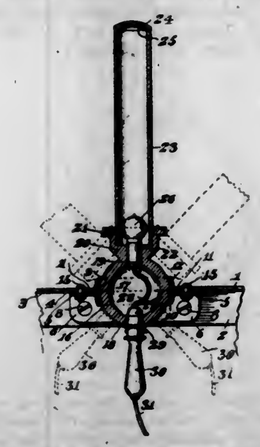


1. In a shock absorber organization for two relatively movable members the combination of a primary spring, a secondary spring, and an irreversible control linkage conjoining the said members with the said springs and acting to impose a concurrently increased flexure thereon whenever the said members are moved from the position of static equilibrium, substantially as described.

1,622,892. ELASTIC SUSPENSION SYSTEM FOR VEHICLES. FRANK L. O. WADSWORTH, Pittsburgh, Pa. Filed July 10, 1922. Serial No. 573,882. 45 Claims. (Cl. 267—65.)

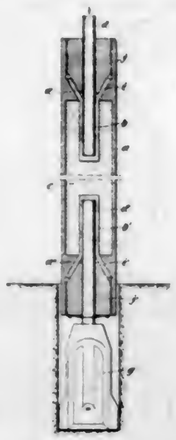
1. In a shock absorber organization for two relatively movable members, the combination of a main spring, means for preventing the reflexing or negative flexure of the said spring beyond the form imposed thereon by the normal load stress, and an elastic connection interposed between said main spring and one of the said members.

1,622,893. RAISING FILLET FOR RAISING MACHINES. CARL WALKER, Calw, Germany. Filed Nov. 7, 1925, Serial No. 67,539, and in Germany Apr. 9, 1925. 1 Claim. (Cl. 26—31.)



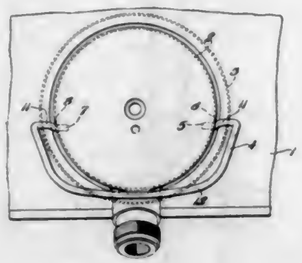
A raising fillet for raising or napping machines, including teeth having flat ends with knife edges lying with their width transversely of the working direction.

1,622,894. STEEL ALLOY. JOSEPH W. WEITZENKORN, Pittsburgh, Pa., assignor to Molybdenum Corporation of America, Pittsburgh, Pa., a Corporation of Delaware Filed Mar. 30, 1926. Serial No. 98,617. 1 Claim. (Cl. 75—1.)



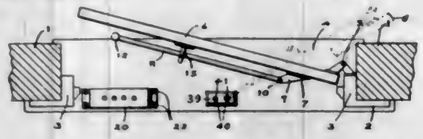
A steel alloy consisting of an appreciable and effective amount of carbon up to about 2.50 per cent, from about .50 to 1.45 per cent chromium, from about .10 to .50 per cent vanadium, and an appreciable and effective amount of molybdenum up to about .48 per cent, the remainder being iron except for the usual amounts of other elements present as impurities and as incidental to manufacturing processes.

1,622,895. DIRECTION INDICATOR. WILLIAM P. WIEMANN, Pittsburgh, Pa., assignor to The Wiemann Co., Pittsburgh, Pa. Filed May 19, 1926. Serial No. 110,218. 7 Claims. (Cl. 116—47.)



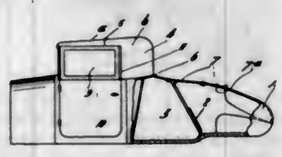
1. An automobile directional indicator comprising a vertically disposed universal bearing joint adapted to be secured to and extend above the top of the body of the automobile and including a movable section extending above and depending below such top, a visible column arranged above such top and secured to the movable section and shiftable to angular positions with respect to the longitudinal axis of the automobile, and an operating handle carried by said section and depending below such top.

1,622,896. DEVICE FOR DRILLING OR CHISELING AWAY ROCK. KARL PRINTZ ZU LÖWENSTEIN, Berlin, Germany. Filed Oct. 17, 1925. Serial No. 63,104. 1 Claim. (Cl. 255—28.)



A device for drilling or chiseling away rock, comprising, in combination, a tube having a chamber formed therein, packed stoppers each having a bore therein arranged within the opposite ends of said tubes, pistons extending through the bores of said stoppers into the chamber formed within said tube, the tube adapted to be filled completely with a liquid; and elastic bags enclosing the inwardly projecting parts of said pistons and being fastened at their other ends, substantially as set forth.

1,622,897. SPEEDOMETER-FASTENING MEANS. THOMAS DONALD ADAIR, Jr., Quincy, Mass., assignor to Standard Thermometer Company, Portland, Me., a Corporation of Maine. Filed Nov. 9, 1925. Serial No. 68,039. 1 Claim. (Cl. 248—30.)

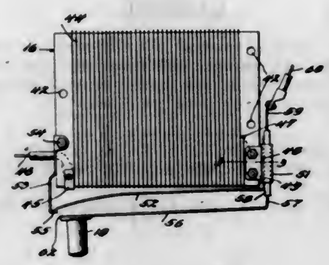


Speedometer fastening means for securing a speedometer in an instrument board having, in combination, an instrument casing provided with pivot holes, a toggle bail comprising a bail-shaped piece of wire having two cam portions and pivot ends, the cam portions extending beyond the pivot portions, being adapted to be sprung into and removed from engagement with pivot holes in the casing, the length of the leverages of the parts being such that after the instrument casing is put in place in the instrument board the bail may be sprung into place with its pivots in the pivot holes in the instrument casing, and then turned to clamp the casing in position on the board.

1,622,898. CLOSURE-MEMBER SECURING AND BOWING DEVICE. VICENTE M. ALCARAZ, San Juan, P. R. Filed May 14, 1926. Serial No. 109,133. 1 Claim. (Cl. 292—271.)

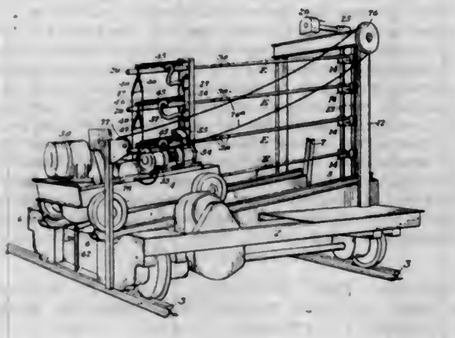
A closure member bower and fastener, comprising a securing arm adapted to be secured at one end to a closure member, a casing adapted to be secured adjacent said closure member and having a plurality of apertures formed through one wall thereof to receive the free end of said arm to hold the closure member in set position, a sliding plate positioned in said casing having each end thereof upturned, one upturned end being formed to set up a hook, a button formed upon the outerside of the other upturned end and exposed through one end of said casing, and a spring element acting upon said plate to cause the hook thereof to engage the free end of said arm when the same is projected through one of said apertures, said arm being disengaged by pressure on said button.

1,622,899. CONSTRUCTION OF MOTOR-ROAD-VEHICLE BODIES. FREDERICK JAMES BARNES, Stourbridge, England. Filed Mar. 11, 1926, Serial No. 94,006, and in Great Britain Apr. 29, 1925. 1 Claim. (Cl. 296—107.)



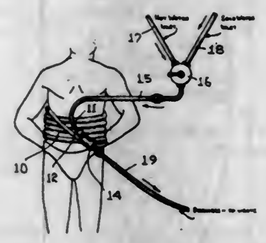
In combination, a vehicle body, a hood hinged thereto for swinging movement between raised and lowered positions, said body having an opening in the top thereof through which said hood moves to and from raised and lowered positions, a door for said opening, a dicky seat to the rear of said opening, a foot board in advance of said dicky seat, and a connection between said footboard and said door whereby the footboard is moved out of the path of swinging movement of the hood when the door is opened.

1,622,900. BOTTLE-WASHING DEVICE. JOHN BECKER, Warren, Idaho. Filed Aug. 25, 1925. Serial No. 52,347. 1 Claim. (Cl. 15—165.)



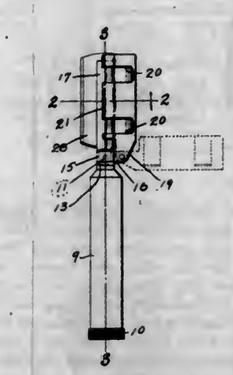
A device for the purpose indicated comprising a staff and a connected brush carrying frame, the latter consisting of pivotally connected bars and brushes mounted thereon, a cap member, an operative connection between the cap member and the brush carrying frame to effect folding or extended movement of the bars of the brush carrying frame upon its movement relative to the staff, the bars comprised by the brush carrying frame being L-shape in cross-section with their contacting flanges pivotally connected and having notched seating brackets set in the corners formed by their flanges, and bruahes provided with twisted wire stems seated in the notches of said brackets.

1,622,901. PORTABLE SEWING MACHINE. DAVID BESWICK, Brooklyn, N. Y. Filed Mar. 31, 1925. Serial No. 19,726. 6 Claims. (Cl. 201—48.)



6. In a rheostat, in combination, a series of convolutions of resistance conductor having intermediate exposed portions forming a longitudinal contact surface, a flexible conductor extending along but normally curved away from said surface and adapted to be pressed successively into engagement with said convolutions, a stop retaining said flexible conductor close to said surface, a breaker strip normally insulated from said flexible and resistance conductors and connected to a source of current, and means to press said breaker strip into engagement with said flexible conductor to cause it to contact with said contact surface for the purpose described.

1,622,902. MATERIAL-HANDLING APPARATUS. EDGAR E. BROSIUS, Pittsburgh, Pa. Filed May 13, 1925. Serial No. 29,958. 18 Claims. (Cl. 214—24.)

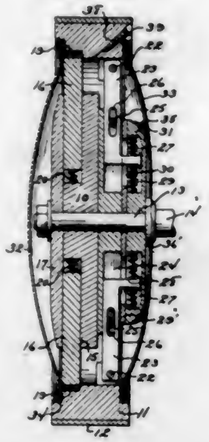


1. A furnace cleaning machine, comprising a plurality of cleaning elements, means for simultaneously operating all of said elements, and yielding means interconnecting said cleaning elements to permit relative movement thereof.

1,622,903. MEDICAL APPLIANCE. JOHN L. COX, Plainview, Nebr. Filed Oct. 20, 1925. Serial No. 63,665. 1 Claim. (Cl. 128—258.)

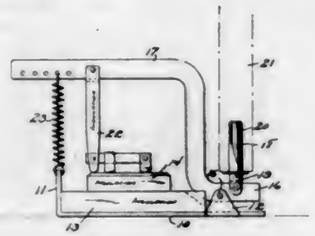
A medical appliance comprising a coil for application in surrounding relation to the human form, the terminals of the coil being crossed, a combined closing and holding means connecting said terminals, and supply and discharge tubes detachably connected with said terminals.

1,622,904. COMBINED SAFETY RAZOR AND BLADE SHARPENER. THOMAS B. CREWS, St. Louis, Mo. Filed Apr. 13, 1925. Serial No. 22,652. 12 Claims. (Cl. 30—12.)



1. A combined safety razor and blade sharpener comprising a blade holder, a shield carried by said holder, a handle removably secured to said holder, a guard detachably secured over said holder and shield, and means for detachably securing said handle to said guard.

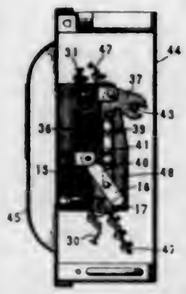
1,622,905. SPRING WHEEL. FRANK W. DECKER, Santa Barbara, Calif. Filed Oct. 19, 1925, Serial No. 63,492. Renewed Dec. 9, 1926. 5 Claims. (Cl. 152—28.)



1. A wheel comprising a hub, a rim surrounding and paced from the hub, spokes having their inner ends guided in the hub, springs to yieldingly force the spokes outwardly, means operatively associating the outer ends of

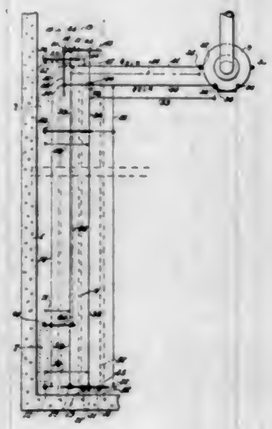
the spokes and rim, levers having their outer ends pivotally connected to the rim and oppositely disposed com-

pression springs operatively associating the inner ends of the levers and hub and disks carried by the rim and enclosing the hub.



1,622,906. SWITCH. WALTER E. FREESE, Tulare, Calif. Filed July 31, 1925. Serial No. 47,339. 1 Claim. (Cl. 200—52.)

A device of the character described including a base plate having one end extending upwardly and perforated, spaced apertured ears extending upwardly from opposite sides of the base at the other end thereof, an insulated block mounted upon the base plate and having one end arranged against the upwardly extending end of the base, a knife switch mounted upon the insulated block, a substantially Z-shaped lever having one arm pivotally mounted between the spaced perforated ears and the other arm extending above the knife switch, a coil spring having one end connected to the upwardly extending end of the base plate and the other end adjustably connected to the second arm of the lever, means forming operative connection between the knife switch and the second arm of the lever, and a weighted member having pivotal connection with the first arm of the lever at a point adjacent the pivot point of the lever as and for the purpose specified.

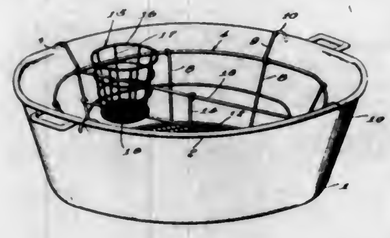


1,622,907. ELECTRIC SWITCH. BENJAMIN E. GETCHELL, Plainville, Conn., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn., a Corporation of Connecticut. Filed Apr. 6, 1925. Serial No. 20,931. 13 Claims. (Cl. 200—116.)

7. A switch construction including a spring-pressed switch member, an operating member, a toggle connection between said switch member and said operating member, a roller on said toggle connection, and a thermostatic mem-

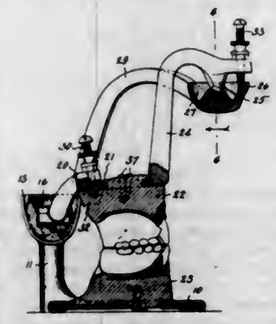
ber serving as a bearing and a stop for said roller on normal circuit conditions and to move said roller to open the switch on overload conditions.

1,622,908. DEVICE FOR MEASURING LENGTHS OF PIPES. GEORGE W. HALL, Hartford, Conn. Filed Apr. 28, 1926. Serial No. 105,149. 4 Claims. (Cl. 33—174.)



1. A device for the purpose described comprising a plurality of members which are adjustable relative to each other, means for adjustably securing the same together, the ends of the members each having sharpened points for engaging the floor joists of a building for retaining the adjustable members in place, depending rods on the said members, a transversely disposed rod on the depending rods, slidable blocks on the said transversely disposed rod, set screws for securing the blocks to said transversely disposed rod, the set screws being formed for attaching the ring ends of a tape line thereto, whereby when a plurality of said structures are attached, as described, the center lines of piping installation may be located and their lengths determined.

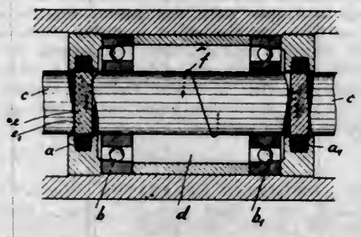
1,622,909. DISH DRAINER. MINNIE E. HATCHER. Tyler, Ala. Filed Nov. 16, 1925. Serial No. 69,385. 1 Claim. (Cl. 141—11.)



A dish drainer having an open-work body made up of a plurality of rings and rods interconnecting the rings for bracing them and holding them in spaced relation, a bottom of wire mesh secured to the lowermost ring, a plurality of vertically aligned transversely extending

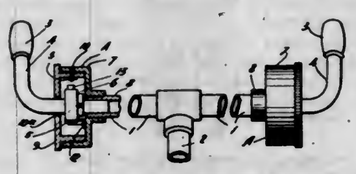
rods connecting opposite portions of the open-work body and serving to brace the body and to divide the interior of the same into compartments, and a rack carried by

said transverse brace rods, a portion of one of said transverse brace rods extending through the rack to divide the same into compartments.



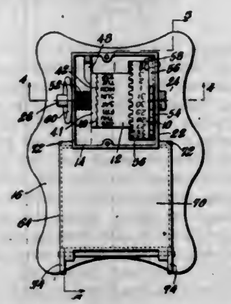
1,622,910. DENTAL RELATOR. JOSEPH HOMER, New York, N. Y. Filed July 13, 1925. Serial No. 43,366. 2 Claims. (Cl. 32—1.)

1. In a dental relator a fixed frame, a movable frame, said movable frame having a pair of pivot members at the rear thereof mounted in a plane above the teeth of jaws carried by the fixed frame, said movable frame also having a pivot member disposed forwardly and at a substantially higher level than the rear pivot members, and bearing members carried by the fixed frame correspondingly disposed thereon to co-operate with the pivot members of the movable frame, the two rear bearing members being appreciably higher than the teeth mounted on said stationary frame and formed as pockets open at the top and one side while the forward bearing member is disposed above the rear bearing members and is formed open at the top, and a guiding lining member positioned in each socket adapted to guide said pivot members as they swing and as they move back and forth during the functioning of the movable frame whereby jaws mounted on the respective frames can be examined and observed and manipulated from the front of the device without difficulty.



1,622,911. PACKING OF ROTARY SHAFTS. CARL HUTH, Stuttgart, Germany, assignor to The Firm Feodor Burgmann, Dresden-Laubegast, Germany. Filed Sept. 29, 1925, Serial No. 59,397, and in Germany May 13, 1924. 3 Claims. (Cl. 288—1.)

1. A packing ring for rotary shafts, the inner surface of which presents a woven texture of fibrous material, having warp and weft threads, the warp threads being more prominent than the weft threads said threads being arranged in effective position, obliquely to the axis



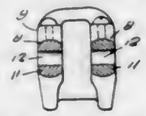
of the shaft, so as to helically surround the latter and to form a net work of channels, the latter being adapted to act as a labyrinth packing.

1,622,912. SHOCK-ABSORBING DEVICE FOR THE HANDLE BARS OF CYCLES AND THE LIKE. JOSEPH JOHNSON, Birmingham, England. Filed Sept. 8, 1925. Serial No. 55,134, and in Great Britain Mar. 25, 1925. 2 Claims. (Cl. 208—125.)

1. In a vehicle steering apparatus, a steering column, a handle bar rigidly secured to said steering column, said handle bar being hollow throughout at least a portion of its length, a hand grip member including a portion axially alined with, snugly fitting within, and rotatable with respect to said handle bar, a housing mounted rigidly on said handle bar and surrounding a portion of said hand grip member, and a spring within said housing connected at one end to said housing and at its other end to said hand grip member.

1,622,913. INDICATING DEVICE. JOHN KARAGUNIS, Newburyport, Mass. Filed Dec. 31, 1925. Serial No. 78,681. 4 Claims. (Cl. 40—112.)

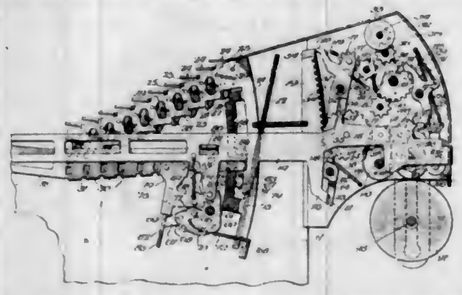
2. An indicating device comprising a rotatable member provided with numbers on the periphery thereof, a second rotatable member provided on its periphery with indications of the days of the week, a disk capable of sliding and oscillatory movement on the shaft of one of said members and having ratchet teeth formed thereon arranged to engage cooperating ratchet teeth on said member to rotate said member step by step when said



disk is oscillated, means for oscillating said disk, means comprising intermeshing gear teeth on the adjacent rims of said rotatable members for maintaining said members in definite relation to one another, means for moving one of said members laterally with respect to the other to disengage said gear teeth and permit rotation of one member relative to the other, a casing enclosing said rotatable members and provided with means for exposing a sufficient portion of the periphery of each rotatable member to view to render visible a number representing the day of the month and one of the indications of the days of the week.

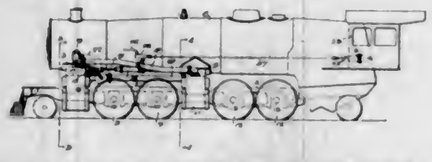
1,622,914. SWIMMING APPARATUS. HERMAN KINDT, Baltimore, Md. Filed May 17, 1926. Serial No. 109,725. 2 Claims. (Cl. 9—21.)

1. A swimming apparatus of the character described, float members adapted to be disposed upon the outer sides of the legs below the knee and provided with securing means, said float members being of hollow metallic form and provided with downwardly and outwardly flaring funnel-like rigid elements constituting propelling means when the legs are moved up and down.



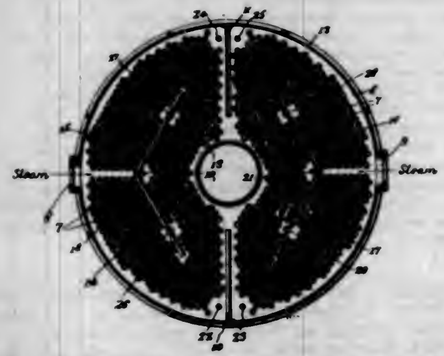
1,622,915. STONE-DRESSING TOOL. GUS MAEHL, Los Angeles, Calif. Filed Mar. 15, 1926. Serial No. 94,845. 1 Claim. (Cl. 125—37.)

A stone dressing tool comprising a body including a handle having a forked head at its outer end, the arms of the fork being provided with bearing block receiving notches opening through the outer ends of said arms, the upper and lower walls of said notches being curved transversely and spaced apart a distance greater than the thickness of the side walls of the fork, bearing blocks fitted into said recesses and having convex edges cooperating with the surface walls of said notches, a shaft extending between the forked arms and having its ends journaled for rotation in the bearing openings in said blocks, cover plates for the outer sides of the bearing openings in said blocks, and means for swingably connecting said plates with the arms of said head.



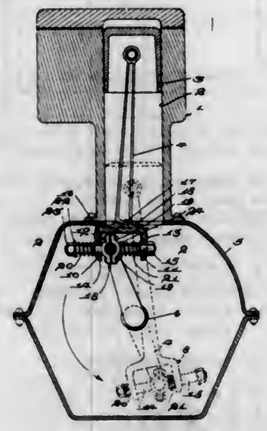
1,622,916. COMPUTER. OTTO MALCHER, Chicago, Ill. Filed Jan. 20, 1919. Serial No. 271,993. 55 Claims. (Cl. 235—59.)

1. In a computing device, an operating member, an inclined key support carried by said operating member, a plurality of keys pivotally mounted on said key support, stops arranged to be engaged by said keys when said operating member is moved, means for holding said keys out of position to engage said stops each key comprising



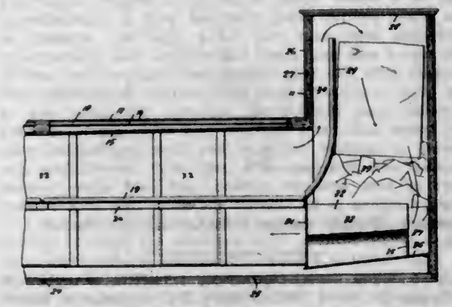
means for swinging it into position to engage its stop when said key is depressed, and means for preventing said key from swinging out of engaging position while said operating member is being moved by said key.

1,622,917. LOCOMOTIVE. WILLIAM J. MCCARROLL, Melrose Park, Pa., assignor to The Baldwin Locomotive Works, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Sept. 14, 1925. Serial No. 56,310. 2 Claims. (Cl. 105—39.)



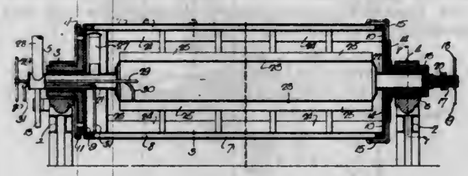
1. In a locomotive, a single rigidly constructed frame; two transversely disposed pairs of engine cylinders spaced apart and rigidly secured to said frame; a boiler supporting saddle rigidly secured to and intermediate of the cylinders of each transversely disposed pair: a boiler rigidly secured to one of said saddles and movably supported on the other of said saddles; rigidly constructed live steam ducts connecting said boiler and said cylinders; and a rigidly constructed exhaust steam duct connecting the pairs of transversely disposed cylinders.

1,622,918. EVAPORATOR. IRA MEALIS, New York, N. Y., assignor to Kelvin Engineering Co., Inc., New York, N. Y., a Corporation of Delaware. Filed May 5, 1926. Serial No. 106,922. 5 Claims. (Cl. 159—28.)



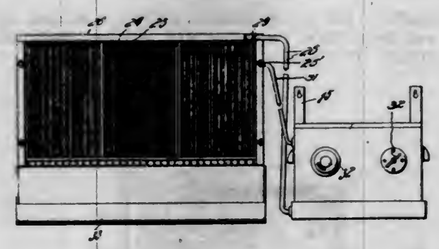
1. A calandria belt for evaporators having opposite vapor inlets and including diagonal baffles having their convergent portions disposed in the path of the incoming vapor, whereby to divide it into oppositely flowing circumferential streams, and lateral baffles disposed to catch said circumferential streams and to divert the same to the opposite sides of said diagonal baffles.

1,622,919. AUTOMATICALLY-VARIABLE CRANK MOTION. ARTHUR E. MILLER, Sacramento, Calif. Filed May 29, 1926. Serial No. 112,554. 6 Claims. (Cl. 74—38.)



1. The combination with a crank shaft having at least one of the usual cranks and a connecting rod for each crank, of means for connecting the connecting rod to said crank to automatically vary the effective lever arm between the connecting rod and the crank shaft and comprising a bearing member positively and pivotally connected to the crank and a shiftable connection between the connecting rod and said bearing member and having yieldable means for holding the connecting rod in a predetermined position relative to said bearing member until the load exceeds a predetermined amount.

1,622,920. REFRIGERATOR. SEVERIN B. NORDSKOG, Marshalltown, Iowa. Filed May 14, 1925. Serial No. 30,338. 3 Claims. (Cl. 63—37.)

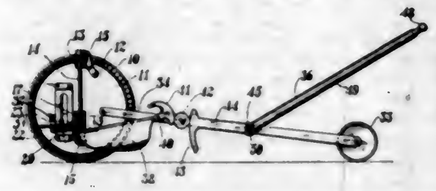


1. In a refrigerator, a single storage cabinet having near each end partitions which divide the cabinet into a central storage compartment, and end ice compartments, each ice compartment having a sloping false bottom, said partitions terminating short of the top of the cabinet to define air passages between the storage and ice compartments, and a tunnel member located upon each false bottom in spaced relation to the end of the cabinet to define an air passage, and having both ends formed with openings for the passage of air therethrough, the tunnel member being adapted to be packed over with cracked ice.

1,622,921. DRIER. CHRISTOPHER OFFENHAUSER, Philadelphia, Pa. Filed May 25, 1922. Serial No. 563,528. 3 Claims. (Cl. 87—13.)

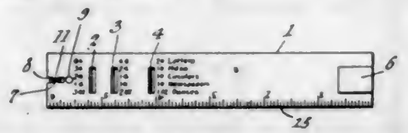
1. The combination in a drier, of a main rotary drum having trunnions; a transverse perforated partition mounted in the drum to form a relatively small collecting chamber; a second stationary drum coaxially positioned within the main drum outside of said chamber; means for introducing steam into the second drum; and a pipe extending through one of the trunnions of the main drum for withdrawing liquid collecting in said chamber.

1,622,922. INSECT DESTROYER. JOHN A. PETERSON and FREDERICK A. TREFFER, Morrill, Kans. Filed Dec. 8, 1923. Serial No. 679,435. 1 Claim. (Cl. 43—112.)



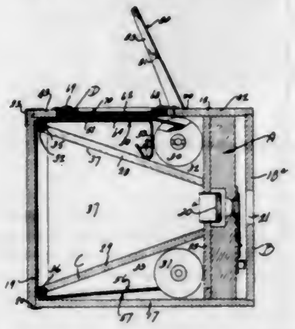
In an insect destroyer, a trough including a flat straight vertical rear wall, having its lower edge curved forwardly and terminating in spaced parallel relation to said wall in the formation of a trough coextensive with the width of said wall, end members closing the ends of said trough and having upwardly inclined edges, a frame of insulating material connected with said wall, primary and secondary circuits including a source of current, metallic frames arranged upon the opposite sides of the insulating frame and supported thereby in spaced parallel relation, said frames including spaced electrodes and adapted to be included in said circuits through the body of an insect contacting the electrodes.

1,622,923. LAWN MOWER. FRANK POLLIFRONE, Brooklyn, N. Y. Filed Nov. 4, 1924. Serial No. 747,740. 2 Claims. (Cl. 56—203.)



1. In a lawn mower, the combination of means whereby the cut grass collector receptacle may be dumped, comprising a receptacle having an integral rearwardly ex-

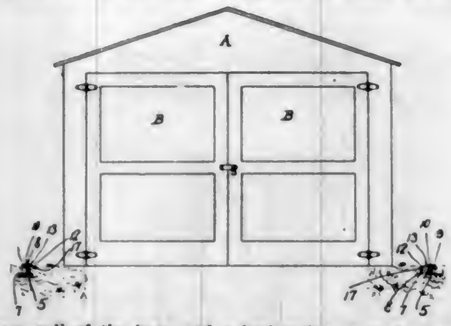
tending gear element, and idler gear meshing with former gear element, a gear segment on the front end of an arm that is pivoted at its rear on a pintle, a



guiding handle extending rearwardly and upwardly from said arm, and a cross bar at the upper end of said handle.

1,622,924. POSTAL SCALE. JAMES KING RICHIE, Butler, Pa. Filed Dec. 6, 1923. Serial No. 678,953. 1 Claim. (Cl. 265—49.)

A weighing scale including a beam, having transversely disposed depressions formed in the upper surface thereof, said depressions defining knife-like projections on the opposite side of the beam providing pivot points, said knife-like projections being spaced various distances apart and arranged adjacent to one end of the beam, one end of the beam having a notch formed therein and having a cut out portion disposed adjacent to the notch defining a bar, a clasp adapted to be pivotally hung on the bar, and a weight at the opposite end of the beam.



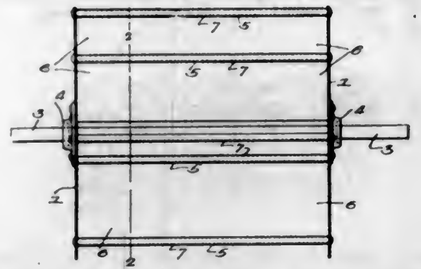
1,622,925. PHOTOGRAPHIC CAMERA. WALTER ELMER ROSS, Hibbs, Pa. Filed Mar. 12, 1925. Serial No. 15,005. 10 Claims. (Cl. 95—1.1.)

1. In a camera the combination of a casing, adapted to receive a film, a strip of paper within the casing adapted to be cooperatively placed with respect to the film received therein, said casing having an opening therein, and a transfer sheet carried across said opening upon which a person may write for recording a message upon the strip of paper pertinent to an exposure of the film.

1,622,926. DOOR CATCH. ARCHIE W. SCOTT, Geneva, Ohio. Filed Feb. 25, 1925. Serial No. 11,458. 1 Claim. (Cl. 292—228.)

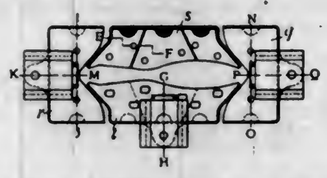
A door catch of the character set forth, comprising a base having its rear wall terminating short of its upper edges, a door engaging element having a pocket in its upper surface at the extremity of an inclined area thereof, a pivotal element supporting the door engaging element on the base with its rear end extending over the

rear wall of the base, and a leaf spring secured at one end to the rear wall of the base with its free end extending over the pivotal element into contact with the under side of the door engaging element.



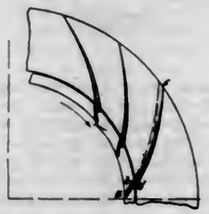
1,622,927. WINDOW-SCREEN HANGER. MANUEL S. SERPA, Rodeo, Calif. Filed May 18, 1925. Serial No. 31,129. 1 Claim. (Cl. 16—172.)

A window screen hanger, comprising an elongated member substantially L-shaped in cross section, one portion thereof being adapted to be secured to the inner face of a screen frame at an upper corner thereof and the other portion being provided with a longitudinally extending slot, said slot being relatively straight at the upper end and lying adjacent to and substantially parallel with the free longitudinal edge of the portion, the lower portion of said slot curving downwardly and inwardly and terminating adjacent the lower end of the frame contacting portion, said other portion further having a passage cut into the free longitudinal edge thereof and merging with said slot intermediate the ends of said straight portion, and said other portion being designed to lie against the inner face of a window frame to slidably engage a supporting pin therein.



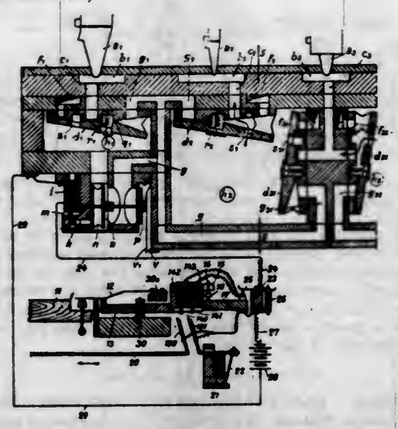
1,622,928. PADDLE FOR DYEING MACHINES. JAMES H. SKITT, Philadelphia, Pa., assignor to Smith, Drum & Company, Philadelphia, Pa., a Partnership consisting of Robert P. Smith and George E. Drum. Filed Feb. 27, 1924. Serial No. 695,581. 2 Claims. (Cl. 259—136.)

1. A paddle wheel comprising end pieces, tie rods securing the end pieces together and arranged in pairs with one rod of each pair further from the axis of the wheel than the other, and plates having beaded opposite



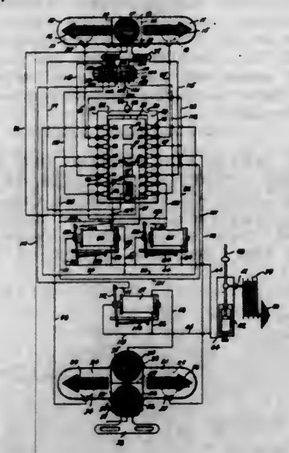
edges through which the tie rods of the respective pairs extend and unbeaded side edges bearing against the said end pieces.

1,622,929. SHOE AND SLIPPER LASTING MACHINE. ERNEST TWEEDALE and JOSEPH HENRY NELSON, Rawtenstall, England. Filed Feb. 3, 1925. Serial No. 6,627, and in Great Britain Feb. 29, 1924. 4 Claims. (Cl. 12—12.)



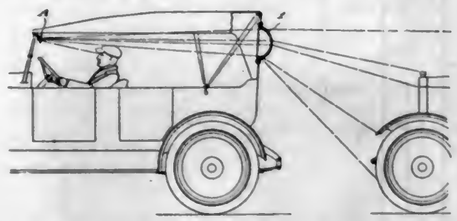
1. In shoe and slipper lasting machines, in combination, a last, with operative means for raising the same, wiper like elements one for each side and one for each end of the last, operative means for moving said elements towards said last, and means co-relating the movements of said last and wipers so that the raising of the last is completed before the inward movement of the wipers is completed.

1,622,930. TURBO MACHINE. THEODOR VON KÁRMÁN, Aachen, Germany, and KARL FROMM, Allentown, Pa. Filed Aug. 21, 1924, Serial No. 733,418, and in Germany Oct. 8, 1921. 6 Claims. (Cl. 230—11.)



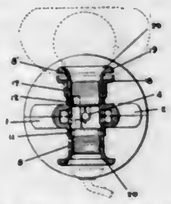
1. In turbo machines, blades co-operating with the fluid passing through the machine, each of said blades being made with uniform continuous contours at either sides of its body and having comparatively small gaps provided therein whereby said blade is divided into sections, said gaps being adapted to pass a comparatively small portion of the fluid from one side of the blade to the other one and to so produce auxiliary streams to draw the main stream between two blades unto and alongside of the contour of the respective blade, said blade sections being carried by circular carrying members.

1,622,931. ORGAN. PAUL WALCKER, Frankfort-on-the-Oder, Germany. Filed July 3, 1922, Serial No. 572,656, and in Germany July 6, 1921. 29 Claims. (Cl. 84—338.)



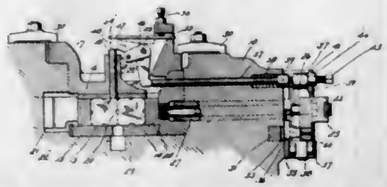
17. In an organ, a double acting pneumatic valve, a channel being in connection with the inflatable part of the said valve, in the channel two openings, and a controlling member for the said openings consisting of a weight in connection with a plate, the said plate being as well adapted to be arranged within the said channel as opposite to the weight at the outside of the said channel.

1,622,932. TRAFFIC INDICATOR. HARRY WARBURTON and GEORGE A. SHERWOOD, Bridgeport, Conn. Filed Aug. 1, 1923. Serial No. 655,056. 11 Claims. (Cl. 177—339.)



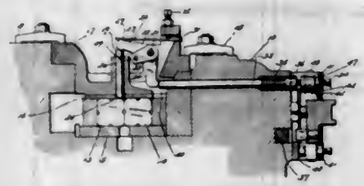
1. In a traffic indicator for motor vehicles, a plurality of similar electrically operated vehicle direction indicators located at the front and rear of the vehicle, an electrically operated tell-tale for each indicator located adjacent the driver's position, each tell-tale corresponding in position and character to its respective indicator, and means for controlling said indicators and tell-tales including a switch for selectively closing circuits for simultaneously operating similar front and rear indicators and their corresponding tell-tales in parallel with the corresponding indicators, said controlling means also including circuits and connections whereby the opening of any indicator circuit will prevent the operation of the corresponding tell-tale.

1,622,933. REAR WINDOW. JAMES H. WEBBER, Carrolltown, Pa. Filed Dec. 11, 1925. Serial No. 74,854. 1 Claim. (Cl. 88—1.)



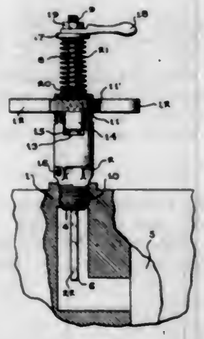
In combination with a motor vehicle having an opening in the rear thereof, of a cup shaped lens adapted to be positioned within said opening with the body of said lens gradually increasing in its thickness from the center, and an annular flange formed on the thickened portion of said lens to provide means whereby to attach the lens within the opening of the vehicle.

1,622,934. ELECTRIC-LIGHTING FIXTURE. ERNEST CANTELO WHITE, New York, N. Y., assignor of one-half to R. Fenton Fisher, Philadelphia, Pa. Filed May 5, 1925. Serial No. 28,060. 9 Claims. (Cl. 240—73.)



1. An electrical lighting fixture comprising a lamp socket, electrical conductors leading thereto, a housing for said socket and conductors formed of moulded insulating material in a plurality of parts, and threaded means adapted to screw onto the outside of the screw-shell of the lamp socket for holding the said housing together in assembled relation.

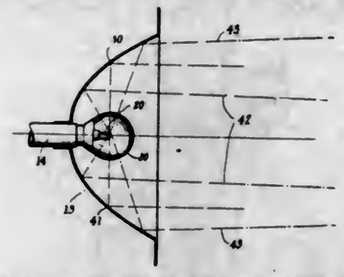
1,622,935. MEANS FOR CUTTING OFF BLANKS IN HEADERS, UPSETTING MACHINES, OR THE LIKE. RICHARD LESTER WILCOX, Waterbury, Conn., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed Jan. 15, 1923. Serial No. 612,836. 10 Claims. (Cl. 10—24.)



2. In a device of the character described, the combination with companion dies that are moved from the feed line to the upsetting line and from the upsetting line to the feed line; means for separating said dies at the feed line, at which tme the wire rod or length is fed therebetween; means for imparting a supplemental movement toward the feed line of that die nearest the upsetting line until it contacts with that portion of the wire rod or length between said dies; and means for maintaining said die in contact with said wire rod or length during the cutting off operation.

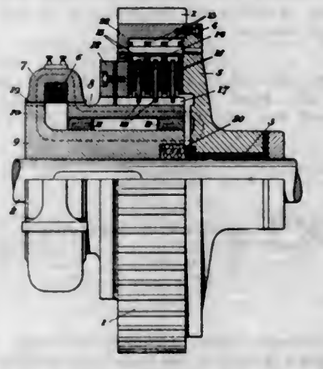
1,622,936. DIE-SEPARATING MEANS. RICHARD LESTER WILCOX, Waterbury, Conn., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed Jan. 15, 1923. Serial No. 612,837. 18 Claims. (Cl. 10—24.)

11. In a heading or upsetting machine, or the like; a plurality of co-operating dies reciprocating between different positions; a die cap or cover; a plurality of members mounted therein for separating the dies at a predetermined position; a yielding part for each of the members imparting movement thereto and connected with the die cap or cover, whereby pressure is applied to the dies at the predetermined position; a shaft mounted in the die cap or cover; a rock member on the shaft for each of the members and engaged thereby; and means, mounted in a part independent of the die cap or cover, by which the rock members are actuated synchronously and the pressure of all of the members upon the dies relaxed at one and the same time.



1,622,937. RELIEF VALVE FOR GAS ENGINES. ERNEST E. YOUNG, Sourlake, Tex. Filed Jan. 8, 1925. Serial No. 1,250. 3 Claims. (Cl. 123—182.)

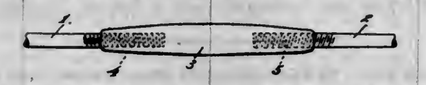
1. A relief valve for gas engines consisting of a valve casing provided with a valve seat, a valve housed within said casing and yieldingly impelled toward said seat, means for imparting angular or turning movement to the valve, and manual means for fixedly disposing said valve in its operating open position, the valve being provided with a stem and the last said means comprising an abutment carried by the stem and movable in a guide opening in the casing, and a member movable axially of the casing and engaging said abutment.



1,622,938. LIGHTING APPARATUS. SAMUEL F. ARBUCKLE, Detroit, Mich., assignor to Monogram Lens Corporation, New York, N. Y., a Corporation of Delaware. Filed Apr. 30, 1924. Serial No. 709,981. 4 Claims. (Cl. 240—41.)

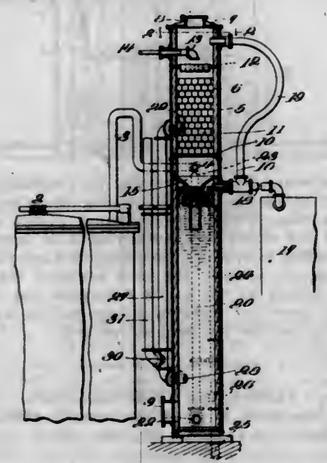
3. In a vehicle light projector, a reflector; a light bulb having two concentrated filaments spaced approximately 1/8 of an inch apart and lying substantially in the focal plane thereof, the lower filament being approximately

5/64 of an inch from the focal point; and means to energize either filament at will to produce two distinct beams, one for distance and one for near illumination.



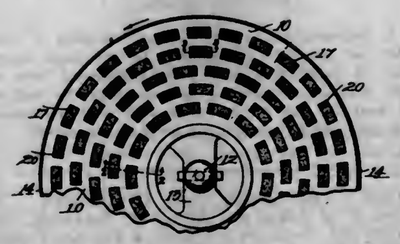
1,622,939. ELECTROMAGNETIC FRICTION CLUTCH. JULIUS BING, Eisenach, Germany, assignor to The Firm Magnet-Werk G. m. b. H. Eisenach, Spezialfabrik für Elektromagnet-Apparate, Eisenach, Thuringia, Germany. Filed Dec. 16, 1924, Serial No. 756,258, and in Germany Dec. 17, 1923. 7 Claims. (Cl. 192—84.)

1. An electromagnetic clutch, comprising a rotary pressure member, and a coaxial rotary abutment member mounted shiftable relatively to each other, two sets of interengaging friction members disposed between said pressure and abutment members and operatively connected respectively therewith for being axially shiftable and non-rotatable thereon, electromagnetic means adapted to shift said pressure and abutment members towards each other and to throw said sets of friction members into frictional engagement with each other, said electromagnetic means comprising two concentric hollow cylindrical bodies of magnetic material and partly surrounded by said friction members and abutment member and rotatable with said abutment member, a ring shaped non-rotatable magnet axially spaced from said friction members and surrounding said cylindrical bodies and having an inner diameter somewhat larger than the outer diameter of both said cylindrical bodies, and an electrical coil adapted to excite said magnet.



1,622,940. ELECTRIC-CABLE COUPLING. JAMES L. BLEVINS, Borderland, W. Va. Filed Aug. 24, 1923. Serial No. 659,076. 1 Claim. (Cl. 191—44.1.)

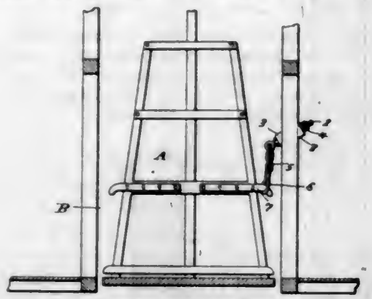
A wire splice comprising two wire ends provided with right and left hand threads respectively, and a union of conductive material having hollow ends respectively right and left hand internally threaded, said union being rounded in cross section having a diameter at the threaded ends approximating that of the wires, and tapering to a thicker portion centrally, for more ready en-



gagement with a wrench, said union being round in cross section and straight so as to form no interference with the gathering of current from the wires at the spliced point.

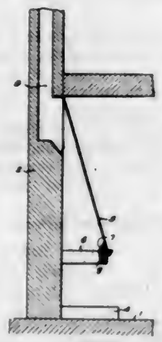
1,622,941. APPARATUS FOR CONDENSING OILS. CHARLES B. BUERGER, Pittsburgh, Pa., assignor to Gulf Refining Company, Pittsburgh, Pa., a Corporation of Texas. Filed July 18, 1924. Serial No. 726,759. 6 Claims. (Cl. 196—140.)

1. A condenser comprising a tower, means for supplying water thereto at a high point, means for withdrawing water therefrom at a low point, the withdrawal means being arranged to maintain a column of water in the tower, means for delivering vapors to be condensed to a point above the top of the column of water in the tower, means for withdrawing condensate from the top of the column and means for equalizing the pressure below and above the point of introduction of the vapors.



1,622,942. BUFFING WHEEL. ELROY A. CHASE, Northfield, Vt. Filed Jan. 17, 1923. Serial No. 613,262. 3 Claims. (Cl. 51—209.)

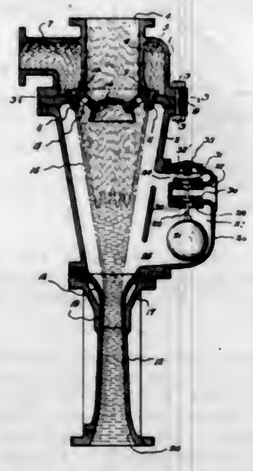
1. A buffing wheel comprising a plate having an extended series of short and substantially circumferential openings therein, a plurality of strips of flexible buffing material fitted in each opening to form a single cir-



cumferentially extended buffing member, and separate means to secure each such assembly of strips in its opening, said openings being arranged in the face of the wheel with successive openings radially overalpping.

1,622,943. ELEVATOR SUPPORT. GEORGE A. EDWARDS, Bisbee, Ariz., assignor of one-half to Fred Henderson, Bisbee, Ariz., and one-half to Nellie V. Edwards. Filed June 13, 1924, Serial No. 719,863. Renewed Jan. 28, 1927. 2 Claims. (Cl. 187—73.)

2. An elevator support including in combination with a support having an inclined opening therethrough, of a bolt in said opening, wedge-shaped plates mounted upon each end of the bolt and having their tapered portions extending in opposite directions upon opposite sides of the support, nuts on the bolts engaging the plates, said bolt having an eye at its lowermost end, a chain having its upper link engaging the eye and its lower link enlarged as and for the purpose specified.



1,622,944. FIREPLACE CONSTRUCTION. ERNEST FLAGG, New York, N. Y. Filed June 15, 1923. Serial No. 645,688. 4 Claims. (Cl. 126—120.)

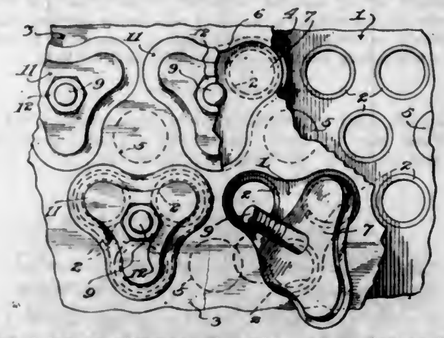
1. A fireplace construction which includes a hearth member set out into the room with one edge adjacent a wall of said room, and a hood disposed over said hearth, said hood extending upward along the wall to a point near the top of the room, said wall containing a flue at this point to which the hood is connected.

1,622,945. LOW-LEVEL JET CONDENSER. RANDOLPH E. S. GEARE and REIDAR M. NORSTROM, Philadelphia, Pa., assignors to Schutte & Koerting Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Dec. 1, 1924. Serial No. 753,272. 2 Claims. (Cl. 261—116.)

1. In a jet condenser a casing, a water box at the upper end of the casing, a plurality of jet nozzles carried at the bottom of the water box and inclined to direct a multiplicity of jets in converging lines toward the outlet of the casing, a steam inlet centrally

of said nozzles and arranged to direct steam within the space interiorly of the plurality of jets of water from said nozzles.

1,622,946. PACKAGE CARRIER. CATO HAARBERG, Chicago, Ill. Filed Aug. 28, 1924, Serial No. 734,762. Renewed Feb. 16, 1927. 2 Claims. (Cl. 294—16.)

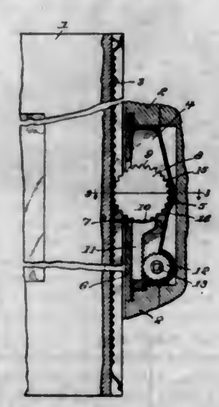


1. A package carrier including end yokes each provided with a handle at the outer ends thereof, a connection between the yokes and connected with the latter at the inner ends thereof, and grab hooks pivoted to the yokes between the ends of said yokes and adapted to be disposed at the outer ends of a package adjacent to the handles, the inner ends of said yokes being adapted to bear upon the top of the package or box being carried to constitute a fulcrum for forcing the hooks into the package with the lifting of the handles.

1,622,947. BOILER STRUCTURE. THOMAS F. HARTY, Rosebank, N. Y. Filed Oct. 24, 1924. Serial No. 745,629. 3 Claims. (Cl. 122—360.)

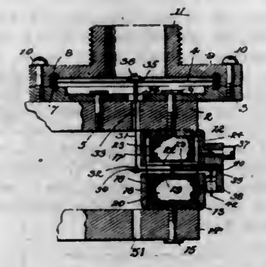
1. In a boiler structure, the combination of an inner tube sheet having tube receiving openings and tubes fitted therein, said openings being arranged in horizontal rows and in groups of three openings to each group disposed in triangular formation, each triangular group comprising two adjacent openings of a horizontal row and a single opening of a next adjacent horizontal row, said single opening being arranged in a vertical plane lying between the companion pair of openings of the same group, and the group forming openings of each two cooperating horizontal rows of openings being staggered with relation to the group forming openings of similar adjacent rows of openings overlying or underlying the same, an outer sheet having handholes, one for each group of tubes in the inner sheet, and arranged in alinement therewith, each handhole being of trifoliate-

form and having the outer walls of its lobes curved on arcs concentric with the center of the hand-hole, and coincident with the said common center of the alined group of tubes, said walls of the lobes substantially conforming to the curvature of the halves of the walls of the tubes most remote from their common center



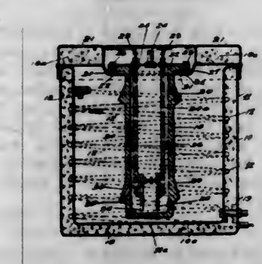
and lying in alinement therewith and at intervening points extending inwardly on lines coincident with the spaces between adjacent relatively inner sides of the tubes, a cover plate for each hand-hole of a trifoliate form corresponding thereto, and means for fastening said cover plate in position.

1,622,948. BANDAGE COMPRESS. ROBERT W. JOHNSON, New Brunswick, N. J., assignor to Johnson & Johnson, New Brunswick, N. J., a Corporation of New Jersey. Filed Dec. 29, 1925. Serial No. 78,188. 2 Claims. (Cl. 128—156.)



1. A compress, and binding strips to which it is secured and whereof each is arranged in accordian plaited folds which overlie the compress, and means operating to adhesively secure the edge folds.

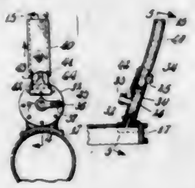
1,622,949. SASH-OPERATING DEVICE AND LOCK. NYLA Q. KELSO, Oklahoma City, Okla., assignor of one-half to John A. Semke, Oklahoma City, Okla. Filed Oct. 16, 1923. Serial No. 668,922. 2 Claims. (Cl. 292—342).



1. A means for locking and controlling the movement of a vertically slidable member which includes a guide for the member, a casing in the guide having its rear wall inclined inwardly from the center thereof, a toothed wheel in the casing projecting therethrough and contacting with the slidable member and normally gravitating to the bottom of the casing for frictionally engaging the rear wall thereof and the slidable member to prevent the movement of the slidable member in one direction, vertically adjustable means underlying and normally supporting the toothed wheel whereby said wheel may be moved to the center of the casing and free from frictional engagement with the casing and with the slidable member or to be further moved for contacting engagement with the upper portion of the casing for the slidable member for holding said slidable member from vertical movement in either direction.

1,622,950. TELEPHONE RECEIVER. WILLIAM E. LA PEARLE and WILLIAM H. LA PEARLE, Salt Lake City, Utah. Filed Dec. 10, 1925. Serial No. 74,634. 11 Claims. (Cl. 179—119.)

1. In a telephone receiver, the combination of a diaphragm; a permanent magnet; an electro-magnet, including a spool and a winding thereon; a plate armature disposed within said spool and adapted to be operated by the electro-magnet about a fixed pivot; armature supporting means disposed between and engaging the opposite faces of the armature and the adjacent faces of said spool for pivotally mounting the armature therein; and a connection between the armature and the diaphragm.



1,622,951. ELECTRIC WATER HEATER OF THE STORAGE TYPE. ALFRED EMILE LEWIS, Camperdown, New South Wales, Australia. Filed Dec. 17, 1925, Serial No. 76,079, and in Australia Jan. 14, 1925. 3 Claims. (Cl. 219—39.)

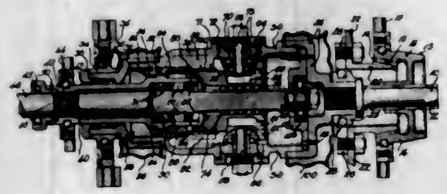
1. An electric water heater of the character described including, a double-walled storage tank, an annular lid for said tank, an annular supporting flange projecting from the inner edge of the lid, an earthenware vessel provided with an outwardly extending annular flange for engagement with the flange on the lid for suspending the vessel within the tank, the wall of the vessel being provided with openings for establishing communication with the tank, a cover disk for the vessel, electric heating elements suspended from the disk and arranged within the vessel, a coil arranged between the walls of the

tank and in connection with a water supply, a float valve arranged in the upper part of the tank and connected with the upper end of the coil, and a valve controlled outlet leading from the bottom of the tank.

1,622,952. FIRE SAFETY DEVICE FOR MOTION-PICTURE MACHINES. GESUALDO LOSCHIRICO, New York, N. Y. Filed Sept. 4, 1926. Serial No. 133,527. 3 Claims. (Cl. 299—62.)

1. In an apparatus of the class described, the combination with a suitable air compressor and a compression tank, of an oscillatory nozzle, which nozzle is provided with a circular base element which is mounted within a housing attached to the said compression tank, an air passage through the said housing and through the said base element and nozzle, and a control valve within the said passage, a crank member suitably connected to the said circular base, and a rocker rod suitably mounted and having a finger engaging the said crank, and the said rod operated by means of the driving mechanism of the said air compressor.

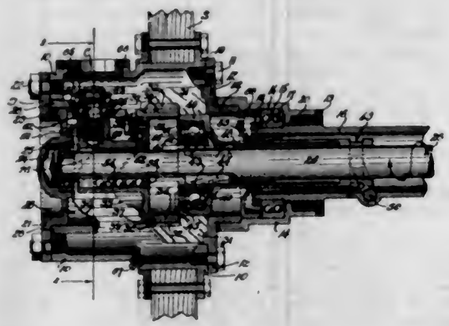
1,622,953. HEADLIGHT. STEPHEN F. LUCAS, Valley Park, Mo. Filed Sept. 9, 1925. Serial No. 55,368. 1 Claim. (Cl. 240—41.)



In a non-glare vehicle headlight, a segmental spherical surface reflector, a cover glass contacting with the margin of said reflector, a central light socket, an annular series of light sockets intersecting said renector near the marginal portion thereof and spaced apart from each other and from said central light socket by substantially equal distances, and a light bulb of low candle power in each socket, the combined candle power of said light bulbs being approximately equal to the candle power of the focal light bulb usually employed.

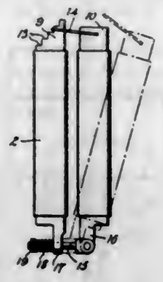
1,622,954. EXTENSIBLE BUCKLE AND THE LIKE. LOUIS MACHEBOUX, Chicago, Ill. Filed June 25, 1926. Serial No. 118,509. 3 Claims. (Cl. 24—163.)

3. As a new article of manufacture an extensible buckle or the like comprising in combination a pair of telescoping members of rectangular cross section, said members being broader in one cross sectional direction than the other, and said members being formed on a cylindrically curved surface, a drum pivotally mounted within the inner member on an axis extending transversely across said member, a spiral spring within said drum tending to retract the same and wind it up, and a flexible tension member having one end connected to the drum and the other end connected to the other telescoping member, and suitable connectors for attachment of a garment to the two telescoping members substantially as described.



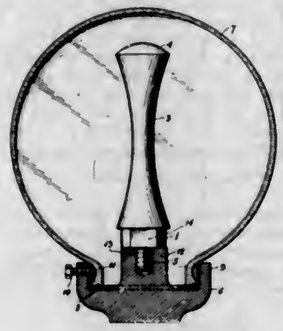
1,622,955. OIL CLUTCH. JOHN A. MALM, Denver, Colo. Filed May 31, 1921, Serial No. 474,007. Renewed Aug. 30, 1926. 27 Claims. (Cl. 192—59.)

1. In an oil clutch a rotary casing, a reciprocable piston in said casing, said piston having a cam groove, the wall on one side of the groove being higher than that on the other side, said high wall having apertures therethru whereby oil may pass from the adjacent end of the piston to said groove and over said low wall to the opposite end of the piston, and rollers carried by said casing to engage said cam walls respectively.



11. An oil clutch comprising a casing, a shaft extending into said casing, a piston within said casing reciprocable on said shaft and splined to said shaft, said shaft and piston having grooves therein, balls positioned in said grooves and constituting the splining means, and fingers carried by the piston and projecting into and closing said grooves to prevent passage of oil through said grooves.

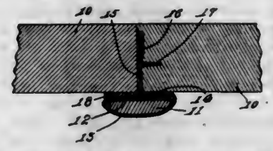
1,622,956. COMBINED OIL CLUTCH AND HUB FOR WHEELS. JOHN A. MALM, Denver, Colo. Filed May 31, 1921, Serial No. 474,009. Renewed Oct. 11, 1926. 16 Claims. (Cl. 192—59.)



1. A wheel hub comprising a casing enclosing a chamber, a pair of spaced shells within said chamber and carried by the casing, said shells providing a cam groove between them, a shaft extending within one of said shells, a piston reciprocable on said shaft, means to control the movement of oil from one end of the piston to the other, and means on the piston projecting into said cam groove for driving the hub, said piston being provided with means yieldable under excessive pressure.

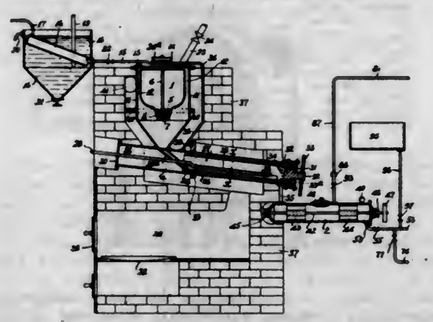
1,622,957. HAIR-WAVING APPLIANCE AND METHOD. JOSEF MAYER, Karlsbad, Czechoslovakia. Original application filed Mar. 19, 1925, Serial No. 16,784, and in Germany Apr. 9, 1924. Divided and this application filed Sept. 14, 1926. Serial No. 135,439. 4 Claims. (Cl. 132—36.)

4. In a permanent hair waving apparatus a pair of flat bars for gripping a flat strand of hair, heat resisting means covering each of said bars, a liquid absorbing member covering said heat resisting means, a resilient hinge connecting said bars together adjacent one end, one of said bars being formed on the end opposite said hinge with a stepped formation, and an adjustable link carried by the other of said bars and adapted to fit against said stepped formation for connecting the opposite ends of said bars together.



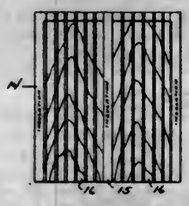
1,622,958. REFLECTING INDICATOR. CLARENCE GARFIELD MCLEAN, Winchester, Mass. Filed Nov. 10, 1921. Serial No. 514,269. 1 Claim. (Cl. 88—1.)

A reflecting indicator comprising a casing comprising a transparent member and having mounted therein a reflecting member and consisting of an elongated hour-glass-shaped body with the opposite enlarged ends of substantially uniform dimensions, the outer concave surface of the body continuing regularly towards the enlarged ends from a central diametrically reduced portion of the body, one enlarged extremity of the body having a convex contour and the opposite extremity being reduced and provided with securing means, the concave surface of the body and convex end being provided with reflecting means.



1,622,959. STRIP. CHARLES A. MCMANAMAY, Beckley, W. Va. Filed Feb. 2, 1925. Serial No. 6,443. Renewed Sept. 20, 1926. 1 Claim. (Cl. 20—69.)

A strip of the character described comprising a core having a flat face, a sheet metal cover surrounding the core, the longitudinal edges of the cover being extended to provide a clamping portion spaced from and parallel with the flat face of the core, a longitudinally disposed attaching flange extending from the free edge of the clamping portion at right angles to the flat face of the

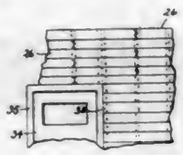


core and a compressible strip having one longitudinal edge clamped between the cover and said clamping portion.

1,622,960. TREATMENT OF ZINC-GOLD SLIMES AND APPARATUS THEREFOR. CHARLES EDWARD MEYER, Johannesburg, Transvaal, South Africa. Filed Apr. 10, 1922, Serial No. 551,295, and in the Union of South Africa Apr. 16, 1921. 10 Claims. (Cl. 266—9.)

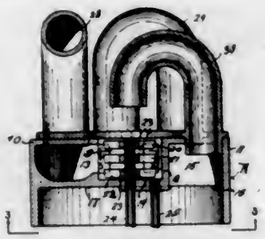
1. Means for treating zinc-gold slimes, including an oxidizing vessel, a rabbler for receiving the product from said vessel, and agitating means for receiving the oxidized product from the rabbler for effecting further treatment of the oxidized slimes, as set forth.

1,622,961. STORAGE-BATTERY-PLATE SEPARATOR. JOHN H. MEYER, Unadilla, Nebr. Filed Aug. 2, 1924, Serial No. 729,777. Renewed Nov. 10, 1926. 3 Claims. (Cl. 136—145.)



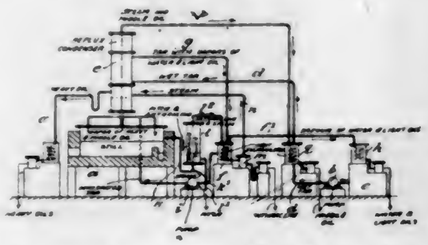
1. A storage battery plate separator comprising a rectangular frame of insulating material open at one end, and having its confronting edges grooved, and a wooden filler of sheet or plate-like formation having its outer edges grooved and conformingly and slidably engaged within the grooves in said frame.

1,622,962. BUILDING CONSTRUCTION. CHARLES L. MICHOD, Chicago, Ill. Filed Sept. 10, 1923. Serial No. 661,870. 2 Claims. (Cl. 20—2.)



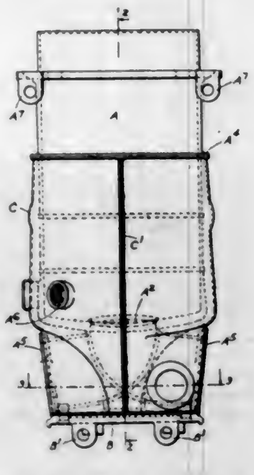
1. In a building construction, a wall section having a frame about an opening therethrough, siding on said wall section, a second wall section, the second wall section having siding, the latter siding at a portion thereof

substantially uninterruptedly fitting against a side of said frame, said siding having an extension beyond an end of the frame interrupted to interfit with the first



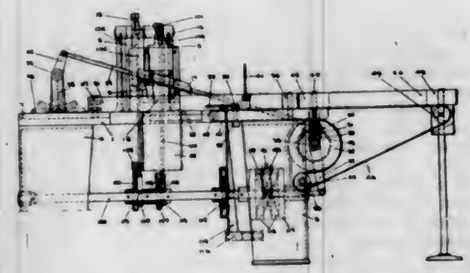
mentioned siding, the interfitting portions of the siding of both sections crossing the extended line of said side to avoid the appearance of a line joint between the sections at said side.

1,622,963. OIL BURNER. JAMES CORBETT MILLAR, De Pere, Wis. Filed Feb. 5, 1925. Serial No. 6,993. 2 Claims. (Cl. 158—91.)



1. A burner of the character described, comprising a body having a central burner cup, superposed oil trays each having radial arms arranged in said cup, means supplying oil to the trays, an overflow pipe leading from the cup, said body being provided with air chambers eccentrically of the burner cup, and opening into the latter, air circulating tubes opening into the body and into the chambers, and means overhanging the burner cup ejecting air onto the trays from the interior of the body.

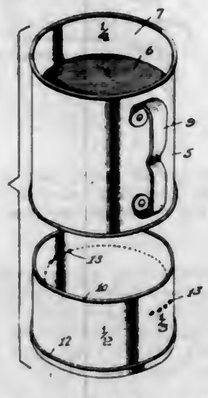
1,622,964. METHOD OF DISTILLATION. JOHN STANLEY MORGAN, London, England, assignor to Thermal Industrial and Chemical (T. I. C.) Research Company Limited, London, England. Filed Jan. 30, 1923, Serial No. 615,963, and in Great Britain Nov. 13, 1922. 4 Claims. (Cl. 196—85.)



1. A method of fractionally distilling a liquid mixture containing more than two constituents, which consists in distilling from the mixture and condensing a lower boiling fraction, passing superheated steam through the higher boiling fraction remaining, cooling the mixture of steam and vapor which leaves the liquid mixture to a temperature adapted to condense the vapor, and then passing the steam through the condensed lower boiling fraction to thereby vaporize a portion of the latter.

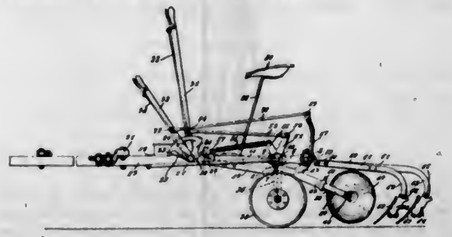
1,622,965. CYLINDER FOR INTERNAL-COMBUSTION ENGINES. MONTAGUE STANLEY NAPIER, Cannes, France, and GEORGE SHAKESPEARE WILKINSON, London, England, assignors to D. Napier & Son Limited, London, England, a British Company. Filed Feb. 2, 1925, Serial No. 6,499, and in Great Britain June 18, 1924. 2 Claims. (Cl. 123—173.)

1. In a multicylinder internal combustion engine of the water-cooled type, the combination of a plurality of cylinders each comprising a cylinder barrel and cylinder head formed as a unit and a thin metal casing surrounding the cylinder and welded thereto in a watertight manner to form a water jacket, lugs formed on each cylinder beyond the limits of the water jacket, means for connecting the lugs of adjacent cylinders together to form a block of cylinders, hollow bosses extending from the water jackets of adjacent cylinders so as to lie opposite to one another and a flexible tube connecting said bosses and adapted to be inserted in place when the cylinders are being assembled and retained in place when they are so assembled without additional securing means.



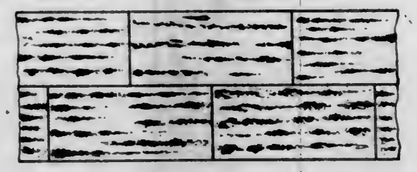
1,622,966. MACHINE FOR MAKING CIGAR ROLLS. PER NORDENFELT and ERIK GRANSTEDT, Stockholm, Sweden, assignors to Aktiebolaget Formator, Stockholm, Sweden, a Corporation. Filed Oct 20, 1923, Serial No. 669,805, and in Sweden May 4, 1923. 11 Claims. (Cl. 131—39.)

1. A machine for making filler rolls for cigars from a string of filler tobacco, comprising means for cutting out roll blanks from said string, means for feeding the string into an operative position for the cutting tool, the part of the said feeding means adjacent the cutting means comprising a gripping device consisting of two



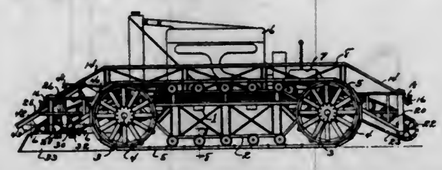
members arranged one on each side of the string and moving in their longitudinal directions and to and from each other, means for causing said members after each severing operation of the tool to grip the string and feed the latter in position for the cutting tool, and then during the severing operation to support the string and keep the severed roll blank together in cooperation with the cutting tool.

1,622,967. CUP MEASURE. HELEN AUGUSTA O'HAVER, Topsham, Me. Filed Nov. 22, 1926. Serial No. 149,989. 3 Claims. (Cl. 73—62.)



1. A cup measure consisting of an open-ended cylinder having a diaphragm extending across its interior at a point to convert one end into a three-fourths-cup measure and the other end into a one-fourth-cup measure, and a one-half-cup measure consisting of a cylinder adapted to fit into the three-fourths-cup measure and provided with a bottom disk which serves when the one-half-cup measure is thus fitted into the three-fourths-cup measure not only as a bottom of this one-half-cup measure but also as a bottom for the cup as a whole.

1,622,968. CULTIVATOR. HERMAN E. ORTHMAN, Lexington, Nebr. Filed July 27, 1926. Serial No. 125,231. 6 Claims. (Cl. 97—143.)

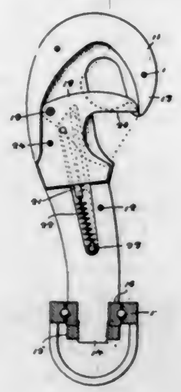


1. A cultivator comprising a pair of spaced, parallel, supporting bars each shiftable on its longitudinal axis and one arranged in advance of the other, a series of spaced parallel coupling members for said bars, a front and a rear shiftable supporting collar mounted in each of said members, said forward bar corresponding in contour to the inner faces of the forward collars and extending through these latter, said rear bar corresponding in contour to the inner faces of the rear collars and extending through these latter, said collars shifting bodily with said bars, a pair of hangers, each fixedly secured to the forward bar in proximity to an end thereof and movable upon an arc when the forward bar is shifted on its longitudinal axis, cultivator disks supported from and rearwardly of said forward bar and vertically adjusted thereby when said bar is shifted on its longitudinal axis, spaced shovels arranged rearwardly of the disks and supported from and rearwardly of said rear bar and vertically adjusted by the latter when it is shifted on its longitudinal axis, a supporting wheel mounted on each hanger and bodily carried therewith when its associated hanger is shifted on an arc, each of said bars provided intermediate its ends with an upstanding crank arm, a link and lever mechanism connected to the crank arm on the forward bar to provide for the shifting of such bar to elevate and lower said disks and shovels synchronously, and a link and lever mechanism connected directly to the crank on the rear bar for shifting the latter to elevate and lower said shovels independently of said disk.

1,622,969. COVERING OF PLASTIC MATERIAL AND METHOD OF MAKING THE SAME. ROBERT W. PAGE, Glen Ridge, N. J. Filed Apr. 6, 1926. Serial No. 100,032. 5 Claims. (Cl. 41—35.)

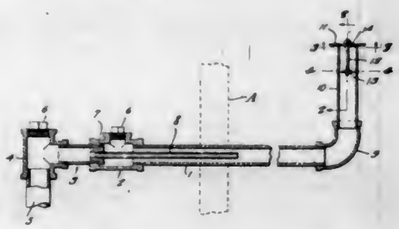
1. The method of making surface coverings of plastic material, which comprises spreading a body layer of a plastic mixture of cementitious material and an aggregate of small stone pieces, placing a plastic mixture of contrasting appearance also formed of cementitious material and small stone pieces on portions of the body layer in distributed lines or areas according to a desired plan or design, pressing the last applied mixture into the body layer while both it and the body layer are still plastic to consolidate it with the body layer, allowing the mass to harden, and grinding the surface smooth.

1,622,970. ROAD-BED-BUILDING MACHINE. ROSCO PAYNE, Macedonia, Ill. Filed Sept. 22, 1926. Serial No. 137,160. 4 Claims. (Cl. 104—6.)



1. A rod building machine for railway tracks, comprising a motor driven caterpillar tractor, an open bridge pivotally supported on the frame of the tractor, and said bridge having its sides provided with downwardly inclined ends, inwardly directed stub shafts on the sides of the bridge, grooved rollers journaled on certain of the stub shafts, sprocket wheels journaled on the ends of the stub shafts, endless chains trained around the sprocket wheels and guided on the grooved rollers and said chains designed to support the ties of a track thereon to hold the same temporarily in elevated position, rollers on the inner corners of the sides of the bridge designed to engage with the rails of the track, and angularly disposed scraper blades at the forward corners of the bridge.

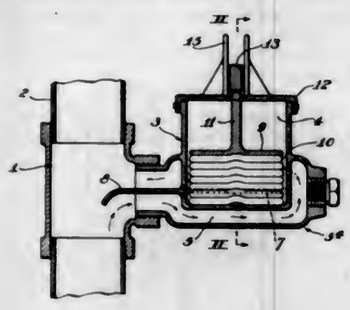
1,622,971. SAFETY HOOK. GEORGE NEWTON PORTER, Oilton, Okla. Filed July 21, 1926. Serial No. 124,027. 4 Claims. (Cl. 24—241.)



1. In combination, a hook, a dog pivoted thereon and having a U-shaped portion, resilient means for normally

holding the dog positioned with its U-shaped portion in the mouth of the hook and adapted to be moved to a position to close said hook incident to the association of an object with the latter, a shoulder formed on the shank of the hook, a pivoted locking rod carried by said dog and adapted to repose upon the shoulder to hold the

dog in its adjusted position, means for moving the bar on said shoulder as the dog is moved to its adjusted position, and means for effecting a release of said locking bar to allow the dog to automatically return to its normal position under the influence of said resilient means.

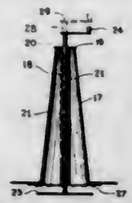


1,622,972. GAS BURNER. HOMER O. PORTER, Denoya, Okla. Filed July 21, 1926. Serial No. 124,004. 1 Claim. (Cl. 158—99.)

A burner for natural gas comprising an L-shaped tubular part having one portion horizontal and the other vertical, the vertical part having notches in its upper end, a plate covering the upper end and being of greater diameter than the vertical part, an eye bolt connected with the plate and depending into the vertical part, a cross piece carried by the vertical part and passing through the eye of the bolt and means for introducing natural gas into the horizontal part under compression and without mixing the same with air.

1,622,973. THERMOSTATIC DAMPER CONTROL. SAMUEL F. RICHARDS, Pittsburgh, Pa. Filed Nov. 22, 1926. Serial No. 149,825. 4 Claims. (Cl. 236—32.)

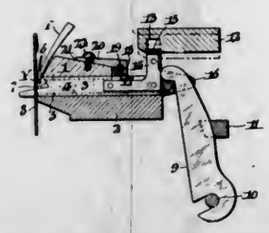
1. In combination in a temperature controlling device for use with an upright hot water pipe through which a circulation of water is provided, a casing having a tubular connection leading into said pipe, a laterally extending partition in the casing extending through said connection and projecting into the pipe, an upright casing integral with the first casing and having its lower end extending down into said first casing past said partition, expansible thermostatic means and a plunger



mounted in said upright casing, and a communication between the outer ends of the cavities in said first casing lying above and below said partition.

1,622,974. PROCESS FOR DECOMPOSING FATS OR OILS INTO FATTY ACIDS AND GLYCERIN. ALBERT S. RICHARDSON and CLINTON V. CONLEY, Cincinnati, Ohio, assignors to The Procter & Gamble Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Mar. 13, 1922. Serial No. 543,514. 2 Claims. (Cl. 87—4.)

1. The process of decomposing fats or oils into fatty acids and glycerin by reaction with water, which consists of heating and agitating the reaction substances in the presence of aromatic sulfonic acids of molecular weight less than 250 without the use of oleic or similar fatty acid, substantially as described.

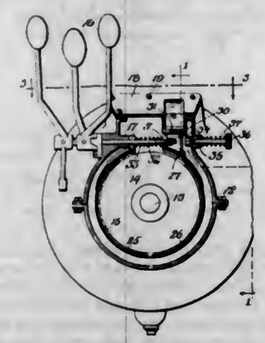


1,622,975. COOKING KETTLE. JOSEPH ROZIČ, Palmerton, Pa. Filed June 16, 1926. Serial No. 116,302. 4 Claims. (Cl. 53—1.)

1. In a cooking kettle, in combination with an outer and an inner container arranged to have a space between the bottoms and sides thereof, a frusto conical shaped member attached at its lower extremity to the bottom of the inner container, and positioned at the center thereof and extending vertically therefrom above the upper extremity of the said container, the bottom of the said inner container having cut therein a central circular aperture to permit the said frusto conical shaped member to be attached thereto, a hollow tubular member attached at its upper extremity to a flanged member provided with apertures, the said hollow tubular member positioned in the center of the frusto conical shaped member and extending downward therefrom flush with the lower extremity of the said frusto conical shaped member, the said flanged member attached to the upper extremity of the said frusto conical shaped member, threads on the inner periphery of said tubular member engaging with a thread cut on the outer periphery of a rod, the said rod positioned in the said hollow tubular

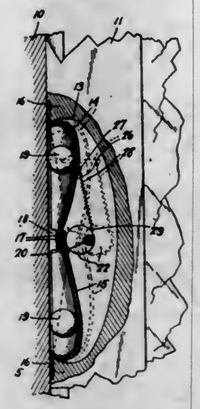
member, a plate attached to the lower extremity of the said rod, a handle attached to the upper extremity of the said rod, so as to permit the said plate to close the lower extremity of the frusto conical shaped member by rotating the said handle.

1,622,976. KNITTING MACHINE. ALBERT E. SCHULZ, Lansdale, Pa., assignor to Dexdale Hosiery Mills, Lansdale, Pa., a Corporation of Pennsylvania. Filed Aug. 9, 1924. Serial No. 731,069. 5 Claims. (Cl. 66—110.)



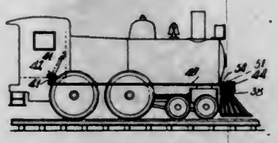
2. In a knitting machine, the combination with needles, yarn feeds, sinkers, sinker-actuating means and a holding bar, of a friction device gravitationally mounted in the holding bar for restraining free movement of the sinkers during periods of release from the actuating means to prevent their accidental projection into the path of the yarn feeds during yarn feeding.

1,622,977. ALLOY. EZEKIEL J. SHACKELFORD and WILLIAM B. D. PENNIMAN, Baltimore, Md., and JOHN R. CAIN, Washington, D. C., assignors to Radiac Metals, Ltd., Masterton, New Zealand, a Corporation of New Zealand. Filed Apr. 16, 1925. Serial No. 23,669. 5 Claims. (Cl. 75—45.)



1. A process of producing an alloy of iron and chromium which includes the steps of charging a furnace with basic slag producing material and molten iron having a carbon content of .05% or under, adding a charge of ferro-chromium, working the bath until the carbon content is under .3%, adding a second charge of ferro-chromium, and repeating this step as often as necessary until the bath has the desired chromium and carbon content.

1,622,978. TRANSMISSION CASE. VALENTINE E. SHAKESPEARE, West New Brighton, N. Y. Filed Sept. 3, 1926. Serial No. 133,427. 4 Claims. (Cl. 74—56.)

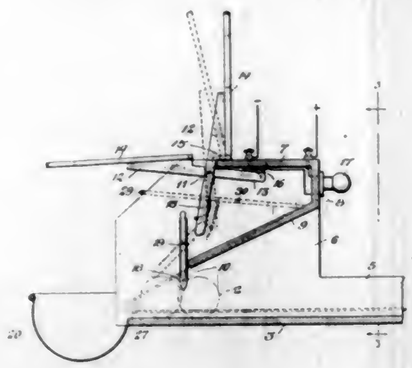


1. A transmission case including a pair of mating sections adapted to be bolted together about a power shaft, a cover carried by one section and having openings therein through which speed bands are adapted to be inserted in the case, said openings being arranged in a depressed portion of the cover.

1,622,979. WINDOW LOCK. OSCAR E. SHOSTROM, Seattle, Wash. Filed Aug. 25, 1926. Serial No. 131,517. 4 Claims. (Cl. 70—14.)

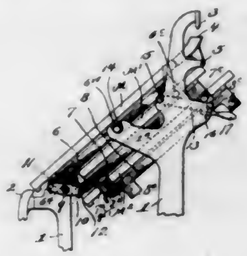
1. A window lock comprising a pair of pivoted trough-like members arranged within a recess formed in one side of the window sash, extensions formed on the adjacent ends of said members and arranged in overlapping relation, a ball movable within each member and adapted to engage the window casing for holding the sash immovable when said members are in active positions, and means operable from the exterior of the sash for holding said members in their active positions.

1,622,980. AUTOMATIC RAILROAD SWITCH. JOSEPH SZABO and ALEXANDER LADANE, New Castle, Pa. Filed Sept. 4, 1926. Serial No. 133,542. 1 Claim. (Cl. 246—314.)



In an apparatus of the class described, the combination with a railroad switch of a rocking beam therewith connected, and the said beam connected in opposite directions by suitable rods to switch levers set at a distance therefrom, the said switch levers each pivotally mounted on a base structure and having a main shaft which has at its upper extremity angularly disposed members adapted to receive the contact of an element projecting from a passing object, and having in the body of the said shaft a slot through which a pivot passes, the said pivot supporting a lever of the connecting mechanism, and a sliding element mounted on the aforesaid shaft and engaging the said pivot, and tension springs secured to the said sliding element and to the said main shaft, substantially as shown and described.

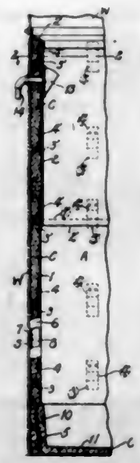
1,622,981. AMUSEMENT DEVICE. FRANK WASUKE TANAKA, New York, N. Y. Filed Oct. 26, 1926. Serial No. 144,309. 5 Claims. (Cl. 273—41.)



1. An amusement device comprising a runway, a series of pivotally mounted figures arranged adjacent one end

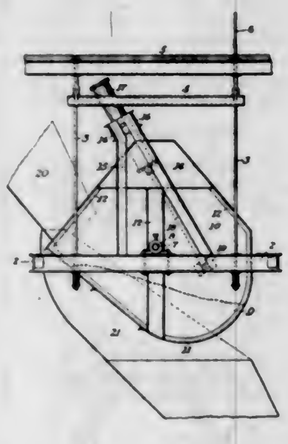
of the runway, a series of pivotally mounted members co-acting with said figures so that when said members are swung in a certain direction they will swing said figures to an inoperative position, a signalling device pro-

vided with an electric circuit, and a switch normally holding said circuit open, said switch being positioned so as to be engaged and closed by said figures as they are moved to a lowered position.



1,622,982. TYPOGRAPHICAL MACHINE. NICHOLAS TESTI, New York, N. Y., assignor to Intertype Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Sept. 25, 1926. Serial No. 137,793. 12 Claims. (Cl. 199—45.)

1. In a typographical machine, the combination of a main frame, means for supporting a plurality of matrix magazines whereby the latter may be shifted to bring one or another thereof into operative position, and means for shifting the magazines comprising a crank rotatable about a fixed axis and having a plurality of crank pins operative to successively act on the magazine supporting means to shift the magazines.

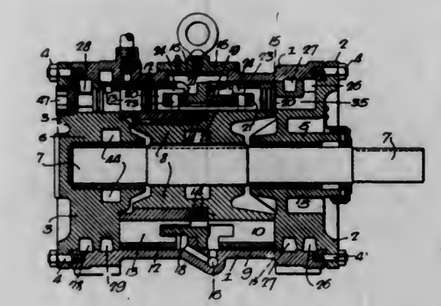


1,622,983. INCLOSURE FOR SHOWER BATHS. MICHAEL J. TRACY, St. Louis, Mo., assignor to Pauly Jail Building Company, St. Louis, Mo., a Corporation of Missouri. Filed Sept. 27, 1926. Serial No. 138,051. 5 Claims. (Cl. 72—16.)

1. In combination with a plurality of partition walls, a shower bath inclosure spaced from said walls, said inclosure comprising a plurality of U-shaped plates in superposed relation, means for mounting the plates on the inner surfaces of the walls, said mounting means consisting of brackets projecting from the walls and clips secured to the sides of the plates, the brackets being adapted

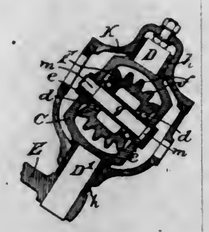
for engagement between the clips and plate and a suitable filling material in the space between the plates and partition walls.

1,622,984. WEIGH PAN. JOSEPH PIERRE VOGEL, Pittsburgh, Pa., assignor to Heyl & Patterson, Inc., Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Nov. 10, 1921. Serial No. 514,192. 11 Claims. (Cl. 265—27.)



1. In an apparatus for weighing coal, a frame supported by a scale element, a weigh pan having a fixed pivotal mounting on the frame, said pan having a closed bottom also an open top through which the coal to be weighed is delivered and through which the weighed coal is discharged, and actuating means for reversing at will the positions of the closed bottom and open top of the pan to place the top into either receiving or discharging position, substantially as described.

1,622,985. ROLLER BEARING. ERNST HJALMAR WALODDI WEIBULL, Gottenborg, Sweden, assignor, by mesne assignments, to Nya Nordiska Kullager Aktiebolaget, Gottenborg, Sweden. Original application filed Apr. 26, 1919, Serial No. 292,927, and in Sweden Oct. 3, 1918. Divided and this application filed July 15, 1920. Serial No. 396,587. 1 Claim. (Cl. 308—215.)



In a roller-bearing of the class described, a plurality of rollers each of which is of such a proportion as to breadth and radius that the moment of inertia with reference to the normal axis of revolution exceeds the moment of inertia with reference to any other axis passing through the center of gravity thereof, whereby a couple will be produced tending to return the roller to its original position.

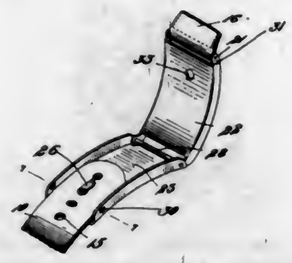
1,622,986. ROTARY PUMP OR MOTOR. ANTHONY E. WEINGARTNER, Bethlehem, Pa., assignor to American Engineering Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 13, 1921. Serial No. 469,158. 14 Claims. (Cl. 121—62.)

6. In a machine, the combination of a casing, end plates for said casing, a rotor mounted within the casing and having at one side thereof an annular peripheral extension, a ring mounted upon the periphery of said rotor and spaced apart from said extension, means for preventing relative rotational movement between the rotor and the ring, lock nuts carried by said rotor intermediate the ring and the said extension for retaining said ring in a position upon the rotor body affording close contact between the outer surfaces of the extension and of the ring and the inner surfaces of the respective end plates, and means for actuating said rotor comprising cylinders in the rotor, pistons in said cylinders, and a relatively fixed cam intermediate the said peripheral extension and said ring and operatively connected with the pistons.

1,622,987. WORM AND WORM-WHEEL TRANSMISSION. HERBERT AUSTIN, Bromsgrove, England. Filed Nov. 29, 1926, Serial No. 151,491, and in Great Britain Feb. 11, 1926. 7 Claims. (Cl. 74—79.)

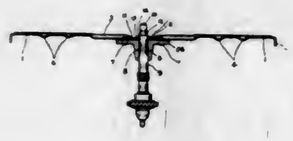
1. Worm and worm-wheel transmission comprising, a parallel sided worm, a pivotally mounted worm-wheel element having its pivoted axis angularly disposed with reference to its axis of rotation, and ring tooth members rotatably carried by the said element and engaging with the convolutions of the worm.

1,622,988. SASH-CORD FASTENER. THOMAS W. BARRETT, Zanesville, Ohio. Filed Sept. 17, 1926. Serial No. 136,139. 2 Claims. (Cl. 16—202.)



1. A sash cord connector comprising a pair of members, one of said members being designed to be set into the side rail of a window sash and having a keeper, the other member being adapted for slidable and removable engagement with the first mentioned member and having a projection for detachable locking engagement with the keeper, said last mentioned member being formed with a restricted portion and a slot, the latter being designed to receive a balance-weight cord, and means for fastening the end of the cord after its passage through the slot to the restricted portion of said member.

1,622,989. EXTENSION MEMBER FOR WRIST-WATCH STRAPS. JOHN P. BENJAMIN, East Providence, R. I., assignor to Rex Manufacturing Company, Providence, R. I., a Corporation of Rhode Island. Filed June 5, 1926. Serial No. 113,878. 6 Claims. (Cl. 24—71.)

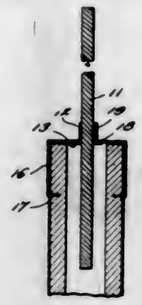


1. In a wrist watch strap having two parts, a pair of sheet metal link members hinged together at one end, means for releasably connecting said members together at the other end whereby they may be detached and swung on said hinge to an end-to-end extended position, an open-

ing in one of said strap parts inwardly from the periphery thereof, a hook on one of said members protruding inwardly therefrom toward the other member when in

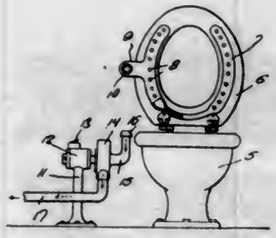
closed position for extending through said opening and over said strap, and the other strap part fixedly connected to the other link member.

1,622,990. RETAINING DEVICE FOR RODS AND SHAFTS. LE BONSIEUR, Elyria, Ohio, assignor to The General Industries Company, Elyria, Ohio, a Corporation of Ohio. Filed Mar. 8, 1926. Serial No. 93,130. 4 Claims. (Cl. 287—53.)



1. In a device of the class described, the combination with a shaft, of an element adapted to be carried on the shaft, said shaft having a shoulder at one side of the said element but closely adjacent thereto, a spiral spring adapted to be placed over the shaft and compressed with its base bearing against a face of the element, and a relatively small convolution of the spring being sprung over the said shoulder during application of the spring and adapted to rest against the said shoulder, whereby the said spring is flattened and compressed between the said shoulder and the element to retain the element in position on the shaft, said shoulder being formed by a peripheral groove extending around the shaft, said small convolution adapted to snap into position in the groove, said spring having an outwardly extending projection adapted to be engaged by a hand tool to facilitate removal of a spring from element securing position on the shaft.

1,622,991. TREATMENT OF FORMATES OF METALS OF THE ALKALI-EARTH GROUP. OTTO PAUL CURT BREDT, Allentown, Pa., assignor to Trojan Powder Company, New York, N. Y., a Corporation of New York. Filed Apr. 7, 1921, Serial No. 459,500. Renewed Jan. 12, 1924. 6 Claims. (Cl. 260—115.)



1. A process comprising reacting upon calcium formate with sodium hydroxide to form sodium formate, heating the sodium formate to obtain sodium oxalate, and causing the sodium oxalate to react with calcium hydroxide to form calcium oxalate and sodium hydroxide.

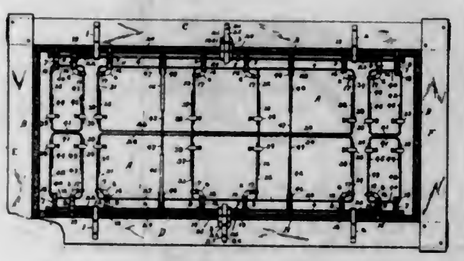
1,622,992. BLASTING CARTRIDGE. ALVA W. CALLIS and FRANK E. SMOOTS, Zincville, Okla. Filed Aug. 12, 1926. Serial No. 128,836. 3 Claims. (Cl. 102—6.)

1. Means for connecting a fuse with a cartridge, comprising a cap adapted to repose upon the upper end of the cartridge and provided with a central opening, a sleeve-like member adapted to receive the fuse and passed through said opening in the cap, and extensions formed on the lower end of the sleeve and arranged against the under side of the cap for holding the cap and sleeve associated.

1,622,993. SUCTION DEVICE FOR WATER-CLOSETS. JAMES D. CAMERON, Tulare, Calif. Filed June 21, 1926. Serial No. 117,428. 1 Claim. (Cl. 4—213.)

In a suction device for water closets, a pipe for arrangement upon the bottom of the closet seat and having inlet openings communicating with the interior of the closet bowl when lowered and having a lateral extension the under side of which is provided with an opening, a standard for arrangement alongside of the water closet independent thereof, a motor mounted on the upper end of the standard, a suction fan mounted to the inner side of the motor and oppositely connected to the shaft thereof, an inlet pipe extending horizontally from the suction fan and bent upwardly in a vertical extension, and a nozzle on the end of the vertical extension for engagement by the opening of the pipe extension.

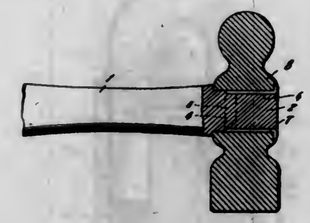
1,622,994. STEAMBOAT CONSTRUCTION. HERBERT CULP, Chicago, Ill. Filed Oct. 12, 1926. Serial No. 141,199. 3 Claims. (Cl. 214—15.)



1. A boat provided with a deck, hatches in said deck, coamings and covers on said hatches, tracks located over

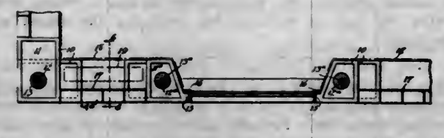
said hatches whereby cars may be run over said hatches and the contents thereof unloaded into said boat, tracks

located between said hatches, said first mentioned tracks being movably mounted on said latter tracks for the purpose set forth.



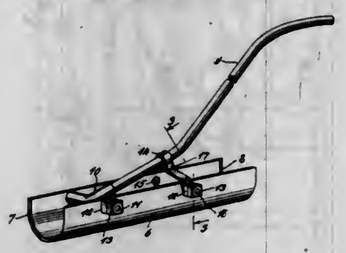
1,622,995. GRAVE COVER. JAMES M. DODDRIDGE, Milton, Ind. Filed July 31, 1926. Serial No. 126,148. 5 Claims. (Cl. 27—30.)

1. A grave cover consisting of two sets of wings, the two sets of wings being adapted to be located on opposite sides of a grave with relation to each other, a shaft for each set of wings and to which the respective wings are connected, each set of wings comprising a main wing and an end wing located on each side of the main wing, each of the end wings being composed of two members which are identical with each other, and each main wing being composed of four members which are identical with each other, springs for normally holding said wings in horizontal position but permitting them to be turned downward to vertical position, stops for preventing the wings from moving upward beyond horizontal position, blankets adapted to cover said wings, and means for detachably securing said blankets to the wings whereby they will not slide when the wings are being turned to vertical position.



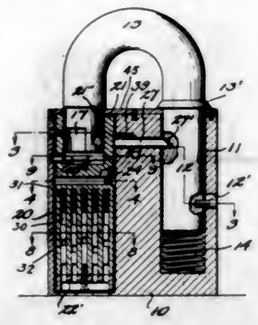
1,622,996. SAFETY HANDLE DEVICE. WILLIAM EVANS, Youngstown, Ohio. Filed Aug. 27, 1926. Serial No. 131,976. 1 Claim. (Cl. 306—37.)

A means for holding a handle on a hammer head in which the eye end of the handle has one of its sides provided with a groove that communicates with longitudinal grooves that enter from the outer end of the said eye end of the handle, and comprising a flat yoke whose central portion is designed to be received in the first mentioned groove, the ends of the said central portion being bent



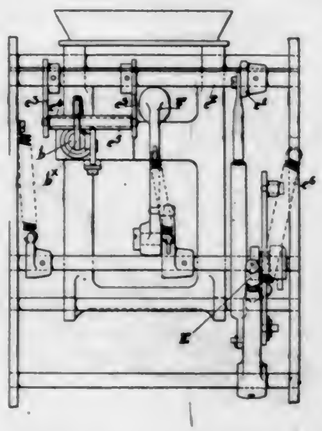
angularly and extended to provide parallel arms which are received in the longitudinal grooves of the handle and project therebeyond and the ends of the arms designed to be bent against the outer face of the hammer head when the end of the handle is inserted through the eye of the said head.

1,622,997. BUILDING CONSTRUCTION. ERNEST FLAGG, New York, N. Y. Filed June 17, 1926. Serial No. 116,673. 6 Claims. (Cl. 72—30.)



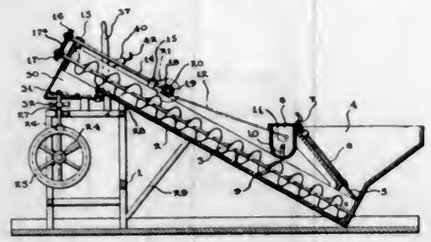
1. A building construction including a series of spaced piers each formed of superimposed molded blocks, the blocks having aligned openings therein for receiving concrete poured in from the top after the blocks have been piled, and curtain walls connecting the piers and flush with the outer faces thereof.

1,622,998. LAWN EDGER. ASHFORD L. FOSTER, Denver, Colo. Filed July 28, 1926. Serial No. 125,362. 1 Claim. (Cl. 97—227.)



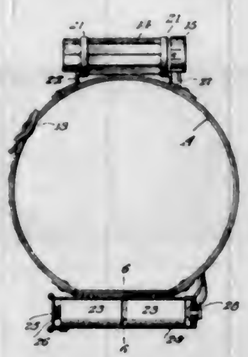
A device of the class described comprising an elongated cutting member formed from sheet metal and having a U-shaped transverse section, a handle having a T secured to one end thereof, a bolt extending through the sides of said cutting member and through the T, a strap having its ends secured to the sides of said cutting member and having its central portion enclosing a part of said handle and a bolt connecting opposite sides of said strap so as to form a loop through which the handle extends whereby the strap may be securely clamped to the handle.

1,622,999. LOCK. ARNOLD J. FRITH, Selma, Ala. Filed Sept. 22, 1926. Serial No. 137,097. 4 Claims. (Cl. 70—108.)



1. In a lock, a casing, a spring operated yoke mounted in the casing and including a shank, an upper barrel and a lower barrel in alinement therewith, means for moving the upper barrel by the rotation of the lower barrel, spring controlled and key controlled pins mounted in the lower barrel, a bolt for engaging the shank, retaining the yoke in locked position, the upper barrel having a recess into which the bolt is movable for releasing the shank of the yoke.

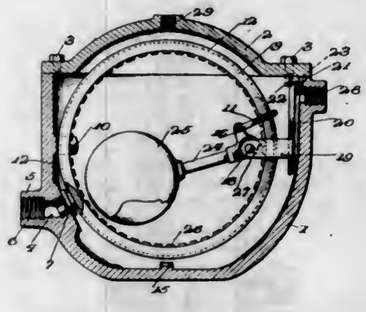
1,623,000. WORKMAN'S TIME RECORDER. ARTHUR HENRY GLEDHILL, Halifax, England. Filed Nov. 17, 1926, Serial No. 148,900, and in Great Britain Nov. 14, 1925. 4 Claims. (Cl. 234—43.)



1. In a time recorder of the character described, operating mechanism for operating on an inserted card including a member movable toward and away from the card, and arresting means normally preventing the functioning of said mechanism and including a feeler movable with and relatively to said member and adapted to contact with and be stopped by said card when the card is in proper position and thereby render the arresting means ineffective when said member is moved toward the card.

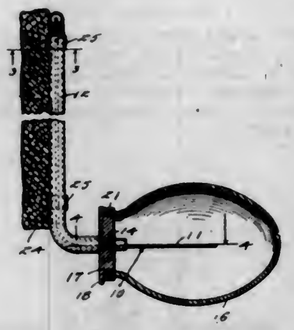
1,623,001. MACHINE FOR TREATING GRAIN WITH COPPER CARBONATE. JOSEPH GOLLBACH, East Nicolaus, Calif. Filed July 19, 1926. Serial No. 123,478. 5 Claims. (Cl. 83—28.)

1. In a grain treating machine, the combination with a seeder, a hopper for the grain, a hopper for copper carbonate, a tube including a passage for the grain and the copper carbonate, and means in the passage for mixing and carrying the grain to the seeder, means for controlling the passage of the grain from the grain hopper to the passage, means for permitting periodical feeding of copper carbonate into said passage, and means for controlling the flow of the treated grain from the passage to the seeder.



1,623,002. LAMP-SUPPORTING COLLAR. JOHN N. GOSSETT, Sheridan, Mont. Filed July 17, 1926. Serial No. 123,114. 2 Claims. (Cl. 240—59.)

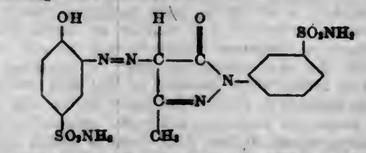
1. A collar adapted to be placed around the neck of an animal, and including inner and outer pieces stitched along their marginal edges, a battery casing attached to the collar, brackets secured to the collar and projecting outwardly therefrom, spaced annuli carried by the brackets and arranged at a right angle to the collar, an electric lamp received and supported by said annuli and arranged diametrically opposite the battery casing, a battery arranged in said casing, and electric wires leading from the battery to the lamp and wholly arranged between the inner and outer pieces of the collar.



1,623,003. STEAM TRAP. ALBERT L. GRANDSTAFF, Akron, Ohio. Filed June 25, 1925. Serial No. 30,616. 10 Claims. (Cl. 137—103.)

1. In a device of the character described, a casing having an outlet opening, a valve seat member extending inwardly within the casing from said outlet opening, a ring valve within the casing and having a peripheral surface adapted to cooperate with said valve seat member to

close said outlet, and means responsive to the rise and fall of liquid within the casing for shifting said ring valve edgewise against and away from said valve seat.



1,623,004. WINDOW CLEANER. RAUL GREENBERG, Brooklyn, N. Y. Filed June 12, 1926. Serial No. 115,530. 5 Claims. (Cl. 15—136.)

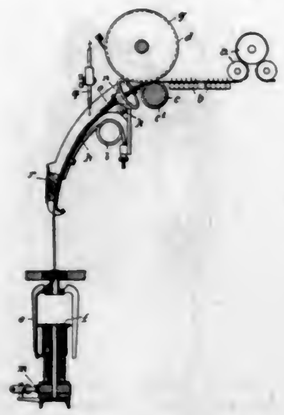
1. An implement of the class described comprising a substantially L-shaped frame, a compressible reservoir into which one end of the frame extends, a flexible tube threaded on said frame and in communication with the interior of the reservoir, and applicator means associated with said tube.

1,623,005. AZO DYESTUFFS CONTAINING CHROMIUM AND PROCESS OF MAKING SAME. HANS GUBLER, HERMANN STAHEL, and FRITZ STRAUB, Basel, Switzerland, assignors to The Firm Society of Chemical Industry in Basle, Basel, Switzerland. Filed June 21, 1926, Serial No. 117,615, and in Switzerland July 3, 1925. 17 Claims. (Cl. 260—12.)

4. As a step in the process of making acid azo-dyestuffs containing chromium the preparation of the dyestuff corresponding with the formula

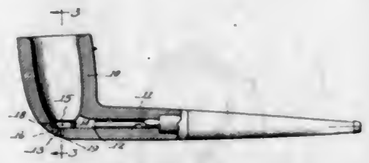
by coupling the diazotized 2-amino-1-hydroxybenzene-4-sulphamide with the 1-(3'-sulphamido)-phenyl-3-methyl-5-pyrazolone.

1,623,006. FLY CATCHER. EDWARD HAMBORG, Linden, and VICTOR T. LORDELL, Elizabeth, N. J. Filed Oct. 9, 1926. Serial No. 140,603. 4 Claims. (Cl. 43—136.)



1. A fly catcher comprising a staff having a handle on one end thereof, normally expanding clamping jaws on the other end of said staff, a conical shaped disk having a sticky substance on the front face thereof, flanges extending from the rear of said disk and seated between said jaws, and means for holding said jaws compressed against said flanges.

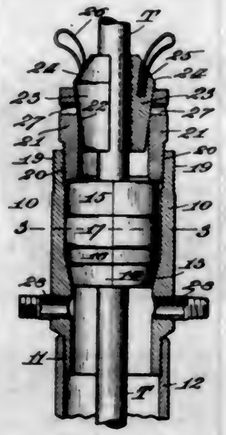
1,623,007. SHOE. FRIEDRICH HERRMANN, Lincoln, Nebr. Filed Nov. 6, 1926. Serial No. 146,708. 4 Claims. (Cl. 36—1.)



1. The method of removing bulges caused by the stretching of the vamps of shoes consisting in providing a strip of unstretchable tape of slightly less length than that portion of the vamp forming the bulge, securing the ends of the strip to the shoe at the upper edge thereof so that the strip extends chordally of the bulge and causing the leather of the vamp to smoothly engage and adhere to said tape.

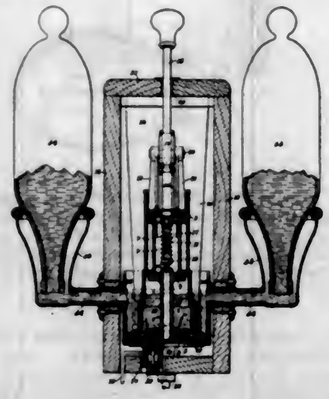
1,623,008. SPINNING MACHINE. ALBERT HIRSCHMÜLLER, Miesbach, Germany. Filed Aug. 12, 1926. Serial No. 128,869, and in Germany Aug. 28, 1925. 8 Claims. (Cl. 117—35.)

1. In a machine for spinning cored rope yarn, the combination with a delivery shaft and with two pressing rollers which cooperate with said shaft for supplying ribbon-shaped core and covering materials to a flyer spindle, of an arched plate arranged so as to support and guide the materials while they are being united, the pressing roller for the covering material being formed with transversely extending recesses enabling the materials to slip under the pull of the core.



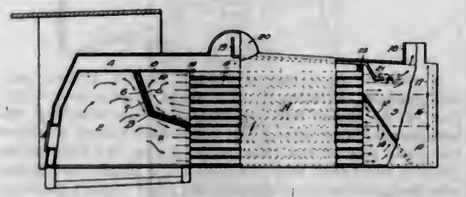
1,623,009. TOBACCO PIPE. FRANK HOFFMAN, Montreal, Quebec, Canada. Filed June 21, 1926. Serial No. 117,515. 4 Claims. (Cl. 131—12.)

4. A tobacco pipe including a bowl having a circular recess in its lower end, an annular absorbent element snugly fitted in the recess and closed at its upper end, and registering apertures in the pipe bowl and the absorbent element for maintaining an air circulation in the interior of said absorbent element whereby to dry up the mixture absorbed by the absorbent element and to cool the bottom of the bowl.



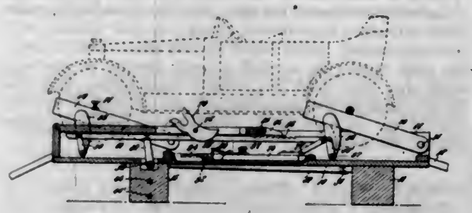
1,623,010. OIL-WELL CASING HEAD. CHESTER C. HOSMER, Huntington Beach, Calif. Filed Dec. 13, 1923, Serial No. 680,376. 5 Claims. (Cl. 166—14.)

5. An oil well casing head comprising a tubular body, the chamber within which is adapted to receive and support a packing element, the upper portion of said tubular body being internally threaded and a spider having its



lower portion screw seated in the internally threaded upper portion of the tubular body and adapted to engage the upper end of the packing element positioned therein.

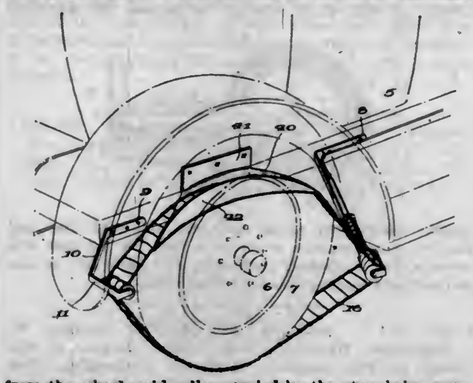
1,623,011. APPARATUS FOR AERATING LIQUIDS. WILLIAM HUCKS, Camden Town, London, England, assignor of one-half to Sodastream Limited, Camden Town, England. Filed July 14, 1926, Serial No. 122,440, and in Great Britain Feb. 17, 1926. 5 Claims. (Cl. 225—21.)



1. Apparatus for use in aerating liquids, the said apparatus consisting in, or comprising, an aerating receptacle closed at the bottom and having an inlet opening, or openings, at a suitable height from the said bottom, through which liquid to be aerated is admitted to the said receptacle, a piston-like body reciprocal within the said aerating receptacle and having an axial passage therethrough, a discharge vessel secured to and reciprocal with the said piston-like body, a combined discharge and safety valve situated in the said discharge vessel and adapted to control the outlet of the said axial passage, means for admitting gas under pressure into the said aerating receptacle, and hand-operable means adapted to cause, at the proper times, the said piston-like body to ascend through the liquid in the said aerating receptacle and close the upper end thereof, and the said combined discharge and safety valve to close the outlet of the axial passage through the said piston-like body, and after aeration of the liquid confined in the said aerating receptacle has been effected, to cause the said combined discharge and safety valve to open the outlet of the said axial passage, and cause, or permit, the said piston-like body to descend and expel the aerated liquid through the said axial passage into the said discharge vessel from which it passes through an outlet spout into a receptacle placed in position to receive it; substantially as hereinbefore described.

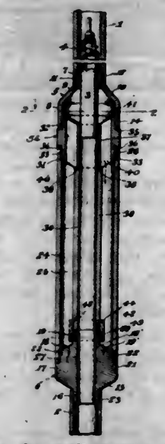
1,623,012. LOCOMOTIVE-BOILER CONSTRUCTION. HARRY S. JARNAGIN, Richmond Heights, Mo., assignor of one-half to Robert W. Bidwell, Richmond Heights, Mo. Filed Nov. 26, 1924. Serial No. 752,442. 2 Claims. (Cl. 122—74.)

1. In a locomotive boiler construction, a fire box bounded by a water chamber, boiler tubes in advance thereof and a front compartment for the boiler, a pair of angular spaced baffle plates fixed at their forward ends to the rear tube sheet and at their upper ends to the crown sheet of the fire box to provide a heat and smoke turning compartment in the upper front corner of the fire box to the rear of a predetermined number of upper boiler tubes and to provide a water passage between the plates and an inclined baffle plate in the front compartment fixed at its upper end to the front boiler sheet and at its lower end to the wall of the boiler.



1,623,013. AUTOMOBILE LIFTING JACK. EMIL KAROW, Sarles, N. Dak., assignor of one-half to Ed. Garwick, Sarles, N. Dak. Filed June 7, 1926. Serial No. 114,305. 8 Claims. (Cl. 254—89.)

1. In a device of the class described, a plurality of pivotally mounted axle-lifting levers, cams engaging the levers, rock shafts mounting and operating the cams, a longitudinally movable device operatively connected with the rock shafts, and wheel engaging devices operatively connected with the longitudinally movable device and automatically thrown to operative position upon the elevation of the levers by the cams.

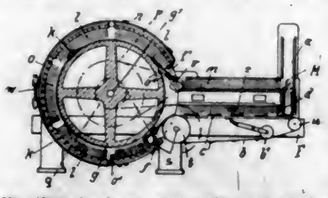


1,623,014. TRACTION CHAIN. STEPHEN S. KEMPF, Chicago, Ill. Filed Aug. 28, 1926. Serial No. 132,122. 7 Claims. (Cl. 305—3.)

4. The combination with a vehicle traction wheel; of an endless traction chain engaged therewith, rollers having connection with the chain, a stem rotatably and movably supporting one of the rollers, and means connected to the stem for controlling the movement of the roller connected to the stem from a remote point, and a guard having a flange constantly spacing a portion of the chain

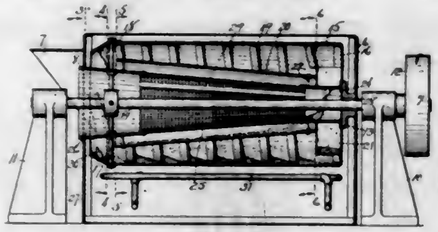
from the wheel, said roller carried by the stem being movable laterally with respect to the plane of the wheel with which the chain is engaged.

1,623,015. SAND TRAP. JOSEPH A. LAWRENCE, Olden, Tex. Filed Nov. 27, 1926. Serial No. 151,145. 3 Claims. (Cl 103—220.)



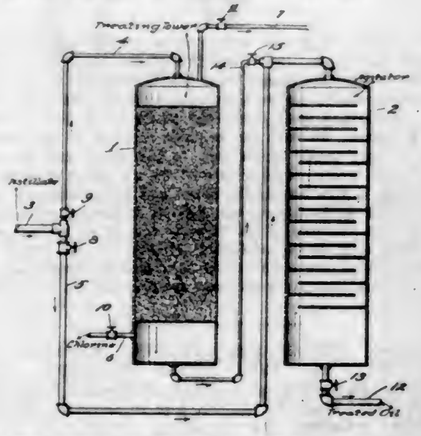
3. A sand trap for well pumps comprising a lower nipple, an upper nipple provided at its top wtih an inwardly extending flange, said nipple adapted to be connected to tubing sections, and have a pump piston extend therethrough, a shell connected at its lower end to said lower nipple, an annular member secured to the lower end of said upper nipple and to the upper end of said shell and having its body formed with a series of vertical openings, a pipe having its upper end extending into and supporting said member and further connected with said flange and through which extends the pump piston, said member, pipe, flange and shell forming a sand receiving compartment, the openings in said member providing inlets for said compartment, said member having a concave top.

1,623,016. DEVICE FOR CLEANING MATRICES OF TYPE-SETTING AND CASTING MACHINES. CARL CHRISTEL, Taucha, near Leipzig, Germany. Filed Aug. 24, 1925, Serial No. 52,123, and in Germany Sept. 6, 1924. 4 Claims. (Cl. 15—77.)



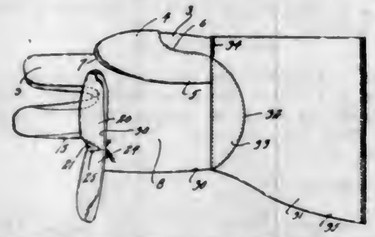
1. A device for cleaning matrices of type-setting machines comprising a frame, a channel on said frame for

guiding said matrices, a belt of steel at the base of said channel, a shaft carried in said frame and operatively connected with said belt, means for rotating said shaft, a disc on said shaft adatped to receive the matrices,



brushes distributed along said belt and said disc and adapted to act on said matrices as they are fed past said brushes, and a channel connected with said disc at one end and said feeding channel at the other.

1,623,017. DRYING APPARATUS. GEORGE W. CHRISTOPH, Warehouse Point, Conn., assignor of one-half to The American Hardware Corporation, New Britain, Conn., a Corporation of Connecticut, and one-half to The Sterling Blower Company, Hartford, Conn., a Corporation of Connecticut. Filed Dec. 14, 1925. Serial No. 75,220. 10 Claims. (Cl. 34—5.)

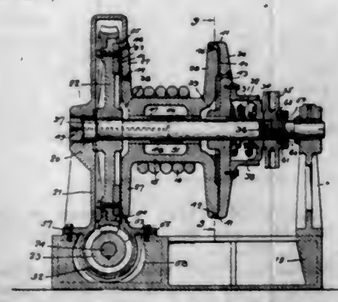


1 A drying apparatus including a plurality of concentrically arranged drums located one within another, one of said drums being adapted to receive articles to be dried and drying material, another of said drums being perforated to screen said material and deliver it to another of said drums, and the latter drum operating to return said material to the first mentioned drum, and means for rotating said drums.

1,623,018. METHOD OF TREATING PETROLEUM. ROY CROSS, Kansas City, Mo. Filed Apr. 26, 1924. Serial No. 709,269. 5 Claims. (Cl. 196—29.)

1. The method of treating petroleum products which comprises creating major and minor flow streams of oil adding to a minor flow of oil, molecular chlorine submitting such minor flow to the action of light and combining the minor flow of the products with a major flow.

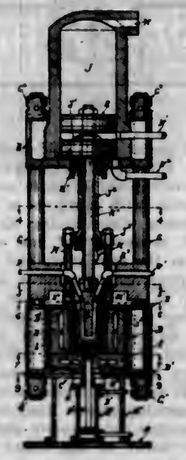
1,623,019. GLOVE. CHARLES L. MCBRIDE, Jr., Toledo, Ohio, assignor to The C. L. McBride Mfg. Company, Toledo, Ohio, a Corporation of Ohio. Filed May 5, 1924. Serial No. 711,050. 1 Claim. (Cl. 2—161.)



A gauntlet glove having a palm, fingers, thumb, back, and gauntlet, a facing for the palm, fingers, and a portion of the thumb and gauntlet, a facing boundary contour seaming approximately a continuous curved line from the outer side of the little finger across the back of the glove to wristward near the side of the thumb, and thence over the gauntlet to the side of the hand toward the wrist from the point of starting with a straight line therefrom to the point of starting.

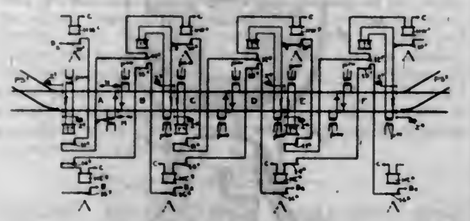
1,623,020. MACHINE FOR CUTTING GROOVES IN FLAT PANELS. CHARLES B. NORRIS, Grand Rapids, Mich., assignor to Haskelite Manufacturing Corporation, a Corporation of New York. Filed May 2, 1924. Serial No. 710,688. 7 Claims. (Cl. 144—136.)

1. In a machine of the character described, a table comprising stationary parallel rails, an elevated rotatable shaft extending transversely across the rails parallel with the tops thereof, cutter heads on said shaft directly above the rails, means for moving a panel resting on the rails along the same past the cutters, and means near the cutter engaging the panel on each side of and in advance and in rear of each cutter yieldingly to press the panel against the rails.



1,623,021. WINCH. JOHN C. SMALTZ, Short Hills, N. J. Filed Aug. 3, 1925. Serial No. 47,848. 3 Claims. (Cl. 254—187.)

1. In a slip drum winch, a winding drum having a friction head, a cooperating friction member against

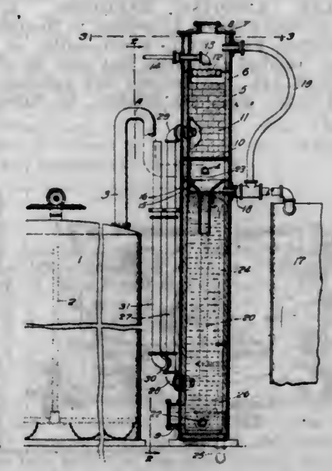


which said head abuts, the adjacent faces of said parts being shaped to afford a chamber for lubricant, at least one of said faces being channelled to lead lubricant from said chamber to a point adjacent the periphery of the area of frictional engagement, together with means at the periphery of said area for preventing direct escape of the lubricant.

1,623,022. MOLDING-PRESS APPARATUS. HAROLD M. STURGEON, Erie, Pa., assignor of one-half to Louis W. Hottel, Erie, Pa. Filed Feb. 18, 1926. Serial No. 89,100. 7 Claims. (Cl. 18—19.)

1. In a molding press for containers, a mold case, mold-box plates in said case, means to impart vertical movement to said mold-box plates with relation to said mold case, fluid actuated mechanism to press down upon the upper edges of said mold-box plates, a core-mold, and fluid actuated mechanism adapted to force said core-mold into said mold-box and withdraw it therefrom in opposition to the first mentioned fluid actuated mechanism.

1,623,023. ABSOLUTE-PERMISSIVE-BLOCK TRAIN-CONTROL SYSTEM. WALTER W. WENHOLZ, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Mar. 14, 1925. Serial No. 15,504. 12 Claims. (Cl. 246—33.)

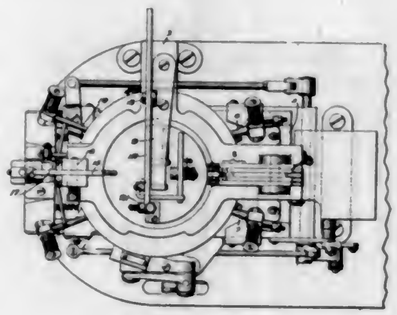


3. In combination, a stretch of railway track divided into control zones, a polar relay at the entrance end to each zone for both directions of travel which assumes a position in accordance with traffic conditions by manifesting dangerous traffic conditions when there is a train in that zone or the next zone in advance traveling in the direction governed by that relay, or there is a train any distance in advance in such stretch traveling in the opposite direction, a line wire for each of said relays extending along the zone for governing such relays in accordance with traffic conditions ahead, means including said line wire for applying alternating current to the exit end of the first section of such zone when there is a train moving in that direction in said stretch of track but is not yet occupying the second section of the zone in question.

1,623,024. HOSIERY. ABRAHAM J. BEUCUS, Waupun, Wis., assignor to Paramount Textile Machinery Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 11, 1926. Serial No. 93,950. 5 Claims. (Cl. 66—172.)

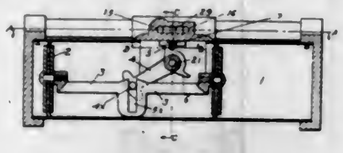
1. A knitted web having a portion of plain knitting including a series of rounds, each round having a predetermined length of yarn knit thereinto, and which determines the diametral extensibility of that round; and a round having a less number of stitches than in the contiguous rounds but with substantially the same length of yarn knit thereinto as in those other rounds, the yarn of that round being floated between stitches, whereby that round is of substantially the same diametral extensibility as the other rounds.

1,623,025. PROCESS OF CONVERTING HIGHER-BOILING PETROLEUM HYDROCARBONS INTO LOWER-BOILING PETROLEUM HYDROCARBONS. CHARLES B. BUERGER, Pittsburgh, Pa., assignor to Gulf Refining Company, Pittsburgh, Pa., a Corporation of Texas. Filed July 22, 1925. Serial No. 45,330. 6 Claims. (Cl. 196—54.)



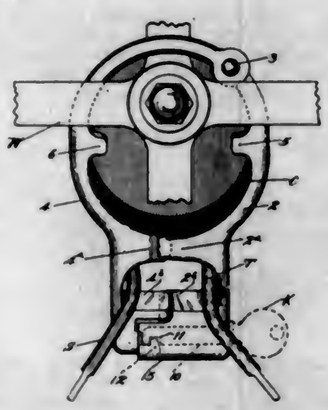
1. In the process of distilling higher boiling hydrocarbons with aluminum chlorid to produce lower boiling hydrocarbons, the step which consists in condensing the produced oily vapors by means of water contacted with them and removing any chlorids, hydrochloric acid and other foreign matters from the vapors by means of such water.

1,623,026. RHEOSTAT. EUSEBIO F. CABEZOLA, deceased; by Margaret J. Cabezola, administratrix, Bayonne, N. J.; Catherine C. Hicks, Felipa J. Wagner, née Cabezola, and Margaret C. Mettler, née Cabezola, executrices of the estate of said Margaret J. Cabezola, deceased. Filed Mar. 29, 1922. Serial No. 547,928. 9 Claims. (Cl. 74—14.)



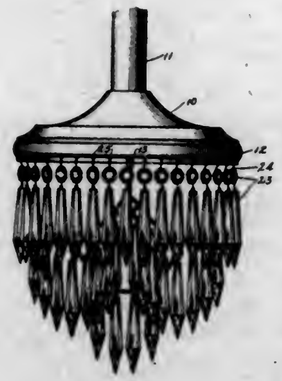
1. A frame having a number of actuating elements mounted thereon, an actuated shaft passing through an opening in the frame and serving as a guide thereto, a notched wheel on said shaft and located between said element in co-operative arrangement and means for moving said frame in vertical alignment to cause said actuating elements to alternately engage the notches in said wheel.

1,623,027. CONTROLLING MECHANISM FOR PRIMARY AND SECONDARY YARNS OF SPLIT WORK, CIRCULAR, KNITTING MACHINES. AUGUSTIN GAGNÉ, Central Falls, R. I., assignor to Hemphill Company, Central Falls, R. I., a Corporation of Massachusetts. Original application filed June 28, 1921, Serial No. 481,144. Divided and this application filed July 11, 1923. Serial No. 650,868. 12 Claims. (Cl. 66—43.)



1. In a split work, circular, knitting machine having means to supply at opposed points a main yarn and an auxiliary yarn and having means relatively to rotate the needle cylinder and cam carrier in the knitting of the upper portion of the leg and relatively to reciprocate the same for the production of split work and to interknit the main and auxiliary yarns in suture seams at opposed points, the combination of yarn cutting and holding means for the main yarn, and yarn cutting and holding means for the auxiliary yarn only.

1,623,028. AUTOMATIC WINDSHIELD CLEANER. LOUIS A. BARETT and CHESTER HUNT, Lynn, Mass.; said Hunt assignor to said Barett. Filed Aug. 9, 1924. Serial No. 731,208. 3 Claims. (Cl. 121—164.)



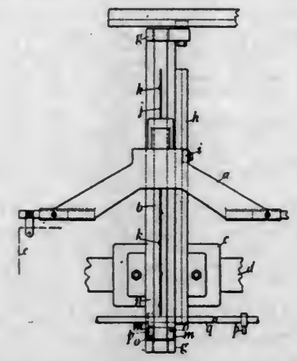
1. An operating motor for windshield cleaners comprising a cylinder, a member reciprocable therein, valve means to alternatively place opposite ends of the cylinder in communication with a source of suction and including a port-closing slide having an operating pin, a shaft journaled cross-wise of the said cylinder, a rocker arm fixed on the said shaft and operatively connected with the reciprocable member so as to impart oscillating motion to the shaft when the member is reciprocated, a lever pivoted to the cylinder on the inside thereof and adjacent the fixed end of the said rocker arm, one end of said lever being forked to provide spaced fingers adapted to alternately engage the operating pin of the said port-closing slide for reciprocating the latter, tensioning means fixed to the said cylinder and bearing against the opposite end of the lever to accelerate the movement of the latter when the said opposite end is off center, and extension fingers carried by the said rocker arm and adapted to alternately engage and shift the said lever until the said opposite end is in position to be acted upon by the said tensioning means.

1,623,029. FORD WHEEL AND THROTTLE LOCK. ROBERT V. BEHNING, Los Angeles, Calif., assignor of one-half to Martin Kroeger, Los Angeles, Calif. Filed Jan. 11, 1926. Serial No. 80,579. 3 Claims. (Cl. 70—126.)

1. A vehicle theft-preventing lock comprising a shackle frame having hinged side frames each with an inwardly projecting lug adapted to rest on the top of the usual gear case, and a lower mouth part for the spark and throttle levers.

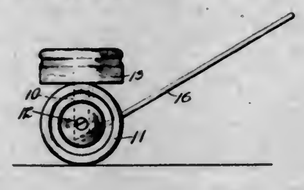
1,623,030. ORNAMENTAL ATTACHMENT FOR LIGHTING FIXTURES OR THE LIKE. AARON BLOCH, Brooklyn, N. Y. Filed Apr. 8, 1926, Serial No. 99,604. Renewed Feb. 16, 1927. 4 Claims. (Cl. 41—10.)

1. An ornamental device comprising a frame member, a chain suspended from said member at the ends thereof and consisting of a plurality of links, and a plurality of pendants hanging from said chain at the individual links.



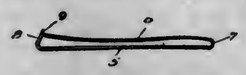
1,623,031. CORSET. BLANCHE CERVELLI, San Francisco, Calif. Filed Aug. 27, 1923. Serial No. 659,637. 8 Claims. (Cl. 2—43.)

1. A corset comprising a body portion made up of soft light weight and flexible although substantially non-elastic fabric, the upper edge of the corset being located at the waistline just above the hips throughout its extent around the body, said body having an elastic inset at the rear and having means associated with the body portion for uniting the edges thereof at the front, the corset being long at its back and having the lower portion of its back extending below, entirely across and around the seat and conforming to the outlines thereof, the lower portion of the corset at the front being cut away on lines which incline ontwardly and downwardly from the center of the corset to the sides thereof to provide a short front and to allow the wearer freedom of movement and comfort.



1,623,032. SHEET-FEEDING MECHANISM. HARRY ALBERT GRIFFITHS, Edgbaston, England. Filed May 3, 1926, Serial No. 106,515, and in Great Britain May 12, 1925. 2 Claims. (Cl. 113—113.)

1. In cutting, drawing, and like presses for operating on metal or other sheets or strips, means for controlling the step-by-step motion whereby the sheet or strip is moved towards the tools, comprising the combination of a work-holder, a stop on said holder, a guide on which the holder can slide, an oscillatory member in conjunction with the guide, abutments on said member engageable by the stop on the work-holder, a transverse oscillatory shaft, a pair of tappet levers on said shaft,



and means for transmitting opposite oscillatory motions from said tappet levers to the oscillatory member on the guide, substantially as described.

1,623,033. WHEELED TOY. STEFAN KIPER, Anderson, Ind. Filed Oct. 28, 1925. Serial No. 65,448. 1 Claim. (Cl. 46—48.)

A wheeled toy comprising an axle having relatively broad flat end surfaces and spaced laterally extending bosses provided with relatively broad flat end surfaces, a wheel mounted at each flat end of said axle and having its radius substantially co-extensive with the laterally extending bosses, and a relatively thick disk mounted on each of said bosses and extending over and engaging the circumference of the adjacent wheel whereby the same will be rotated by said wheel upon the propulsion of the toy, substantially as set forth.

1,623,034. HAIR SNAP. KENNETH L. HEATH and LOUIS SCHOEL, Edmonds, Wash.; said Schoel assignor to said Heath. Filed June 4, 1925. Serial No. 34,836. 1 Claim. (Cl. 132—48.)

A device of the class described including an elongated arcuate bar, an elongated ogee shaped bar, one end of the first bar merging with one end of the second bar so that the bars extend in the same general direction with their free ends normally sprung from each other and with the convex side of the first bar adjacent the second bar, the free end of the first bar being provided with an extension leaning over upon itself and having a bevel terminal which is in the path of movement of the terminal of the second bar whereby the terminal of the second bar may snap past the terminal of the extension for closing the device.

Mar. 1, 1927

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

A. & F. Pears Limited, London, England. Perfumed soap. 59,910–11; renewed Jan. 22, 1927.

A. & F. Pears Limited, London, England. Perfumed soap. 60,057; renewed Jan. 29, 1927.

Abbott Laboratories, North Chicago, Ill. Ammonium o-iodoxy benzoate. 224,691; Mar. 1; Serial No. 239,500; published Dec. 14, 1926.

Abel & Bach Company, Milwaukee, Wis. Trunks. 224,601; Mar. 1; Serial No. 239,281; published Dec. 14, 1926.

Abseck, Louis, doing business as The Sealastic Co., Brooklyn, N. Y. Brushes and bristle dusters. 224,605; Mar. 1; Serial No. 239,222; published Dec. 14, 1926.

Acme Baby Chick Hatchery, Peoria, Ill. Baby chicks. 224,562–3; Mar. 1; Serial Nos. 210,772–3; published Dec. 14, 1926.

Adam, J. N., & Co., Buffalo, N. Y. Paints, varnishes, paint enamels, and oils. 224,491; Mar. 1; Serial No. 237,643; published Nov. 23, 1926.

Additon, Forrest, doing business as Chattahoochee Furniture Company, Flowery Branch, Ga. Wardrobes. 224,690; Mar. 1; Serial No. 239,501; published Dec. 7, 1926.

Adelphi Trading Co., Philadelphia, Pa. Antislipping preparation applied to the grip portion of golf clubs, etc. 224,517; Mar. 1; Serial No. 238,148; published Nov. 30, 1926.

Aird-Don Co., Troy, N. Y. Heating boilers. 224,668; Mar. 1; Serial No. 235,012; published Nov. 30, 1926.

Aktien-Gesellschaft Vereinigte Berner & Zurcher Chocolade-Fabriken Lindt & Sprungli, Bern, Switzerland, assignor to Lindt & Sprungli, Inc., New York, N. Y. Certain named chocolate and cocoa preparations. 51,382; renewed Apr. 17, 1926.

Alabama-Georgia Syrup Company, Montgomery, Ala. Sirups. 63,089; renewed June 4, 1927.

Allen, Joseph, & Sons Limited, Sheffield, England. Cutlery in general and other hand tools having a cutting edge. 63,407; renewed June 18, 1927.

Alps Specialty Company, Chicago, Ill. Candies, peanut clusters, chocolate raisin clusters, etc. 224,674; Mar. 1; Serial No. 234,428; published Dec. 7, 1926.

Amalgamated Silk Corporation, Wilmington, Del., and New York, N. Y. Plaid and satin crepe piece goods. 224,559; Mar. 1; Serial No. 239,732; published Dec. 14, 1926.

American Chain Company. (See Standard Chain Company, assignor.)

Medicine, Asthma. L. Kozik. 224,444; Mar. 1; Serial No. 237,507; published Dec. 7, 1926.
Medicine for coughs, colds, pneumonia, colic, etc. J. C. Shelley. 224,728; Mar. 1; Serial No. 2[illegible],404; published Dec. 7, 1926.

Medicine for headache, toothache, neuralgia, etc. D. M. Malloy & Sons. 224,438; Mar. 1; Serial No. 237,915; published Nov. 30, 1926.
Mouth wash. Canute Co. 224,676; Mar. 1; Serial No. 234,291; published Dec. 7, 1926.
Oil, Gelatinized cod-liver. Otis Clapp & Son. 224,632; Mar. 1; Serial No. 238,611; published Dec. 7, 1926.
Parasiticides. Niagara Sprayer Company. 224,515; Mar. 1; Serial No. 233,141; published Dec. 7, 1926.
Parasiticides. Niagara Sprayer Company. 224,516; Mar. 1; Serial No. 233,136; published Dec. 7, 1926.
Perfume, toilet water, face powder, etc. C. J. Diaz. 224,722; Mar. 1; Serial No. 238,844; published Dec. 14, 1926.
Pharmaceutical preparation. Ozojell Co. 62,890; renewed May 28, 1927.
Pharmaceutical preparations for human use in the treatment of rheumatism, gout, etc. Gerhard F. Schmidt Aktiengesellschaft. 224,684; Mar. 1; Serial No. 239,601; published Dec. 14, 1926.
Poison, Insect. H. L. Squires. 63,652; renewed July 2, 1927.
Powder, Foot. Foot-Care Co. 224,635; Mar. 1; Serial No. 238,647; published Dec. 7, 1926.
Powder, shampoo, perfume, rouge, etc., Face, talcum, and body. A. H. Fowler. 224,552; Mar. 1; Serial No. 238,171; published Dec. 14, 1926.
Powder, Toilet. Amolin Chemical Company. 59,178; renewed Jan. 1, 1927.
Powder, Vaginal douche. Wo-Ness Laboratory. 224,685; Mar. 1; Serial No. 239,554; published Dec. 14, 1926.
Powders, Face. J. Martinat. 224,737; Mar. 1; Serial No. 221,129; published Dec. 7, 1926.
Powders, Face and talcum. Baird & Sawyer. 224,720; Mar. 1; Serial No. 238,832; published Dec. 14, 1926.
Preparation adapted for external application to the skin. I. Weinshenker. 224,726; Mar. 1; Serial No. 238,470; published Dec. 7, 1926.
Preparation for permanent hair waving. J. Fluette. 224,783; Mar. 1.
Preparation for the treatment of tuberculosis and heaves. J. M. Christie. 224,584; Mar. 1; Serial No. 238,952; published Dec. 7, 1926.
Remedies for diseases of the throat, lungs, and bronchial organs. H. Stringer. 48,558; renewed Jan. 2, 1926.
Remedies for the treatment of obesity, high blood pressure, acidosis, etc. B. L. Cole. 224,591; Mar. 1; Serial No. 238,897; published Dec. 7, 1926.
Remedy for diseases of stock and poultry. W. S. Brown. 57,208; renewed Nov. 6, 1926.
Remedy used internally for seasickness and other disorders and diseases originating in the stomach. M. Z. Söhne. 224,475; Mar. 1; Serial No. 231,892; published Dec. 7, 1926.
Rouge, Toilet. E. M. Hetsel. 61,945; renewed Apr. 9, 1927.
Shampoo, Liquid. Western Meat Company. 224,440; Mar. 1; Serial No. 237,636; published Dec. 7, 1926.
Starch, Laundry. Sherer-Gillett Company. 62,946; renewed May 28, 1927.
Suppositories, Vaginal. L. M. Hunter. 224,607; Mar. 1; Serial No. 239,175; published Dec. 14, 1926.
Tablets. J. H. Pine. 58,987; renewed Dec. 25, 1926.
Toilet and medicinal preparations. Sherer-Gillett Company. 60,849; renewed Feb. 19, 1927.
Toilet preparations. Frederick Stearns & Company. 62,616; renewed May 14, 1927.
Tonics, Uterine. Rio Chemical Co. 63,011; renewed June 4, 1927.
Witch-hazel cream, cucumber cream, cold cream, etc. Jordan Marsh Company. 224,686; Mar. 1; Serial No. 239,524; published Dec. 14, 1926.

CLASS 7.

Cables and ropes. Broderick & Bascom Rope Company. 224,542; Mar. 1; Serial No. 235,728; published Dec. 14, 1926.
Cords, twines, and ropes. Silver Lake Company. 60,317; renewed Feb. 5, 1927.
Rope, Wire. Macomber & Whyte Rope Company. 58,983; renewed Dec. 25, 1926.

CLASS 9.

Cartridges, powder, and percussion caps. Peters Cartridge Company. 60,728; renewed Feb. 19, 1927.
Explosives and blasting supplies. Eastern Dynamite Company. 62,480; renewed May 7, 1927.
Explosives, High. Eastern Dynamite Company. 61,978; renewed Apr. 16, 1927.
Firecrackers. Hitt Fireworks Company. 224,509; Mar. 1; Serial No. 239,657; published Dec. 14, 1926.

CLASS 10.

Bone phosphate. Baugh & Sons Company. 63,359; renewed June 18, 1927.

CLASS 11.

Inked ribbons, sheets, and strips for duplication and transfer of impressions. Columbia Carbon Company. 224,645; Mar. 1; Serial No. 238,543; published Dec. 14, 1926.

CLASS 12.

Cement and Portland cement. Onoda Cement Co. Ltd. 224,462–3; Mar. 1; Serial Nos. 226,504–5; published Nov. 9, 1926.
Slates, tiles, plates, paving bricks, etc. Société Française de l'Everite. 224,568–70; Mar. 1; Serial Nos. 201,052–4; published Feb. 16, 1926.

CLASS 13.

Chain and chain links. Standard Chain Company. 58,223; renewed Dec. 11, 1926.
Doorchecks. United Hardware & Tool Corporation. 224,648; Mar. 1; Serial No. 238,537; published Dec. 14, 1926.
Metal grips for cables. Universal Cable Grip Company. 61,329; renewed Mar. 12, 1927.
Nails. Pittsburgh Steel Company. 224,589; Mar. 1; Serial No. 238,917; published Dec. 14, 1926.
Rope-end attachment. W. G. Norman Corporation. 224,622; Mar. 1; Serial No. 238,339; published Dec. 14, 1926.

CLASS 14.

Alloy, Metallic. Western Electric Company. 224,452; Mar. 1; Serial No. 237,360; published Dec. 7, 1926.
Cadmium plating, anodes, and anode supports. Udylite Process Company. 224,679; Mar. 1; Serial No. 233,958; published Dec. 14, 1926.
Forgings. Kropp Forge Company. 224,470; Mar. 1; Serial No. 232,682; published Dec. 14, 1926.
Lead, Pig. Picher Lead Company. 59,961; renewed Jan. 22, 1927.
Metal rods, die castings, sand castings, and forgings of nonferrous metal. Mueller Brass Co. 224,739; Mar. 1; Serial No. 236,430; published Dec. 14, 1926.
Metals and bearing castings, Babbitt. Division Smelting and Refining Company. 224,745; Mar. 1; Serial No. 236,639; published Dec. 14, 1926.
Molds for making castings of metal and parts and accessories thereof. Guardian Trust Company, trustee. 224,734; Mar. 1; Serial No. 216,177; published Aug. 10, 1926.
Steel and iron. Kloster Steel Corporation. 224,557; Mar. 1; Serial No. 239,758; published Dec. 14, 1926.
Steels and alloy steels. Central Steel Company. 224,751; Mar. 1; Serial No. 221,946; published Dec. 14, 1926.
Tin and galvanized steel sheets, Roofing. Wheeling Corrugating Company. 224,669; Mar. 1; Serial No. 234,937; published Dec. 7, 1926.

CLASS 15.

Gasoline. Beacon Oil Company. 224,453; Mar. 1; Serial No. 237,219; published Nov. 30, 1926.
Oil, Blended lubricating. Masury-Young Company. 224,752–5; Mar. 1; Serial Nos. 221,760–3; published Dec. 7, 1926.
Oil, Motor-lubricating. C. F. Gydeson. 224,589; Mar. 1; Serial No. 236,085; published Dec. 7, 1926.
Oils, Standard Oil Company. 224,699; Mar. 1; Serial No. 239,433; published Dec. 14, 1926.
Oils and greases, Motor. Wilson Oil Corporation. 224,579; Mar. 1; Serial No. 239,007; published Dec. 14, 1926.
Oils, Fuel. Penn Oil Co. 224,496; Mar. 1; Serial No 237,764; published Dec. 14, 1926.
Oils, Illuminating. Warden & Oxnard. 58,385; renewed Dec. 11, 1926.
Oils, Lubricating. United States Graphite Company. 59,505; renewed Jan. 8, 1927.

CLASS 16.

Enamel in the nature of paint. United States Gutta Percha Paint Company. 224,750; Mar. 1; Serial No. 222,148; published Dec. 14, 1926.
Lacquers and varnishes. Ultralac Products Co. 224,705; Mar. 1; Serial No. 238,349; published Dec. 7, 1926.
Lacquers, Nitrocellulose. Red Spot Paint & Varnish Co. 224,611; Mar. 1; Serial No. 239,138; published Dec. 7, 1926.
Lead, Pure white. Eagle White Lead Co. 60,062; renewed Jan. 29, 1927.
Lead, Pure white. Eagle White Lead Company. 60,983; renewed Feb. 26, 1927.
Lithopone used as a paint pigment. New Jersey Zinc Company. 224,495; Mar. 1; Serial No. 237,748; published Nov. 23, 1926.
Paint. M. J. Merkin Paint Co. Inc. 224,583; Mar. 1; Serial No. 238,985; published Dec. 14, 1926.
Paint and varnish removers. John Lucas & Co. 58,241; renewed Dec. 11, 1926.
Paint or coloring material. John Lucas & Co. 58,240; renewed Dec. 11, 1926.
Paints. Johnson McKim Johnson Co. 224,457; Mar. 1; Serial No. 237,032; published Nov. 23, 1926.
Paints and painters' materials. John Lucas & Co. 59,889; renewed Jan. 22, 1927.
Paints and varnish, Ready-mixed. Williamson & Beisler. 224,541; Mar. 1; Serial No. 236,072; published Nov. 30, 1926.
Paints and varnishes. Wisconsin Paint Mfg. Company. 224,544; Mar. 1; Serial No. 235,505; published Dec. 7, 1926.

Paints and varnishes, Thinners for. Red Spot Paint & Varnish Co. 224,546; Mar. 1; Serial No. 235,420; published Dec. 7, 1926.
Paints, Enamel. John Lucas & Co. 58,242; renewed Dec. 11, 1926.
Paints, Ready-mixed wall-finish. Hanna Paint Manufacturing Company. 224,702; Mar. 1; Serial No. 235,216; published Nov. 23, 1926.
Paints, varnishes, paint enamels, and oils. J. N. Adam & Co. 224,491; Mar. 1; Serial No. 224,491; published Nov. 23, 1926.

Vehicles, Boats and road. E. Gentil. 59,474; renewed Jan. 8, 1927.

CLASS 21.

Batteries, Storage. Rechargo Manufacturing Co. 224,759; Mar. 1; Serial No. 221,379; published Dec. 14, 1926.
Condensers, Variable. Wireless Radio Corporation. 224,523; Mar. 1; Serial No. 238,098; published Dec. 7, 1926.
Current-supply apparatus, A and B power. Grigsby-Grunow-Hinds Co. 224,671; Mar. 1; Serial No. 234,907; published Dec. 14, 1926.
Electric lamps, Incandescent. Franklin Electric Mfg. Co. 61,508; renewed Mar. 26, 1927.
Electrical apparatus. International Process and Engineering Corporation. 224,704; Mar. 1; Serial No. 219,588; published Dec. 14, 1926.
Electrical hot plates, cabinet ranges, cookers, and waffle irons. Buckwalter Stove Company. 224,725; Mar. 1; Serial No. 238,481; published Dec. 14, 1926.
Lightning rods covered or plated with a layer of copper. St. Louis Lightning Rod Co. 60,575; renewed Feb. 12, 1927.
Radio power units. W. F. Price Battery Supply Company. 224,633; Mar. 1; Serial No. 238,612; published Dec. 14, 1926.
Radio receiving sets. Better Radio, Inc. 224,746; Mar. 1; Serial No. 236,722; published Dec. 14, 1926.
Radio receiving sets and parts thereof. A. G. Landres. 224,630; Mar. 1; Serial No. 225,021; published Dec. 14, 1926.
Reproducers for radioreceivers. Grigsby-Grunow-Hinds Co. 224,670; Mar. 1; Serial No. 234,908; published Dec. 14, 1926.

CLASS 22.

Cribbage board, Pocket. F. B. Babbitt. 224,497; Mar. 1; Serial No. 237,772; published Dec. 7, 1926.
Dolls. Jacobs & Kassler. 224,538; Mar. 1; Serial No. 236,131; published Nov. 30, 1926.
Dolls. Louis Wolf & Co. Inc. 224,697; Mar. 1; Serial No. 239,450; published Dec. 14, 1926.
Fishhooks, artificial flies, etc. Henry Milward & Sons, Limited. 224,494; Mar. 1; Serial No. 237,745; published Dec. 7, 1926.
Fishing reels. Enterprise Manufacturing Company. 224,683; Mar. 1; Serial No. 239,615; published Dec. 14, 1926.
Game. Shulman & Sons. 224,587; Mar. 1; Serial No. 238,924; published Dec. 14, 1926.
Game board played with pieces and dice, Parlor. William M. Rohn and Carl A. Johnson. 224,649; Mar. 1; Serial No. 238,527; published Dec. 14, 1926.
Golf balls, golf clubs, etc. North British Rubber Co. Ltd. 224,455; Mar. 1; Serial No. 237,129; published Dec. 21, 1926.
Toy animals, Stuffed. M. A. Myers. 224,618; Mar. 1; Serial No. 238,385; published Dec. 7, 1926.
Toys, combination mechanical toys and games, etc., Mechanical. F. J. Dick. 224,550; Mar. 1; Serial No. 235,256; published Dec. 7, 1926.

CLASS 23.

Automobile replacement parts. Star Products and Machine Company. 224,560; Mar. 1; Serial No. 215,826; published Dec. 14, 1926.
Bearings. Neveroil Bearing Company. 224,507; Mar. 1; Serial No. 239,667; published Dec. 14, 1926.
Bit braces, cake turners, can openers, etc. Washburn Company. 224,942; Mar. 1; Serial No. 230,576; published Dec. 7, 1926.
Couplings, Shaft. Charles Bond Company. 224,776–7; Mar. 1.
Cutlery. F. Koeller & Co. 224,749; Mar. 1; Serial No. 222,616; published Dec. 14, 1926.
Cutlery in general and other hand tools having a cutting edge. Joseph Allen & Sons Limited. 63,407; renewed June 18, 1927.
Filters for engines. Sheet Steel Products Company. 224,729; Mar. 1; Serial No. 238,402; published Dec. 14, 1926.
Machinery. Organ Power Corporation. 62,801; renewed May 28, 1927.
Machinery. Organ Power Corporation. 62,816; renewed May 28, 1927.
Machinery, Experimental and special. W. F. Errig. 224,466; Mar. 1; Serial No. 232,916; published Dec. 14, 1926.
Pan lifters. Tyler Manufacturing Company. 224,520; Mar. 1; Serial No. 238,143; published Dec. 14, 1926.
Planes. Sears, Roebuck and Co. 224,597; Mar. 1; Serial No. 239,328; published Dec. 7, 1926.
Plows. Wiard Plow Company. 63,301; renewed June 11, 1927.
Razor blades, Safety. E. W. McDonough. 224,143; Mar. 1; Serial No. 236,615; published Dec. 7, 1926.
Razors and razor blades, Safety. Magazine Repeating Razor Company. 224,639; Mar. 1; Serial No. 238,326; published Dec. 7, 1926.
Shovels, spades, and scoops. Ames Shovel and Tool Company. 224,770; Mar. 1.
Sweepers, Carpet. Bissell Carpet Sweeper Co. 60,505–8; renewed Feb. 12, 1927.
Sweepers, Carpet. Bissell Carpet Sweeper Company. 61,146–7; renewed Mar. 5, 1927.
Swith stands, Railway. Pettibone Mulliken Co. 224,532; Mar. 1; Serial No. 219,842; published Dec. 14, 1926.
Turbines and parts thereof, Steam. C. A. Parsons. 51,999; renewed May 1, 1926.
Typewriting machines and parts thereof. L C Smith & Corona Typewriters Inc. 224,784; Mar. 1.

CLASS 24.

Washing machine. Mystic Washer Co. 224,626; Mar. 1; Serial No. 238,189; published Nov. 30, 1926.

CLASS 25.

Padlocks. I. P. Reese. 224,771; Mar. 1.

CLASS 26.

Electrical measuring instruments. Lundquist Tool & Mfg. Co. 224,758; Mar. 1; Serial No. 221,556; published Dec. 14, 1926.
Lenses and blanks, Opthalmic. Unisite Lens Company. 224,762; Mar. 1; Serial No. 236,785; published Dec. 7, 1926.
Photographic plates and films, lenses, cameras, etc. I. G. Farbenindustrie Aktiengesellschaft. 224,730; Mar. 1. Serial No. 238,547; published Dec. 14, 1926.
Picture films, Motion. J. Ollendorff. 224,443; Mar. 1; Serial No. 237,509; published Dec. 7, 1926.
Pyrometer sheaths. Industrial Welded Products Co. Inc. 224,675; Mar. 1; Serial No. 234,400; published Nov. 30, 1926.

Flatirons, Electric. Chicago Flexible Shaft Company. 242,085; Mar. 1.
Flatirons, Electric. Chicago Flexible Shaft Company. 242,089; Mar. 1.
Flatirons, Electric. Chicago Flexible Shaft Company. 242,090; Mar. 1.
Lighting equipment, etc., Theater. Major Equipment Company. 240,423–4; Mar. 1.
Radio receiving sets. H. P. Trambley. 238,536; Mar. 1.
Radio receiving sets and parts thereof and loud speakers. Luxor Radio Corporation. 242,063; Mar. 1.
Radio receiving sets, loud speakers, etc. Roth Radio, Inc. 236,775; Mar. 1.
Resistors for electrical purposes, Fixed and variable. American Mechanical Laboratories, Inc. 238,001; Mar. 1.
Suction cleaners, Electrically-operated. Standard Vacuum Cleaner Manufacturing Company. 241,683; Mar. 1.
Vacuum tubes and valves. Radio Corporation of America. 240,365–6; Mar. 1.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Wire, ribbon, strips, and rods. Resistance. Driver-Harris Company. 241,876; Mar. 1.

CLASS 22.

Exercising devices. S. Blickmann, Inc. 240,522; Mar. 1.
Fishing bait, Artificial. South Bend Bait Co. 241,908; Mar. 1.

CLASS 23.

Bellows for temperature and pressure controlled apparatus, etc., Metallic. Clifford Manufacturing Co. 241,987; Mar. 1.
Devices actuated automatically by the gear of vehicles to indicate the route to be taken and to display advertisements. Periometer Co. Inc. 240,212; Mar. 1.
Fire-extinguishing apparatus. Direct Selling Company of America. 241,812; Mar. 1.
Knives, Woodworking-machinery. Guaranteed Machine Company. 243,268; Mar. 1.
Press machinery and fluted cutting tools, Diesinking and metal-working. J. H. Ripstra. 241,242; Mar. 1.
Straps, Lug, loom, harness, etc. J. E. Rhoads & Sons. 241,674; Mar. 1.
Sweepers, Mechanical carpet. Bissell Carpet Sweeper Company. 242,274; Mar. 1.

CLASS 25.

Catches, bolts, sash fasteners, locks, etc, Barn-door. Champion Hardware Company. 205,392; Mar. 1.
Locks. J. Q. Sherman. 242,445; Mar. 1.

CLASS 26.

Measuring and recording voltage surges, Instruments for. Westinghouse Electric & Manufacturing Company. 240,795; Mar. 1.
Picture films, Moving-. Bray Productions, Inc. 241,315;

CLASS 27.

Watchcases and watches. S. Bruner Inc. 239,083–6; Mar. 1.
Watches. S. Weissman Company. 241,800; Mar. 1.
Watches and parts thereof. Gebrüder Thiel Gesellschaft mit beschrankter Haftung. 241,336; Mar. 1.

CLASS 28.

Jewelry. Stockert & Cie. 241,121; Mar. 1.
Silver hollow ware. Bernard Rice's Sons, Inc. 241,677; Mar. 1.
Silver-plated knives. Associated Silver Company. 241,689; Mar. 1.
Silverware. Weidlich Sterling Spoon Co. 224,792; Mar. 1.

CLASS 32.

Mattresses and pillows. F. Parker. 239,486; Mar. 1.
Wardrobes, cabinets, and chests, Mothproof. J. F. Friedel Paper Box Co. 238,981; Mar. 1.

CLASS 34.

Draft regulator. H. W. Heyman. 237,413; Mar. 1.
Radiator using oil or gas, Room-heating. Everhot Heater Company. 234,666; Mar. 1.
Ranges, Combined coal and gas. A-B Stove Company. 242,266; Mar. 1.

CLASS 35.

Belting. Ruboil Belting Company. 237,247; Mar. 1.
Boots for the repair of tires. F. J. Hagerling. 241,943; Mar. 1.
Tire patches, tube patches, tire-repair kits, etc. Fisk Rubber Company. 243,148; Mar. 1.

CLASS 36.

Educational chart in the form of phonograph records. A. E. Ambalov. 226,120; Mar. 1.
Musical instruments. Lyon & Healy, Inc. 225,616; Mar. 1.
Musical instruments and supplies. M. Waterson. 226,758; Mar. 1.

CLASS 37.

Notebooks, chalk holders, and rulers. Reeves & Sons Limited. 221,772; Mar. 1.
Paper. W. A. Hermanson. 242,431; Mar. 1.
Paper, Book and printing. Perkins Goodwin Company. 242,021; Mar. 1.
Paper, Tissue. Brittains, Limited. 241,560; Mar. 1.
Supplies, pass books, check books, etc., Bank. Continental Bank-Supply Company. 219,060; Mar. 1.

CLASS 38.

Books, prints. Sign of the Mermaid. 232,357; Mar. 1.
Coupons, Bank. Bank Credits Title Company. 241,313; Mar. 1.
Magazine. Meadow Press, Inc. 240,674; Mar. 1.
Magazine articles and other writings, Printed and typed. W. Holmes. 241,053; Mar. 1.
Magazines. American News Company. 240,334; Mar. 1.
Newspaper column. Los Angeles Examiner. 237,608–9; Mar. 1.
Printed matter. F. H. W. Clark. 239,260; Mar. 1.
Publication. E. Ennis. 241,295; Mar. 1.
Publication. United Engineering & Foundry Company. 237,004; Mar. 1.
Publication, Monthly. Wall Street Iconoclast. 235,007; Mar. 1.

CLASS 39.

Coats, vests, trousers, etc., for men and young men. Eisenberg & Anderson. 233,537; Mar. 1.
Dresses, rompers, and boys' suits, Children's. Wilson-Collier Co. Inc. 242,264; Mar. 1.
Hosiery. Bear Brand Hosiery Co. 242,518; Mar. 1.
Hosiery. Interwoven Stocking Company. 242,340; Mar. 1.
Hosiery. A. Kobb. 242,670; Mar. 1.
Hosiery. Peck & Peck. 242,251; Mar. 1.
Hosiery. Daisy Whitehead Knitting Co. 242,574; Mar. 1.
Hosiery and underwear. Colton & Bernie, Inc. 242,708; Mar. 1.
Overalls and work shirts. Harlin & Williams. 242,586; Mar. 1.
Shoes and pumps. Menihan Company. 241,061; Mar. 1.
Slippers, Leather. E. Bandler. 241,312; Mar. 1.
Soles, etc., Whole and half. J. E. Rhoads & Sons. 241,675; Mar. 1.
Suits, Bathing. Niagara Knitting Co. 242,204; Mar. 1.

CLASS 40.

Hair bands made of celluloid or like material. L. Skaruda. 241,446; Mar. 1.
Needles, Hand sewing. L. Lammertz. 240,727; Mar. 1.

CLASS 42.

Cotton, cotton and silk, and cotton and rayon fabrics. Turner & Vandam, Inc. 239,869; Mar. 1.
Silk crepe in the piece. Jas. G. Johnson & Co. 242,891; Mar. 1.
Towels, bedspreads, etc. F. Tausend. 241,009; Mar. 1.
Woolen piece goods. Everett Norfolk Company. 240,906; Mar. 1.
Woolen piece goods. Forstmann & Huffmann Company. 242,421; Mar. 1.

CLASS 45.

Beverage. J. F. Bloodworth. 238,769; Mar. 1.
Beverage. Keen Kola Manufacturing Company. 238,504–6; Mar. 1.
Beverages. Aceda Company. 238,563; Mar. 1.
Beverages. Henry-Brown Company. 242,831; Mar. 1.
Beverages. S. A. Jessup. 242,785; Mar. 1.
Extracts, sirups, and concentrates for making beverages. H. C. Schranck Company. 239,890; Mar. 1.
Ginger ale. Hotel Sherman Co. 242,832; Mar. 1.

CLASS 46.

Alimentary products. Chicago Macaroni Co. 241,986; Mar. 1.
Bread. Great Atlantic & Pacific Tea Co. 242,291; Mar. 1.
Candy. Bullock's. 223,460; Mar. 1.
Candy. Junior Candy Company. 236,263; Mar. 1.
Candy. Pensacola Candy Co. 241,900; Mar. 1.
Candy bars. Coxon Corporation. 223,371; Mar. 1.
Candy, Fig. Gordon, Wolf, Cowen Co. Inc. 241,616; Mar. 1.
Candy sucker. F. S. Barbaro. 235,722; Mar. 1.
Canned caviar. Meyer & Lange, Inc. 240,825; Mar. 1.
Canned corn, peas, red kidney beans, etc. Inderrieden Canning Co. 238,906; Mar. 1.
Canned fish. Sebastian Stuart Fish Co. 237,196; Mar. 1.
Canned fruits and vegetables, fruit preserves, dried vegetables, etc. Edward W. Brown Co. 211,015; Mar. 1.
Canned mushrooms. E. H. Jacob. 242,131; Mar. 1.
Canned pumpkin, string beans, hominy, etc. Rasse Wholesale Grocer Co. 238,742; Mar. 1.
Canned tunny fish. N. Tatsukawa. 180,598; Mar. 1.
Canned vegetables. R. C. Williams & Co. Inc. 238,631; Mar. 1.
Canned vegetables and berries. Sanborn-Cutting Company. 223,869; Mar. 1.
Cocoa, pastries, confectionery, etc. "Sarotti" Aktiengesellschaft. 232,795; Mar. 1.
Coffee. B. H. Karmen. 242,939; Mar. 1.
Confection. Angleton Fig Company. 242,701; Mar. 1.
Flavoring. Hershey Chocolate Company. 233,075; Mar. 1.
Flour, Self-rising pancake, buckwheat, cake, biscuit, etc. Teco Foods, Inc. 238,243; Mar. 1.
Fruits, melons, lettuce, tomatoes, cucumbers, peas, etc., Fresh citrous and deciduous. Yaqui Fruit Co. 217,127; Mar. 1.
Gum, Chewing. American Chicle Company. 236,980; Mar. 1.
Gum, Chewing. American Chicle Company. 238,564; Mar. 1.
Gum, Chewing. American Chicle Company. 238,887; Mar. 1.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Gum, Chewing. American Yeast Gum Company. 240,940; Mar. 1.
Hays and ground feeds. Mason Alfalfa Process Company. 242,383; Mar. 1.
Ice cream, whipped cream, butter, etc. Rio Grande Valley Dairy Association. 242,852; Mar. 1.
Jelly powders. Enzo Jel Company. 241,147; Mar. 1.
Melons and vegetables, Fresh. E. E. Whitted. 234,180; Mar. 1.
Mustard. R. T. French Company. 239,978; Mar. 1.
Oil, Olive. R. W. Gerard. 241,527; Mar. 1.
Paste products, Alimentary. Tharinger Macaroni Company. 239,494; Mar. 1.
Salad oil. Hakoach Kosher Food Products Co. Inc. 240,352; Mar. 1.
Sirup for food purposes, Malt. Valentin Blatz Brewing Company. 242,079; Mar. 1.

Vegetables, Fresh. Sealinas Land Company. 243,286; Mar. 1.
Vegetables, Fresh. Southern Sweet Potato Exchange Incorporated. 239,152; Mar. 1.
Vinegar. W. Marti. 237,430; Mar. 1.
Yeast. Universal Yeast Corporation. 242,400; Mar. 1.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 1ST DAY OF MARCH, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Aaron, Maurice F., Mizpah, N. J. Automobile seat-cushion cover. 1,619,556; Mar. 1.
Abbott, Robert H. (See Buchanan, J. R and Abbott.)
Abramson, Nathan, Brooklyn, N. Y. Flashing plug. 1,619,778; Mar. 1.
Actien Gesellschaft "Neptun" Schiffswerft und Maschinenfabrik. (See Wodke, Otto, assignor.)
Adams, Harry E., assignor to The W. G. Nagel Electric Company, Toledo, Ohio. Rheostat. 1,618,967; Mar. 1.
Adams, Morton L., Seattle, Wash. Lubricator. 1,619,779; Mar. 1.
Adams, Ross W. (See Anderson E., and Adams.)
Adco, Limited. (See Richards, E. H., and Hutchinson, assignors.)
Adlof, Frederick W., New Brighton, Pa. Circular saw. 1,619,780; Mar. 1.
Aetna Automatic Oil Burner, Incorporated. (See Scheminger, John, jr., assignor.)
Agar, Calvin A., West Orange, N. J. Shipping member. 1,619,011; Mar. 1.
Aglow, Harry, New York, N. Y., assignor to The New York Lighting Fixture Mfg. Co. Chandelier. Des. 72,077; Mar. 1.
Aglow, Harry, New York, N. Y., assignor to The New York Lighting Fixture Mfg. Co. Lighting-fixture backplate. Des. 72,078; Mar. 1.
Air Reduction Company. (See Van Nuys, Claude C., assignor.)
Akashi, Kazue, Tokyo, Japan. Beam compass. 1,619,392; Mar. 1.
Aktiebolaget Formator. (See Granstedt, Erik, assignor.)
Aktiebolaget Gerh. Arehns Mekaniska Verkstad. (See Ekström, G. C., Öström, and Johnson, assignors.)
Aktiebolaget Stille-Werner. (See Brunskog, V. H. M., and Nordin, assignors.)
Alexander, Jesse, Los Angeles, Calif. Ribbon-operating mechanism for typewriting machines. 1,619,174; Mar. 1.
Alfonso, Ernest M., Brooklyn, N. Y. Compression faucet. 1,619,781; Mar. 1.
Alland, Maurice, Atlantic City, N. J. Fountain pen. 1,619,323; Mar. 1.
Allen, Durward M., assignor of one-half to F. N. Gilbert, Binghamton, N. Y. Mop for baseboards. 1,619,324; Mar. 1.
Allen, John H. (See Riegel, Samuel S., assignor.)
Alvey Manufacturing Company. (See Bohn, William J., assignor.)
American Arch Company. (See Willett, Alfred H., assignor.)
American Auto Trimming Company. (See Best, Frank A., assignor.)
American Auto Trimming Company. (See Plumb, Milton M., assignor.)
American Can Company. (See Widell, M. E., and Rudolphi, assignors.)
American Lead Pencil Company. (See Roche, John, assignor.)
American Lithographic Company. (See Intemann, William, assignor.)
American Optical Company. (See Gagnon, Louis L., assignor.)
American Optical Company. (See Hill, Harry W., assignor.)
American Optical Company. (See Maynard, Albert E., assignor.)
American Optical Company. (See Peterson, Frank E., assignor.)
American Telephone and Telegraph Company. (See Crisson, George, assignor.)
American Telephone and Telegraph Company. (See Deardorff, Ralph W., assignor.)
American Telephone and Telegraph Company. (See Nyquist, Harry, assignor.)
Ames, B. C., Co. (See Robbins, Chester C., assignor.)
Amity Leather Products Co. (See Rolfs, Robert H. and H. J., assignors.)
Amsler-Morton Company, The. (See Morton, William A., assignor.)
Anderson, David L., assignor to Intertype Corporation, Brooklyn, N. Y. Assembling elevator gate for typographical machines. 1,619,646; Mar. 1.
Anderson, Edward, and R. W. Adams, Minneapolis, Minn. Vegetable and soap slicing machine. 1,619,557; Mar. 1.
Anderson, Gustaf A., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Truck side frame. 1,619,688; Mar. 1.
Anderson, J. Alfred. (See Martikainen, Janne, assignor.)
Anderson, John B., Moline, Ill. Amusement device. 1,619,325; Mar. 1.
Anderson, Sigurd E., assignor to New Monarch Machine & Stamping Company, Des Moines, Iowa. Loader attachment for tractors. 1,619,786; Mar. 1.
Angle, Glenn D., Dayton, Ohio. Crank-case construction. 1,619,012; Mar. 1.
Apollo Holding Corporation. (See McCrery, H. E., Jesser, and Montgomery, assignors.)
Arca Regulators, Inc. (See Lindsay, Thomas, assignor.)
Archer, Thomas P., assignor to Ternstedt Manufacturing Company, Detroit, Mich. Handle assembly. 1,619,097; Mar. 1.
Archila, Fulgencio, Bogota, Colombia. Waterproof case. 1,619,782; Mar. 1.
Armington, Arthur P., Willoughby, assignor to The Euclid Crane & Hoist Company, Euclid Village, Ohio. Auxiliary rim and attaching same. 1,619,175; Mar. 1.
Armstrong Cork Company. (See Humphreys, Harry S., assignor.)
Armstrong, Frank H., Auburn, assignor, by mesne assignments, to L C Smith & Corona Typewriter Inc., Syracuse, N. Y. Typewriting machine. 1,619,013; Mar. 1.
Aronson, Louis Y., Newark, N. J. Spinning toy. 1,619,689; Mar. 1.
Asprooth, Axel H., Baltimore, Md., and A. M. Leoni; said Leoni, assignor to Electro-Motive Devices, Inc., Philadelphia, Pa. Balanced rear-axle drive. 1,619,051; Mar. 1.
Atwell, Henry K., Syracuse, N. Y. Trousers for athletes. 1,619,176; Mar. 1.
Austin, Gilbert E., Atascadero, Calif. Novelty doll. 1,619,393; Mar. 1.
Autopoint Company. (See Kaufmann, M. M., Lynn, and Deli, assignors.)
Avery, True M., assignor to Union Bag & Paper Corporation, Hudson Falls, N. Y. Sift-proof bag. 1,619,177;
Ayling & Reichert Company. (See Manchester, Clyde C., assignor.)
Ayres, Arthur H. (See Jones, L. D., and Ayres.)
Babcock & Wilcox Company. (See Dickson, George H., assignor.)
Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Revivifying carbon used in purifying ethylene. 1,619,326; Mar. 1.
Backhaus, Arthur A., Baltimore, Md., assignor to U. S. Industrial Alcohol Co. Revivifying carbon. 1,619,327; Mar. 1.
Badger, William R., Hubbard, Ohio. Dental plate retainer. 1,619,647; Mar. 1.
Baffetti, Achille A., Chicago, Ill. Vulcanizer. 1,619,231; Mar. 1.
Bagley and Sewall Company, The. (See Valentine, Charles W., assignor.)
Baker, Clyde J., Wellington, Tex. Cotton cleaner. 1,619,178; Mar. 1.
Baker, Milo A., Los Angeles, Calif. Fabricating structural members. 1,619,232; Mar. 1.
Baker, Norman G., Muscatine, Iowa. Tracker bar. 1,619,690; Mar. 1.
Baker-Vawter Company. (See Steenrod, William J., assignor.)
Baker, William J. (See Harriger, M. W., and Baker.)
Balston, Clyde C., New York, N. Y. Typewriting machine. 1,619,691; Mar. 1.
Bancel, Paul A., Nutley, and J. F. Kirgan, Phillipsburg, assignors to Ingersoll-Rand Company, Jersey City, N. J. Pump controller. 1,619,098; Mar. 1.
Bangerter, Adolf, New Brighton, N. Y. Mechanical toy. 1,619,179; Mar. 1.
Bardsley, Henry, Providence, R. I., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Loom dobby. 1,619,394; Mar. 1.
Barrett, William C., Chicago, Ill. Curtain fixture. 1,619,456; Mar. 1.
Barringer, Lawrence E., Schenectady, and C. F. Peterson, Scotia, N. Y., assignor to General Electric Co. Making molded compositions. 1,619,692; Mar. 1.
Barrows, Donald S., Rochester, N. Y., assignor, by mesne assignments, to The Symington Company. Carry iron. 1,619,693; Mar. 1.
Bartels, Reinhard E., Lynn, Mass. Incorporating a shank stiffener with a shoe sole. 1,619,648; Mar. 1.
Bartels, William, New York, N. Y. Tool. 1,619,395; Mar. 1.
Bassan, Mordecai, Brooklyn, N. Y. Packing rugs, etc. 1,618,972; Mar. 1.

Bassick Manufacturing Company, The. (See Zerk, Oscar, assignor.)
Baum, Ewald G., assignor to Seal-Kap Company, Natick, Mass. Bottle cap. 1,619,283; Mar. 1.
Bean, Leon H., New York, N. Y., assignor to Hollander-Langee, Inc. Machine for making buttons. 1,619,233; Mar. 1.
Beardmore, William. (See Chorlton, Alan E. L., assignor.)
Beardslee Chandelier Manufacturing Company. (See Dvorak, Anton, assignor.)
Beaudet, Theodore F. X., Blaine, Wash. Gold washer. 1,619,558; Mar. 1.
Beebe, Leslie W., Oak Park, Ill. Liquid-control system. 1,619,234; Mar. 1.
Beck, Charles W., Toledo, Ohio, assignor to Beck-Frost Corporation, Detroit, Mich. Oil-can holder. 1,619,099; Mar. 1.
Beck-Frost Corporation. (See Beck, Charles W., assignor.)
Beck, Joseph M. (See Combs, W. F., and Beck.)
Beck, Michael, Minneapolis, Minn. Vaporizer and pre-heater for internal-combustion engines. 1,619,496; Mar. 1.
Bell, Harvey W., Ardsley-on-Hudson, N. Y., assignor to The Beloyt Corporation, Dover, Del. Flexible coupling. 1,619,457; Mar. 1.
Bell, John E., Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill. Evaporative condenser. 1,619,284; Mar. 1.
Bell, John E., Brooklyn, N. Y., assignor to Sinclair Refining Company, Chicago, Ill. Apparatus and process for fractional distillation and condensation. 1,619,396; Mar. 1.
Beloyt Corporation, The. (See Bell, Harvey W., assignor.)
Benckenstein, Charles H., Vinton, La. Core barrel. 1,619,328; Mar. 1.
Benussi, Andrew, Brooklyn, N. Y. Bath mit. 1,619,180; Mar. 1.
Beretz, John, Blair, W. Va. Combination tool. 1,619,181; Mar. 1.
Berger, Samuel I., Newark, N. J. Mechanical Toy. 1,619,694; Mar. 1.
Bergstrom, Nathan H., Neenah, Wis. Cylinder for paper-pulp machines. 1,619,052; Mar. 1.
Bernhard, John B., Warren, assignor to Ironton Bernhard Boiler Company, Ironton, Ohio. Sectional heating boiler. 1,619,235; Mar. 1.
Berry, John L., and W. Holden, Andover, Mass. Apparatus for removing and inserting electric bulbs. 1,619,559; Mar. 1.
Best, Frank A., Ford, Ontario, Canada, assignor to American Auto Trimming Company, Detroit, Mich. Convertible vehicle body. 1,619,182; Mar. 1.
Bethel, Claude, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. Railway-motor mounting. 1,619,397; Mar. 1.
Bethlehem Steel Company. (See Coffey, John J., assignor.)
Bethlehem Steel Company. (See Kinney, James A., assignor.)
Beveridge, James, Richmond, Va. Lining material for alkali-recovery furnaces. 1,619,785; Mar. 1.
Bignell, Edward, Lincoln, assignor to Concrete Piling Co., Seward, Nebr. Pile. 1,619,053; Mar. 1.
Bigney, Sidney O., assignor to S. O. Bigney & Company, Attleboro, Mass. Bracelet hook. 1,619,014; Mar. 1.
Bigney, S. O., & Company. (See Bigney, Sidney O., assignor.)
Blabon, George W., Company, The. (See Tamberlin, John, assignor.)
Blackhawk Manufacturing Co. (See Pfauser, Edward M., assignor.)
Blacklock, Thomas. (See Guy, H. L., and Blacklock.)
Blair, Robert S. (See Wells, Burling D., assignor.)
Blair, Thomas P., San Diego, Calif. Floor heater. 1,619,593; Mar. 1.
Blake, C. C., Incorporated. (See Blake, Charles C., assignor.)
Blake, Charles C., Brookline, assignor to C. C. Blake, Incorporated, Boston, Mass. Seam. 1,619,497; Mar. 1.
Blakeslee, George R., executor. (See Blakeslee, George S.)
Blakeslee, George S., deceased, Oak Park, Ill.; G. R. Blakeslee, executor. Dishwashing machine. 1,619,236; Mar. 1.
Blaskewitz, William. (See Groehn, O. J., and Blaskewitz.)
Blecker, Herbert E., New York, N. Y. Fish-catching apparatus. 1,619,560; Mar. 1.
Blecksmith, Arthur F. (See Sperti, George, assignor.)
Blest, Minot C., Bellevue, assignor to Pressed Steel Car Company, Pittsburgh, Pa. Discharge device for tanks. 1,619,054; Mar. 1.
Blest, Minot C., Bellevue, assignor to Pressed Steel Car Company, Pittsburgh, Pa. Poke-hole cover. 1,619,055; Mar. 1.
Block, William, Chicago, Ill. Spindle for lighting fixtures. Des. 72,079; Mar. 1.
Block, William, Chicago, Ill. Lamp bracket. Des. 72,080; Mar. 1.
Block, William, Chicago, Ill. Lamp base. Des. 72,081; Mar. 1.
Block, William, Chicago, Ill. Lamp base. Des. 72,082; Mar. 1.
Bocchino, Ernest, assignor of one-third to S. Tolino, Newark, N. J. Clown and animal toy. Des. 72,083; Mar. 1.
Boese, Albert T. and P. H., Hutchinson, Kans. Gauge. 1,619,695; Mar. 1.
Boese, Peter H. (See Boese, Albert T. and P. H.)
Bohl, Hugo, Westfield, N. J., assignor to Radiant Lighting Fixture Co., New York, N. Y. Lighting-fixture bracket. Des. 72,084; Mar. 1.
Bohn, William J., assignor to Alvey Manufacturing Company, St. Louis, Mo. Loading device. 1,619,015; Mar. 1.
Bolz, Julius A., Everett, Mass. Trunk. 1,619,561; Mar. 1.
Bond, David G., Quitsna, N. C. Traffic signal. 1,619,562; Mar. 1.
Bonnard, Alfred H. (See Bonnard, Leonard H., assignor.)
Bonnard, Leonard H., assignor of one-half to A. H. Bonnard, London, England. Manufacture of vegetable carbon. 1,619,649; Mar. 1.
Bono, Andrew, Brooklyn, N. Y. Shoe heel. 1,619,458; Mar. 1.
Boston Electric Heating Corporation. See Heath, Donald B., assignor.)
Bouton, Edgar M., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. System of control. 1,619,398; Mar. 1.
Bowen, Ernest W., Chiswick, London, England. Mechanism for converting rotary motion into combined reciprocating and oscillating motion and vice versa. 1,619,696; Mar. 1.
Brace, Porter H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Production of thin steel. 1,619,899; Mar. 1.
Braden, Joseph F. (See Julland, John, assignor.)
Bradner, Donald B., and N. E. Oglesby, Edgewood, Md. Producing smoke clouds from moving aircraft. 1,619,183; Mar. 1.
Bragg, George E., Cincinnati, Ohio. Internal-combustion rotary motor. 1,619,237; Mar. 1.
Bragg, Gilbert A., East Orange, N. J., assignor to Metals Recovery Company, New York, N. Y. Concentration of slimes by flotation. 1,619,790; Mar. 1.
Brandes Laboratories, Inc. (See Rypinski, Maurice C., assignor.)
Brandes Laboratories, Inc. (See Stevenson, Harry, assignor.)
Bregman, Harry, Lorain, Ohio, assignor to The Steel Stamping Company. Toy pistol. 1,619,184; Mar. 1.
Breil, Wilhelm, Essen-Bredeney, Germany. Tubbing. 1,618,973; Mar. 1.
Breslauer, Joseph, assignor to Compagnie de l'Azote et des Fertilisants S. A., Geneva, Switzerland. Removing the dust from calcium cyanamide and deodorizing the same. 1,619,185; Mar. 1.
Bricca, Tobias J., and J. C. Favilla, San Francisco, Calif. Combination automobile trunk and table. 1,619,186; Mar. 1.
Briggs, George W., Nanuet, N. Y. Pliers. 1,619,400; Mar. 1.
Bright, C. Laco, et al. (See Jones, Leslie W., assignor.)
Broad, William, Beaver Falls, assignor of three-fourths to H. E. McLain, Pittsburgh, Pa. Testing instrument. 1,619,699; Mar. 1.
Bronstien, Edward L., St. Paul, Minn. Attachment for bed springs. 1,619,187; Mar. 1.
Brown Company. (See Moore, Hugh K., assignor.)
Brown, Harold, Kansas City, Kans. Safety device for automobiles. 1,619,097; Mar. 1.
Browne, Le Roy, Troy, N. Y. Nonskid cross-chain hook. 1,619,188; Mar. 1.
Brügmann, William F., Evanston, Ill. Printing-plate holder and clamp. 1,619,650; Mar. 1.
Brunskog, Victor H. M., and J. A. Nordin, assignors to Aktiebolaget Stille Werner, Stockholm, Sweden. Grinding apparatus for meat-slicing machines and the like. 1,619,056; Mar. 1.
Brush, Mittie T., Dublin, N. H. Aircraft. 1,619,100; Mar. 1.
Brysilka, Limited. (See Schubert, Friedrich W., assignor.)
Buchanan, Jerome R., and R. H. Abbott, Los Angeles, Calif. Electric-light bracket. Des. 72,085; Mar. 1.
Buchanan, Jerome R., and R. H. Abbott, Los Angeles, Calif. Bobeche for Electric-Light fixtures. Des. 72,086; Mar. 1.
Budd, Edward G., Manufacturing Company. (See Ledwinka, Joseph, assignor.)
Budd Wheel Company. (See Ludwick, Herbert V., assignor.)
Buechele, Edward E., West View, and S. A. Martin, Bradfordwoods, Pa. Earth anchor for structural towers. 1,619,651; Mar. 1.
Buechler, Emil, Chicago, Ill. Weigh-scale platform. 1,619,594; Mar. 1.
Burdwise, Aaron, assignor to Musical Manufacturers' Corporation, Baltimore, Md. Fastening connecter for strings of musical instruments. 1,619,563; Mar. 1.
Burks, Arthur W., Decatur, Ill. Pump. 1,619,285; Mar. 1.
Burks, Arthur W., Decatur, Ill. Pump. 1,619,286; Mar. 1.

Burns, William A., London, assignor, by mesne assignments, to C. Gold, Ravens, England. Sign. 1,619,189; Mar. 1.
Burroughs Adding Machine Company. (See Horton, Allen A., assignor.)
Bushnell, Charles S., assignor to General Railway Signal Company, Rochester, N. Y. Intermittent inductive train control. 1,619,698; Mar. 1.
Buss, August, Detroit, Mich. Circulating drip vent. 1,619,238; Mar. 1.
Butcher, Charles A., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic station. 1,619,459; Mar. 1.
Butler, Charles R. (See Rasmussen, Chester A., assignor.)
By-Products Recovery Company. (See Resines, Francis J., assignor.)
Byrne, Manufacturing Company, The. (See Dillhoefer, Henry M., assignor.)
Cage Engine Syndicate, Inc. (See Cage, John M., assignor.)
Cage, John M., Ford City, Ontario, Canada, assignor to Cage Engine Syndicate, Inc., New York, N. Y. Internal-combustion engine and means for supplying charge thereto. 1,619,460; Mar. 1.
Cahusac, Clarence N., assignor to U. S. Tool Company, Inc., Newark, N. J. Variable condenser. 1,618,974; Mar. 1.
Cairncross, Robert L., Chicago, Ill. Rail-joint spring. 1,619,595; Mar. 1.
Cameron Machine Company. (See Stocker, William M., assignor.)
Campbell, Burt C., Cleveland, Ohio. Electrically-operated clock. 1,619,564; Mar. 1.
Campbell-Cooney Patents Co. (See Cooney, Robert K., assignor.)
Campbell, William E., San Diego, assignor of one-third to A. Hicks, San Diego, Calif. Metal-lath corner strip. 1,619,401; Mar. 1.
Carlton, Jack C., assignor to The Carlton Machine Tool Company, Cincinnati, Ohio. Radial drill. 1,619,190; Mar. 1.
Carlton Machine Tool Company, The. (See Carlton, Jack C., assignor.)
Carr Fastener Company. (See Carr, Moses F., assignor.)
Carr, John G. (See Hart, Clyde, assignor.)
Carr, Moses F., Lexington, assignor to Carr Fastener Company, Cambridge, Mass. Stud. Re16,561; Mar. 1.
Carter, Benjamin C., London, England. Centrifugal separator. 1,619,652; Mar. 1.
Carter, George W., Canonsburg, Pa. Chair brace. 1,619,402; Mar. 1.
Cass, Christopher P., Berkeley, Calif., and J. F. Craig, Edgewood, assignors to The Westinghouse Air Brake Company, Wilmerding, Pa. Automotive brake device. 1,619,239; Mar. 1.
Castricum, Martin, Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Manufacture of weftless cord fabric. 1,619,191; Mar. 1.
Castricum, Martin, Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Delivering moving webs. 1,619,192; Mar. 1.
Challis, Philip, Victoria, London, England. Spark plug. 1,619,653; Mar. 1.
Chandler and Price Company, The. (See Frackelton, R. J., and Sixt, assignors.)
Chandler, Daniel L., Boston, Mass., assignor, by mesne assignments, to Vend Ads Corp. Fraud-preventing device. 1,619,654; Mar. 1.
Chandler, Daniel L., Boston, Mass., assignor to Vent-Ads Co., Inc., Worcester, Mass. Fraud-preventing device for vending machines. 1,619,655; Mar. 1.
Chapin, Alfred V., San Antonio, Tex. Carburetor. 1,619,329; Mar. 1.
Chapin, Alfred V., San Antonio, Tex. Auxiliary air and fume supply for explosive engines. 1,619,330; Mar. 1.
Chapin, Fenton G., East St. Louis, Ill. Door-locking mechanism. 1,619,596; Mar. 1.
Charter, Thomas E., Cedar Rapids, Iowa. Hose-repair clamp. 1,619,287; Mar. 1.
Chase, Herbert, Forest Hills, N. Y. Toy building. 1,619,101; Mar. 1.
Chase, William G., Oak Park, Ill. Tire chain. 1,619,783; Mar. 1.
Chemical Machinery Corporation. (See Field, Crosby, assignor.)
Chenoweth, Alexander C., deceased, New York, N. Y.; C. R. Chenoweth, administratrix. Method of and apparatus for laying protective coverings. 1,619,331; Mar. 1.
Chenoweth, Catharine R., administratrix. (See Chenoweth, Alexander C.)
Chicago-Cleveland Car Roofing Company. (See Williams, T. H., and Wright, assignors.)
Chicago Pneumatic Tool Company. (See Davenport, Ransom W., assignor.)
Chorlton, Alan E. L., London, England. Variable-speed gear and controlling the same. 1,619,701; Mar. 1.
Chorlton, Alan E. L., London, England. Reversing gear for internal-combustion-engine locomotives. 1,619,702; Mar. 1.
Chorlton, Alan E. L., London, England. Power-transmission mechanism. 1,619,703; Mar. 1.
Chorlton, Alan E. L., assignor of one-half to W. Beardmore, London, England. Internal-combustion-engine locomotive. 1,619,704; Mar. 1.
Chorlton, Alan E. L., London, England. Internal-combustion-engine locomotive. 1,619,705; Mar. 1.
Chvojka, Joseph, Philadelphia, Pa. Aerial advertiser. 1,619,565; Mar. 1.
Cizek, John V., Clutier, Iowa. Adjustable bolster standard for wagons. 1,619,288; Mar. 1.
Clark, James E. (See Clark, Thomas E. and J. E.)
Clark, Mickle, Chicago, Ill. Electrical condenser. 1,619,597; Mar. 1.
Clark, Thomas E., assignor to Continuous Train Control Corporation, Detroit, Mich. Train-control apparatus. 1,619,290; Mar. 1.
Clark, Thomas E. and J. E., assignors to Continuous Train Control Corporation, Detroit, Mich. Train-control system. 1,619,289; Mar. 1.
Clay, Noble S., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Wood-veneer propeller. 1,618,968; Mar. 1.
Clayton & Lambert Manufacturing Company. (See Groehn, O. J., and Blaskewitz, assignors.)
Clement, Lewis M. (See Williams, S. B., and Clement.)
Climax Engineering Company. (See Waters, Harry H., assignor.)
Cline, Allan J., Chicago, and J. A. Hollander, Forest Park, assignors to Cline Electric Manufacturing Company, Chicago, Ill. Web-tension equipment for printing presses. 1,618,975; Mar. 1.
Cline Electric Manufacturing Company. (See Cline, A. J., and Hollander, assignors.)
Coates, Erwin F., St. Paul, Minn. Collar button. 1,619,706; Mar. 1.
Codina, Peter, assignor to Illinois Cork Co., Chicago, Ill. Capped swab or dauber. 1,618,977; Mar. 1.
Coffey, John J., assignor to Bethlehem Steel Company, Bethlehem, Pa. Milling machine. 1,619,057; Mar. 1.
Collins, James H., Fullerton, assignor to W. D. Shaffer, Brea, Calif. Pump-rod-rotating device. 1,619,700; Mar. 1.
Colline, Walter H. (See Moore, Max J., assignor.)
Columbia Phonograph Company. (See Cowan, Charles H., assignor.)
Columbia Phonograph Company. (See Mowits, Albert C., assignor.)
Combs, William F., and J. M. Beck, Eureka, Utah. Radiator filler. 1,619,498; Mar. 1.
Commercial Shearing & Stamping Company. (See Proctor, R. V., and Schaab, assignors.)
Commercial Truck Company. (See Whitney, Eddy R., assignor.)
Compagnie de l'Azote et des Fertilisants S. A. (See Breslauer, Joseph, assignor.)
Concrete Piling Co. (See Bignell, Edward, assignor.)
Conlon, Thomas A., Silver Spring, Md. Loader for guns. 1,619,193; Mar. 1.
Consolidated Paper Company, The. (See Jones, James F., assignor.)
Continental Can Company. (See Fink, Henry A., assignor.)
Continuous Train Control Corporation. (See Clark, Thomas E., assignor.)
Continuous Train Control Corporation. (See Clark, Thomas E. and J. E., assignors.)
Cooney, Robert K., Toledo, Ohio, assignor to Campbell-Cooney Patents Co., Homer, Mich. Butter and cream treating process. Re16,562; Mar. 1.
Corbett, Edward L., et al. (See McDonald, John C., assignor.)
Cornego, Manuel F., St. Louis, Mo. Assembling piston rings for finishing. 1,619,240; Mar. 1.
Coughlin, William G., Philadelphia, Pa. Rail. 1,619,403; Mar. 1.
Counts, Charles B., assignor of one-half to H. B. Easterling, Hampton, Ark. Door for cottonseed boxes. 1,619,784; Mar. 1.
Cowan, Charles H., New Rochelle, N. Y., assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Cabinet for sound-reproducing mechanism. Des. 72,087; Mar. 1.
Cowan, Charles H., New Rochelle, N. Y., assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Cabinet for sound-reproducing mechanism. Des. 72,088; Mar. 1.
Cowan, Charles H., New Rochelle, N. Y., assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Cabinet for sound-reproducing mechanism. Des. 72,089; Mar. 1.
Cowley, James T., assignor to The Lamson Company, Syracuse, N. Y. Power-control device for pneumatic-dispatch systems. 1,619,707; Mar. 1.
Craig, John F. (See Cass, C. P., and Craig.)
Crankshaw, Richard L., Dunlewy, Gweedore, Ireland. Golf club. 1,619,566; Mar. 1.
Crawford, Frederick C., and M. P. Graham, Detroit, Mich., assignors to The Steel Products Company, Cleveland, Ohio. Tie rod or the like. 1,619,291; Mar. 1.
Crescent Machine Company, The. (See Wilderson, Clinton G., assignor.)
Crisson, George, Hackensack, N. J., assignor to American Telephone and Telegraph Company. Telephone repeater station. 1,619,058; Mar. 1.

Croan, Walter B., assignor to Drying Systems, Inc., Chicago, Ill. Sheet-metal oil-burning air heater. 1,619,567; Mar. 1.

Crofton, William M., Dublin, Ireland. Carburetor. 1,619,656; Mar. 1.

Crompton & Knowles Loom Works. (See Bardsley, Henry, assignor.)

Crompton & Knowles Loom Works. (See Findlay, G. P., and Johnston, assignors.)

Crow, William M., Cole, S. Dak. Four-horse-wagon evener. 1,619,059; Mar. 1.

Crowe, Leroy J., Monument, Kans. Foot scraper for automobiles. 1,619,404; Mar. 1.

Cumfer, Harry A., Chicago, Ill., assignor of one-half to The Flintkote Company, Boston, Mass. Roofing element. 1,619,598; Mar. 1.

Cumfer, Harry A., Chicago, Ill., assignor of one-half to The Flintkote Company, Boston, Mass. Shingle element. 1,619,599; Mar. 1.

Cumfer, Harry A., Chicago, Ill., assignor of one-half to The Flintkote Company, Boston, Mass. Roofing element. 1,619,600; Mar. 1.

Cumfer, Harry A., Chicago, Ill., assignor of one-half to The Flintkote Company, Boston, Mass. Shingle strip. 1,619,601; Mar. 1.

Cunningham, Arthur B., assignor to Republic Flow Meters Co., Chicago, Ill. Pen lifter for recording instruments 1,619,241; Mar. 1.

Curtis, Lewis E., Milwaukee, Wis., assignor to The Youngstown Pressed Steel Company. Continuous lath-expanding machine. 1,619,499; Mar. 1.

Cutler, Isabella M. (See Cutler, William C., assignor.)

Cutler, William C., assignor to I. M. Cutler, Glendale, Calif. Selective vending machine for stacked articles. 1,619,292; Mar. 1.

Cutler, William C., assignor to I. M. Cutler, Glendale, Calif. Selective dispensing machine. 1,619,293; Mar. 1.

Cutler, William C., assignor to I. M. Cutler, Glendale, Calif. Rotary selecting mechanism for vending machines. 1,619,294; Mar. 1.

Daniel, Royal G., Denver, Colo., assignor to The Underwood Typewriter Company, New York, N. Y. Silencing device for typewriters. 1,619,602; Mar. 1.

Dann, Walter M., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transformer radiator. 1,619,332; Mar. 1.

Dann, Walter M., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Radiator. 1,619,333; Mar. 1.

Dann, Walter M., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Transformer radiator. 1,619,334; Mar. 1.

Davenport, Ransom W., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Working substance for heat engines. 1,619,194; Mar. 1.

Davenport, Ransom W., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Heat engine. 1,619,195; Mar. 1.

Davenport, Ransom W., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Transforming heat. 1,619,196; Mar. 1.

Davenport, Ransom W., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Heat engine. 1,619,197; Mar. 1.

Davies, David R., Manchester, England, assignor to Westinghouse Electric & Manufacturing Company. Switch contact for circuit breakers. 1,618,969; Mar. 1.

Davies, William R. (See Thomas, H. S., and Davies.)

Davison, Gregory C., New London, Conn. Coin-operated gasoline pump. 1,619,657; Mar. 1.

Dean, John H., Grand Rapids, Mich. Tobacco stemming and booking machine. 1,619,461; Mar. 1.

Deardorff, Ralph W., Kensington, Calif., assignor to American Telephone and Telegraph Company. System of multifrequency circuits. 1,619,060; Mar. 1.

Dedouch, Joseph A., Oak Park, Ill. Expansible fastening. 1,619,568; Mar. 1.

Dedouch, Joseph A., Oak Park, Ill. Expansible fastening. 1,619,569; Mar. 1.

Delco-Remy Corporation. (See Emmert, Rodger J., assignor.)

Delco-Remy Corporation. (See Gomory, Albert B., assignor.)

Dell, Frank C. (See Kaufmann, M. M., Lynn, and Dell.)

Dell, Samuel M., & Co. (See McMillan, Hugh P., assignor.)

De Luxe Clock and Manufacturing Company, The. (See Kohn, Rudolf V., assignor.)

Dembitz, Isidor, New York, N. Y. Lamp shade. 1,618,978; Mar. 1.

Denman, Rene E., Kansas City, Mo. Lingerie clasp. 1,619,242; Mar. 1.

Desautels, Charles H., Springfield, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Bead mold. 1,619,102; Mar. 1.

Dester, William F., Newark, assignor to U. S. Tool Co., Inc., East Orange, N. J. Safety lighter for gas stoves. 1,618,979; Mar. 1.

Detroit Belt Lacer Co. (See Knott, Frank W., assignor.)

De Zeng, Henry L., Moorestown, assignor to De Zeng Standard Company, Camden, N. J. Diagnostic instrument. 1,618,970; Mar. 1.

De Zeng, Henry L., Moorestown, assignor to De Zeng Standard Company, Camden, N. J. Diagnostic instrument. 1,618,971; Mar. 1.

De Zeng Standard Company. (See De Zeng, Henry L., assignor.)

Dibble, Claude M., assignor to Moore Brothers Company, Joliet, Ill. Stove construction. 1,619,243; Mar. 1.

Dickson, George H., Chicago, Ill., assignor to The Babcock & Wilcox Company, Bayonne, N. J. Boiler baffle. 1,619,463; Mar. 1.

Dietrick, Herman T., Philadelphia, Pa. Combined receptacle opener and fluid conductor. 1,619,708; Mar. 1.

Dillhoefer, Henry M., Cleveland Heights, assignor to The Byrne Manufacturing Company, Cleveland, Ohio. Bung-seat construction. 1,619,603; Mar. 1.

Doherty, Henry L., New York, N. Y. Apparatus for generating steam. 1,619,244; Mar. 1.

Doman, Lewis B., East Syracuse, N. Y. Engine-controlled pneumatically-operated circuit controller. 1,619,103; Mar. 1.

Donathan, William F., Poteau, Okla., assignor to S. J. Graham, Tuckerman, Ark. Vending machine. 1,619,245; Mar. 1.

Donathan, William F., Memphis, Tenn., assignor to S. J. Graham, Tuckerman, Ark. Coin-controlled vending machine. 1,619,246; Mar. 1.

Donathan, William F., Winchester, Tenn., assignor to S. J. Graham, Tuckerman, Ark. Fraud preventer for coin-controlled devices. 1,619,247; Mar. 1.

Donathan, William F., Winchester, Tenn., assignor to S. J. Graham, Tuckerman, Ark. Vending machine. 1,619,248; Mar. 1.

Donnelly, Joseph F., Lemont, Ill. Apparatus for controlling fluids. 1,619,335; Mar. 1.

Dorn, Carl, Halle-on-the-Saale, Germany. Dough-dividing machine. 1,619,104; Mar. 1.

Doujak, Maria, New York, N. Y. Automobile safety attachment. 1,619,709; Mar. 1.

Dow, Charles F., Poughkeepsie, N. Y. Pipe wrench. 1,619,604; Mar. 1.

Drake, Bert E., assignor of one-half to H. D. Tracy, Rockville Center, N. Y. Display device. 1,619,658; Mar. 1.

Drewsen, Viggo, Brooklyn, assignor to West Virginia Pulp and Paper Company, New York, N. Y. Process and apparatus for making concentrated carbon dioxide. 1,619,336; Mar. 1.

Drying Systems, Inc. (See Croan, Walter B., assignor.)

Dubilier Condenser Corporation. (See Fried, Joseph A., assignor.)

Dubilier Condenser Corporation. (See Van Deventer, Harry R., assignor.)

Duchemin, Howard A., Los Angeles, Calif. Building hollow-wall constructions. 1,619,570; Mar. 1.

Duclaux, Jacques, Paris, France. Clarification of beverages. 1,619,016; Mar. 1.

Duff, Lee F., Los Angeles, Calif. Blade holder. 1,619,249; Mar. 1.

Dunham, Bert G., Hawthorne, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,619,250; Mar. 1.

Dunlop, James, assignor to Knestner & Hecht Company, Chicago, Ill. Elevator. 1,619,405; Mar. 1.

Dunten, Charles J. (See Marsh, H. E., and Dunten.)

Du Pont, E. I., de Nemours & Company. (See Pratt, L. S., Weitz, and Mills, assignors.)

Du Pont, E. I., de Nemours & Company. (See Schanche, Herman G., assignor.)

Duro Company, The. (See Eisenhauer, Charles P., assignor.)

Duro Company, The. (See Nicholson, Stanley W., assignor.)

Duryea, William F., Hackensack, N. J. Dust cap. 1,619,710; Mar. 1.

Dvorak, Anton, Berwyn, assignor to Beardslee Chandelier Manufacturing Company, Chicago, Ill. Lighting fixture. 1,619,061; Mar. 1.

Easterling, H. B. (See Counts, Charles B., assignor.)

Eaton Axle and Spring Company, The. (See Weymouth, Harry G., assignor.)

Eclipse Tool Company. (See Ferguson, David, assignor.)

Econopouly, Peter D., Port Jefferson, N. Y. Automatic cut-off for pressure-fluid-supply lines. 1,619,500; Mar. 1.

Edison, Karl, New York, N. Y. Illuminating device. 1,619,198; Mar. 1.

Eggau, Alfred J., Chicago, Ill. Soap container. 1,619,105; Mar. 1.

Eichhorn, Charles, assignor to V. Tosabella, Chicago, Ill. Train-pipe coupling. 1,619,464; Mar. 1.

Eisenhauer, Charles P., assignor to The Duro Company, Dayton, Ohio. Pressure switch. 1,619,465; Mar. 1.

Eisenhauer, Charles P., assignor to The Duro Company, Dayton, Ohio. Compressor. 1,619,466; Mar. 1.

Elder, Earl B., Oak Park, assignor to Elder & Robinson Co., Chicago, Ill. Machine for check weighing and grading by weight. 1,619,787; Mar. 1.

Elder & Robinson Co. (See Elder, Earl B., assignor.)

Eldred, Frank H., and C. Hutchings, Morris, Ill. Automobile radiator ornament. Des. 72,090; Mar. 1.

Electric Refrigeration Corporation. (See Spreen, Charles C., assignor.)

Electro-Motive Devices, Inc. (See Asprooth, A. H., and Leoni, assignors.)

Elektrotrennmaschinen Gesellschaft mit beschränkter Haftung. (See Neiss, Oskar H. L., assignor.)

Ekström, Gunnar C., and G. Örström, Stockholm, and B. A. E. Johnson, Appelviken, assignors to Aktiebolaget Gerh. Arehns Mekaniska Verkstad, Stockholm, Sweden. Packing cigarettes. 1,619,062; Mar. 1.

Emmert, Rodger J., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Armature-commutator-lead-soldering machine. 1,619,406; Mar. 1.

Empire Milking Machine Company. (See Oakes, Ernest C., assignor.)

English, Fred S., New London, Conn. Sheet-delivery mechanism for presses. 1,619,106; Mar. 1.

Engstrom, Elmer, South Windham, Conn. Apparatus for feeding folded paper tubes or the like. 1,619,711; Mar. 1.

Enright, Thomas P., assignor of one-half to J. H. Lawrence and of one-half to E. F. Lawrence, Sterling, Ill. Friction hinge. 1,619,107; Mar. 1.

Ernst, Clemens. (See Schley, F. L., and Ernst.)

Estwick, Charles F., assignor to General Railway Signal Company, Rochester, N. Y. Intermittent inductive train control. 1,619,712; Mar. 1.

Euclid Crane & Hoist Company, The. (See Armington, Arthur P., assignor.)

Evers, Edward H., Cincinnati, Ohio. Radio apparatus. 1,619,407; Mar. 1.

Evans, Humphrey, and H. E. Heilbronner, assignor to Holeproof Hosiery Co., Milwaukee, Wis. Full-fashioned hosiery. 1,619,199; Mar. 1.

Evans, Joseph T., Boise, Idaho. Eyeglasses or spectacles. 1,619,659; Mar. 1.

Evans, Lincoln B. (See Parks, W. J., and Evans.)

Evans, Richard W., Spokane, Wash. Screen for automobiles. 1,619,501; Mar. 1.

Evans, Robert D., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Distributing system. 1,619,337; Mar. 1.

Ewertz, Eric H., Elizabeth, N. J. Vessel. 1,619,063; Mar. 1.

Ex-El Company, The. (See Vaughan, Ross, assignor.)

Fabyan, George. (See Gruender, Hubert, assignor.)

Faessler, J., Manufacturing Company, The. (See Maupin, Graves R., assignor.)

Faherty, Michael W., Los Angeles, Calif. Ram. 1,619,605; Mar. 1.

Fairchild, Sherman M., New York, N. Y. Camera. 1,619,108; Mar. 1.

Fairchild, Walter H., Chicago, Ill., assignor to Mid-West Box Company, Anderson, Ind. Lamp wrapper. 1,619,608; Mar. 1.

Fairweather, Charles B., West Chester, assignor of one-half to F. E. Moore, Coatesville, Pa. Vehicle wheel. 1,619,607; Mar. 1.

Fait, John, Glenburnie, Md. Motion-picture-projecting machine. 1,619,606; Mar. 1.

Falconer, Harry W. (See Ross, H. C., and Falconer.)

Faust, Alexander L., assignor to National Marking Machine Company, Cincinnati, Ohio. Laundry Marking-Tag-Attaching Machine. 1,619,251; Mar. 1.

Favilla, Joseph C. (See Bricca, T. J., and Favilla.)

Fay, Richard D., Nahant, Mass., assignor to Submarine Signal Company, Portland, Me. Finding direction. 1,619,017; Mar. 1.

Fedders, John M., assignor to Fedders Manufacturing Company, Inc., Buffalo, N. Y. Radiator core. 1,618,980; Mar. 1.

Fedders Manufacturing Company. (See Fedders, John M., assignor.)

Federal Products Corporation. (See Tingley, Leonard C., assignor.)

Fejés, Jenö, Budapest, Hungary. Chassis framing more particularly for motor vehicles. 1,619,609; Mar. 1.

Ferguson, Clarence E., Portland, Oreg. Safety cigarette holder. 1,619,408; Mar. 1.

Ferguson, David, Indianapolis, assignor to Eclipse Tool Company, Indianapolis, Ind. Rolling device for beading operation. 1,619,064; Mar. 1.

Ferguson, David W., Harrold, S. Dak. Ironing board. 1,619,409; Mar. 1.

Ferris, Walter, Milwaukee, Wis. Hydraulic transmission. 1,619,200; Mar. 1.

Festbaukasten Gesellschaft mit beschränkter Haftung. (See Rettig, Max R., assignor.)

Field, Crosby, New York, N. Y., assignor to Chemical Machinery Corporation. High-temperature heating method. 1,619,660; Mar. 1.

Field, Crosby, Yonkers, N. Y., assignor to Chemical Machinery Corporation. Apparatus for heat transfer at high temperature. 1,619,661; Mar. 1.

Field, Crosby, Yonkers, N. Y., assignor to Chemical Corporation. Heating and cooling at high temperatures. 1,619,662; Mar. 1.

Field, Crosby, Yonkers, N. Y assignor to Chemical Machinery Corporation. Apparatus for heating and for controlling reactions at high temperatures. 1,619,663; Mar. 1.

Findlay, George P., and W. W. Johnston, assignors to Crompton & Knowles Loom Works, Worcester, Mass. Knife grinder for looms. 1,619,410; Mar. 1.

Fink, Emil C. (See Masury, A. F., and Fink.)

Fink, Henry A., assignor to Continental Can Company, Inc., Syracuse, N. Y. Sealed metal containers. 1,619,411; Mar. 1.

Fink, Henry A., assignor to Continental Can Company, Inc., Syracuse, N. Y. Sealed metal containers. 1,619,412; Mar. 1.

Fisk Rubber Company, The. (See Castricum, Martin, assignor.)

Fisk Rubber Company, The. (See Desautels, Charles H., assignor.)

Fitts, Walter H., assignor to The Foxboro Company, Foxboro, Mass. Thermometer. 1,619,109; Mar. 1.

Flannery, Martin A., New York, assignor to Will & Baumer Candle Company Inc., Syracuse, N. Y. Apparatus for cleaning candle receptacles. 1,619,110; Mar. 1.

Flintkote Company, The. Cumfer, Harry A., assignor.)

Forman, Solomon, New York, N. Y. Teapot or coffeepot. 1,619,065; Mar. 1.

Fotch, John M., Chicago, Ill. Automatic air and gas check valve. 1,619,066; Mar. 1.

Foxboro Company, The. (See Fitts, Walter H., assignor.)

Fox, Martin, Chicago, Ill. Concealed hinge. 1,619,502; Mar. 1.

Fox, Rudolph H., Denver, Colo. Rope-guide roller. 1,619,413; Mar. 1.

Frackelton, Robert J., Summit, and F. C. Sixt, assignors to The Chandler and Price Company, Cleveland, Ohio. Adjustable roller track for Gordon printing presses. 1,619,018; Mar. 1.

Franklin, Albert W., assignor to Chas. Freshman Co. Inc., New York, N. Y. Vernier tuning dial. 1,619,338; Mar. 1.

Frean, Norman A., Mount Barker, South Australia, Australia. Trap device for separating water from petrol. 1,619,713; Mar. 1.

Fredericks, Adolf, Monterery Park, Calif. Low-level alarm for gasoline tanks. 1,619,339; Mar. 1.

Freshman, Chas., Co. Inc. (See Franklin, Albert W., assignor.)

Fried, Joseph A., Flushing, assignor to Dubilier Condenser Corporation, New York, N. Y. Condenser. 1,619,201; Mar. 1.

Fritch, James E. (See Fritch, Oscar G. and J. E.)

Fritch, Oscar G. and J. E., Ashland, Nebr. Greenhouse plant-suspension frame. 1,619,791; Mar. 1.

Fritz, Emil F. L., Chicago, Ill. Loading device. 1,619,610; Mar. 1.

Fry, Walter L., New York, N. Y. Brake-testing device. 1,619,714; Mar. 1.

Fuller, Frederick L., Bridgeport, Conn., and W. H. Robertson, Dayton, Ohio, assignors, by mesne assignments, to National Cash Register Company, Dayton, Ohio. Cash register. 1,619,664; Mar. 1.

Fullerton, Herbert S., Philadelphia, Pa., assignor to Niles-Bement-Pond Company, New York, N. Y. Work holder. 1,619,340; Mar. 1.

Furlong, George D., New Orleans, La. Chair. 1,619,503; Mar. 1.

Gabriel, Adolph, New York, N. Y. Toe slipper. 1,619,665; Mar. 1.

Gabriel, Herbert D., New York, N. Y. Automatically-operated end gate for dump vehicles. 1,619,504; Mar. 1.

Gagl, John, Bronx, N. Y. Photographic apparatus to identify holdup men. 1,619,715; Mar. 1.

Gagnon, Louis L., assignor to American Optical Company, Southbridge, Mass. Ophthalmic lens. 1,619,341; Gál, Gyula, Szeged, Hungary, assignor of one-half to B. Gellen, New Brunswick, N. J. Rail joint. 1,619,716 Mar. 1.

Gammeter, John R., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Tire-building method and apparatus. 1,619,019; Mar. 1.

Gammeter, John R., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Apparatus for vulcanizing strip material. 1,619,020; Mar. 1.

Gammeter, John R., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Doorcheck strap. 1,619,067; Mar. 1.

Gammeter, John R., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for producing elastic strip material. 1,619,342; Mar. 1.

Ganssen, Robert, Grunewald, Germany. Extraction of ammonium-aluminum sulphate from aluminum-sulphate solutions containing ferric compounds. 1,619,666; Mar. 1.

Gardner, William, Cleveland, Ohio. Apparatus for and reduction of finely-divided material. 1,619,295; Mar. 1.

Garton, John T., Toronto, Ontario, Canada. Floor-finishing apparatus. 1,619,571; Mar. 1.

Gas Research Company, The. (See Smith, Harry F., assignor.)

Gat Gun Lubricating Corporation. (See Hundemer, Walter F., assignor.)

Gauger, Frank A., assignor to Time-O-Stat Corporation, Milwaukee, Wis. Thermostatic control for ovens. 1,619,505; Mar. 1.

Gauld, Harry W., Brandon, Manitoba, Canada. Starter for gas engines. 1,619,414; Mar. 1.

Gaw-O'Harra Envelope Co. (See Olgay, Albert, assignor.)

Gearhart, Ralph W., assignor to Gearhart Sales Cabinet Co. Inc., Clearfield, Pa. Manufacturing, hardening, storing, and dispensing plant for ice cream and other frozen food products. 1,619,717; Mar. 1.

Gearhart Sales Cabinet Co. Inc. (See Gearhart, Ralph W., assignor.)

Gellen, Balint. (See Gál, Gyula, assignor.)

Gemeinder, Emil, Philadelphia, Pa. Lock-up cover for receptacles. 1,619,506; Mar. 1.

General Electric Co. (See Barringer, L. E., and Peterson, assignors.)

General Electric Company. (See Hull, John I., assignor.)

General Electric Company. (See Peterson, Charles F., assignor.)

General Railway Signal Company. (See Bushnell, Charles S., assignor.)

General Railway Signal Company. (See Eatwick, Charles F., assignor.)

General Railway Signal Company. (See Howe, Winthrop K., assignor.)

George, Harry F., Chicago, Ill. Tumbler lock. 1,619,252; Mar. 1.

Gibson, George H., Montclair, N. J. Flow-controlling apparatus. 1,619,253; Mar. 1.

Gilbert, Frank N. (See Allen, Durward M., assignor.)

Gillies, James H., Hobart, Tasmania, Australia. Dirigible headlight. 1,619,068; Mar. 1.

Gillis, Lyle N., Rosecrest, Va. Degumming. 1,619,111; Mar. 1.

Girling, Albert H. G., Harlow, England. Braking mechanism. 1,619,718; Mar. 1.

Glasner, Rudolph W., and J. Nelson, assignors to Marquette Tool & Manufacturing Co., Chicago, Ill. Blank-holding means. 1,619,069; Mar. 1.

Glass, Walter L. (See Rogers, B. W., and Glass.)

Globe Company, The. (See Honold, Gottlob F., assignor.)

Globe Lighting Fixture Mfg. Co. (See Petersen, Thorvald J., assignor.)

Globe Lighting Fixture Mfg. Co. (See Villaret, Gustave E., assignor.)

Gold, Charles. (See Burns, William A., assignor.)

Golding, William H., Merrick, N. Y. Railway-crossing guard. 1,619,070; Mar. 1.

Goldman, Clarence F. (See Mitchell, S. W., Naud, and Goldman.)

Goldman, Matthew S., and E. W. Huttig, assignors to McCallum Decorative Corporation, Pittsburgh, Pa. Display background. 1,619,719; Mar. 1.

Goldsmith, Joseph, Seattle, Wash. Ice-cream cabnet. 1,619,611; Mar. 1.

Goldstein, Samuel, Bronx, N. Y. Necktie fastener. 1,619,667; Mar. 1.

Gomory, Albert B., Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Armature-core insulation. 1,619,415; Mar. 1.

Goodman Manufacturing Company. (See Gray, Walter S., assignor.)

Goodman Manufacturing Company. (See Sloane, William W., assignor.)

Goodrich, B. F., Company, The. (See Gammeter, John R., assignor.)

Goodrich, B. F., Company, The. (See Kmentt, Waldemar D., assignor.)

Goodrich, B. F., Company, The. (See Leguillon, Charles W., assignor.)

Goodrich, B. F., Company, The. (See MacDonald, Frank J., assignor.)

Goodrich, B. F., Company, The. (See Mell, Tod J., assignor.)

Goodrich, B. F. Company, The. (See Rogers, B. W., and Glass, assignors.)

Goodrich, B. F., Company, The. (See Scrote, Merle C., assignor.)

Goodwin, Ernest G., Brooklyn, assignor to Standard Coupler Co., New York, N. Y. Friction draft gear. 1,619,112; Mar. 1.

Gordon, Harry L., New York, N. Y. Antiglare attachment for headlights. 1,619,720; Mar. 1.

Gordon, Henry F., Chicago, Ill. Toy navigator. 1,619,668; Mar. 1.

Gorr, John A. (See Huff, William D., assignor.)

Gorton, Walter T., U. S. Army, Springfield, Mass. Mount for machine guns. 1,619,113; Mar. 1.

Gough, Ned E., Seattle, Wash. Valve lifter. 1,619,669; Mar. 1.

Gouldbourn, Joseph, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Abrading machine. 1,619,021; Mar. 1.

Graemiger, Benjamin, Zurich, Switzerland. Fluid-flow meter. 1,619,416; Mar. 1.

Graff, Charles, assignor to Graff, Washbourne & Dunn, New York, N. Y. Combined cigar lighter and ash tray. Des. 72,091; Mar. 1.

Graff, Charles, assignor to Graff, Washbourne & Dunn, New York, N. Y. Combined cigar lighter and ash tray. Des. 72,092; Mar. 1.

Graff, Washbourne & Dunn. (See Graff, Charles, assignor.)

Graham, Alfred, et al., executors. (See Graham, Edward A.)

Graham, Edward A., deceased, Brockley, London, England; M. Graham and A. Graham, executors. Telephonic receiver. 1,619,114; Mar. 1.

Graham, Maria, et al., executors. (See Graham, Edward A.)

Graham, Matthew P. (See Crawford, F. C., and Graham.)

Graham, Stephen J. (See Donathan, William F., assignor.)

Grand Rapids Brass Company. (See Osbeck, Elmer C., assignor.)

Granstedt, Erik, assignor to Aktiebolaget Formator, Stockholm, Sweden. Machine for handling tobacco. 1,619,507; Mar. 1.

Graves, Harry S., assignor to Spiral Piston Ring Company, Detroit, Mich. Apparatus for electrically forming spiral piston rings. 1,619,296; Mar. 1.

Gray, Emmet P., Detroit, Mich. Muffler. 1,619,115; Mar. 1.

Gray, Emmet P., Detroit, Mich. Automobile heater. 1,619,116; Mar. 1.

Gray, Emmet P., Detroit, Mich. Valve control. 1,619,117; Mar. 1.

Gray, Walter S., assignor to Goodman Manufacturing Company, Chicago, Ill. Locomotive. 1,619,572; Mar. 1.

Green, William P., et al. (See Pennebaker, George B., assignor.)

Greenstreet, Charles J., Chicago, Ill. Powdered soluble fruit, vegetable, or other edible natural or manufactured substances and making a powdered fruit, vegetable, or other edible substance or composition. 1,619,202; Mar. 1.

Gregersen, Siegfried W., Crookston, Nebr. Repair guard for mowers and the like. 1,619,721; Mar. 1.

Grinoch, Jacob B. and S., Bronx, N. Y. Continuously-sounding piano device. 1,619,722; Mar. 1.

Grinoch, Simon. (See Grinoch, Jacob B. and S.)

Griscom-Russell Company, The. (See Price, Joseph, assignor.)

Groehn, Otto J., and W. Blaskewitz, assignors to Clayton & Lambert Manufacturing Company, Detroit, Mich. Fire-pot construction. 1,618,981; Mar. 1.

Gronberg, Clarence O., assignor of one-third to A. M. Price, Elgin, Ill. Lead pencil. 1,619,508; Mar. 1.

Groves, Lucian S., assignor, by mesne assignments, to Stewart Manufacturing Company, Boston, Mass. Bottle cap. 1,619,509; Mar. 1.

Gruber, Morris M., East Orange, N. J., assignor, by mesne assignments, to Sonora Phonograph Company, Inc., New York, N. Y. Tone arm for phonographs. 1,619,467; Mar. 1.

Grubman, Anton L., Belle Harbor, N. Y., assignor to Voices, Incorporated, Newark, N. J. Sound-producing device. 1,619,203; Mar. 1.

Grubman, Leo J., New York, N. Y., assignor to Voices, Incorporated, Newark, N. J. Sound-producing device. 1,619,204; Mar. 1.

Grudzinski, Alexander, Cambridge Springs, Pa. Thermostatic gasoline valve. 1,619,612; Mar. 1.

Gruender, Hubert, St. Louis, Mo., assignor to G. Fabyn, Geneva, Ill. Color mixer. 1,619,468; Mar. 1.

Grunberg, George, New York, N. Y. Perfume bottle. Des. 72,093; Mar. 1.

Grunberg, George, New York, N. Y. Perfume bottle. Des. 72,096; Mar. 1.

Guinan, Joseph L., Omaha, Nebr. Grain conditioner. 1,619,417; Mar. 1.

Guy, Henry L., and T. Blacklock, Manchester, England, assignor to Westinghouse Electric & Manufacturing Company. Filter. 1,619,118; Mar. 1.

Guy, James A., Semiway, Ky. Buttonhole attachment. 1,619,613; Mar. 1.

Habenicht, August F., Tinley Park, Ill. Automatic relief valve. 1,619,469; Mar. 1.

Haberman, Frank D., Des Moines River Township, Minn. Stub-shoe attachment for runners of corn planters or the like. 1,619,670; Mar. 1.

Hackley, Roy C., San Francisco, Calif. Concrete gun. 1,619,297; Mar. 1.

Hahnemann, Walter, Kitzberg, near Kiel, W. Rudolph and E. Wilckens, assignors to Signal Gesellschaft mit beschränkter Haftung, Kiel, Germany. Device for the production of mechanical vibrations by means of a continuous stream of fluid. 1,618,982; Mar. 1.

Haines, Elizabeth, Concord, Mass. Lid support. 1,619,573; Mar. 1.

Haines, Jones & Cadbury Company. (See Muend, Charles J., assignor.)

Hall, Frank W., Port Arthur, Tex., assignor to The Texas Company, New York, N. Y. Manufacture of aluminum chloride. 1,619,022; Mar. 1.

Hammond, John H., jr., Gloucester, Mass. Angle-indicating device for moving bodies. 1,619,205; Mar. 1.

Hands, Howard A., assignor to Hood Rubber Company, Watertown, Mass. Multiple heater control. 1,619,510; Mar. 1.

Hanley, Michael. (See Miller, J. T., and Hanley.)

Hardinge Brothers, Incorporated. (See Hardinge, Franklin, assignor.)

Hardinge, Franklin, assignor to Hardinge Brothers, Incorporated, Chicago, Ill. Oil-burning mechanism. 1,619,470; Mar. 1.

Hargrave, Fred M., Cedar Rapids, Iowa. Road-building machine. 1,619,614; Mar. 1.

Harriger, Meade W., and W. J. Baker, Tylersburg, Pa. Treatment of gasoline. 1,619,206; Mar. 1.

Hart, Clyde, Humble, assignor of one-half to J. G. Carr, Harris County, Tex. Spear. 1,619,254; Mar. 1.

Hartford-Empire Company. (See Mullholland, Vergil, assignor.)

Hartman, John H., assignor to The Hubley Manufacturing Co., Lancaster, Pa. Toy stove. 1,619,723; Mar. 1.

Hartung, Adalberto G., Buenos Aires, Argentina. Tension fastening for antislip chains. 1,619,471; Mar. 1.

Hartwell, Benjamin F., Winchester, Mass. Boot or shoe, composite sole therefor, and manufacturing same. 1,619,023; Mar. 1.

Haskelite Manufacturing Corporation. (See Norris, Charles B., assignor.)

Hastings, Horace H., Quebec, Quebec, Canada. Manufacture of inner tubes. 1,619,119; Mar. 1.

Hausner, Oscar G., Webster Groves, Mo. Order card. 1,619,511; Mar. 1.

Haverstick, Earl J., Oakmont, Pa., assignor to Westinghouse Electric & Manufacturing Company. Coating materials. 1,619,343; Mar. 1.

Haynes, Hobart F., Syracuse, N. Y. Socket wrench. 1,619,255; Mar. 1.

Heap, William D., Two Rivers, Wis. Cigarette case. 1,619,418; Mar. 1.

Heath, Donald B., assignor to Boston Electric Heating Corporation, Whitman, Mass. Shoe-tempering machine. 1,619,724; Mar. 1.

Heaton, William H., Oakland, Calif. Fire extinguisher. 1,619,120; Mar. 1.

Heckman, Bruce C., Eureka, Calif. Fishing apparatus. 1,619,512; Mar. 1.

Heilbronner, Herbert E. (See Evans, H., and Heilbronner.)

Heinrichs, Berg, assignor to Midwest Box Company, Chicago, Ill. Wrapper-making machine. 1,619,615; Mar. 1.

Heller, Earl R., Wapwallopen, Pa. Combination foot rest and robe container. 1,619,725; Mar. 1.

Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Computing scale. 1,619,121; Mar. 1.

Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Testing device. 1,619,122; Mar. 1.

Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Integrating scale. 1,619,123; Mar. 1.

Hemphill Company. (See Taubel, Clarence H., assignor.)

Henderson, Wilburn H., El Paso, Tex. Internal-combustion engine. 1,619,071; Mar. 1.

Herrick William T., Tulsa, Okla. Frictional unit control for multidial radio sets. 1,619,419; Mar. 1.

Heublein, Charles M., Chicago, Ill. Window attachment. 1,619,256; Mar. 1.

Heyman, David, Newark, N. J. Mechanical automobile toy. 1,619,726; Mar. 1.

Hicks, Amy. (See Campbell, William E., assignor.)

Higgins, Samuel M. (See Read, H., and Higgins.)

Hilger, George, Chicago, Ill. Automatic refrigeration system. 1,619,072; Mar. 1.

Hill, Harry W., assignor to American Optical Company, Southbridge, Mass. Abrasive-supplying means. 1,619,344; Mar. 1.

Hill, Joseph H. (See Roberts, Charles W., assignor.)

Hill, Nella H. (See Hill, Rolo D., assignor.)

Hill, Rolo D., assignor of one-half to N. H. Hill, Los Angeles, Calif. Container. 1,619,727; Mar. 1.

Hirschfield, Armond J. (See Wisroth, E., and Hirschfeld.)

Hittenberger, Carl H., San Francisco, Calif. Abdominal support. 1,619,513; Mar. 1.

Hobson, Stanley H., assignor to Geo. D. Roper Corporation, Rockford, Ill. Combined gas stove and range. Des. 72,094; Mar. 1.

Hoffman, Charles E., Richland, Wash. Safety delivery receptacle. 1,619,257; Mar. 1.

Hofmann, John M., Brooklyn, N. Y. Radio loud speaker. Des. 72,095; Mar. 1.

Hofmann, Martin, New York, N. Y. Self-defense shooting device. 1,618,976; Mar. 1.

Hojer, Wilhelm, Munich, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany. Steam generator for portable plants. 1,619,671; Mar. 1.

Holcomb, Charles R., assignor to Holcomb Safety Garment Company, Chicago, Ill. Legging. 1,619,472; Mar. 1.

Holcomb Safety Garment Company. (See Holcomb, Charles R., assignor.)

Holden, Walker. (See Berry, J. L., and Holden.)

Holeproof Hosiery Co. (See Evans, H., and Heilbronner, assignors.)

Holland Furnace Company. (See Kolla, John P., assignor.)

Hollander, Jacob A. (See Cline, A. J., and Hollander.)

Hollander-Langee, Inc. (See Bean, Leon H., assignor.)

Holman Pump Manufacturing Company, The. (See Holman, Stephen W., assignor.)

Holman, Stephen W., Marmarth, N. Dak., assignor to The Holman Pump Manufacturing Company. Propeller pump. 1,619,514; Mar. 1.

Holmes, Harleigh R., Denver, Colo. Power transmission for wheels. 1,619,672; Mar. 1.

Holtz, Frederick C., assignor to Sangamo Electric Company, Springfield, Ill. Maximum-demand meter. 1,619,473; Mar. 1.

Holy, George H. F., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Resilient driving connection. 1,619,345; Mar. 1.

Honold, Gottlob F., Sheboygan, Wis., assignor to The Globe Company. Wheel and crank. 1,619,024; Mar. 1.

Hood Rubber Company. (See Hands, Howard A., assignor.)

Hood Rubber Company. (See Perrault, Joseph E., assignor.)

Hoover, Sidney L., assignor of one-half to H. F. Miller, St. Louis, Mo. Insectifuge. 1,619,258; Mar. 1.

Höper, Karl. (See Wolters, O., and Höper.)

Honklins, Arthur C., Compton, Calif., assignor to U. S. Tool Co. Cushion joint for rotary drill pipes. 1,619,728; Mar. 1.

Hornby, Frank, Liverpool, England, assignor to Meccano Company, Inc., Elizabeth, N. J. Circular girder. 1,619,298; Mar. 1.

Horton, Allen A., Plymouth, Mich., assignor to Burroughs Adding Machine Company. Retarding device. 1,619,574; Mar. 1.

Hoskin, Edmund F., assignor to William A. Spinks & Company, Chicago, Ill. Bed for billiard tables and the like. 1,619,515; Mar. 1.

Hoszowski, John, Oakland, Calif. Folding table. 1,619,124; Mar. 1.

Hoth, Charles H., Postville, Iowa. Display rack. 1,619,420; Mar. 1.

Hough, Clinton W., Boonville, assignor to Wired Radio, Inc., New York, N. Y. Piezo-electric crystal apparatus. 1,619,125; Mar. 1.

Houston, Harold A., Wilkinsburg, and V. J. Shepard, Pittsburgh, Pa., assignors to Westinghouse Electric and Manufacturing Company. Welded spring structure. 1,619,346; Mar. 1.

Howard, George E., Butler, Pa. Regulation of glass feeders. 1,619,729; Mar. 1.

Howe, Winthrop K., assignor to General Railway Signal Company, Rochester, N. Y. Intermittent inductive train control. 1,619,730; Mar. 1.

Howell, Charles C., Kisbey, Saskatchewan, Canada. Stubble burner. 1,619,516; Mar. 1.

Hubbard Machine Company. (See Hubbard, William E., assignor.)

Hubbard, William E., assignor to Hubbard Machine Company, San Francisco, Calif. Pumping system. 1,619,474; Mar. 1.

Hubbard, William E., assignor to Hubbard Machine Company, San Francisco, Calif. Pumping system. 1,619,475; Mar. 1.

Hubley Manufacturing Co., The. (See Hartman, John H., assignor.)

Huff, William D., assignor of one-half to J. A. Gorr, La Fayette, La. Rail joint. 1,619,792; Mar. 1.

Hughes, William D., Miami, Fla. Fruit picker. 1,619,731; Mar. 1.

Hughes, William, Taunton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Connecter for electric wires. 1,619,517; Mar. 1.

Hull, Harry E., Washington, D. C. Motor-vehicle control pedal. 1,619,421; Mar. 1.

Hull, John I., Schenectady, N. Y., assignor to General Electric Company. System of speed control for induction motors. 1,619,673; Mar. 1.

Humphreys, Harry S., assignor to Armstrong Cork Company, Lancaster, Pa. Rug or similar article. Des. 72,097; Mar. 1.

Humphreys, Harry S., assignor to Armstrong Cork Company, Lancaster, Pa. Rug or similar articles. Des. 72,098; Mar. 1.

Hundemer, Walter F., Alameda, assignor to Gat Gun Lubricating Corporation, Oakland, Calif. Lubricating device. 1,619,126; Mar. 1.

Huntoon, Charles F., South Pasadena, Calif. Truck bolster. 1,619,575; Mar. 1.

Huntoon, Charles F., South Pasadena, Calif. Truck bolster. 1,619,576; Mar. 1.

Hutchings, Charles. (See Eldred, F. H., and Hutchings.)

Hutchinson, Henry B. (See Richards, E. H., and Hutchinson.)

Huttig, Ernest W. (See Goldman, M. S., and Huttig.)

Hylarides, Walter, Granville, Iowa. Animal forceps. 1,619,299; Mar. 1.

Illinois Cork Co. (See Codina, Peter, assignor.)

Illinois Tool Works. (See Olson, Carl G., assignor.)

Ionides, Philip D., assignor of one-half to Ransomes & Rapier Limited, Ipswich, England. Electrically-propelled vehicle. 1,619,616; Mar. 1.

Indiana Canning Machinery Company. (See Lindley, Stacey B., assignor.)

Ingalls, Joseph B., Chicago, Ill. Coin bank. 1,619,073; Mar. 1.

Ingersoll-Rand Company. (See Bancel, P. A., and Kirgan, assignors.)

Intemann, William, Brooklyn, assignor to American Lithographic Company, New York, N. Y. Banding cigars. 1,618,983; Mar. 1.

International Motor Company. (See Masury, Alfred F., assignor.)

International Motor Company. (See Pampinella, Frank, assignor.)

International Motor Company. (See Wirrer, Gottfried, assignor.)

Intertype Corporation. (See Anderson, David L., assignor.)

Ironton Bernhard Boiler Company. (See Bernhard, John B., assignor.)
James, William D. (See Tooker, Harry S., assignor.)
Jarvis, Charles H., assignor to United Steel and Wire Company, Battle Creek, Mich. 1,619,259; Mar. 1.
Jaxon, George S., Huntington, W. Va., assignor to Link-Belt Company, Chicago, Ill. Inspection and weighing apparatus. 1,619,732; Mar. 1.
Jeffries, Schuyler A., assignor to Reo Motor Car Company, Lansing, Mich. Transmission. 1,619,127; Mar. 1.
Jenschke, Adolph, Fredericksburg, Tex. Automobile shock absorber. 1,619,422; Mar. 1.
Jensen, Jens O., Baltimore, Md. Cooling comminuted solid material. 1,619,577; Mar. 1.
Jeppson, George N., assignor to Norton Company, Worcester, Mass. Aggregate-cement tile. 1,619,733; Mar. 1.
Jeppson, George N., and C. L. Leafe, assignors to Norton Company, Worcester, Mass. Terrazzo tile and making the same. 1,619,734; Mar. 1.
Jesser, Albert E. (See McCrery, H. E., Jesser, and Montgomery.)
Jobst, Conrad, Toledo, Ohio, assignor, by mesne assignments, to The Uline Ice-Scoring Machine Company, Wilmington, Del. Ice-scoring machine. 1,619,128; Mar. 1.
Johnson, Bror A. E. (See Ekström, G. C., Örström, and Johnson.)
Johnson, Herbert L., Brooklyn, N. Y., assignor to Standard Development Company. Lubricant. 1,619,074; Mar. 1.
Johnson, Josiah F., Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Bleeder turbine. 1,619,129; Mar. 1.
Johnson, Perry, Topeka, Kans. Combined tomb marker and decoration container. 1,619,735; Mar. 1.
Johnson, William R., Lexington, Ky. Headlight. 1,619,617; Mar. 1.
Johnston, William W. (See Findlay, G. P., and Johnston.)
Jones, Harry S., Chicago, Ill. Steel stock rack. 1,619,476; Mar. 1.
Jones, James F., Sewickley, Pa., assignor to The Consolidated Paper Company, Monroe, Mich. Machine for forming blanks for corrugated-paper boxes. 1,619,207; Mar. 1.
Jones, Leo D., and A. U. Ayres, assignors to The Sharples Specialty Company, Philadelphia, Pa. Centrifugal bowl. 1,619,347; Mar. 1.
Jones, Leslie W., assignor of one-third to A. H. Young, and one-third to C. L. Bright, Charleston, W. Va. Safety stop valve. 1,619,130; Mar. 1.
Jorgensen, Olav E., Forest Hills, assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Scavenging air pump or compressor. 1,619,131; Mar. 1.
Jorgensen, Olav E., Forest Hills, assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Piston-cooling device. 1,619,618; Mar. 1.
Joy, Joseph F., assignor, by mesne assignments, to Joy Manufacturing Company, Franklin, Pa. Loading machine. 1,619,260; Mar. 1.
Joy Manufacturing Company. (See Joy, Joseph F., assignor.)
Juliano, John, assignor of one-fourth to J. F. Braden, Niagara Falls, N. Y. Rear air-brake control. 1,619,132; Mar. 1.
Junkers, Hugo, Dessau, Germany. Sheet-metal trelliswork. 1,619,518; Mar. 1.
Kaestner & Hecht Company. (See Dunlop, James, assignor.)
Kaufmann, Michael M., J. P. Lynn, and F. C. Dell, assignors to Autopoint Company, Chicago, Ill. Grinding machine. 1,619,736; Mar. 1.
Kasley, Alexander T., Essington, Pa., assignor to Westinghouse Electric & Manufacturing Company. Blade fastening. 1,619,133; Mar. 1.
Katzman, Max. (See Martin, Alphonse, assignor.)
Kavanaugh, James T., Port Richmond, N. Y. Oil-storage tank. 1,618,984; Mar. 1.
Kay Sign Company. (See Walsh, Harrie H., assignor.)
Kelly, Bert F., R. F. Miller, and L. G. Winkler, assignors to Parts Corporation, Indianapolis, Ind. Universal mounting. 1,618,985; Mar. 1.
Kelly, Elbert, Anniston, Ala. Lap link. 1,619,519; Mar. 1.
Kenney, Edward F., Bethlehem, Pa. Heat treatment of steel. 1,619,025; Mar. 1.
Kern, Joseph M., Oswego, N. Y. Door-controlled electric-lighting switch. 1,619,134; Mar. 1.
Kerns, John R., Covington, Ky. Illuminated license-tag holder for automobiles. 1,619,520; Mar. 1.
Kerr, Herbert W., Augusta, Kans. Wire-line belt guide. 1,619,793; Mar. 1.
Kieffer, Russell J. (See Perrenot, Frederick A., assignor.)
Killefer Manufacturing Company, The. (See Killefer, Robert, assignor.)
Killefer, Robert, assignor to The Killefer Manufacturing Company, Los Angeles, Calif. Disk cultivator. 1,619,208; Mar. 1.
Kingston, Charles T. (See Wallis, H. E., and Kingston.)
Kinney, James A., Lebanon, assignor to Bethlehem Steel Company, Bethlehem, Pa. Work-handling mechanism for bolt machine. 1,619,077; Mar. 1.
Kirby, Charles H., Detroit, Mich. Mold for casting pistons. 1,619,135; Mar. 1.
Kirgan, John F. (See Bancel, P. A., and Kirgan.)
Kirschbaum, Albert, Newark, N. J. Door. 1,619,578; Mar. 1.
Klaasen, Benjamin J., Detroit, Mich. Wall construction. 1,619,300; Mar. 1.
Kmentt, Waldemar D., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Washer-feeding apparatus. 1,619,075; Mar. 1.
Knott, Frank W., assignor to Detroit Belt Lacer Co., Detroit, Mich. Belt-hook-closing machine. 1,619,137; Mar. 1.
Knowles, William H., Port Chester, N. Y. Bottle closure. 1,619,136; Mar. 1.
Kohn, Rudolf V., Cedarhurst, assignor to The De Luxe Clock and Manufacturing Company, Inc., New York, N. Y. Clock casing. 1,619,674; Mar. 1.
Kolla, John P., assignor to Holland Furnace Company, Holland, Mich. Furnace-water-pan construction. 1,619,261; Mar. 1.
Kollstede, George, Providence, R. I. Strap for personal wear. 1,619,138; Mar. 1.
Korn, Francesca, assignor of one-half to C. Seller, San Francisco, Calif. Cake box. 1,619,423; Mar. 1.
Kramer, Gustav A., Concord, assignor, by mesne assignments, to Simplex Refining Company, San Francisco, Calif. Producing lubricating oils. 1,619,348; Mar. 1.
Kratz, Howard L., assignor to John Wanamaker Philadelphia, Philadelphia, Pa. Statuette. Des. 72,099; Mar. 1.
Krummel, Louis C., Brooklyn, N. Y. Precast plastic composition structural parts and means for uniting the same. 1,619,737; Mar. 1.
Kucera, Frank. (See Rubel, C. F., and Kucera.)
Kuever, Rudolph A., Iowa City, Iowa, assignor to Pepsodent Company, Chicago, Ill. Cleansing and polishing agent. 1,619,076; Mar. 1.
Kupetz, Adolph G., New Rochelle, assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,619,349; Mar. 1.
Kurtz, Cyrus B., Lakewood, Ohio. Transmission mechanism. 1,619,477; Mar. 1.
Kyfes, Vinko, St. Joseph, La. Farrier's knife. 1,619,619; Mar. 1.
Lacerda, Harry A., Watervliet, N. Y. Oil burner. 1,619,738; Mar. 1.
La Chapelle, Euclid I., Brockton, Mass. Making box-toes. 1,619,350; Mar. 1.
Laddon, Isaac M., Dayton, Ohio. Shock-absorbing wheel. 1,619,078; Mar. 1.
Lakewood Engineering Company, The. (See Mosel, Joseph H., assignor.)
Langsdorf, Walter M., New York, N. Y. Back of a mirror or similar article. Des. 72,100; Mar. 1.
Lamson Company, The. (See Cowley, James T., assignor.)
Larsson, Edward, Stockholm, Sweden. Chain coupling for logs. 1,619,675; Mar. 1.
La Rue, Harry F. and W. Zierlein, Fairfield, Iowa. Smoker's stand. Des. 72,101; Mar. 1.
Latagliata, Fortunato, Buenos Aires, Argentina. Animal marker. 1,619,424; Mar. 1.
Laucks, Samuel F., and W. E. Wilkinson, York, Pa., assignors to said Laucks. Constructing safes. 1,619,139; Mar. 1.
Law, Edward F., Reno, Nev., assignor to United States Engineering Company. Roller mill. 1,619,739; Mar. 1.
Lawlor, Joseph P., and J. I. Seay, Memphis, Tenn. Installing well strainers. 1,619,521; Mar. 1.
Lawrence, Edwin F., et al. (See Enright, Thomas F., assignor.)
Lawrence, John H., et al. (See Enright, Thomas P., assignor.)
Layman, Milton R., Johnstown, Pa. Safety pocket. 1,619,140; Mar. 1.
Leafe, Carl L. (See Jeppson, G. N., and Leafe.)
Leary, Richard J., Burlington, N. J. Charging apparatus for molding machines. 1,619,301; Mar. 1.
Le Chauffage Electricque Ideal Limited. (See Lévesque, L. J., and Lessard, assignors.)
Ledbetter, James C., New York, N. Y., assignor to The Prosperity Company, Inc., Syracuse, N. Y. Ironing-press burnguard. 1,618,986; Mar. 1.
Ledwinka, Joseph, assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Motor vehicle. 1,619,478; Mar. 1.
Lee, James H., et al. (See Marsh, H. E., and Dunten, assignors.)
Lee Rubber & Tire Corporation. (See Leopold, Frederick, jr., assignor.)
Lee, Verner B., et al. (See Marsh, H. E., and Dunten, assignors.)
Le Grue, Angus R., Buffalo, N. Y. Pumping apparatus. 1,619,302; Mar. 1.
Leguillon, Charles W., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method and apparatus for preparing plastic stock. 1,619,079; Mar. 1.
Le Mur, S., Company. (See Lewis, W. S., and Murray, assignors.)
Leoni, Alfonso M. (See Asprooth, A. H., and Leoni.)
Leopold, Frederick, jr., Harmonville, Pa., assignor to Lee Rubber & Tire Corporation, Conshohocken, Pa. Tire casing and similar article. Des. 72,102; Mar. 1.
Lessard, Joseph. (See Lévesque, L. J., and Lessard.)

Lévesque, Louis J., and J. Lessard, assignors to Le Chauffage Electrique Ideal Limitee, Bagotville, Quebec, Canada. Heater. 1,619,425; Mar. 1.
Lew, Albert F., Baker, Oreg. Tire tool. 1,619,426; Mar. 1.
Lewis, Frank M., Chicago, Ill. Differential mechanism. 1,619,141; Mar. 1.
Lewis, Wilbur S., Cleveland, and J. C. Murray, Lakewood, assignors to S. Le Mur Company, Cleveland, Ohio. Container for hair in permanent-waving process. 1,619,798; Mar. 1.
Lescarts, Fernand, Brussels, Belgium. Variable-speed gear. 1,618,987; Mar. 1.
Lichtenstein, Harry R., assignor to M. Lichtenstein & Bro., New York, N. Y. Button and fastener therefor. 1,619,800; Mar. 1.
Lichtenstein, M., & Bro. (See Lichtenstein, Harry R., assignor.)
Lindley, Stacey B., assignor to Indiana Canning Machinery Company, Indianapolis, Ind. Mixing and straining machine. 1,618,988; Mar. 1.
Lindsay, Thomas, London, England, assignor to Arca Regulators, Inc., New York, N. Y. Fluid-pressure-operated regulator. 1,619,351; Mar. 1.
Link, Vincent, Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Brake. 1,619,262; Mar. 1.
Link, Vincent, Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Brake. 1,619,579; Mar. 1.
Light, Purl G., Exeter, N. Y. Hay-mowing means. 1,619,620; Mar. 1.
Lindquist, David N. (See Pearson, A., and Lindquist.)
Link-Belt Company. (See Jaxon, George S., assignor.)
Lippard, Herman I., Darby, Pa. Sewing needle. 1,619,142; Mar. 1.
Little Red Wagon Mfg. Co., The. (See Thomas, Arthur C., assignor.)
Long, Eugene M., New York, N. Y. Amusement apparatus. 1,619,580; Mar. 1.
Long, Eugene M., Port Washington, N. Y. Scissors sharpener. 1,619,581; Mar. 1.
Long, Eugene M., Port Washington, N. Y. Key holder. 1,619,582; Mar. 1.
Long, Thomas J., and J. L. Tuttle, Wellington, Kans. Tent structure. 1,619,740; Mar. 1.
Loewenbach, Oscar, Milwaukee, Wis. Manifold sheet. 1,619,522; Mar. 1.
Lovejoy, Ralph M., Meredith, N. H. Radiator-shutter mechanism. 1,619,621; Mar. 1.
Lowy, Louis, Bronx, N. Y. Ice-saving refrigerator. 1,619,741; Mar. 1.
Ludwick, Herbert V., assignor to Budd Wheel Company, Philadelphia, Pa. Carrier for spare disk wheels. 1,619,026; Mar. 1.
Lum, George R., assignor to Western Electric Company, Incorporated, New York, N. Y. Loud-speaking sound reproducer. Des. 72,103; Mar. 1.
Luplow, Donald C., Calistoga, Calif. Traffic signal for motor vehicles. 1,619,523; Mar. 1.
Luschnig, Oswald, Nokomis, Ill. Drill. 1,619,209; Mar. 1.
Lynn, John P. (See Kaufmann, M. M., Lynn, and Dell.)
MacCallum Decorative Corporation. (See Goldman, M. S., and Huttig, assignors.)
MacDonald, Charles D., Fullerton, Calif. Convertible bed and trunk. 1,619,353; Mar. 1.
MacDonald, Frank J., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Method of and apparatus for making and applying markers for rubber articles. 1,619,354; Mar. 1.
MacLaren, Alfred A., Boston, Mass. Apparatus for forming articles from sheets of material. 1,619,210; Mar. 1.
MacReady, George A., Bakersfield, Calif. Making production tests in well drilling. Re16,563; Mar. 1.
MacVey, Gertrude, N. Y. Cigarette box. 1,619,622; Mar. 1.
Magnavox Company, The. (See Summers, Frank E., assignor.)
Magnifico, Nicola, Rome, Italy. Phonograph. 1,619,623; Mar. 1.
Maillefer, Arthur, Lausanne, Switzerland. Blade pump. 1,619,429; Mar. 1.
Manchester, Adam, Central Bridge, N. Y. Combustion-engine spark-plug protector. 1,619,524; Mar. 1.
Manchester, Clyde C., assignor, by mesne assignments, to The Ayling & Reichart Company, Toledo, Ohio. Metal float. Re16,564; Mar. 1.
Mann, Charles. (See Sanford, Lynn H., assignor.)
Marcalus, Nicholas, Plainfield, N. J., assignor to Niles-Bement-Pond Company, New York, N. Y. Frog and switch planer. 1,619,355; Mar. 1.
Marmignat, Henri, administrator. (See Wever, Fritz.)
Marquette Manufacturing Company. (See Nilson, Leonard D., assignor.)
Marquette Tool & Manufacturing Co. (See Glasner, R. W., and Nelson, assignors.)
Marquis, Joseph T. (See Perrault, J. S., and Marquis.)
Marsh, Howard E., Lompoc, and C. J. Dunten, Santa Maria, assignors of one-sixth to V. B. Lee, Santa Barbara, Calif., and one-sixth to J. H. Lee, Grand Junction, Colo. Oil-shale apparatus. 1,619,525; Mar. 1.
Marsh, William B. (See Updegrove, A. J., and Marsh.)
Marsh, William G., Toronto, Ontario, Canada. Auxiliary air control for gasoline engines. 1,619,082; Mar. 1.
Martikainen, Janne, Ryttyla, Finland, assignor to J. A. Anderson, Suffolk County, Mass. Cultivator. 1,619,797; Mar. 1.
Martin, Alphonse, assignor of fifty-one one-hundredths to M. Katzman, Ogdensburg, N. Y. Combined water heater and sterilizing apparatus. 1,619,146; Mar. 1.
Martin, Earl L., New York, N. Y. Water-level-controlling means. 1,619,356; Mar. 1.
Martin, Sidney A. (See Buechele, E. E., and Martin.)
Maryl Equipmnt Company. (See Spaeth, Charles, assignor.)
Marx, Carl, Wyoming, Milburn Township, Essex County, N. J., assignor to Union Sulphur Company. Sulphur composition of diminished inflammability and producing the same. 1,619,357; Mar. 1.
Masury, Alfred F., assignor to International Motor Company, New York, N. Y. Combined radiator and hood for motor vehicles. Des. 72,104; Mar. 1.
Masury, Alfred F., and E. C. Fink, assignors to The Rubber Shock Insulator Company, Inc., New York, N. Y. Shock-insulated rail track. 1,619,028; Mar. 1.
Masszcyk, Alexander, Chicago, Ill. Mop. 1,619,624; Mar. 1.
Mathey, Louis C., Nashville, Tenn. Fishing hook. 1,619,147; Mar. 1.
Mathieson Alkali Works, Inc., The. (See Mauran, Max, assignor.)
Maupin, Graves R., assignor to The J. Faessler Manufacturing Company, Moberly, Mo. Method of and apparatus for finishing cylindrical bearing surfaces. 1,619,479; Mar. 1.
Mauran, Max, Niagara Falls, assignor to The Mathieson Alkali Works, Inc., New York, N. Y. Gas-absorption apparatus. 1,619,430; Mar. 1.
Maxwell, James D., Brooklyn, N. Y. Pump packing. 1,619,211; Mar. 1.
Mayer, Josef, Karlsbad, Czechoslovakia. Permanent-hair-waving appliance. 1,619,794; Mar. 1.
Mayhew, James E., Brooklyn, N. Y. Garment hanger. 1,619,742; Mar. 1.
Maynard, Albert E., assignor to American Optical Company, Southbridge, Mass. Edging machine. 1,619,358; Mar. 1.
Maxon, Glenway, jr., Milwaukee, Wis. Finishing machine for concrete roads. 1619,083; Mar. 1.
McCaffery, Thomas F., jr., Colorado Springs, Colo. Drawing instrument. 1,619,427; Mar. 1.
McClaire, Katherine, Chicago, Ill. Hair curler. 1,619,743; Mar. 1.
McCloskey, Paul J., Roselle, N. J. Mechanic's fishing tool. 1,619,744; Mar. 1.
McCrery, Harold E., A. E. Jsser, and A. B. Montgomery, assignors to Apollo Holding Corporation, Apollo, Pa. Roll heater. 1,619,303; Mar. 1.
McCumpsey, Joseph D., Altoona, Pa. Sanitary milk bottle. 1,619,969; Mar. 1.
McDonald, John C., assignor of one-third to W. N. Westerlund, and twenty-six per cent to E. L. Corbett, New York, N. Y. Polyphase relay. 1,619,080; Mar. 1.
McFall, Robert J., Amherst, Mass. Leather-measuring machine. 1,619,143; Mar. 1.
McFalls, Jones C., Pomona Mills, N. C. Dyeing and oxidizing machine. 1,619,263; Mar. 1.
McGinnis, Edward R. (See Thompson, Arthur A., assignor.)
McKee, James, Chester, assignor to Sun Oil Company, Philadelphia, Pa. Making grease. 1,619,352; Mar. 1.
McLain, H. E. (See Broad, William, assignor.)
McLaine, Claude I., Boston, assignor to Seal-Kap Company, Natick, Mass. Closure for containers. 1,619,264; Mar. 1.
McLaurin-Jones Co. (See McLaurin, William W., assignor.)
McLaurin, William W., Brookfield, Mass. Coated paper and coating paper. 1,619,027; Mar. 1.
McLaurin, William W., assignor to McLaurin-Jones Co., Brookfield, Mass. Strip gummed paper and making the same. 1,619,081; Mar. 1.
McMillan, Edward H., Oakland, Calif. Quick-action clamp. 1,619,144; Mar. 1.
McMillan, Edward H., Oakland, Calif. Combination tandem concrete-mixing machine. 1,619,145; Mar. 1.
McMillan, Hugh P., assignor to Samuel H. Dell & Co., Inc., Baltimore, Md. Manufacturing brushes. 1,619,428; Mar. 1.
McNamara, James A., New York, N. Y. Milk-bottle protector. 1,619,745; Mar. 1.
Meccano Company. (See Hornby, Frank, assignor.)
Meeker, John A., and E. J. Roach, Potsdam, N. Y.; said Meeker assignor to said Roach. Receptacle-shaking machine. 1,619,526; Mar. 1.
Melkie, John, assignor to Vaporator Mfg. Co., Chicago, Radiator cover or similar article. Des. 72,105; Mar. 1.
Mellink, Charles F., Toledo, Ohio. Locking device for safes. 1,619,676; Mar. 1.
Mell, Tod J., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Variegated articles of rubber or the like and making the same. 1,619,359; Mar. 1.
Mendizabal, Alberto, Buenos Aires, Argentina. Automatic valve and float for drinking troughs and the like. 1,619,431; Mar. 1.
Merdian, Fred, Vancouver, Wash. Tool for inserting and removing bearing sleeves. 1,619,625; Mar. 1.
Messinger, George M. (See Roat, Harry A., assignor.)

Metals Recovery Company. (See Bragg, Gilbert A., assignor.)
Metters, Gordon J., Wayville, and K. W. Nolan, St. Peters, South Australia, Australia. Mincing machine. 1,618,990; Mar. 1.
Middleton, George R., Tampa, Fla. Slip-cover fastener. 1,619,265; Mar. 1.
Midland Company, The. (See Nourse, Clair P., assignor.)
Mid-West Box Company. (See Fairchild, Walter H., assignor.)
Mid-West Box Company. (See Heinrichs, Berg, assignor.)
Miller, Adolph H., Minneapolis, Minn. Ash-sifting shovel. 1,619,266; Mar. 1.
Miller, Albert W., Nokomis, Ill. Wire-crimping tool. 1,619,084; Mar. 1.
Miller, Frederick H., Portland, Oreg. Potato slicer. 1,619,746; Mar. 1.
Miller, H. Fancourt. (See Hoover, Sidney L., assignor.)
Miller, John T., and M. Hanley, Chicago, Ill. Switch. 1,619,148; Mar. 1.
Miller, Max, New York, N. Y. Vehicle parking system. 1,619,360; Mar. 1.
Miller, Robert F. (See Kelly, B. F., Miller, and Winkler.)
Mills, Joseph. Coalhurst, Alberta, Canada. Pump. 1,619,149; Mar. 1.
Mills, William L. (See Pratt, L. S., Weltz, and Mills.)
Mitchell, Sidney W., J. Naud, and C. F. Goldman, St. Petersburg, Fla. Dog race track. 1,619,150; Mar. 1.
Montgomery, Alonzo B. (See McCrery, H. E., Jesser, and Montgomery.)
Moore Brothers Company. (See Dibble, Claude M., assignor.)
Moore, Frederick E. (See Fairweather, Charles B., assignor.)
Moore, Hugh K., assignor to Brown Company, Berlin, N. H. Producing calcium arsenate. 1,619,267; Mar. 1.
Moore, Max J., Newark, N. J., assignor to W. H. Collins, Summit, N. J. Trap-nest attachment. 1,619,527; Mar. 1.
Moravec, John, Vancouver, British Columbia, Canada. Log-barking apparatus. 1,619,151; Mar. 1.
Morris, Earl V., Big Lake, Tex. Air washer for internal-combustion engines. 1,619,029; Mar. 1.
Mortimer, Albert, Chicago, Ill. Money tray for bankers and the like. 1,619,528; Mar. 1.
Morton, William A., assignor to The Amsler-Morton Company, Pittsburgh, Pa. Recuperator. 1,619,747; Mar. 1.
Moscowitz, Benjamin, Brooklyn, N. Y. Undergarment. 1,618,901; Mar. 1.
Mosel, Joseph H., assignor to The Lakewood Engineering Company, Lakewood, Ohio. Discharge mechanism for mixers. 1,619,626; Mar. 1.
Mossbart, Donald J., Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company. Stoker. 1,619,480; Mar. 1.
Mowlitz, Albert C., Philadelphia, Pa., assignor to Columbia Phonograph Company, Inc., Bridgeport, Conn. Cabinet for sound reproducing mechanism. Des. 72,106; Mar. 1.
Moyer, Edward A., West Hartford, Conn., assignor to Pratt & Whitney Company, New York, N. Y. Thread-chaser-grinding machine. 1,619,361; Mar. 1.
Mulend, Charles J., Philadelphia, Pa., assignor to Haines, Jones & Cadbury Company. Valve construction. 1,619,748; Mar. 1.
Mulconroy Company. (See Mulconroy, Joseph J., assignor.)
Mulconroy, Joseph J., Germantown, assignor to Mulconroy Company, Inc., Philadelphia, Pa. Steam iron coupling and hose. 1,619,583; Mar. 1.
Müller, Hans, Munich, Germany. Box for storing furs. 1,619,529; Mar. 1.
Mullholland, Vergil West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Guiding device for molten glass. 1,619,432; Mar. 1.
Murray, John C. (See Lewis, W. S., and Murray.)
Murray, Richard, New York, N. Y. Clamp. 1,619,746; Mar. 1.
Murray, Thomas E., Brooklyn, N. Y. Withdrawing cores from molded conduits. 1,619,362; Mar. 1.
Murray, Walter. (See Riordan, J. P. P., and Murray.)
Murtaught, William C., Chicago, Ill. Calibrating device for gauge sticks. 1,619,363; Mar. 1.
Musical Manufacturers' Corporation. (See Burdwise, Aaron, assignor.)
Myers, Hubert A., Toledo, Ohio. Clutch device. Re16,565; Mar. 1.
Myers, Lewis C., Freeport, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,619,530; Mar. 1.
Nagel, W. G., Electric Company, The. (See Adams, Harry E., assignor.)
Nansano, Joseph C., San Pedro, Calif. Oil indicator. 1,619,531; Mar. 1.
National Cash Register Company. (See Fuller, F. L., and Robertson.)
National Cash Register Company, The. (See Shipley, Bernis M., assignor.)
National Marking Machine Company. (See Faust, Alexander L., assignor.)
Naud, Jack. (See Mitchell, S. W., Naud, and Goldman.)
Neederman, Stephen A., assignor of forty per cent to H. M. Smith, Dallas, Tex. Novelty toothbrush. 1,619,212; Mar. 1.
Neiss, Oskar H. L., assignor to Elektrotrenamaschinen Gesellschaft mit beschränkter Haftung, Hamburg, Germany. Method and apparatus for electrically cutting metal. 1,619,627; Mar. 1.
Nelson, Emil, Gary, Ind. Beam compass. 1,619,750; Mar. 1.
Nelson, John. (See Glasner, R. W., and Nelson.)
Nelson, Joseph F., Los Angeles, Calif. Filter. 1,619,584; Mar. 1.
Nelson, Verner A., Lynden, Wash. Hydraulic clutch. 1,619,751; Mar. 1.
Nenzel, Joseph F., Reno, Nev. Lamp. 1,619,213; Mar. 1.
New Monarch Machine & Stamping Company. (See Anderson, Sigurd E., assignor.)
New York Light Fixture Mfg. Co. (See Aglow, Harry, assignor.)
Nicholas Power Company. (See Uhlemann, Theodore F., assignor.)
Nicholson, Stanley W., assignor to The Duro Company, Toledo, Ohio. Window-controlling device. 1,619,633; Mar. 1.
Niemann, Frank H., Philadelphia, Pa. Tremolo. 1,619,532; Mar. 1.
Niles-Bement-Pond Company. (See Fullerton, Herbert S., assignor.)
Niles-Bement-Pond Company. (See Marcalus, Nicholas, assignor.)
Nilson, Leonard D., Wayzata, assignor to Marquette Manufacturing Company, St. Paul, Minn. Lifting jack. 1,619,304; Mar. 1.
Nock, Harold E., assignor to Towle Manufacturing Company, Newburyport, Mass. Plate or analogous article. Des. 72,107; Mar. 1.
Nolan, Kenneth W. (See Metters, G. J., and Nolan.)
Nordin, Joseph A. (See Brunskog, V. H. M., and Nordin.)
Norris, Charles B., Grand Rapids, Mich., assignor to Haskelite Manufacturing Corporation. Machine for cutting metal-sheathed sheets. 1,619,305; Mar. 1.
Northey, John P., Toronto, Ontario, Canada. Sound-signaling installatio. 1,619,585; Mar. 1.
Northup, Harry R., and C. L. Snyder, Des Moines, Iowa. Humidor cigar holder. 1,619,306; Mar. 1.
Norton Company. (See Jeppson, George N., assignor.)
Norton Company. (See Jeppson, G. N., and Leafe, assignors.)
Norton Company. (See Van Der Pyl, Edward, assignor.)
Nourse, Clair P., Milwaukee, assignor to The Midland Company, South Milwaukee, Wis. Manufacturing buckles. 1,619,533; Mar. 1.
Nunlist, Emil V., Indianapolis, Ind. Fishpole holder. 1,619,152; Mar. 1.
Nyquist, Harry, Jackson Heights, N. Y., assignor to American Telephone and Telegraph Company. Carrier-current signaling system. 1,619,085; Mar. 1.
Oakes, Ernest C., Bloomfield, N. J., assignor, by mesne assignments, to Empire Milking Machine Company, Inc., Rochester, N. Y. Vacuum pump. 1,619,364; Mar. 1.
Oakes, Ernest C., Bloomfield, assignor, by mesne assignments, to Empire Milking Machine Company, Inc., Rochester, N. Y. Vacuum pump valve. 1,619,481; Mar. 1.
Offenbach, Solomon, Bradford, Pa. Shelf. 1,619,307; Mar. 1.
Oglesby, Nicholas E. (See Bradner, D. B., and Oglesby.)
Oldmixon, Benjamin F., Pittsfield, Mass. Terminal connecter. 1,619,086; Mar. 1.
Olgay, Albert, Glen Ellyn, assignor to Gaw-O'Hara Envelope Co., Chicago, Ill. Machine for punching and reenforcing blanks. 1,619,214; Mar. 1.
Olgay, Albert, Glen Ellyn, assignor to Gaw O'Hara Envelope Company, Chicago, Ill. Envelope-fastening device. 1,619,215; Mar. 1.
Olgay, Albert, Glen Ellyn, assignor to Gaw-O'Hara Envelope Company, Chicago, Ill. Envelope-window-cutting device. 1,619,365; Mar. 1.
Oliver, John R., Medfield, assignor to Reece Shoe Machinery Company, Boston, Mass. Press for cutting or punching sheet material. 1,619,482; Mar. 1.
Olson, Carl G., assignor to Illinois Tool Works, Chicago, Ill. Gear-testing machine. 1,619,483; Mar. 1.
Olson, Hans M., Burbank, Calif. Oxychloride cement and making same. 1,619,534; Mar. 1.
Olson, Nels L., Detroit, Mich. Motor-truck chassis. 1,619,308; Mar. 1.
O'Neal, Nathaniel P., Hope, Ark. Masonry jointing tool. 1,619,030; Mar. 1.
One Minute Manufacturing Company. (See Schroeder, Simon E., assignor.)
Örström, Gustaf. (See Ekström, G. C., Örström, and Johnson.)
Osbeck, Elmer C., assignor to Grand Rapids Brass Company, Grand Rapids, Mich. Latch. 1,619,752; Mar. 1.
Osborn, Arthur W., Philadelphia, Pa., assignor to The White Company, Cleveland, Ohio. Dumping vehicle. 1,619,628; Mar. 1.
Ostrosky, Joseph, jr., Duryea, Pa., and P. Ostrosky, Detroit, Mich. Window fastener. 1,619,031; Mar. 1.
Ostrosky, Paul. (See Ostrosky, Joseph, jr., and P.)
Otto, Carl, Bochum, Germany. Vertical-chamber oven. 1,619,535; Mar. 1.
Owen, Frederick C., Fayetteville, N. C. Transformer for electric-arc cutting, repairing, and welding apparatus. 1,619,629; Mar. 1.

Owen, Frederick C., Fayetteville, N. C. Transformer for electric-arc-welding apparatus. 1,619,753; Mar. 1.
Paaske, Jens, Clinton, Iowa. Upholstering device. 1,619,754; Mar. 1.
Packer, Mortimer L., Columbus, Ohio. Heater. Des. 72,108; Mar. 1.
Paget, Charles, Santa Cruz, Calif. Kettle. 1,618,992; Mar. 1.
Pagett, Earl W., Detroit, Mich. Carburetor. 1,619,309; Mar. 1.
Pajeau, Charles H., Glencoe, assignor to The Toy Tinkers, Inc., Evanston, Ill. Toy. 1,619,630; Mar. 1.
Pampinella, Frank, Brooklyn, assignor to International Motor Company, New York, N. Y. Rubber shock-insulated bumper. 1,619,087; Mar. 1.
Parker, Arthur L., Cleveland, Ohio. Tube coupling. 1,619,755; Mar. 1.
Parker, Ira D., Minneapolis, Minn. Grain-car door. 1,619,310; Mar. 1.
Parks, William J., and L. B. Evans, La Salle, Ill. Direction indicator. 1,619,536; Mar. 1.
Parrish, Jacob O., Pomona, Calif. Spring-eye bender. 1,619,537; Mar. 1.
Parsons, Stuart W., assignor to The Stanley Works, New Britain, Conn. Door latch. 1,619,032; Mar. 1.
Parts Corporation. (See Kelly, B. F., Miller, and Winkler, assignors.)
Patasnik, David, Brooklyn, N. Y. Sash. 1,619,631; Mar. 1.
Paulson, Martin L., Fort Snelling, Minn. Punctureproof pneumatic tire. 1,619,433; Mar. 1.
Pawsat, Ewald F., Maysville, Ky., assignor to Wald Manufacturing Company. Tire-repair tool. 1,619,538; Mar. 1.
Pearson, Anton, and D. N. Lindquist, Lindsborg, Kans. Milk card. 1,619,756; Mar. 1.
Peck, Samuel S., Honolulu, Hawaii. Strainer for sugar juices and the like. 1,619,484; Mar. 1.
Pelkey, Milton, Milwaukee, Wis. Lock bolt. 1,619,757; Mar. 1.
Pelz, Bruno. (See Reinhardt, C., and Pelz.)
Pennebaker, George B., Oakland, assignor to F. Starr and W. P. Green, Oakland, Calif. Changeable exhibitor. 1,619,088; Mar. 1.
Pepsodent Company. (See Kuever, Rudolph A., assignor.)
Perrault, Joseph E., assignor to Hood Rubber Company, Watertown, Mass. Auxiliary tool holder for lathes and the like. 1,618,993; Mar. 1.
Perrault, Joseph S., and J. T. Marquis, Nashua, N. H. Meat-grinder head. 1,619,632; Mar. 1.
Perrenot, Frederick A., assignor of one-half to R. J. Kieffer, San Antonio, Tex. Valve. 1,619,033; Mar. 1.
Perttu, Arvid D., Ridgefield, Wash. Vehicle signal. 1,619,311; Mar. 1.
Petersen, Christen H. A., Glenada, Oreg. Trap for catching crabs. 1,619,306; Mar. 1.
Petersen, Thorvald J., New York, assignor to Globe Lighting Fixture Mfg. Co., Brooklyn, N. Y. Chandelier or article of similar nature. Des. 72,109; Mar. 1.
Petersen, Thorvald J., New York, assignor to Globe Lighting Fixture Mfg. Co., Brooklyn, N. Y. Lighting-fixture bracket or article of similar nature. Des. 72,110; Mar. 1.
Peterson, Charles F. (See Barringer, L. E., and Peterson.)
Peterson, Charles F., Scotia, N. Y., assignor to General Electric Company. Making molded articles. 1,619,758; Mar. 1.
Peterson, Frank E., Chicago, Ill., assignor to American Optical Company, Southbridge, Mass. Adjustable bridge. 1,619,367; Mar. 1.
Pfauser, Edward M., assignor to Blackhawk Manufacturing Co., Milwaukee, Wis. Circulating pump. 1,619,539; Mar. 1.
Pierce, Earl F., Chicago, Ill., assignor, by mesne assignments, to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,619,677; Mar. 1.
Pierce, George L., and H. V. Rau, Brooklyn, assignors to A. G. Spalding & Bros., New York, N. Y. Playing ball. 1,618,994; Mar. 1.
Pietrzycki, Ziegmund P., Klamath Falls, Oreg. Cabinet. 1,619,312; Mar. 1.
Plum, Johannes, Washington, D. C. Speed boat. 1,618,995; Mar. 1.
Plumb, Milton M., assignor to American Auto Trimming Company, Detroit, Mich. Vehicle top construction. 1,619,153; Mar. 1.
Pollard, Carl I., assignor of one-half to The Vulcan Last Company, Portsmouth, Ohio. Machine for forming heels for shoes. 1,619,154; Mar. 1.
Powers, Charles P., Spring Lake, assignor to U. S. Tool Company, Inc., East Orange, N. J. Constructing variable condenser rotors. 1,618,996; Mar. 1.
Pratt, Lyde S., E. H. Weltz, Penns Grove, N. J., and W. L. Mills, Chester, Pa., assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Making alkylnitroaryl ethers. 1,619,368; Mar. 1.
Pratt & Whitney Company. (See Moyer, Edward A., assignor.)
Pressed Steel Car Company. (See Blest, Minot C., assignor.)
Price, Albert M. (See Gronberg, Clarence O., assignor.)
Price, George R., Monessen, Pa. Changeable exhibitor. 1,619,155; Mar. 1.
Price, Joseph, assignor to The Griscom-Russell Company, New York, N. Y. Sectional condenser. 1,619,034; Mar. 1.
Prince, Alva L., Dallas, Tex. Mopping and scrubbing machine. 1,619,313; Mar. 1.
Prinz, Herman L., Chicago, Ill. Movable bridge. 1,619,678; Mar. 1.
Proctor, Robert V., and H. M. Schaab, assignors to The Commercial Shearing & Stamping Company, Youngstown, Ohio. Pallet. 1,619,759; Mar. 1.
Prosperity Company, The. (See Ledbetter, James C., assignor.)
Radandt, Joseph H., Emmett, Idaho. Lock for tire rims. 1,618,997; Mar. 1.
Rademaekers, William H., jr. (See Rademaekers, William H., sr., and W. H., jr.)
Rademaekers, William H., sr., and W. H. Rademaekers, jr., Newark, N. J. Collision bumper device. 1,619,540; Mar. 1.
Radiant Lighting Fixture Co. (See Bohl, Hugo, assignor.)
Radio Patents Corporation. (See Van Deventer, Harry R., assignor.)
Rafter, Albert, assignor to Rafter Machine Company, Newark, N. J. Shock absorber. 1,619,035; Mar. 1.
Rafter Machine Company. (See Rafter, Albert, assignor.)
Rand, Benjamin G., North Tonawanda, N. Y. Filing cabinet. 1,619,761; Mar. 1.
Rand, James H., North Tonawanda, assignor to Rand Kardex Bureau, Inc., Tonawanada, N. Y. Index element. 1,619,760; Mar. 1.
Rand Kardex Bureau, Inc. (See Rand, James H., assignor.)
Ransomes & Rapier Limited. (See Ionides, Philip D., assignor.)
Raschick, Charles T., St. Paul, Minn. Index. 1,619,089; Mar. 1.
Rasmussen Chester A., assignor of one-half to C. R. Butler, Long Beach, Calif. Casing wedge. 1,619,268; Mar. 1.
Ratigan, James P., Walnut Park, Calif. Beam adjuster. 1,619,216; Mar. 1.
Rau, Henry V. (See Pierce, G. L., and Rau.)
Ravnestad, Andreas J., Fredrikstad, Norway. Clarifying and purifying liquids and waste waters. 1,619,036; Mar. 1.
Read, Henry, Kansas City, and S. M. Higgins, Webb City, Mo. Semimetallic flexible form for floor domes. 1,619,269; Mar. 1.
Reckard, Irven, Duncombe, Iowa. Snowplow. 1,619,314; Mar. 1.
Redinger, Joseph M., Providence, R. I. Milling-machine collet and end mill. 1,618,998; Mar. 1.
Reece Shoe Machinery Company. (See Oliver, John R., assignor.)
Reese, Andrew, Massillon, Ohio. Device for displaying cards, etc. 1,619,434; Mar. 1.
Reese, Frank, Minneapolis, Minn. Weather strip for inswinging casements. 1,619,037; Mar. 1.
Rehm, Heinrich, Nuremberg, Germany. Artificial knee joint. 1,619,485; Mar. 1.
Rehor, Charles A., Portland, Oreg. Rubber button. 1,619,541; Mar. 1.
Reid, James, New York, N. Y. Umbrella. 1,619,217; Mar. 1.
Reinhart, Adolf, Hoboken, N. J. Fish boat. 1,619,762; Mar. 1.
Reinhardt, Christian, and B. Pelz, New York, N. Y. Movable doll eyes. 1,619,763; Mar. 1.
Reintjes, George P., Kansas City, Mo. Corner-fill furnace-wall construction. 1,619,270; Mar. 1.
Reiser, John A., Port Jervis, N. Y. Smoker's pipe. 1,619,090; Mar. 1.
Reiter, Daniel I., New York, N. Y. Fastening device. 1,619,764; Mar. 1.
Remington Typewriter Company. (See Shepard, Herbert C., assignor.)
Reo Motor Car Company. (See Jeffries, Schuyler A., assignor.)
Republic Flow Meters Co. (See Cunningham, Arthur B., assignor.)
Resines, Francis J., assignor to By-Products Recovery Company, Philadelphia, Pa. Refining oils. 1,619,486; Mar. 1.
Rettig, Max R., Koenigsberg, assignor to Festbaukasten Gesellschaft mit beschränkter Haftung, Berlin, Germany. Producing models of buildings and the like. 1,619,435; Mar. 1.
Rice, Louis E., New Martinsville, W. Va. Automobile lens. 1,619,038; Mar. 1.
Richards, Eric H., and H. B. Hutchinson, Hertfordshire, assignors to Adco Limited, London, England. Manufacture of nitrogenous fertilizers. 1,619,679; Mar. 1.
Richards, Leslie W., assignor to St. Louis Car Company, St. Louis, Mo. Brake. 1,619,039; Mar. 1.
Richmond, Vincent C., and G. H. Scott, Cardington, England. Mooring gear for airships. 1,619,680; Mar. 1.
Ricketts, Richard R., Springfield, Mo. Dispensing receptacle. 1,619,315; Mar. 1.
Ridley, Grahame B., assignor to E. B. Ward, San Francisco, Calif. Desiccator. 1,619,765; Mar. 1.
Riedinger, Edward, Bloomfield, N. J. Brake mechanism. 1,619,542; Mar. 1.

Riegel, Samuel S., Scranton, Pa., assignor, by mesne assignments, of one-half to J. H. Allen, Jersey City, N. J. Passenger-car waste-transfer apparatus. 1,619,369; Mar. 1.
Riesor, William, Newark, N. J. Tool for marking tiles, 1,619,091; Mar. 1.
Riley, S., Stoker Corporation. (See Taylor, Irving A., assignor.)
Riordan, James P. P., and W. Murray, Johannesburg, Transvaal, South Africa. Hose-clamping tool. 1,619,766; Mar. 1.
Roach, Emmett J. (See Meeker, J. A., and Roach.)
Roat, Harry A., Manchester, N. Y., assignor of one-half to G. M. Messinger, Morganza, Pa. Bait box. 1,619,634; Mar. 1.
Robbins, Chester C., assignor to B. C. Ames Co., Waltham, Mass. Cylinder gauge. 1,619,370; Mar. 1.
Roberts, Charles W. Centerville, assignor of one-half to J. H. Hill, Richmond, Ind. Greenhouse bench. 1,618,999; Mar. 1.
Robertson, William H. (See Fuller, F. L., and Robertson.)
Robinson, Joseph, Jersey City, N. J. Ornamental wool felt and making same. 1,619,681; Mar. 1.
Roby, Luther E., Peoria, Ill. Fertilizer distributor. 1,619,795; Mar. 1.
Roche, John, Hoboken, N. J., assignor to American Lead Pencil Company. Process and apparatus for marking articles. 1,619,487; Mar. 1.
Roche, Phoebe M., Cleveland, Ohio. Mop. 1,619,040; Mar. 1.
Roebling's, John A., Sons Company. (See Sunderland, Charles C., assignor.)
Rogers, Bruce W., and W. L. Glass, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Rubber-covered rolls. 1,619,371; Mar. 1.
Rohrbach, Adolf, Charlottenburg, Germany. Wing construction for metal airplanes. 1,619,372; Mar. 1.
Rohrbach, Adolf, Charlottenburg, Germany. Wing for flying machines. 1,619,373; Mar. 1.
Rohrbach, Adolf, Berlin-Wilmersdorf, Germany. Method and device for the increase of floating stability of airplanes. 1,619,374; Mar. 1.
Rolfs, Harry J. (See Rolfs, Robert H. and H. J.)
Rolfs, Robert H. and H. J., assignors to Amity Leather Products Co., West Bend, Wis. Bill folder. 1,619,543; Mar. 1.
Rollins, Henry H., Phoenix, Ariz. Shade or awning raising device. 1,619,635; Mar. 1.
Root Manufacturing Company, The. (See Root, Ralph R., assignor.)
Root, Ralph R., Lakewood, assignor to The Root Manufacturing Company, Cleveland, Ohio. Agricultural powder-distributing device. 1,619,316; Mar. 1.
Roper, Geo. D., Corporation. (See Hobson, Stanley H., assignor.)
Ross, Hugh C., Toledo, and H. W. Falconer, near Perrysburg, Ohio; said Ross assignor to said Falconer. Identification device for vehicles. 1,619,271; Mar. 1.
Rounds, Charles W. and J. C., Seattle, Wash. Nonchattering gear. 1,619,799; Mar. 1.
Rounds, John C. (See Rounds, Charles W. and J. C.)
Rowley, Edward G., Belleville, N. J., assignor to Underwood Typewriter Company, New York, N. Y. Typewriting machine. 1,619,375; Mar. 1.
Roy, William, O., Montreal, Quebec, Canada. Tree. 1,619,272; Mar. 1.
Royal Typewriter Company. (See Myers, Lewis C., assignor.)
Rubber Shock Insulator Company. (See Masury, A. F., and Fink, assignors.)
Rubel, Charles F., and F. Kucera, assignor to Union Special Machine Company, Chicago, Ill. Sewing machine for cording. 1,619,436; Mar. 1.
Rubel, Charles F., and F. Kucera, assignor to Union Special Machine Company, Chicago, Ill. Seam for sewed articles. 1,619,437; Mar. 1.
Rudolph, Wilhelm. (See Hahnemann, W., Rudolph, and Wilckens.)
Rudolphi, Frank. (See Widell, M. E., and Rudolphi.)
Rudy, Addison E., Matewan, W. Va. Frame for steam shovels. 1,619,156; Mar. 1.
Ruetz, Carl, Zurich, Switzerland. Potato-laying machine. 1,619,488; Mar. 1.
Russell, Edward A., assignor to Vapor Car Heating Company, Inc., Chicago, Ill. Flexible pipe joint 1,619,218; Mar. 1.
Russell, Edward A., assignor to Vapor Car Heating Company, Inc., Chicago, Ill. Automatic regulating apparatus for car-heating systems. 1,619,219; Mar. 1.
Ryan, George E., Taunton, Mass. Heating and humidifying device. 1,619,092; Mar. 1.
Rypinski, Maurice C., Yonkers, N. Y., assignor to Brandes Laboratories, Inc., Newark, N. J. Loud-speaker cabinet. Des. 72,111; Mar. 1.
Rypinski, Maurice C., Yonkers, N. Y., assignor to Brandes Laboratories, Inc., Newark, N. J. Loud-speaker cabinet. Des. 72,112; Mar. 1.
Rypinski, Maurice C., Yonkers, N. Y., assignor to Brandes Laboratories, Inc., Newark, N. J. Loud-speaker cabinet. Des. 72,113; Mar. 1.
Sakatwalla, Byramji D., Crafton, Pa. Manufacture of alloy steel and iron. 1,619,462; Mar. 1.
Sallinger, Hans W. G., Berlin, Germany. Duplex arrangement for telegraph cables. 1,619,041; Mar. 1.
Sanford, Alfred F., Knoxville, Tenn. Radio apparatus. 1,619,544; Mar. 1.
Sanford, Alfred F., Knoxville, Tenn. Radio apparatus. 1,619,545; Mar. 1.
Sanford, Lynn H., assignor of one-half to C. L. Mann, Toledo, Ohio. Brake-shoe-key holder. 1,619,767; Mar. 1.
Sangamo Electric Company. (See Holtz, Frederick C., assignor.)
Sargent, George H., Chicago, Ill. Inspection plug. 1,619,273; Mar. 1.
Sauer, Johan N. A., Amsterdam, Netherlands. Apparatus for treating liquids with decolorizing, purifying, and filtering agents and for separating undissolved substances from liquids. 1,619,042; Mar. 1.
Sauvage, Herbert J., assignor to trustees of The Electro Thermostatic Control Company, Chicago, Ill. Thermostatic Control. 1,619,636; Mar. 1.
Schaab, Harry M. (See Proctor, R. V., and Schaab.)
Schanche, Herman G., Philadelphia, Pa., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Lithophone and increasing the resistance thereof to sunlight. 1,619,376; Mar. 1.
Scheiwer, Albert T., Erie, Pa. Screw-driver mechanism for insulator screws. 1,619,043; Mar. 1.
Scheminger, John, jr., Providence, R. I., assignor to Aetna Automatic Oil Burner, Incorporated, New York, N. Y. Liquid-fuel saving and safety device. 1,619,157; Mar. 1.
Scherer, Karl, New York, N. Y. Spare-tire lock. 1,619,044; Mar. 1.
Schimmelpfennig, John, Cedar Rapids, Iowa. Combination woodworking machine. 1,619,158; Mar. 1.
Schley, Frederick L., and C. Ernst, Brooklyn, N. Y. Agricultural machine. 1,619,586; Mar. 1.
Schmidt'sche Heildampfy-Gesellschaft m. b. H. (See Thomsen, Peter, assignor.)
Schoenke, Walter, Lichterfelde, near Berlin, Germany. Appliance for practicing riding sport. 1,619,438; Mar. 1.
Schoenweitz, William F., Rochester, N. Y. Cooking utensil. 1,619,159; Mar. 1.
Schoger, William H., Aurora, Ill. Stenciling apparatus. 1,619,587; Mar. 1.
Schroeder, Simon E., assignor of one-half to One Minute Manufacturing Company, Newton, Iowa. Agitator for washing machine. 1,619,637; Mar. 1.
Schubert, Friedrich W., assignor to Brysilka, Limited, Apperley Bridge, near Bradford, England. Manufacture of artificial silk. 1,619,768; Mar. 1.
Schubert, Friedrich W., assignor to Brysilka, Limited, Apperley Bridge, near Bradford, England. Apparatus for use in the manufacture of artificial silk. 1,619,769; Mar. 1.
Schwarz, John N., Bridgeport, and V. W. Schwarz, Fairfield, Conn. Tile-making machine. 1,619,489; Mar. 1.
Schwarz, Vincent W. (See Schwarz, John N. and V. W.)
Schwarz, Vincent W., North Bergen, N. J. Mold plate for roofing-tile machines. 1,619,490; Mar. 1.
Scott, George H. (See Richmond, V. C., and Scott.)
Scrote, Merle C., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Tire-building apparatus. 1,619,377; Mar. 1.
Scudder, Charles J., Scranton, Pa. Connecting-rod bearing. 1,619,588; Mar. 1.
Seal-Kap Company. (See Baum, Ewald G., assignor.)
Seal-Kap Company. (See McLaine, Claude I., assignor.)
Sears, Roebuck and Co. (See Sexton, Lawrence E., assignor.)
Seay, James I. (See Lawlor, J. P., and Seay.)
Sebring, E. H., China Company, The. (See Sebring, Ellsworth H., assignor.)
Sebring, Ellsworth H., assignor to The E. H. Sebring China Company, Sebring, Ohio. Covered dish. Des. 72,114; Mar. 1.
Seller, Carrie. (See Korn, Francesca, assignor.)
Sexton, Lawrence E., assignor to Sears, Roebuck and Co., Chicago, Ill. Tire. Des. 72,115; Mar. 1.
Sexton, Lawrence E., assignor to Sears, Roebuck and Co., Chicago, Ill. Tire. Des. 72,116; Mar. 1.
Shaffer, William D. (See Collins, James H., assignor.)
Sharples Specialty Company, The. (See Jones, L. D., and Ayres, assignors.)
Shaw, James, San Francisco, Calif. System of frost prevention for orchards. 1,619,378; Mar. 1.
Shaw, James, San Francisco, Calif. Fuel-feed device for internal-combustion engines. 1,619,379; Mar. 1.
Shepard, Herbert C., Frankfort, assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting machine. 1,619,546; Mar. 1.
Shepard, Victor J. (See Houston, H. A., and Shepard.)
Sheridan, William J., Rochester, N. Y. Stock regulator for paper-making machines. 1,619,682; Mar. 1.
Shipley, Bernis M., assignor, by mesne assignments, to The National Cash Register Company, Dayton, Ohio. Cash register. 1,619,796; Mar. 1.
Short, Gurney L., Angus, Minn. Cow-tail tie. 1,619,274; Mar. 1.
Sickler, Clarence E., Endicott, N. Y. Electric-circuit-control device. 1,619,638; Mar. 1.
Siebenbrodt, Otto, Chicago, Ill. Lamp stand. 1,619,639; Mar. 1.
Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung. (See Hojer, Wilhelm, assignor.)

Sieurin, Paul W., Gottenborg, Sweden. Tackle. 1,619,000; Mar. 1.
Sieurin, Sven A., Gottenborg, Sweden. Lifeboat. 1,619,001; Mar. 1.
Signal Gesellschaft mit beschränkter Haftung. (See Habnemann, W., Rudolph, and Wilckens, assignors.)
Silicox, Lewis K. (See Whipple, G. L., and Silicox.)
Sinclair Refining Company. (See Bell, John E., assignor.)
Sinclair Refining Company. (See Sloan, Alfred J., assignor.)
Simplex Refining Company. (See Kramer, Gustav A., assignor.)
Sixt, Frederick C. (See Frackelton, R. J., and Sixt.)
Skillern, William T., Boise, Idaho. Hose connection. 1,619,439; Mar. 1.
Sloan, Alfred J., Kansas City, Kans., assignor to Sinclair Refining Company, Chicago, Ill. Pressure still. 1,619,440; Mar. 1.
Sloane, William W., assignor to Goodman Manufacturing Company, Chicago, Ill. Explosionproof fuse. 1,619,640; Mar. 1.
Smith, Douglass M., Walla Walla, Wash. Toy gun. 1,619,275; Mar. 1.
Smith, Harry F., assignor to The Gas Research Company, Dayton, Ohio. Gas-generating apparatus. 1,619,441; Mar. 1.
Smith, Harry M. (See Neederman, Stephen A., assignor.)
Smith, Harvey J., Bay Point, Calif. Pendulum inclination indicator. 1,619,317; Mar. 1.
Smith, L C & Corona Typewriter Inc. (See Armstrong, Frank H., assignor.)
Smith, Oakley, Chicago, Ill. Measure of tension differential. 1,619,491; Mar. 1.
Snyder, Charles L. (See Northup, H. R., and Snyder.)
Snyder, Harry L., West Los Angeles, Calif. Paper-bag holder. 1,619,547; Mar. 1.
Sommer, Edmund T., North Attleboro, Mass. Finger ring. Des. 72,117; Mar. 1.
Sonora Phonograph Company. (See Gruber, Morris M., assignor.)
Sonora Phonograph Company. (See Wolff, Joseph, assignor.)
Spaeth, Charles, assignor to the Marvel Equipment Company, Cleveland, Ohio. Measuring and dispensing pump. 1,619,492; Mar. 1.
Spalding, A. G., & Bros. (See Pierce, G. L., and Rau, assignors.)
Spencer, Isaac N., Follansbee, W. Va. Stacking device or standard. 1,619,641; Mar. 1.
Sperti, George, Covington, assignor of one-fourth to A. F. Blecksmith, Dayton, Ky. Electric meter. 1,619,002; Mar. 1.
Spinks, William A., & Company. (See Hoskin, Edmund F., assignor.)
Spiral Piston Ring Company. (See Graves, Harry S., assignor.)
Spreen, Charles C., assignor, by mesne assignments, to Electric Refrigeration Corporation, Detroit, Mich. Mechanical refrigeration. 1,619,548; Mar. 1.
Standard Coupler Co. (See Goodwin, Ernest G., assignor.)
Standard Development Company. (See Johnson, Herbert L., assignor.)
Stanley Works, The. (See Parsons, Stuart W., assignor.)
Staples, Elden I., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Motor-control system. 1,619,380; Mar. 1.
Starr, Fred, et al. (See Pennebaker, George B., assignor.)
Stavrum, Maurice W., Chicago, Ill. Loop antenna. Des. 72,118; Mar. 1.
Steel Products Company, The. (See Crawford, F. C., and Graham, assignors.)
Steel Stamping Company, The. (See Bregman, Harry, assignor.)
Steele, Herbert H., Lynbrook, N. Y. Educational device for teaching spelling. 1,619,160; Mar. 1.
Steenrod, William J., assignor to Baker-Vawter Company, Benton Harbor, Mich. Loose-leaf binder. 1,619,589; Mar. 1.
Steere Engineering Company. (See Steere, George R., assignor.)
Steere, George R., assignor to Steere Engineering Company, Detroit, Mich. Gate or valve operating system. 1,619,003; Mar. 1.
Steiner, John, Poughkeepsie, N. Y. Polishing wheel. 1,619,442; Mar. 1.
Sternkopf, Christian J., Rittersgrun, Germany. Process and apparatus for the production of wood pulp. 1,619,004; Mar. 1.
Stevenson, Harry, Kearney, assignor to Brandes Laboratories, Inc., Newark, N. J. Electromagnetic sound reproducer. 1,619,161; Mar. 1.
Steward, William J., Boston, Mass. Collapsible chair and easel. 1,619,381; Mar. 1.
Stewart Manufacturing Company. (See Groves, Lucian S., assignor.)
Stewart, Robert, New York, N. Y. Dispensing container. 1,619,770; Mar. 1.
Stinson, Alexander J., Elgin, Ariz. Music-teaching device. 1,619,683; Mar. 1.
St. Louis Car Company. (See Richards, Leslie W., assignor.)
Stocker, William M., Woodhaven, assignor to Cameron Machine Company, Brooklyn N. Y. Winding means. 1,619,220; Mar. 1.
Stringer, Melvin, Pottstown, Pa. Forming band brakes. 1,619,549; Mar. 1.
Strodel, Norbert J., Syracuse, N. Y. Valve lifter. 1,619,162; Mar. 1.
Strong, Samuel M., Garden City, N. Y. Respiration and pulse recorder. 1,619,005; Mar. 1.
Studebaker Corporation, The. (See Link, Vincent, assignor.)
Stultz, George W. (See Warring, R. T., and Stultz.)
Submarine Signal Company. (See Fay, Richard D., assignor.)
Summers, Frank E., near Memphis, Mo., assignor to The Magnovox Company, San Francisco, Calif. Electrostatic detector and amplifier. 1,619,318; Mar. 1.
Sunderland, Charles C., assignor to John A. Roebling's Sons Company, Trenton, N. J. Rope-tension-testing device. 1,619,093; Mar. 1.
Sun Oil Company. (See McKee, James, assignor.)
Sutker, Louis, Brooklyn, N. Y. Roller bearing for sliding doors. 1,619,443; Mar. 1.
Swab, Jay G., Baldwin, assignor to Tension Envelope Co. Inc., Brooklyn, N. Y. Fastener for envelopes and the like. 1,619,382; Mar. 1.
Symington Company, The. (See Anderson, Gustaf A., assignor.)
Symington Company, The. (See Barrows, Donald S., assignor.)
Szakacs, Miklos. (See Zorgo, Desider, assignor.)
Tamberlin, John, assignor to The George W. Blabon Company, Philadelphia, Pa. Sheet-linoleum disintegrator. 1,619,276; Mar. 1.
Tanner, George W., Otis, Colo. Caster wheel. 1,619,590; Mar. 1.
Taubel, Clarence H., Riverside, N. J., assignor to Hemphill Company, Central Falls, R. I. Seamless knit, clocked stocking and making same. 1,619,788; Mar. 1.
Taylor, Doc G., Baytown, Tex. Antichattering device. 1,619,444; Mar. 1.
Taylor, Irving A., assignor to S. Riley Stoker Corporation, Worcester, Mass. Furnace-wall air plate. 1,619,445; Mar. 1.
Tension Envelope Co. Inc. (See Swab, Jay G., assignor.)
Ternstedt Manufacturing Company. (See Archer, Thomas P., assignor.)
Texas Company, The. (See Hall, Frank W., assignor.)
Thebaud, Victor E., and S. Wesselius, Grand Rapids Township, Kent County, Mich. Machine for mashing fruits and vegetables. 1,619,550; Mar. 1.
Thiemann, William B., Albert City, Iowa. Portable pneumatic elevating device. 1,619,277; Mar. 1.
Thomas, Arthur C., assignor to The Little Red Wagon Mfg. Co., Omaha, Nebr. Tractor dump wagon. 1,619,094; Mar. 1.
Thomas, Edward G., assignor to Toledo Scale Company, Toledo, Ohio. Device for weighing sheet material. 1,619,163; Mar. 1.
Thomas, Edward G., assignor to Toledo Scale Company, Toledo, Ohio. Testing device. 1,619,164; Mar. 1.
Thomas, Edward G., assignor to Toledo Scale Company, Toledo, Ohio. Weighing scale. 1,619,165; Mar. 1.
Thomas, Hubert S., Llandaff, and W. R. Davies, Whitchurch, Wales. Machinery employed in the shearing of metal plates or sheets. 1,619,684; Mar. 1.
Thomas, Walter H., Spencer, Iowa. Foot throttle control. 1,619,319; Mar. 1.
Thompson, Arthur A., assignor of one-half to E. R. McGinnis, Oakland, Calif. Ear protector. 1,619,772; Mar. 1.
Thompson, Howard A., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,619,221; Mar. 1.
Thomsen, Laura K. H., San Francisco, Calif. Dancing toy. 1,619,446; Mar. 1.
Thomsen, Peter, assignor to Schmidt'sche Heissdampf-Gesellschaft m. b. H., Cassel-Wilhelmshohe, Germany. Steam boiler. 1,619,447; Mar. 1.
Thurston, Herman B., Cleveland Heights, Ohio. Low-water alarm. 1,619,222; Mar. 1.
Tiefel, Charles G., Rochester, N. Y. Overinflation-preventing apparatus. 1,619,383; Mar. 1.
Time-O-Stat Corporation. (See Gauger, Frank A., assignor.)
Tingley, Leonard C., assignor to Federal Products Corporation, Providence, R. I. Cylinder gauge. 1,619,771; Mar. 1.
Tobolla, Victor. (See Eichhorn, Charles, assignor.)
Toledo Scale Company. (See Hem, Halvor O., assignor.)
Toledo Scale Company. (See Thomas, Edward G., assignor.)
Toler, William E., Pawnee, Okla. Stove. 1,619,166; Mar. 1.
Tolino, Silvia. (See Bocchino, Ernest, assignor.)
Tooker, Harry S., Joplin, assignor to W. D. James, Kansas City, Mo. Pump. 1,619,320; Mar. 1.
Towle Manufacturing Company. (See Nock, Harold E., assignor.)
Toy Tinkers, Inc., The. (See Pajeau, Charles H., assignor.)
Tracy, Horace D. (See Drake, Bert E., assignor.)
Travis, John M., St. Louis, Mo. Beverage-dispensing apparatus. 1,619,278; Mar. 1.

Trico Products Corporation. (See Pierce, Earl F., assignor.)
Trolel, Arthur E., Oakland, Calif. System of concrete construction. 1,619,321; Mar. 1.
Trustees of the Electro Thermostatic Control Company. (See Sauvage, Herbert J., assignor.)
Tuomi, Uuno E., Dallas, Tex. Sash-operating mechanism. 1,619,167; Mar. 1.
Tuttle, James L. (See Long, T. J., and Tuttle.)
Uhlemann, Theodore F., assignor to Nicholas Power Company, Inc., New York, N. Y. Framing mechanism for motion picture machines. 1,619,551; Mar. 1.
Updegrove, Alice J., and W. B. Marsh, Brooklyn, N. Y. Bed rest. 1,619,685; Mar. 1.
Uline Ice-Scoring Machine Company, The. (See Jobst, Conrad, assignor.)
Underwood Typewriter Company, The. (See Daniel, Royal G., assignor.)
Underwood Typewriter Company. (See Kupetz, Adolph G., assignor.)
Underwood Typewriter Company. (See Rowley, Edward G., assignor.)
Underwood Typewriter Company. (See Waldheim, John, assignor.)
Union Bag & Paper Corporation. (See Avery, True M., assignor.)
Union Special Machine Company. (See Rubel, C. F., and Kucera, assignors.)
Union Sulphur Company. (See Marx, Carl, assignor.)
Union Switch & Signal Company, The. (See Thompson, Howard A., assignor.)
U. S. Industrial Alcohol Co. (See Backhaus, Arthur A., assignor.)
United Shoe Machinery Corporation. (See Gouldbourn, Joseph, assignor.)
United Shoe Machinery Corporation. (See Hughes, William, assignor.)
United States Engineering Company. (See Law, Edward F., assignor.)
U. S. Tool Company. (See Cahusac, Clarence N., assignor.)
U. S. Tool Co. (See Dester, William F., assignor.)
U. S. Tool Co. (See Hopkins, Arthur C., assignor.)
U. S. Tool Company. (See Powers, Charles P., assignor.)
United Steel and Wire Company. (See Jarvis, Charles H., assignor.)
Usoskin, Joseph, New York, N. Y. Display device. 1,619,095; Mar. 1.
Valentine, Charles W., assignor to The Bagley and Sewall Company, Watertown, N. Y. Paper-making machine. 1,619,168; Mar. 1.
Van Houten, Erskine B., South Nyack, N. Y. Beverage mixer. Des. 72,119; Mar. 1.
Vance, Arthur C., Brooklyn, N. Y. Fishing reel. 1,619,448; Mar. 1.
Van Der Pyl, Edward, assignor to Norton Company, Worcester, Mass. Safety-tread unit. 1,619,778; Mar. 1.
Van Deventer, Harry R., assignor to Dubilier Condenser Corporation, New York, N. Y. Condenser. 1,619,223; Mar. 1.
Van Deventer, Harry R., assignor to Radio Patents Corporation, New York, N. Y. Telephone attachment for phonographs and the like. 1,619,384; Mar. 1.
Van Nuys, Claude C., Cranford, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Apparatus for separating the constituents of gaseous mixtures. 1,619,169; Mar. 1.
Vaporator Mfg. Co. (See Meikle, John, assignor.)
Vapor Car Heating Company. (See Russell, Edward A., assignor.)
Vaughan, Ross., assignor to The Ex-El Company, Pittsburgh, Pa. Coin-controlled vending machine. 1,619,006; Mar. 1.
Vend Ads Corp. (See Chandler, Daniel L., assignor.)
Villaret, Gustave E., Leonia, N. J., assignor to Globe Lighting Fixture Mfg. Co., Brooklyn, N. Y. Chandelier or article of similar nature. Des. 72,120; Mar. 1.
Villaret, Gustave E., Leonia, N. J., assignor to Globe Lighting Fixture Mfg. Co., Brooklyn, N. Y. Chandelier or article of similar nature. Des. 72,121; Mar. 1.
Voellmecke, Carl H., Cincinnati, Ohio. Pipe hanger. 1,619,591; Mar. 1.
Vogt Bros. & Squier Company. (See Vogt, Clarence, assignor.)
Vogt, Clarence, Wenonah, N. J., assignor to Vogt Bros. & Squier Company, Philadelphia, Pa. Latch. 1,619,789; Mar. 1.
Voices, Incorporated. (See Grubman, Anton L., assignor.)
Vosburgh, John R., Johnstown, N. Y. Traction device for vehicle tires. 1,619,170; Mar. 1.
Vulcan Last Company, The. (See Pollard, Carl I., assignor.)
Vulté, Hermann T., New Rochelle, N. Y. Antiskid chain. 1,619,592; Mar. 1.
Wagner, Ervin C., Indianapolis, Ind. Basket-ball game. 1,619,279; Mar. 1.
Wald Manufacturing Company. (See Pawsat, Ewald F., assignor.)
Waldheim, John, Elizabeth, N. J., assignor to Underwood typewriter Company, New York, N. Y. Typewriting machine. 1,619,045; Mar. 1.
Wallace, George L., San Diego, Calif. Water-heater vent pipe ceiling device. 1,619,385; Mar. 1.
Wallis, Henry E., and C. T. Kingston, Detroit, Mich. Boiler. 1,619,171; Mar. 1.
Walsh, Austin, New York, N. Y. Telescopic hatband. 1,619,007; Mar. 1.
Walsh, Harrie H., assignor to Kay Sign Company, Chicago, Ill. Advertising-projecting device. 1,619,090; Mar. 1.
Walsh, James M., Co. (See Walsh, James M., assignor.)
Walsh, James M., assignor to James M. Walsh Co., Milwaukee, Wis. Crown ring. 1,619,224; Mar. 1.
Walsh, James M., assignor to James M. Walsh Co., Milwaukee, Wis. Breast-strap slide. 1,619,225; Mar. 1.
Wanamaker, John, Philadelphia. (See Kratz, Howard L., assignor.)
Ward, Charles E., Charleston, W. Va. Portable repair chamber. 1,619,642; Mar. 1.
Ward, Edna S., Fort Worth, Tex. Bathing shoe. Re16,566; Mar. 1.
Ward, Edward B. (See Ridley, Grahame B., assignor.)
Ward, James H., Chicago, Ill. Drum. 1,619,046; Mar. 1.
Warring, Robert T., and G. W. Stultz, Brooklyn, N. Y. Radiator air valve. 1,619,386; Mar. 1.
Waselge, Charles, Ruell, France. Speed-reducing gear. 1,619,552; Mar. 1.
Waterbury Farrel Foundry and Machine Company, The. (See Wilcox, Richard L., assignor.)
Waters, Harry H., assignor to Climax Engineering Company, Clinton, Iowa. Neutral brake. 1,619,449; Mar. 1.
Watts, Leo E., Amarillo, Tex. Ironing-board installment. 1,619,774; Mar. 1.
Waugh, Lester R., Mount Vernon, N. Y. Smoking utensil. 1,619,387; Mar. 1.
Webb, Martin L., Garden City, Kans. Wind turbine. 1,619,643; Mar. 1.
Wellman, Frank E., Kansas City, Kans. Liquid-level indicator. 1,619,553; Mar. 1.
Wells, Burling D., Danbury, assignor to R. S. Blair, Stamford, Conn. Deflation alarm for penumatic tires. 1,619,450; Mar. 1.
Weltz, Earl H. (See Pratt, L. S., Weltz, and Mills.)
Werbitzky, Theophilus D., Cleveland, Ohio. Rotary valve for internal-combustion engines. 1,619,226; Mar. 1.
Went, William F., Colorado Springs, Colo. Time feeder for domestic animals. 1,619,172; Mar. 1.
Wesselius, Sybrant. (See Thebaud, V. E., and Wesselius.)
Westerlund, William N., et al. (See McDonald, John C., assignor.)
Western Electric Company. (See Dunham, Bert G., assignor.)
Western Electric Company. (See Lum, George R., assignor.)
Western Electric Company. (See Williams, S. B., and Clement, assignors.)
Westinghouse Air Brake Company, The. (See Cass, C. P., and Craig, assignors.)
Westinghouse Electric and Manufacturing Company. (See Bethel, Claude, assignor.)
Westinghouse Electric & Manufacturing Company. (See Bouton, Edgar M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Brace, Porter H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Butcher, Charles A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Clay, Noble S., assignor.)
Westinghouse Electric & Manufacturing Company. (See Dann, Walter M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Davies, David R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Evans, Robert D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Guy, H. L., and Blacklock, assignors.)
Westinghouse Electric & Manufacturing Company. (See Haverstick, Earl J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Houston, H. A., and Shepard, assignors.)
Westinghouse Electric & Manufacturing Company. (See Holy, George H. F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Johnson, Josiah F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Kasley, Alexander T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Mosshart, Donald J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Staples, Elden I., assignor.)
West Virginia Pulp and Paper Company. (See Drewsen, Viggo, assignor.)
Wetzel, Charles, New York, N. Y. Safety attachment for pocketbooks, etc. 1,619,644; Mar. 1.
Wever, Fritz, deceased, Stuttgart, Germany; H. Marmignat, administrator. Feather-lined material and making the same. 1,619,493; Mar. 1.
Weymann, Charles T., Paris, France. Window-glass guide for vehicles and the like. 1,619,047; Mar. 1.
Weymouth, Harry G., assignor to The Eaton Axle and Spring Company, Cleveland, Ohio. Combined fender and luggage carrier. 1,619,451; Mar. 1.
Wheeler, Mary E., Evanston, Ill. Window-curtain protector. 1,619,280; Mar. 1.
Whipple, Gordon L., Omaha, Nebr., and L. K. Silcox, Riverside, Ill. Railway-car-door construction. 1,619,048; Mar. 1.
White Company, The. (See Osborn, Arthur W., assignor.)

White, Jay C., New Castle, Pa. Multiple-carriage lathe. 1,619,281; Mar. 1.
Whitehill, David B., Clarendon, Pa. Spring suspension device. 1,619,452; Mar. 1.
Whitney, Eddy R., assignor to Commercial Truck Company, Philadelphia, Pa. Delivery truck. 1,619,775; Mar. 1.
Widell, Magnus E., Cincinnati, Ohio, and F. Rudolphi, Montclair, N. J., assignors to American Can Company, New York, N. Y. Blank-shearing apparatus. 1,619,227; Mar. 1.
Wilckens, Ernst. (See Hahnemann, W., Rudolph, and Wilckens.)
Wilcox, Richard L., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Upsetting mechanism. 1,619,494; Mar. 1.
Wilcox, Richard L., assignor to The Waterbury Farrel Foundry and Machine Company, Waterbury, Conn. Upsetting mechanism. 1,619,495; Mar. 1.
Wilderson, Clinton G., assignor to The Crescent Machine Company, Leetonia, Ohio. Sectional chip breaker for planing machines. 1,619,008; Mar. 1.
Wilderson, Clinton G., assignor to The Crescent Machine Company, Leetonia, Ohio. Sectional feed roll for planing machines. 1,619,009; Mar. 1.
Wilderson, Clinton G., assignor to The Crescent Machine Company, Leetonia, Ohio. Mortising and boring machine. 1,619,049; Mar. 1.
Wilhelm, Henry, Brooklyn, N. Y. Contact device and insulation. 1,619,010; Mar. 1.
Wilkinson, William E. (See Laucks, S. F., and Wilkinson.)
Will & Baumer Candle Company Inc. (See Flannery, Martin A., assignor.)
Willett, Alfred H., West New York, N. J., assignor to American Arch Company. Fire pan. 1,619,453; Mar. 1.
Williams, Samuel B., jr., Brooklyn, N. Y., and L. M. Clement, Mountain Lakes, N. J., assignors to Western Electric Company, Incorporated, New York, N. Y. Automatic telephone high-frequency trunk. 1,619,228; Mar. 1.
Williams, Theron H., and W. Wright, assignors, by mesne assignments, to Chicago-Cleveland Car Roofing Company, Chicago, Ill. Car-roof clamp. 1,619,282; Mar. 1.
Willson, Tom B., Pittsburgh, Pa. Automatic telephone apparatus. 1,619,554; Mar. 1.
Winkler, Louis G. (See Kelly, B. F., Miller, and Winkler.)
Winn, Adelbert D., Toronto, Ontario, Canada. Combined tongue and shoe-lace fastener. 1,619,322; Mar. 1.
Winters, Frederick V., New York, N. Y. Vacuum-creating instrument. 1,619,388; Mar. 1.
Winters, Frederick V., New York, N. Y. Vacuum-creating instrument. 1,619,389; Mar. 1.
Wired Radio, Inc. (See Hough, Clinton W., assignor.)
Wirrer, Gottfried, Plainfield, N. J., assignor to International Motor Company, New York, N. Y. Apparatus for vaporizing hydrocarbon mixtures. 1,619,050; Mar. 1.
Wisroth, Ernst, and A. J. Hirschfield, Los Angeles, Calif. Automobile parking device. 1,619,555; Mar. 1.
Witkowski, Walter, Brooklyn, N. Y. Camp stool. 1,619,686; Mar. 1.
Wodke, Otto, assignor of one-half to the Firm Actien Gesellschaft "Neptun" Schiffswerft und Maschinenfabrik, Rostock, Germany. Seed dispenser. 1,619,687; Mar. 1.
Wolff, Joseph, Brooklyn, N. Y., assignor to Sonora Phonograph Company, Inc. Radiocabinet. Des. 72,122; Mar. 1.
Wolff, Joseph, Brooklyn, N. Y., assignor to Sonora Phonograph Company, Inc. Radiocabinet. Des. 72,123; Mar. 1.
Wolff, Joseph, Brooklyn, N. Y., assignor to Sonora Phonograph Company, Inc. Radiocabinet. Des. 72,124; Mar. 1.
Wolf, Frank, New York, N. Y. Collar fastener. 1,619,390; Mar. 1.
Wolters, Otto, Magdeburg, and K. Höper, Berlin-Charlottenburg, Germany, assignors to said Wolters. Feeling mechanism for machines for punching controlling bands. 1,619,645; Mar. 1.
Wood, Floyd R., Grand Rapids, Mich. Oil-feed construction. 1,619,229; Mar. 1.
Woodruff, Albert N., Washington, D. C. Type-bar mechanism. 1,619,391; Mar. 1.
Worthington Pump and Machinery Corporation. (See Jorgensen, Olav E., assignor.)
Wright, John E., Mayfield, Ky. Calculator. 1,619,230; Mar. 1.
Wright, William. (See Williams, T. H., and Wright.)
Yates, Sydney. (See Yates, Walter and S.)
Yates, Walter and S., Swinton, near Manchester, England. Heat-exchanging apparatus. 1,619,776; Mar. 1.
Young, A. Homer, et al. (See Jones, Leslie W., assignor.)
Youngstown Pressed Steel Company. (See Curtis, Lewis E., assignor.)
Zerk, Oscar, now by judicial change of name Oscar Ulysses Zerk, Cleveland, Ohio, assignor, by mesne assignments to The Gassick Manufacturing Company. Lubricant-receiving nipple. 1,619,454; Mar. 1.
Zerk, Oscar U., Detroit, Mich., assignor, by mesne assignments, to The Bassick Manufacturing Company. Lubricating nipple. 1,619,455; Mar. 1.
Zierlein, William. (See La Rue, H. F., and Zierlein.)
Zimmerman, Harry C., Washington, D. C. Cradle lock for gun carriages. 1,619,173; Mar. 1.
Zorgo, Desider, Montreal, Quebec, Canada, assignor of four-tenths to M. Szakacs, Brooklyn, N. Y. Automatic electric time switch. 1,619,777; Mar. 1.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 1ST DAY OF MARCH, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abdominal support. C. H. Hittenberger. 1,619,513; Mar. 1.
Abrading machine. J. Gouldbourn. 1,619,021; Mar. 1.
Abrasive-supplying means. H. W. Hill. 1,619,344; Mar. 1.
Advertising-projecting device. H. H. Walsh. 1,619,096; Mar. 1.
Aerial advertiser. J. Chvojka. 1,619,565; Mar. 1.
Agricultural machine. F. L. Schley and C. Ernst. 1,619,586; Mar. 1.
Aircraft. M. T. Brush. 1,619,100; Mar. 1.
Aircraft, Producing smoke clouds from moving. D. B. Bradner and N. E. Oglesby. 1,619,183; Mar. 1.
Airplanes, Method and device for the increase of floating stability of. A. Rohrbach. 1,619,374; Mar. 1.
Airplanes, Wing construction for metal. A. Rohrbach. 1,619,372; Mar. 1.
Alarm: *See*—
Low-water alarm.
Alkyl-nitronryl ethers, Making. L. S. Pratt, E. H. Weltz, and W. L. Mills. 1,619,368; Mar. 1.
Alloy steel and iron, Manufacture of. B. D. Saklatwalla. 1,619,462; Mar. 1.
Aluminum chloride, Manufacture of. F. W. Hall. 1,619,022; Mar. 1.
Ammonium-aluminum sulphate from aluminum-sulphate solutions containing ferric compounds, Extraction of. R. Ganssen. 1,619,666; Mar. 1.
Amusement apparatus. E. M. Long. 1,619,580; Mar. 1.
Amusement device. J. R. Anderson. 1,619,325; Mar. 1.
Animal marker. F. Latagliata. 1,619,424; Mar. 1.
Antenna, Loop. M. W. Stavrum. Des. 72,118; Mar. 1.

Fertilizer distributor. L. E. Roby. 1,619,795; Mar. 1.
Fertilizers, Manufacture of nitrogenous. E. H. Richards and H. B. Hutchinson. 1,619,679; Mar. 1.
Filter. H. L. Guy and T. Blacklock. 1,619,118; Mar. 1.
Filter. J. F. Nelson. 1,619,584; Mar. 1.
Finger ring. E. T. Sommer. Des. 72,117; Mar. 1.
Fire extinguisher. W. H. Heaton. 1,619,120; Mar. 1.
Fire pan. A. H. Willett. 1,619,453; Mar. 1.
Fire-pot construction. O. J. Groehn and W. Blaskewitz. 1,618,981; Mar. 1.
Fish-catching apparatus. H. E. Blecker. 1,619,560; Mar. 1.
Fishing apparatus. B. C. Heckman. 1,619,512; Mar. 1.
Fishing hook. L. C. Mathey. 1,619,147; Mar. 1.
Fishing reel. A. C. Vance. 1,619,448; Mar. 1.
Fishing tool, Mechanic's. P. J. McCloskey. 1,619,744; Mar. 1.
Fishpole holder. E. V. Nunlist. 1,619,152; Mar. 1.
Flexible coupling. H. Bell. 1,619,457; Mar. 1.
Floor domes, Semimetallic flexible form for. H. Read and S. M. Higgins. 1,619,269; Mar. 1.
Floor-finishing apparatus. J. T. Garton. 1,619,571; Mar. 1.
Floor heater. T. P. Blair. 1,619,593; Mar. 1.
Flow-controlling apparatus. G. H. Gibson. 1,619,253; Mar. 1.
Flow meter, Fluid-. B. Graemiger. 1,619,416; Mar. 1.
Fluid-supply lines, Automatic cut-off for pressure-. P. D. Sconopouly. 1,619,500; Mar. 1.
Fluids, Apparatus for controlling. J. F. Donnelly. 1,619,335; Mar. 1.
Flying machines, Wing for. A. Rohrbach. 1,619,373; Mar. 1.
Folding table. J. Hoszowski. 1,619,124; Mar. 1.
Foot rest and robe container, Combination. E. R. Heller. 1,619,725; Mar. 1.
Forceps, Animal. W. Hylarides. 1,619,299; Mar. 1.
Frame: *See*—
Suspension frame. Track side frame.
Fraud-preventing device. D. L. Chandler. 1,619,654; Mar. 1.
Fruit picker. W. D. Hughes. 1,619,731; Mar. 1.
Fruit, vegetable, or other edible natural or manufactured substances and making a powdered fruit, vegetable, or other edible substance or composition, Powdered soluble. C. J. Greenstreet. 1,619,202; Mar. 1.
Fruits and vegetables, Machine for mashing. V. E. Thebaud and S. Wesselius. 1,619,550; Mar. 1.
Furnace-wall air plate. I. A. Taylor. 1,619,445; Mar. 1.
Furnace-wall construction, Corner-fill. G. P. Reintjes. 1,619,270; Mar. 1.
Furnace-water-pan construction. J. P. Kolla. 1,619,261; Mar. 1.
Furnaces, Lining material for alkali-recovery. J. Beveridge. 1,619,785; Mar. 1.
Fuse, Explosionproof. W. W. Sloane. 1,619,640; Mar. 1.
Game, Basket-ball. E. C. Wagner. 1,619,279; Mar. 1.
Garment hanger. J. E. Mayhew. 1,619,742; Mar. 1.
Gas-absorption apparatus. M. Mauran. 1,619,430; Mar. 1.
Gas-generating apparatus. H. F. Smith. 1,619,441; Mar. 1.
Gas stove and range, Combined. S. H. Hobson. Des. 72,094; Mar. 1.
Gaseous mixtures, Apparatus for separating the constituents of. C. C. Van Nuys. 1,619,169; Mar. 1.
Gasoline, Treatment of. M. W. Harriger and W. J. Baker. 1,619,206; Mar. 1.
Gate or valve operating system. G. R. Steere. 1,619,003; Mar. 1.
Gauge: *See*—
Cylinder gauge.
Gauge. A. T. and P. H. Boese. 1,619,695; Mar. 1.
Gear and means for controlling the same, Variable-speed. A. E. L. Chorlton. 1,619,701; Mar. 1.
Gear for airships, Mooring. V. C. Richmond and G. H. Scott. 1,619,680; Mar. 1.
Gear, Friction draft. E. G. Goodwin. 1,619,112; Mar. 1.
Gear, Nonchattering. C. W. and J. C. Rounds. 1,619,799; Mar. 1.
Gear, Speed-reducing. C. Waselge. 1,619,552; Mar. 1.
Gear-testing machine. C. G. Olson. 1,619,483; Mar. 1.
Gear, Variable-speed. F. Lescarts. 1,618,987; Mar. 1.
Generating steam, Apparatus for. H. L. Doherty. 1,619,244; Mar. 1.
Girder, Circular. F. Hornby. 1,619,298; Mar. 1.
Glass feeders, Regulation of. G. E. Howard. 1,619,729; Mar. 1.
Glass, Guiding device for molten. V. Mulholland. 1,619,432; Mar. 1.
Gold washer. T. F. X. Beaudet. 1,619,558; Mar. 1.
Golf club. R. L. Crankshaw. 1,619,566; Mar. 1.
Grain conditioner. J. L. Guinan. 1,619,417; Mar. 1.
Grease, Making. J. McKee. 1,619,352; Mar. 1.
Greenhouse bench. C. W. Roberts. 1,618,999; Mar. 1.
Grinder head, Meat-. J. S. Perrault and J. T. Marquis. 1,619,632; Mar. 1.
Grinding machine. M. M. Kaufmann, J. P. Lynn, and F. C. Dell. 1,619,736; Mar. 1.
Grinding machine, Thread-chaser-. E. A. Moyer. 1,619,361; Mar. 1.
Gun, Concrete. R. C. Hackley. 1,619,297; Mar. 1.
Gun carriages, Cradle lock for. H. C. Zimmerman. 1,619,173; Mar. 1.
Guns, Loader for. T. A. Conlon. 1,619,193; Mar. 1.
Guns, Mount for machine. W. T. Gorton. 1,619,113; Mar. 1.
Hair curler. K. McClaire. 1,619,743; Mar. 1.
Hair-waving appliance, Permanent-. J. Mayer. 1,619,794; Mar. 1.
Handle assembly. T. P. Archer. 1,619,097; Mar. 1.
Hanger: *See*—
Garment hanger. Pipe hanger.
Hatband, Telescopic. A. Walsh. 1,619,007; Mar. 1.
Headlight. W. B. Johnson. 1,619,617; Mar. 1.
Headlights, Antiglare attachment for. H. L. Gordon. 1,619,720; Mar. 1.
Headlights, Dirigible. J. H. Gillies. 1,619,068; Mar. 1.
Heat engine. R. W. Davenport. 1,619,195; Mar. 1.
Heat engine. R. W. Davenport. 1,619,197; Mar. 1.
Heat-exchanging apparatus. W. and S. Yates. 1,619,776; Mar. 1.
Heat transfer at high temperatures, Apparatus for. C. Field. 1,619,661; Mar. 1.
Heat, Transforming. R. W. Davenport. 1,619,196; Mar. 1.
Heater: *See*—
Automobile heater. Oil-burning air heater.
Floor heater. Roll heater.
Heater. M. L. Packer. Des. 72,108; Mar. 1.
Heater. L. J. Lévesque and J. Lessard. 1,619,425; Mar. 1.
Heater control, Multiple. H. A. Hands. 1,619,510; Mar. 1.
Heating and cooling at high temperatures. C. Field. 1,619,662; Mar. 1.
Heating and for controlling reactions at high temperatures, Apparatus for. C. Field. 1,619,663; Mar. 1.
Heating and humidifying device. G. E. Ryan. 1,619,092; Mar. 1.
Heating method, High-temperature. C. Field. 1,619,660; Mar. 1.
Heels for shoes, Machine for forming. C. I. Pollard. 1,619,154; Mar. 1.
Hinge, Concealed. M. Fox. 1,619,502; Mar. 1.
Hinge, Friction. T. P. Enright. 1,619,107; Mar. 1.
Hook: *See*—
Bracelet hook. Fishing hook.
Chain hook.

Hose-clamping tool. J. P. P. Riordan and W. Murray. 1,619,766; Mar. 1.
Hose connection. W. T. Skillern. 1,619,439; Mar. 1.
Hose-repair clamp. T. E. Charter. 1,619,287; Mar. 1.
Hosiery, Full-fashioned. H. Evans and H. E. Hellbronner. 1,619,199; Mar. 1.
Hydrocarbon mixtures, Apparatus for vaporizing. G. Wirrer. 1,619,050; Mar. 1.
Ice-scoring machine. C. Jobat. 1,619,128; Mar. 1.
Identification device for vehicles. H. C. Ross and H. W. Falconer. 1,619,271; Mar. 1.
Illuminating device. K. Edison. 1,619,198; Mar. 1.
Index. C. T. Raschick. 1,619,089; Mar. 1.
Index element. J. H. Rand. 1,619,760; Mar. 1.
Indicator: *See*—
Direction indicator. Pendulum inclination indicator.
Liquid-level indicator.
Oil indicator.
Inner tubes, Manufacture of. H. H. Hastings. 1,619,119; Mar. 1.
Insectifuge. S. L. Hoover. 1,619,258; Mar. 1.
Inspection and weighing apparatus. G. S. Jaxon. 1,619,732; Mar. 1.
Internal-combustion engine. W. H. Henderson. 1,619,071; Mar. 1.
Internal-combustion rotary motor. G. E. Bragg. 1,619,237; Mar. 1.
Iron: *See*—
Carry iron.
Ironing board. D. W. Ferguson. 1,619,409; Mar. 1.
Ironing-board installment. L. E. Watts. 1,619,774; Mar. 1.

Pocket, Safety. M. R. Layman. 1,619,140; Mar. 1.
Pocketbooks, etc., Safety attachment for. C. Wetzel. 1,619,644; Mar. 1.
Poke-hole cover. M. C. Biest. 1,619,055; Mar. 1.
Polishing wheel. J. Steiner. 1,619,442; Mar. 1.
Polyphase relay. J. C. McDonald. 1,619,080; Mar. 1.
Potato-laying machine. C. Ruetz. 1,619,488; Mar. 1.
Powder-distributing device, Agricultural. R. R. Root. 1,619,316; Mar. 1.
Power-transmission mechanism. A. E. L. Chorlton. 1,619,703; Mar. 1.
Practicing riding sport, Appliance for. W. Schoenke. 1,619,438; Mar. 1.
Presses, Sheet-delivery mechanism for. F. S. English. 1,619,106; Mar. 1.
Pressure-operated regulator, Fluid-. T. Lindsay. 1,619,351; Mar. 1.
Pressure still. A. J. Sloan. 1,619,440; Mar. 1.
Pressure switch. C. P. Eisenhauer. 1,619,465; Mar. 1.
Printing-plate holder and clamp. W. F. Brügmann. 1,619,650; Mar. 1.
Printing presses, Adjustable roller track for Gordon. R. J. Frackelton and F. C. Sixt. 1,619,018; Mar. 1.
Printing presses, Web-tension equipment for. A. J. Cline and J. A. Hollander. 1,618,975; Mar. 1.
Propeller, Wood-veneer. N. S. Clay. 1,618,968; Mar. 1.
Pump. A. W. Burks. 1,619,285–6; Mar. 1.
Pump. J. Mills. 1,619,149; Mar. 1.
Pump. H. S. Tooker. 1,619,320; Mar. 1.
Pump, Blade. A. Maillefer. 1,619,429; Mar. 1.
Pump, Circulating. E. M. Pfauser. 1,619,539; Mar. 1.
Pump, Coin-operated gasoline. G. C. Davison. 1,619,657; Mar. 1.
Pump controller. P. A. Bancel and J. F. Kirgan. 1,619,098; Mar. 1.
Pump, Measuring and dispensing. C. Spaeth. 1,619,492; Mar. 1.
Pump or compressor, Scavenging air. O. E. Jorgensen. 1,619,131; Mar. 1.
Pump, Propeller. S. W. Holman. 1,619,514; Mar. 1.
Pump-rod-rotating device. J. H. Collins. 1,619,700; Mar. 1.
Pump, Vacuum. E. C. Oakes. 1,619,364; Mar. 1.
Pumping apparatus. A. R. Le Grue. 1,619,302; Mar. 1.
Pumping system. W. E. Hubbard. 1,619,474–5; Mar. 1.
Punching controlling bands, Feeling mechanism for machines for. O. Wolters and K. Höper. 1,619,645; Mar. 1.
Quick-action clamp. E. H. McMillan. 1,619,144; Mar. 1.
Rack: *See*—
Display rack. Steel stock rack.
Rack. C. H. Jarvis. 1,619,259; Mar. 1.
Radial drill. J. C. Carlton. 1,619,190; Mar. 1.
Radiator. W. M. Dann. 1,619,333; Mar. 1.
Radiator core. J. M. Fedders. 1,618,980; Mar. 1.
Radiator cover or similar article. J. Meikle. Des. 72,105; Mar. 1.
Radiator filler. W. F. Cooms and J. M. Beck. 1,619,498; Mar. 1.
Radiator ornament, Automobile. F. H. Eldred and C. Hutchings. Des. 72,090; Mar. 1.
Radiator-shutter mechanism. R. M. Lovejoy. 1,619,621; Mar. 1.
Radiator, Transformer. W. M. Dann. 1,619,332; Mar. 1.
Radiator, Transformer. W. M. Dann. 1,619,334; Mar. 1.
Radio apparatus. E. H. Evers. 1,619,407; Mar. 1.
Radio apparatus. A. F. Sanford. 1,619,544–5; Mar. 1.
Radiocabinet. J. Wolff. Des. 72,122–4; Mar. 1.
Radio loud speaker. J. M. Hofmann. Des. 72,095; Mar. 1.
Radio sets, Frictional-unit control for multidial. W. T. Herrick. 1,619,419; Mar. 1.
Rail. W. G. Coughlin. 1,619,403; Mar. 1.
Rail joint. G. Gál. 1,619,716; Mar. 1.
Rail joint. W. D. Huff. 1,619,792; Mar. 1.
Rail-joint spring. R. L. Cairncross. 1,619,595; Mar. 1.
Rail track, Shock-insulated. A. F. Masury and E. C. Fink. 1,619,028; Mar. 1.
Railway-crossing guard. W. H. Golding. 1,619,070; Mar. 1.
Railway-motor mounting. C. Bethel. 1,619,397; Mar. 1.
Railway-traffic-controlling apparatus. H. A. Thompson. 1,619,221; Mar. 1.
Ram. M. W. Faherty. 1,619,605; Mar. 1.
Receptacle, Dispensing. R. R. Ricketts. 1,619,315; Mar. 1.
Receptacle opener and fluid conductor, Combined. H. T. Dietrick. 1,619,708; Mar. 1.
Receptacle, Safety delivery. C. E. Hoffman. 1,619,257; Mar. 1.
Receptacle-shaking machine. J. A. Meeker and E. J. Roach. 1,619,526; Mar. 1.
Receptacles, Lock-up cover for. E. Gemeinder. 1,619,506; Mar. 1.
Recording instruments, Pen lifter for. A. B. Cunningham. 1,619,241; Mar. 1.
Recuperator. W. A. Morton. 1,619,747; Mar. 1.
Reduction of finely-divided material, Apparatus for and process of. W. Gardner. 1,619,295; Mar. 1.
Reel: *See*—
Fishing reel.
Refrigeration, Mechanical. C. C. Spreen. 1,619,548; Mar. 1.
Refrigeration system, Automatic. G. Hilger. 1,619,072; Mar. 1.
Refrigerator, Ice-saving. L. Lowy. 1,619,741; Mar. 1.
Register: *See*—
Cash register.
Regulator: *See*—
Fluid-pressure-operated regulator
Repair chamber, Portable. C. E. Ward. 1,619,642; Mar. 1.
Respiration and pulse recorder. S. M. Strong. 1,619,005; Mar. 1.
Retarding device. A. A. Horton. 1,619,574; Mar. 1.
Rheostat. H. E. Adams. 1,618,967; Mar. 1.
Rim and attaching same, Auxiliary. A. P. Armington. 1,619,175; Mar. 1.
Ring: *See*—
Crown ring.
Road-building machine. F. M. Hargrave. 1,619,614; Mar. 1.
Roads, Finishing machine for concrete. G. Maxon, jr. 1,619,083; Mar. 1.
Roll heater. H. E. McCrery A. E. Jesser, and A. B. Montgomery. 1,619,303; Mar. 1.
Roller: *See*—
Rope-guide roller.
Roller mill. E. F.-G. Law. 1,619,739; Mar. 1.
Rolling device for beading operation. D. Ferguson. 1,619,064; Mar. 1.
Roofing element. H. A. Cumfer. 1,619,598; Mar. 1.
Roofing element. H. A. Cumfer. 1,619,600; Mar. 1.
Rope-guide roller. R. B. Fox. 1,619,413; Mar. 1.

Rotary motion into combined reciprocating and oscillating motion, and vice versa, Mechanism for converting. E. W. Bowen. 1,619,696; Mar. 1.
Rubber-covered roll. B. W. Rogers and W. L. Glass. 1,619,371; Mar. 1.
Rubber or the like and making same, Variegated articles of. T. J. Mell. 1,619,359; Mar. 1.
Rug or similar article. H. S. Humphreys. Des. 72,097–8; Mar 1.
Packing rugs, etc. M. Bassan. 1,618,972; Mar. 1.
Safes, Constructing. S. F. Laucks and W. B. Wilkinson. 1,619,139; Jan. 29.
Safes, Locking device for. C. F. Mellink. 1,619,676; Mar. 1.
Safety-tread unit. E. Van Der Pyl. 1,619,773; Mar. 1
Sash. D. Patasnik. 1,619,631; Mar. 1.
Sash-operating mechanism. U. E. Tuomi. 1,619,167; Mar. 1.
Saw, Circular. F. W. Adolf. 1,619,780; Mar. 1.
Scale, Computing. H. O. Hem. 1,619,121; Mar. 1.
Scale, Integrating. H. O. Hem. 1,619,123; Mar. 1.
Scale, Weighing. E. G. Thomas. 1,619,165; Mar. 1.
Scissors sharpener. E. M. Long. 1,619,581; Mar. 1.
Screws, Screw-driver mechanism for insulator. A. T. Scheiwer. 1,619,043; Mar. 1.
Seam. C. C. Blake. 1,619,497; Mar. 1.
Seam for sewed articles. C. F. Rubel and F. Kucera. 1,619,437; Mar. 1.
Seed dispenser. O. Wodke. 1,619,687; Mar. 1.
Sectional heating boiler. J. B. Bernhard. 1,619,235; Mar. 1.
Separator: *See*—
Centrifugal separator.
Sewing machine for cording. C. F. Rubel and F. Kucera. 1,619,436; Mar. 1.
Shade or awning raising device. H. H. Rollins. 1,619,635; Mar. 1.
Shank stiffener with a shoe sole, Incorporating a. R. E. Bartels. 1,619,648; Mar. 1.
Shearing of metal plates or sheets, Machinery employed in the. H. S. Thomas and W. R. Davies. 1,619,684; Mar. 1.
Sheet material, Press for cutting or punching. J. R. Oliver. 1,619,482; Mar. 1.
Shelf. S. Offenbach. 1,619,307; Mar. 1.
Shingle element. H. A. Cumfer. 1,619,599; Mar. 1.
Shingle strip. H. A. Cumfer. 1,619,601; Mar. 1.
Shipping member. C. A. Agar. 1,619,011; Mar. 1.
Shock absorber. A. Rafter. 1,619,035; Mar. 1.
Shock absorber, Automobile. A. Jenschke. 1,619,422; Mar. 1.
Shock-absorbing wheel. I. M. Laddon. 1,619,078; Mar. 1.
Shoe, Bathing. E. S. Ward. Re16,506; Mar. 1.
Shoe heel. A. Bono. 1,619,458; Mar. 1.
Shoe tempering machine. D. B. Heath. 1,619,724; Mar. 1.
Shooting device, Self-defense. M. Hofmann. 1,618,976. Mar. 1.
Shovel: *See*—
Ash-sifting shovel.
Siftproof bag. T. M. Avery. 1,619,177; Mar. 1.
Sign. W. A. Burns. 1,619,189; Mar. 1.
Signal: *See*—
Traffic signal. Vehicle signal.
Signaling installation, Sound-. J. P. Northey. 1,619,585; Mar. 1.
Signaling system, Carrier-current. H. Nyquist. 1,619,085; Mar. 1.
Silk, Apparatus for use in the manufacture of artificial. F. W. Schubert. 1,619,769; Mar. 1.
Silk, Manufacture of artificial. F. W. Schubert. 1,619,768; Mar. 1.
Slicer, Potato. F. H. Miller. 1,619,746; Mar. 1.
Slicing machine, Vegetable and soap. E. Anderson and R. W. Adams. 1,619,557; Mar. 1.
Slimes by flotation, Concentration of. G. A. Bragg. 1,619,790; Mar. 1.
Slipper, Toe. A. Gabriel. 1,619,665; Mar. 1.
Smoker's pipe. J. A. Reiser. 1,619,090; Mar. 1.
Smoker's stand. H. F. La Rue and W. Zierlein. Des. 72,101; Mar. 1.
Smoking utensil. L. R. Waugh. 1,619,387; Mar. 1.
Snowplow. I. Reckard. 1,619,314; Mar. 1.
Soap container. A. J. Eggan. 1,619,105; Mar. 1.
Socket wrench. H. F. Haynes. 1,619,255; Mar. 1.
Soldering machine, Armature-commutator-lead-. R. J. Emmert. 1,619,406; Mar. 1.
Sound-producing device. A. L. Grubman. 1,619,203; Mar. 1.
Sound-producing device. L. J. Grubman. 1,619,204; Mar. 1.
Spare-tire lock. K. Scherer. 1,619,044; Mar. 1.
Spark plug. P. Challis. 1,619,653; Mar. 1.
Spark-plug protector, Combustion-engine. A. Manchester. 1,619,524; Mar. 1.
Spear. C. Hart. 1,619,254; Mar. 1.
Spring: *See*—
Rail-joint spring.
Spring-eye bender. J. O. Parrish. 1,619,537; Mar. 1.
Spring suspension device. D. B. Whitehill. 1,619,452; Mar. 1.
Stacking device or standard. I. N. Spencer. 1,619,641; Mar. 1.
Stand: *See*—
Lamp stand.
Station, Automatic. C. A. Butcher. 1,619,459; Mar. 1.
Statuette. H. L. Kratz. Des. 72,099; Mar. 1.
Steam boiler. P. Thomsen. 1,619,447; Mar. 1.
Steam generator for portable plants. W. Hojer. 1,619,671; Mar. 1.
Steam shovels, Frame for. A. E. Rudy. 1,619,156; Mar. 1.
Steel, Heat treatment of. E. F. Kenney. 1,619,025; Mar. 1.
Steel, Production of thin. P. H. Brace. 1,619,399; Mar. 1.
Steel stock rack. H. S. Jones. 1,619,476; Mar. 1.
Stenciling apparatus. W. H. Schoger. 1,619,587; Mar. 1.
Stoker. D. J. Mosshart. 1,619,480; Mar. 1.
Stove. W. E. Toler. 1,619,166; Mar. 1.
Stove construction. C. M. Dibble. 1,619,243; Mar. 1.
Stoves, Safety lighter for gas. W. F. Dester. 1,618,979; Mar. 1.
Stocking and method of making same, Seamless knit, clocked. C. H. Taubel. 1,619,788; Mar. 1.
Stool, Camp. W. Witkowski. 1,619,686; Mar. 1.
Strainer for sugar juices and the like. S. S. Peck. 1,619,484; Mar. 1.
Strainers, Installing well. J. P. Lawlor and J. I. Seay. 1,619,521; Mar. 1.
Strap: *See*—
Doorcheck strap.
Strap for personal wear. G. Kolistedc. 1,619,138; Mar. 1.
Strap slide, Breast-. J. M. Walsh. 1,619,225; Mar. 1.
Strip material, Apparatus for vulcanizing. J. R. Gammeter. 1,619,020; Mar. 1.
Strip material, Method and apparatus for producing elastic. J. R. Gammeter. 1,619,342; Mar. 1.
Stubble burner. C. C. Howell. 1,619,516; Mar. 1.
Stud. M. F. Carr. Re16,561; Mar. 1.
Sulphur composition of diminished inflammability and producing same. C. Marx. 1,619,357; Mar. 1.
Suspension frame, Greenhouse plant. O. G. Fritch and J. E. Fritch. 1,619,791; Mar. 1.
Swab or dauber, Capped. P. Codina. 1,618,977; Mar. 1.
Switch: *See*—
Electric-lighting switch. Time switch.
Pressure switch.
Switch. J. T. Miller and M. Hanley. 1,619,148; Mar. 1.
Table: *See*—
Folding table.
Tackle. P. W. Sieurin. 1,619,000; Mar. 1.
Tank: *See*—
Oil-storage tank.
Tanks, Discharge device for. M. C. Biest. 1,619,054; Mar. 1.
Tanks, Low-level alarm for gasoline. A. Fredericks. 1,619,339; Mar. 1.
Teapot or coffeepot. S. Forman. 1,619,065; Mar. 1.
Telegraph cables, Duplex arrangement for. H. W. G. Salinger. 1,619,041; Mar. 1.
Telephone apparatus, Automatic. T. B. Wilson. 1,619,554; Mar. 1.
Telephone-exchange system. B. G. Dunham. 1,619,250; Mar. 1.
Telephone high-frequency trunk, Automatic. S. B. Williams, jr., and L. M. Clement. 1,619,228; Mar. 1.
Telephone repeater station. G. Crisson. 1,619,058; Mar. 1.
Telephonic receiver. E. A. Graham. 1,619,114; Mar. 1.
Tension differential, Measure of. O. Smith. 1,619,491; Mar. 1.
Tension-testing device, Rope-. C. C. Sunderland. 1,619,093; Mar. 1.
Tent structure. T. J. Long and J. L. Tuttle. 1,619,740; Mar. 1.
Terminal connecter. B. F. Oldmixon. 1,619,086; Mar. 1.
Testing device. H. O. Hem. 1,619,122; Mar. 1.
Testing device. E. G. Thomas. 1,619,164; Mar. 1.
Testing instrument. W. Brond. 1,619,699; Mar. 1.
Thermometer. W. H. Fitts. 1,619,109; Mar. 1.
Thermostatic control. H. J. Sauvage. 1,619,636; Mar. 1.
Throttle control. Foot. W. H. Thomas. 1,619,319; Mar. 1.
Tie: *See*—
Cow-tail tie.
Tie rod or the like. F. C. Crawford and M. P. Graham. 1,619,291; Mar. 1.
Tile and making same, Terrazzo. G. N. Jeppson and C. L. Leafe. 1,619,734; Mar. 1.
Tile machines, Mold plate for roofing-. V. W. Schwarz. 1,619,490; Mar. 1.
Tile-making machine. J. N. and V. W. Schwarz. 1,619,489; Mar. 1.
Tiles, Tool for marking. W. Rieser. 1,619,091; Mar. 1.
Time switch, Automatic electric. D. Zorgo. 1,619,777; Mar. 1.
Tire. L. E. Sexton. Des. 72,115–16; Mar. 1.
Tire-building apparatus. M. C. Scrote. 1,619,377; Mar. 1.
Tire-building method and apparatus. J. R. Gammeter. 1,619,019; Mar. 1.
Tire casing and similar article. F. Leopold, jr. Des. 72,102; Mar. 1.
Tire chain. W. G. Chase. 1,619,783; Mar. 1.
Tire, Punctureproof pneumatic. M. L. Paulson. 1,619,433; Mar. 1.
Tire-repair tool. E. F. Pawsat. 1,619,538; Mar. 1.
Tire rims, Lock for. J. H. Radandt. 1,618,997; Mar. 1.

Typewriting machine. H. C. Shepard. 1,619,546; Mar. 1.
Typewriting machine. J. Waldheim. 1,619,045; Mar. 1.
Typographical machines, Assembling elevator gate for. D. L. Anderson. 1,619,646; Mar. 1.
Typewriting machines, Ribbon-operating mechanism for. J. Alexander. 1,619,174; Mar. 1.
Umbrella. J. Reid. 1,619,217; Mar. 1.
Undergarment. B. Moscomitz. 1,618,991; Mar. 1.
Upholstering device. J. Paaske. 1,619,754; Mar. 1.
Upsetting mechanism. R. L. Wilcox. 1,619,494–5; Mar. 1.
Vacuum-creating instrument. F. V. Winters. 1,619,388–9; Mar. 1.
Valve. F. A. Perrenot. 1,619,033; Mar. 1.
Valve and float for drinking troughs and the like, Automatic. A. Mendizabal. 1,619,431; Mar. 1.
Valve, Automatic air and gas check. J. M. Fotch. 1,619,066; Mar. 1.
Valve, Automatic relief. A. F. Habenicht. 1,619,469; Mar. 1.
Valve construction. C. Muend. 1,619,748; Mar. 1.
Valve control. E. P. Gray. 1,619,117; Mar. 1.
Valve lifter. N. E. Gough. 1,619,669; Mar. 1.
Valve lifter. N. J. Strodel. 1,619,162; Mar. 1.
Valve, Radiator air. R. T. Warring and G. W. Stultz. 1,619,386; Mar. 1.
Valve, Safety stop. L. W. Jones. 1,619,130; Mar. 1.
Valve, Thermostatic gasoline. A. Grudzinski. 1,619,612; Mar. 1.
Valve, Vacuum pump. E. C. Oakes. 1,619,481; Mar. 1.
Vehicle body, Convertible. F. A. Best. 1,619,182; Mar. 1.
Vehicle control pedal, Motor-. H. E. Hull. 1,619,421; Mar. 1.
Vehicle, Dumping. A. W. Osborn. 1,619,628; Mar. 1.
Vehicle, Electrically-propelled. P. D. Ionides. 1,619,616; Mar. 1.
Vehicle, Motor. J. Ledwinka. 1,619,478; Mar. 1.
Vehicle parking system. M. Miller. 1,619,330; Mar. 1.
Vehicle signal. A. D. Pertin. 1,619,311; Mar. 1.
Vehicle top construction. M. M. Plumb. 1,619,153; Mar. 1.
Vehicle wheel. C. B. Fairweather. 1,619,607; Mar. 1.
Vehicles and the like, Window-glass guide for. C. T. Weymann. 1,619,047; Mar. 1.
Vehicles, Automatically-operated end gate for dump. H. D. Gabriel. 1,619,504; Mar. 1.
Vehicles, Chassis framing more particularly for motor. J. Fejés. 1,619,609; Mar. 1.
Vehicles, Combined radiator and hood for motor. A. F. Masury. Des. 72,104; Mar. 1.
Vehicles, Traffic signal for motor. R. C. Luplow. 1,619,523; Mar. 1.
Vending machine. W. F. Donathan. 1,619,245; Mar. 1.
Vending machine. W. F. Donathan. 1,619,248; Mar. 1.
Vending machine, Coin-controlled. W. F. Donathan. 1,619,246; Mar. 1.
Vending machine, Coin-controlled. R. Vaughan. 1,619,006; Mar. 1.
Vending machine for stacked articles, Selective. W. C. Cutler. 1,619,292; Mar. 1.
Vending machines, Fraud-preventing device for. D. L. Chandler. 1,619,655; Mar. 1.
Vending machines, Rotary selecting mechanism for. W. C. Cutler. 1,619,294; Mar. 1.
Vessel. E. H. Ewerts. 1,619,063; Mar. 1.
Vibrations by means of a continuous stream of fluid, Device for the production of mechanical. W. Hahnemann, Rudolph, and E. Wilckens. 1,618,982; Mar. 1.
Vulcanizer. A. A. Baffetti. 1,619,231; Mar. 1.
Wagon evener, Four-horse-. W. M. Crow. 1,619,059; Mar. 1.
Wagon, Tractor dump. A. C. Thomas. 1,619,094; Mar. 1.
Wagons, Adjustable bolster standard for. J. V. Cizek. 1,619,288; Mar. 1.
Wall construction. B. J. Klaasen. 1,619,300; Mar. 1.
Wall construction, Building hollow-. H. A. Duchemin. 1,619,570; Mar. 1.
Washer: *See*—
Gold washer.
Washer-feeding apparatus. W. D. Kmentt. 1,619,075; Mar. 1.
Washing machines, Agitator for. S. E. Schroeder. 1,619,637; Mar. 1.
Water from petrol, Trap device for separating. N. A. Frean. 1,619,713; Mar. 1.
Water heater and sterilizing apparatus, Combined. A. Martin. 1,619,146; Mar. 1.
Water-heater vent-pipe ceiling device. G. L. Wallace. 1,619,385; Mar. 1.
Water-level-controlling means. E. L. Martin. 1,619,356; Mar. 1.
Waterproof case. F. Archila. 1,619,782; Mar. 1.
Weather strip for inswinging casements. F. Reese. 1,619,037; Mar. 1.
Weftless cord fabric, Manufacture of. M. Castricum. 1,619,191; Mar. 1.
Weighing sheet material, Device for. E. G. Thomas. 1,619,163; Mar. 1.
Welded spring structure. H. A. Houston and V. J. Shepard. 1,619,346; Mar. 1.
Well drilling, Making production tests in. G. A. Macready. Re16,563; Mar. 1.
Wheel: *See*—
Caster wheel. Vehicle wheel.
Polishing wheel.
Wheel and crank. G. F. Honold. 1,619,024; Mar. 1.
Wheels, Power transmission for. H. R. Holmes. 1,619,672; Mar. 1.
Winding means. W. M. Stocker. 1,619,220; Mar. 1.
Window attachment. C. M. Heublein. 1,619,256; Mar. 1.
Window-controlling device. S. W. Nicholson. 1,619,633; Mar. 1.
Window-curtain protector. M. E. Wheeler. 1,619,280; Mar. 1.
Window fastener. J., jr., and P. Ostrosky. 1,619,031; Mar. 1.
Windshield cleaner. E. F. Pierce. 1,619,677; Mar. 1.
Wire-crimping tool. A. W. Miller. 1,619,084; Mar. 1.
Wire-line belt guide. H. W. Kerr. 1,619,793; Mar. 1.
Wood pulp, Process and apparatus for the production of. C. J. Sternkopf. 1,619,004; Mar. 1.
Woodworking machine, Combination. J. Schimmelpfennig. 1,619,158; Mar. 1.
Wool felt and making same, Ornamental. J. Robinson. 1,619,681; Mar. 1.
Work holder. H. S. Fullerton. 1,619,340; Mar. 1.
Wrapper-making machine. B. Heinrichs. 1,619,615; Mar. 1.
Wrench: *See*—
Pipe-wrench. Socket wrench.

CLASSIFICATION OF PATENTS

ISSUED MARCH 1, 1927.

NOTE.—First number=class, second number=subclass, third number=patent number.

1—	49.4: 1,619,137	30—	25: 1,619,249	58—	53: 1,619,674	84—	348: 1,619,532	113—	46: 1,619,069	140—	106: 1,619,084
2—	224: 1,618,991	32—	4: 1,619,647	59—	97: 1,619,582		415: 1,619,046		59: 1,619,406	141—	9: 1,619,236
	267: 1,619,176	33—	104: 1,619,427	60—	1: 1,619,671		472: 1,619,683		112: 1,618,996		12: 1,619,052
	251: 1,619,140		124: 1,619,143		52: 1,619,200	87—	3: 1,619,110	114—	66.5: 1,618,995	143—	47: 1,619,780
	278: 1,619,493		147: 1,619,370		67: 1,619,129		9: 1,619,074		79: 1,619,063	144—	78: 1,619,049
3—	2: 1,619,485		158: 1,619,392	61—	38: 1,619,331		1,619,352	115—	34: 1,619,762		208: 1,619,151
4—	8: 1,619,369		1,619,750		41: 1,618,973		12: 1,619,486	116—	34: 1,619,450		244: 1,619,008

Coal-tar pitch. Barrett Manufacturing Company. 62,608; renewed May 14, 1927.
Coke. Miller Coke Corporation. 225,056; Mar. 8; Serial No. 237,869; published Dec. 14, 1926.
Furs and skins, Unfinished. Mei-Hwa Fur Trading Corporation. 225,014; Mar. 8; Serial No. 229,746; published Dec. 21, 1926.
Graphite. Joseph Dixon Crucible Company. 62,784; renewed May 28, 1927.
Graphite. Joseph Dixon Crucible Company. 62,977; renewed June 14, 1927.
Horses. A. L. Fitz Patrick. 224,922; Mar. 8; Serial No. 237,733; published Dec. 21, 1926.
Leather. Max Hertz Leather Company. 224,816; Mar. 8; Serial No. 237,958; published Dec. 14, 1926.
Rosin. Foreign Traders Company. 224,865; Mar. 8; Serial No. 237,659; published Dec. 14, 1926.
Silver-lead or plumbago foundry facings and pulverized graphite. United States Graphite Co. 62,978; renewed June 4, 1927.

CLASS 2.

Paper bags, wrapping paper, and paper boards. Union Bag and Paper Company. 62,141; renewed Apr. 23, 1927.
Receptacles and attachments, Metallic. Protectoseal Company of America, Inc. 224,912; Mar. 8; Serial No. 222,279; published Dec. 21, 1926.

CLASS 3.

Horseshoes. Chillington Tool Company. 51,495; renewed Mar. 26, 1927.

CLASS 4.

Cleaner, Dry. Delete Company. 225,046; Mar. 8; Serial No. 238,363; published Dec. 21, 1926.
Cleaner or detergent. Diversey Manufacturing Company. 225,092; Mar. 8; Serial No. 239,025; published Dec. 14, 1926.
Cleaners, Dry. Wynn Products Company. 225,044; Mar. 8; Serial No. 238,825; published Dec. 21, 1926.
Cleaning and polishing preparations and grease solvent. Dry-Carbona Products Company. 224,845; Mar. 8; Serial No. 231,901; published Dec. 21, 1926.
Cleanser for automobiles and furniture, pianos, etc. J. W. Williams. 224,951; Mar. 8; Serial No. 207,323; published Dec. 21, 1926.
Cream for dressing and polishing leather. California Leather Dressing Company. 225,089; Mar. 8; Serial No. 239,087; published Dec. 21, 1926.
Detergent and washing powders. N. K. Fairbank Company. 30,219; renewed June 15, 1927.
Detergent and washing powders. N. K. Fairbank Company. 30,115; renewed June 1, 1927.
Detergent, Mineral. B. Payne. 224,916; Mar. 8; Serial No. 238,557; published Dec. 21, 1926.
Paste which is used as a soap and a spot and stain remover. Fade-A-Way Products Co. 225,063; Mar. 8; Serial No. 239,048; published Dec. 21, 1926.
Polish. J. R. Carr. 225,093; Mar. 8; Serial No. 239,022; published Dec. 14, 1926.
Polish, leather cleaning and conserving preparations, Shoe. Welt-Wachs-Werk Egbert Günther Söhne. 224,847; Mar. 8; Serial No. 231,508; published Dec. 21, 1926.
Polish, Metal. J. W. Dicus. 225,008; Mar. 8; Serial No. 234,257; published Dec. 21, 1926.
Polish, Stove. Joseph Dixon Crucible Company. 62,976; renewed June 4, 1927.
Preparation for cleaning glass. Crystola Mfg. Co. 225,060; Mar. 8; Serial No. 237,787; published Dec. 21, 1926.
Preparation for cleaning oil-gummed brakes, clutches, etc. Lubricant Laboratories, Inc. 224,791; Mar. 8; Serial No. 238,660; pnulished Dec. 21, 1926.
Preparation for whitening stonework. Topp's Dressing Co. 28,835; renewed Sept. 1, 1926.
Soap. P. G. Cameron. 224,963; Mar. 8; Serial No. 236,672; published Dec. 21, 1926.
Soap. N. K. Fairbank Company. 63,626; renewed July 2, 1927.
Soap. Palmolive Company. 225,086; Mar. 8; Serial No. 239,135; published Dec. 14, 1926.
Soap. Procter & Gamble Company. 225,057; Mar. 8; Serial No. 237,921; published Dec. 21, 1926.
Soap, Dry-cleaning. Beltine Chemical & Mfg. Co. 225,084; Mar. 8; Serial No. 239,161; published Dec. 21, 1926.
Soap, Nursery. Hastings Research Group, Inc. 225,097; Mar. 8; Serial No. 238,854; published Dec. 21, 1926.
Soaps. Colgate & Co. 63,219; renewed June 11, 1927.
Soaps. C. J. Diaz. 225,099; Mar. 8; Serial No. 238,843; published Dec. 14, 1926.
Soaps. Houbigant, Inc. 225,026; Mar. 8; Serial No. 234,475; published Dec. 21, 1926.
Soaps. John Wanamaker Philadelphia. 225,004; Mar. 8; Serial No. 239,686; published Dec. 14, 1926.
Soaps in powdered and cake form. Great Atlantic & Pacific Tea Company. 62,778; renewed May 28, 1927.
Soaps, Liquid and other. W. & F. Walker. 29,022; renewed Oct. 20, 1926.
Strops. Robt. H. Ingersoll, Inc. 224,960; Mar. 8; Serial No. 236,753; published Dec. 21, 1926.
Strops, Razor. Koken Companies. 225,094; Mar. 8; Serial No. 238,981; published Dec. 14, 1926.
Treated dust cloths, brake dressing, enamel cleaner, etc. Out West Manufacturing Co. 224,814; Mar. 8; Serial No. 220,861; published Feb. 23, 1926.

CLASS 5.

Paste. Prang Company. 224,962; Mar. 8; Serial No. 236,710; published Dec. 7, 1926.

CLASS 6.

Anæsthetic used in dentistry. Twilight Sleep Company. 225,108; Mar. 8.
Analgesic and antirheumatic. Farbenfabriken vorm. Friedr. Bayer & Co. 62,613; renewed May 14, 1927.
Antirheumatic and analgesic. Farbenfabriken vorm. Friedr. Bayer & Co. 62,856; renewed May 28, 1927.
Antiseptic and healing powder. Societe Dr. Fumouze & Cie. 225,048; Mar. 8; Serial No. 238,405; published Dec. 21, 1926.
Antiseptic compound. L. F. Piquett. 63,583; renewed June 25, 1927.
Bitters. Foster-Milburn Co. 63,417; renewed June 18, 1927.
Bluing, Bag. E. Z. Adams. 225,031; Mar. 8; Serial No. 238,763; published Dec. 21, 1926.
Carbon dioxide in solid or semisolid form. Carbice Corporation of America. 225,005; Mar. 8; Serial No. 239,612; published Dec. 21, 1926.
Carbon dioxide in solid or semisolid form. Carbice Corporation of America. 225,065; Mar. 8; Serial No. 239,611; published Dec. 21, 1926.
Caustic soda, soda ash, etc. Michigan Alkali Company. 224,848; Mar. 8; Serial No. 231,157; published Dec. 21, 1926.
Chemical and pharmaceutical products. Chemische Fabrik von Heyden, Gesellschaft mit beschränkter Haftung. 29,942; renewed May 4, 1927.
Chemical preparations. C. Raspe. 29,728; renewed Mar. 23, 1927.
Chemicals having a narcotic influence. Firm of E. Merck. 29,658; renewed Mar. 9, 1927.
Coal-tar products excepting dyes. Barrett Manufacturing Company. 29,556; renewed Feb. 2, 1927.
Composition for manufacturing glass batch. J. Kempner. 29,552; renewed Feb. 2, 1927.
Compound for the treatment of the nerves of the teeth. Stratford-Cookson Company. 225,032; Mar. 8; Serial No. 238,750; published Dec. 21, 1926.
Compound in suppository form for the cure and alleviation of female disorders. H. E. Currey. 60,387; renewed Feb. 5, 1927.
Corn flour and cornstarch and laundry starch. National Starch Manufacturing Company. 30,327; renewed July 6, 1927.
Corn plasters, foot-bath powders and toilet powders. Kurt Krisp. 224,947; Mar. 8; Serial No. 217,160; published Dec. 14, 1926.
Cosmetics, pastes, powders, and toilet preparations. Parfumerie Roger et Gallet. 224,824; Mar. 8; Serial No. 237,875; published Nov. 16, 1926.
Cosmetics, pastes, powders, and toilet preparations. Parfumerie Roger et Gallet. 224,825; Mar. 8; Serial No. 237,873; published Nov. 16, 1926.
Cough drops. Davies, Rose & Co., Ltd. 50,571; renewed Mar. 20, 1926.
Cream and eczema cure, Massage. Blanke-Baer Chemical Company. 61,247; renewed Mar. 12, 1927.
Cream, talcum powder, tooth paste, laxative tablets, and shampoo preparation, Skin. Noxzema Chemical Co. 225,012; Mar. 8; Serial No. 230,679; published Dec. 14, 1926.
Creams and powders, Facial. M. M. Munter. 224,795; Mar. 8; Serial No. 238,606; published Dec. 21, 1926.
Dentifrice. Herman C. G. Luyties and Frederick A. Luyties. 29,840; renewed Apr. 13, 1927.
Deodorizers, antiseptics, disinfectants, and sterilizers. C. C. Allebach. 224,996; Mar. 8; Serial No. 239,839; published Dec. 21, 1926.
Destroyers and exterminators, Rat, vermin, and insect. E. S. Wells. 59,991; renewed Jan. 22, 1927.
Dyes, dyestuffs, etc. General Dyestuff Corporation. 224,827; Mar. 8; Serial No. 237,802; published Dec. 14, 1926.
Dyestuff. Badische Anilin and Soda-Fabrik. 29,687–9; renewed Mar. 9, 1927.
Extract of thyroid glands. Farbenfabriken, vormals Fr. Bayer & Co. 29,406; renewed Jan. 5, 1927.
Insecticide, disinfecting, fumigating, deodorizing, and antiseptic preparations, etc. Midland Chemical Laboratories. 224,959; Mar. 8; Serial No. 236,764; published Dec. 21, 1926.
Insecticides. H. O. Huntington. 225,075; Mar. 8; Serial No. 239,306; published Dec. 14, 1926.
Iodids, Substitutes for. Farbenfabriken vorm. Friedr. Bayer & Co. 61,730; renewed Apr. 2, 1927.
Iodine compound, Organic. H. A. Metz Laboratories, Inc. 224,955; Mar. 8; Serial No. 225,233; published Dec. 21, 1926.
Lactate and citrate of silver and all pharmaceutical preparations of silver. Chemische Fabrik von Heyden, Gesellschaft mit beschränkter Haftung. 29,133; renewed Nov. 10, 1926.
Lanolin and lanolin salves. Wollwäscherei und Kämmerei. 58,052; renewed Dec. 4, 1926.
Lanolin and preparations thereof. Wollwäscherei und Kämmerei. 57,875; renewed Nov. 27, 1926.
Laxative, Candy. L. Perrigo Company. 224,879; Mar. 8; Serial No. 228,389; published Dec. 21, 1926.
Massage and cleansing cream, etc. Milky-Way Company. 225,082; Mar. 8; Serial No. 239,187; published Dec. 14, 1926.
Medical compound salve. J. Cefola. 224,876; Mar. 8; Serial No. 222,440; published Dec. 21, 1926.
Medicinal compound. L. B. Hawkins. 225,006; Mar. 8; Serial No. 234,439; published Dec. 14, 1926.
Medicinal preparation. Larned Company. 224,925; Mar. 8; Serial No. 236,648; published Dec. 21, 1926.
Medicinal preparations. Eli Lilly & Company. 61,924; renewed Apr. 9, 1927.
Medicine. T. A. Slocum Co. 63,587; renewed June 25, 1927.
Medicine for use as an antacid. W. H. Frersing. 225,002; Mar. 8; Serial No. 239,705; published Dec. 21, 1926.
Medicines. Citizens' Wholesale Supply Company. 63,438; renewed June 18, 1927.
Medicines. E. S. Wells. 62,289; renewed Apr. 23, 1927.
Nail polish, nail-polish remover, etc. I. Kleckner. 224,817; Mar. 8; Serial No. 237,966; published Dec. 14, 1926.
Nonfreezing solution, Radiator. F. Pfeifer. 224,941; Mar. 8; Serial No. 228,828; published Dec. 21, 1926.

Nonfreezing solutions for automobile radiators. Firewater Sales Company. 224,867; Mar. 8; Serial No. 237,602; published Dec. 14, 1926.
Oils. E. F. Houghton & Co. 225,022; Mar. 8; Serial No. 234,844; published Dec. 14, 1926.
Ointment. N. C. Goodwin's Laboratory, Inc. 225,069; Mar. 8; Serial No. 239,470; published Dec. 14, 1926.
Ointment for eczema. Veitch (Chemist) Limited. 225,043; Mar. 8; Serial No. 238,198; published Dec. 14, 1926.
Pastes and powders and perfumery. Parfumerie Roger et Gallet, Société Anonyme. 225,077; Mar. 8; Serial No. 239,263; published Dec. 21, 1926.
Pepto-bismol, a liquid demulcent preparation. Norwich Pharmacal Company. 224,933; Mar. 8; Serial No. 236,388; published Dec. 14, 1926.
Perfumes and toilet creams. John Wanamaker Philadelphia. 225,003; Mar. 8; Serial No. 239,687; published Dec. 21, 1926.
Perfumes and toilet waters, Liquid and powder. Colgate & Co. 63,264; renewed June 11, 1927.
Perfumes, astringents, bandoline, beautifier creams, brilliantine, etc. French Beauty Products Co. 225,098; Mar. 8; Serial No. 238,484; published Dec. 21, 1926.
Perfumes, toilet waters, sachets, vegetals, etc. Cheramy, Inc. 225,115; Mar. 8.
Phosphorus and analogous chemical compounds. Albright & Wilson, Limited. 30,409; renewed July 20, 1927.
Powder, Face. Western Laboratories, Inc. 225,074; Mar. 8; Serial No. 239,339; published Dec. 28, 1926.
Powder, Fly and insect killing. J. C. Hensley. 224,943; Mar. 8; Serial No. 219,625; published Dec. 14, 1926.
Preparation for the treatment of sour stomach, bad breath, headache, etc. Mobilax Manufacturing Co. 224,872; Mar. 8; Serial No. 223,857; published Dec. 21, 1926.
Preparation for use against syphilis in each stage. Chemisch-Pharmazeutische A. G. Bad Homburg. 224,810; Mar. 8; Serial No. 224,744; published Sept. 28, 1926.
Preparation for use in the treatment of cancer. R. L. Levliner. 224,841; Mar. 8; Serial No. 232,732; published Dec. 14, 1926.
Preparation, Water-soinble. J. A. von Wülfing. 225,018; Mar. 8; Serial No. 229,067; published Dec. 14, 1926.
Preparations. H. E. Stratton. 224,868; Mar. 8; Serial No. 232,798; published Dec. 14, 1926.
Prophylactics. 2 Tube Company. 225,107; Mar. 8.
Remedies, Fever and ague. C. H. & F. L. Osgood. 63,287; renewed June 11, 1927.
Remedies for catarrh, hay fever, etc. John J. Reardon and Thomas Kenyon. 29,832; renewed Apr. 13, 1927.
Salt. H. J. Gilbert. 224,967; Mar. 8; Serial No. 237,546; published Nov. 9, 1926.
Salts, Blood. Western Pharmacal Company. 225,080; Mar. 8; Serial No. 239,210; published Dec. 14, 1926.
Shampoo and bay rum. Barcelona Products Co. Inc. 225,113; Mar. 8.
Shampoo powder. P. P. Mülhens. 224,877; Mar. 8; Serial No. 227,132; published Oct. 5, 1926.
Sirup, arnica lotion, headache tablets, etc., Cough. Stansbury Drug Co. 224,860; Mar. 8; Serial No. 238,532; published Dec. 14, 1926.
Soda and silicate of soda not used in connection with compounds for scalding raw wool, Caustic. Joseph Crosfield & Sons, Limited. 29,630; renewed Mar. 2, 1927.
Soda, Bicarbonate of. Citizens' Wholesale Supply Company. 62,610; renewed May 14, 1927.
Soda, Caustic. Chance & Hunt Limited. 63,589; renewed June 25, 1927.
Solution for automobile radiators, Nonfreeze. Apex Laboratories Inc. 224,792; Mar. 8; Serial No. 238,634; published Dec. 14, 1926.
Spray, Nose and throat. Schreiber Products Corporation. 225,001; Mar. 8; Serial No. 239,722; published Dec. 21, 1926.
Tartar, Cream of. Citizens' Wholesale Supply Company. 62,922; renewed May 28, 1927.
Tonic. Toxalin Chemical Co. 224,939; Mar. 8; Serial No. 235,186; published Dec. 21, 1926.

CLASS 7.

Metal and wire goods, chains, cables, conductors, etc. Felton & Guilleaume. 26,769; renewed July 2, 1925.

CLASS 8.

Ash receivers. S. C. Fish. 224,930; Mar. 8; Serial No. 239,926; published Dec. 21, 1926.
Cigarette and cigar rest, holder for match boxes, ash and stub containers. J. H. Marshall. 225,112; Mar. 8.
Pipes. Split-Stem-Pipe Corporation. 224,949; Mar. 8; Serial No. 215,882; published Dec. 21, 1926.

CLASS 9.

Fuses. Coast Manufacturing & Supply Co. 61,643; renewed Apr. 2, 1927.
Shotguns, pistols, revolvers, and rifles. Remington Arms Company. 60,248; renewed Jan. 29, 1927.
Shot shells, gun wads, rifle cartridges, shot, smokeless and semismokeless powders, etc. Western Cartridge Company. 224,874; Mar. 8; Serial No. 222,897; published Dec. 21, 1926.

CLASS 11.

Crayons, inks, and similar articles used in lithography. W. Korn. 30,215; renewed June 15, 1927.

CLASS 12.

Argillaceous-earth admixture used for concrete and plaster. Colloy Production Company. 224,930; Mar. 8; Serial No. 236,464; published Dec. 7, 1926.
Asphalt and asphalt felt. Roofings Incorporated. 224,794; Mar. 8; Serial No. 238,619; published Dec. 14, 1926.
Bituminous compound for the protection of metal against corrosion. Quigley Furnace Specialties Company. 224,973; Mar. 8; Serial No. 237,335; published Dec. 21, 1926.
Cement, Portland. Associated Portland Cement Manufacturers (1900), Limited. 62,502; renewed May 14, 1927.
Cement, Portland. Oklahoma Portland Cement Company. 63,506; renewed June 25, 1927.
Cements, High-temperature. Parker-Russell Mining & Mfg. Co. 225,013; Mar. 8; Serial No. 230,499; published Dec. 14, 1926.
Cements of special quality, rapidly hardening, and of high resistance, Portland. C. B. R. Cimenteries et Briqueteries Réunies S. A. 224,855; Mar. 8; Serial No. 233,636; published Dec. 21, 1926.
Cements, Portland. C. B. R. Cimenteries et Briqueteries Réunies S. A. 224,873; Mar. 8; Serial No. 223,115; published Dec. 7, 1926.
Chemical stains for cement floors. Color Control Company. 224,863; Mar. 8; Serial No. 237,492; published Dec. 14, 1926.
Felt and paper for roofing and covering for insulation against heat and cold. J. A. & W. Bird & Co. 62,505; renewed May 14, 1927.
Felt for use in the construction of buildings, Deadening. Barrett Manufacturing Company. 62,504; renewed May 14, 1927.
Granite, Cut. Cold Spring Granite Co. 224,926; Mar. 8; Serial No. 236,636; published Dec. 7, 1926.
Graphite paint and pipe "cement". United States Graphite Co. 62,971; renewed June 4, 1927.
Insulating materials, Thermal. Banner Rock Products Co. 225,049; Mar. 8; Serial No. 238,419; published Dec. 14, 1926.
Lath, Metal. Milwaukee Corrugating Company. 224,909; Mar. 8; Serial No. 238,989; published Dec. 21, 1926.
Manufactures from cement and asbestos, bitumen, plaster, concrete, etc. Eternit Pietra Artificiale (London) Limited. 224,849; Mar. 8; Serial No. 234,110; published Dec. 7, 1926.
Metal gratings for floors and staircases. Irving Iron Works Company. 224,833; Mar. 8; Serial No. 238,721; published Dec. 21, 1926.
Roofing and sheathing felt. Barrett Manufacturing Company. 61,627; renewed Apr. 2, 1927.
Roofing, Felt. Union Paper & Twine Company. 62,606; renewed May 21, 1927.
Roofing, Ready tar and felt. Barrett Manufacturing Company. 60,693; renewed Feb. 19, 1927.
Sashes and doors, window and door frames, stairways, etc. Schell-Sasse Manufacturing Company. 224,798; Mar. 8; Serial No. 238,560; published Dec. 14, 1926.
Sheathing, packing, or filling, Builders'. Samuel Cabot, Inc. 224,937; Mar. 8; Serial No. 235,334; published Dec. 7, 1926.
Slates, Roofing and structural. Blue Ridge Quarries, Inc. 224,956; Mar. 8; Serial No. 221,163; published Dec. 7, 1926.
Weather strip. W. J. Dennis & Company. 225,054; Mar. 8; Serial No. 238,107; published Dec. 7, 1926.

CLASS 13.

Chains and conveyer chains, Drive. Link-Belt Company. 63,003; renewed June 4, 1927.
Chains, conveyer chains, and chain cables, Drive. Link-Belt Company. 63,503; renewed June 25, 1927.
Culvert pipe, Cast-iron. American Casting Company. 224,979; Mar. 8; Serial No. 237,060; published Dec. 21, 1926.
Hardware. Frantz Manufacturing Co. 224,942; Mar. 8; Serial No. 220,515; published Dec. 7, 1926.
Metal conduits for grease guns, Flexible. Shere Metal Products Corp. 225,011; Mar. 8; Serial No. 230,768; published Dec. 21, 1926.
Pipes and fittings, Wrought-iron. John Simmons Co. 30,131; renewed June 1, 1927.

CLASS 14.

Copper and zinc plates for photo-engravers' uses. American Steel & Copper Plate Co. 59,343; renewed Jan. 8, 1927.

CLASS 15.

Kerosene. Associated Oil Company. 225,119; Mar. 8.
Lubricants. United States Graphite Co. 61,816; renewed Apr. 9, 1927.
Lubricants. Vacuum Oil Company. 30,162; renewed June 8, 1927.
Oils and greases. Standard Oil Company (New Jersey). 224,804; Mar. 8; Serial No. 228,447; published Aug. 17,1926.

Oils and greases, Lubricating. Citizens Wholesale Supply Company. 62,145; renewed Apr. 23, 1927.
Oils, greases, and gasoline, Lubricating. Refiners Oil Co. 224,832; Mar. 8; Serial No. 238,812; published Dec. 21, 1926.

Wines. Martini & Rossi. 229,450; Mar. 8.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 8TH DAY OF MARCH, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A C Spark Plug Company. (See Champion, Albert, assignor.)
Abele, Theodore J., assignor to Stuber & Kuck Co., Peoria, Ill. Display rack. 1,620,318; Mar. 8.
Abbott, Charles R., Los Angeles, Calif. Marble-polishing buffer. 1,619,961; Mar. 8.
Abbott, Harvey B., Glassboro, N. J. Composition of matter adapted to be used for building materials. 1,620,312; Mar. 8.
Ackerman, Hannibal R., Merrill, Wis. Snagless fishhook. 1,620,589; Mar. 8.
Acme Road Machinery Company. (See Cookinham, Edward F., assignor.)
Adrian, Matthew B., Milwaukee, Wis. X-ray machine. 1,619,962; Mar. 8.
Air Reduction Company. (See Wilkinson, Walter, assignor.)
Airo, Sally, assignor to Lincoln Manufacturing Company, Detroit, Mich. Beam-light fixture. Des. 72,125; Mar. 8.
Akron Rubber Mold and Machine Company. (See Michelson, Albert S., assignor.)
Alderman, Ira D., Clinton, N. C. Rural-mail-box indicator or flag. 1,620,314; Mar. 8.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. System of distribution. 1,620,506; Mar. 8.
Allan, William G., Toronto, Ontario, Canada, assignor, by mesne assignments, to F. G. Clark. Electrolytic apparatus and electrode therefor. 1,620,052; Mar. 8.
Allied Process Corporation. (See Czochralski, Johann, assignor.)
Allied Process Corporation. (See Czochralski, J., and Welter, assignors.)
Althaus, Henry. (See Gebhard, J. B., and Althaus.)
Altman, Fred E. (See Frederick, C. W., and Altman.)
Aluminate Sales Corporation. (See Evans, Wilson, assignor.)
Alvera, Josef. (See Wenz, J., Alvera, and Brunhübner.)
American Can Company. (See Hothersall, John M., assignor.)
American Chain Company. (See Fageol, Rollie B., assignor.)
American Cyanamid Company. (See Christmann, Ludwig J., assignor.)
American Engineering Company. (See Preston, Herbert E., assignor.)
American Flyer Manufacturing Company. (See Becker, Harry S., assignor.)
American Hoist & Derrick Company. (See Sederholm, John E., assignor.)
American Manganese Steel Company. (See Psilander, Charles A., assignor.)
American Telephone and Telegraph Company et al. (See Dunham, B. G., and Haines, assignors.)
American Telephone and Telegraph Company. (See Ohl, Russell S., assignor.)
American Telephone and Telegraph Company. (See Silent, Harold C., assignor.)
American Telephone and Telegraph Company. (See Vernam, Gilbert S., assignor.)
Amsco Products Inc. (See Hardy, Charles, assignor.)
Anderson, Harold N., Cleveland, Ohio. Toothed gear. 1,619,963; Mar. 8.
Anderson, Joseph F., Kansas City, Kans. Lubricating oil. 1,619,964; Mar. 8.
Antrobus, Mary, London, England. Seat. Des. 72,126; Mar. 8.
Antrobus, Mary, London, England. Bedstead. Des. 72,127; Mar. 8.
Antrobus, Mary, London, England. Table. Des. 72,128; Mar. 8.
Appleby, Thomas, assignor of one-third to C. D. Ehret, Philadelphia, Pa. Control Method and apparatus. 1,619,911; Mar. 8.
Arcade Manufacturing Company. (See Rubin, Adolph, assignor.)
Arnett, Florence, and L. Welspiel, San Francisco, Calif. Pot-holder rack. 72,129; Mar. 8.
Arnstein, Karl, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Hull construction of rigid airships. 1,620,507; Mar. 8.
Arnzen, Frank H., Grangeville, Idaho. Chain equipment for tires. 1,619,846; Mar. 8.
Art Specialty Company, The. (See Kaden, Harry E., assignor.)
Artesian Well Engineering Co., The. (See Jacobson, Conrad C., assignor.)
Arundel, Clarence E., assignor of one-half to F. F. Postell, Birmingham, Ala. Sheet-material toy. 1,620,053; Mar. 8.
Aseltine, Fred E., assignor to General Motors Research Corporation, Dayton, Ohio. Internal-combustion engine. 1,619,965; Mar. 8.
Ashman, James, Central City, Pa. Twin steel crosstie. 1,620,181; Mar. 8.
Aspinwall, Robert S., assignor to Lincoln Manufacturing Company, Detroit, Mich. Electric droplight fixture. Des. 72,130; Mar. 8.
Aspinwall, Robert S., assignor to Lincoln Manufacturing Company, Detroit, Mich. Electric droplight fixture. Des. 72,131; Mar. 8.
Associated Silver Company. (See Lashar, Thomas B. and T. H., assignors.)
Atlantic Steel Company. (See Lawton, Mortimer P., assignor.)
Austin, Charles T. (See Homan, W. A., and Austin.)
Automatic Arc-Welding Company. (See Morton, Harry D., assignor.)
Automatic Electric Inc. (See Lomax, Clarence E., assignor.)
Bach, Oscar B., New York, N. Y. Lamp. Des. 72,132; Mar. 8.
Bach, Oscar B., New York, N. Y. Candlestick. Des. 72,133; Mar. 8.
Bach, Oscar B., New York, N. Y. Candlestick. Des. 72,134; Mar. 8.
Bach, Oscar B., New York, N. Y. Table. Des. 72,135; Mar. 8.
Bach, Oscar B., New York, N. Y. Torchère. Des. 72,136; Mar. 8.
Bach, Oscar B., New York, N. Y. Chair. Des. 72,137; Mar. 8.
Baer, Abraham L., assignor of one-half to F. J. Meyer, Milwaukee, Wis. Pen and pencil grip. 1,619,801; Mar. 8.
Bagley, James K., et al. (See Williamson, Aubrey C., assignor.)
Bailey, Fred S., Chicago, Ill. Flexibly-adjustable duct-roller brake. 1,619,805; Mar. 8.
Baker, David, Los Angeles, Calif. Interliner. 1,620,054; Mar. 8.
Baker, Frederick W., Stourbridge, England, assignor to Trinity Wheel Corporation. Vehicle wheel. 1,619,802; Mar. 8.
Baker, J. L. (See Hoeschen, Henry A., assignor.)
Baker-Raulang Company, The. (See Remde, Edward H., assignor.)
Baker, William E., assignor to W. E. Baker and G. A. Frantz, trustees of the Web Engineering Company, Cleveland, Ohio. Valve. 1,620,315; Mar. 8.
Baker, William E., et al., trustees. (See Baker, William E., assignor.)
Baker, William H., Montreal, Quebec, Canada, and J. Dewhurst, Methuen, Mass.; said Baker assignor to said Dewhurst. Shuttle-checking device for looms. 1,619,847; Mar. 8.
Bakke, Laurits K. O., Emmetsburg, Iowa. Tripping mechanism for binders. 1,620,055; Mar. 8.
Ball, Everett R., assignor of one-half to C. E. Monckton, Quincy, Ill. Scoop scale. 1,620,000; Mar. 8.
Ball, Joseph S., assignor of one-half to J. N. Miller, Denver, Colo. Railway brake mechanism. 1,620,508; Mar. 8.
Ballantine, Stuart, White Haven, Pa., assignor to Electrical Research Laboratories, Inc., Chicago, Ill. Escutcheon plate for radioreceivers. Des. 72,138; Mar. 8.
Ballard, Milton H., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Controlling means for machines. 1,620,001; Mar. 8.
Baltzley, Louis E., Glen Ridge, N. J. Closure. 1,620,316; Mar. 8.
Barany, Edmund R., Brooklyn, N. Y. Vanity case. 1,620,002; Mar. 8.
Barnard, George A., near Princeton, Nebr. Game trap. 1,620,182; Mar. 8.
Barnes, James W., Cleveland, Tenn. Vehicle spring snubber. 1,620,424; Mar. 8.
Barrett, Paul D., San Francisco, Calif. Brake-equalizing mechanism. 1,619,912; Mar. 8.
Baruch, Samuel, New York, N. Y. Antirattling device. 1,619,913; Mar. 8.

Basil, Gerald L. (See Wakefield, F. W., Basil, and Schroeder.)
Bassett, Robert S., Buffalo, N. Y. Liquid meter. 1,620,151; Mar. 8.
Batchelder, Asa F., Scotia, N. Y., assignor to General Electric Company. Locomotive or car truck. 1,620,425; Mar. 8.
Baxter, Benjamin R., Goulburn, New South Wales, Australia. Agitating, washing, liming, or tanning solutions. 1,620,317; Mar. 8.
Baxter, Mabel, Belvidere, Ill. Apron. 1,620,426; Mar. 8.
Bayne, Walter L. (See Burkhart, P. H., and Bayne.)
Beal, Ralph R., and H. F. Elliott, Palo Alto, assignors, by mesne assignments, to Federal Telegraph Company, San Francisco, Calif. High-frequency arc converter. 1,620,318; Mar. 8.
Beatty, William H., Birmingham, Ala., assignor to James B. Clow & Sons. Centrifugal molding machine. 1,620,427; Mar. 8.
Becker, Harry S., River Forest, assignor to American Flyer Manufacturing Company, Chicago, Ill. Wire-terminal clip for toy tracks. 1,620,428; Mar. 8.
Beckstrom, August W. (See Ellison, E. H., and Beckstrom.)
Beers, Royce L., Detroit, Mich., assignor, by mesne assignments, to Riley Stoker Corporation, Worcester, Mass. Tuyère structure. 1,620,056; Mar. 8.
Beers, Royce L., Detroit, Mich., assignor, by mesne assignments, to Riley Stoker Corporation, Worcester, Mass. Side tuyère structure. 1,620,057; Mar. 8.
Beers, Royce L., Detroit, Mich., assignor, by mesne assignments, to Riley Stoker Corporation, Worcester, Mass. Fuel-tributing means for underfeed stokers. 1,620,509; Mar. 8.
Behrman, Marcus B., New York, assignor to The Lox Seal Corporation, Brooklyn, N. Y. Fastening means. 1,619,803; Mar. 8.
Beidelstein, Frank, Milwaukee, Wis. Game-wheel spider. Des. 72,139; Mar. 8.
Beise, Leonard L., and R. J., Pine Island, Minn. Cultivator for eliminating quack grass. 1,620,510; Mar. 8.
Beise, Richard J. (See Beise, Leonard L., and R. J.)
Bell, George A., and J. H. Carson, assignors to Indiana Fibre Products Company, Marion, Ind. Stacking device. 1,620,058; Mar. 8.
Bell, Gordon R., Englewood, Colo. Water-closet. 1,620,429; Mar. 8.
Bell & Howell Company, The. (See Miehle, Robert F., jr., assignor.)
Bendix Brake Company. (See Bendix, Vincent, assignor.)
Bendix Brake Company. (See Cautley, John R., assignor.)
Bendix Brake Company. (See Krieg, Walter L., assignor.)
Bendix, Vincent, assignor to Bendix Brake Company, Chicago, Ill. Brake mechanism. 1,619,806; Mar. 8.
Benner, Harry P. (See Egloff, G., and Benner.)
Bennett, Guy I., assignor of one-half to W. C. Frieze, Columbus, Ohio. Reenforced shirt cuff. 1,620,319; Mar. 8.
Bernotow, Dominik M., assignor to Bunte Brothers, Chicago, Ill. Multicellular mold. 1,619,914; Mar. 8.
Berry, Edward R., Malden, Mass., assignor to General Electric Company. Quartz working. 1,620,511; Mar. 8.
Bersted, Martin C., San Diego, Calif. Flatiron. 1,629,183; Mar. 8.
Bersted, Martin C., San Diego, Calif. Automatic electric connection plug for electric heating apparatus. 1,620,184; Mar. 8.
Bersted, Martin C., San Diego, Calif. Automatic electric connection plug. 1,620,185; Mar. 8.
Bethlehem Steel Company. (See Schenck, Charles, assignor.)
Betts, John L., Woodbury, Ga. Fruit pail. 1,620,059; Mar. 8.
Betts, Orville R., San Pedro, Calif. Combined towel rack and clothesline. 1,620,590; Mar. 8.
Bigelow Hartford Carpet Company. (See Vetter, Ignatius J., assignor.)
Bilbrey, George L., Hermitage Springs, assignor of one-half to J. B. Freeman, Lafayette, and of one-fourth to J. R. Vaughn, Red Boiling Springs, Tenn. Fertilizer distributor. 1,620,320; Mar. 8.
Billon, Frederic, and J. Bohli, assignors to Scintilla Aktiengesellschaft, Solothurn, Switzerland. Ignition machine. 1,620,060; Mar. 8.
Bishop, George E., Cleveland, Ohio. Automobile inclosure. 1,620,003; Mar. 8.
Blackham, Ninian A., Long Branch, and G. N. Robillard, Toronto, Ontario, Canada; said Blackham assignor to said Robillard. Elevator. 1,619,966; Mar. 8.
Blair, Frank N., Boise, Idaho. Folding table. 1,620,061; Mar. 8.
Blaw-Knox Company. (See Brynoldt, Christian, assignor.)
Bliss, E. W., Company. (See Gabriel, Charles R., assignor.)
Bloch, Leon, assignor to Republic Brass Company, Cleveland, Ohio. Shut-off valve within body of fixture. 1,620,186; Mar. 8.
Block, Gregory K., New York, N. Y. Typewriting machine. 1,620,004; Mar. 8.
Blomfield, Alfred L., Colorado Springs, and E. R. Ramsey, Denver, Colo., assignors to The Dorr Company, New York, N. Y. Treatment of pulps. 1,619,807; Mar. 8.
Bludworth, William D., Sacramento, Calif. Single horse and cart toy. Des. 72,140; Mar. 8.
Blue Valley Creamery Company. (See Cook, Joseph, assignor.)
Bobst, Henri, assignor to J. Bobst & Fils, Societe Anonyme, Lausanne, Switzerland. Apparatus for working paper, carton, and like materials. 1,619,848; Mar. 8.
Bobst, J., & Fils, Societe Anonyme. (See Bobst, Henri, assignor.)
Boedtcher, Franz A., Bergenfield, N. J. Operating mechanism for shaft doors. 1,620,430; Mar. 8.
Bohli, Jakob. (See Billon, F., and Bohli.)
Bontempi, Mario, New York, N. Y. Coffeepot. 1,619,967; Mar. 8.
Borg & Beck Company, The. (See Reed, Harold V., assignor.)
Bosshart, Fredrich, Osnabrock, N. Dak. 1,620,062; Mar. 8.
Boswell, John S., assignor to Jersey-Creme Company, Fort Worth, Tex. Jug. Des. 72,141; Mar. 8.
Bourgon, Joseph H., Detroit, Mich., assignor to The Studebaker Corporation. Ventilator. 1,620,512; Mar. 8.
Bovaird and Seyfang Manufacturing Company. (See Leonard, Peter, G., assignor.)
Bowers, Claude E., Los Angeles, Calif. Combined switch-box support and lath holder. 1,620,063; Mar. 8.
Bowman, Albert B., Grand Rapids, Mich. Transmission. 1,620,064; Mar. 8.
Bracke, Robert F., Chicago, assignor, by mesne assignments, to C. B. Camp, trustee, Oak Park, Ill. Suction-producing means for fuel-feeding systems. 1,619,808; Mar. 8.
Bracke, Robert F., Chicago, assignor to C. B. Camp, trustee, Glencoe, Ill. Fuel-feed system for motor vehicles. 1,619,809; Mar. 8.
Brady, Charles T., Detroit, Mich. Desk lamp. Des. 72,142; Mar. 8.
Bragg, Caleb S., Palm Beach, Fla., and V. W. Kliesrath, Port Washington, assignors to Bragg-Kliesrath Corporation, Long Island City, N. Y. Power actuator. 1,620,513; Mar. 8.
Bragg-Kliesrath Corporation. (See Bragg, C. S., and Kliesrath, assignors.)
Braly, Norman B., Paso Robles, Calif. Scrubber. 1,620,591; Mar. 8.
Bramwell, Balfour, Belfast, Ireland. Filtering apparatus. 1,620,431; Mar. 8.
Brandish, Michael. (See Kaplan, M. L., and Brandish.)
Braselton, Chester H., New York, N. Y., and C. P. Brockway, Toledo, Ohio, said Brockway assignor to said Braselton. Pumping mechanism. 1,620,065; Mar. 8.
Brazell, Fred W. and O. W., Kansas City, Mo. Weather strip and guide. 1,619,915; Mar. 8.
Brazell, Otis W. (See Brazell, Fred W. and O. W.)
Brennels, Louis, assignor to Brennels Manufacturing Company, Oxnard, Calif. Disk harrow. 1,620,066; Mar. 8.
Brennels Manufacturing Company. (See Brennels, Louis, assignor.)
Brewster, William, New York, N. Y. Retainer for automobile cushions. 1,619,916; Mar. 8.
Breyer, Robert, assignor to Phoenix Hosiery Company, Milwaukee, Wis. Stocking. Des. 72,143; Mar. 8.
Brigham, Vernon T., Des Moines, Iowa. Control for subvacuous condition of periodically-fired boilers. 1,620,005; Mar. 8.
Briscoe, Walter F., Trenton, N. J. Flexible coupling. 1,620,592; Mar. 8.
Brittingham, Vertner D., Brighton, Colo. Arithmetical game. 1,619,849; Mar. 8.
Brock, Williams S. (See Reedy, J. H., and Brock.)
Brockway, Carl P. (See Braselton, C. H., and Brockway.)
Brookby, Harry E., Chicago, Ill., and G. D. King, Fort Dodge, Iowa, assignors to United States Gypsum Company, Chicago, Ill. Cellular plaster. 1,620,067; Mar. 8.
Brown, Fred E. (See Johnson, William M., assignor.)
Brown, Walter E., assignor to United Iron Works, Inc., Kansas City, Mo. Distilling apparatus. 1,620,593; Mar. 8.
Brown, William A., Philadelphia, Pa. Emergency heater. 1,620,432; Mar. 8.
Brown, William R., Winchendon, Mass. Shipping container. 1,619,917; Mar. 8.
Browne, Lyle W., assignor to The Fisher Governor Company, Marshalltown, Iowa. Automatic relief valve. 1,620,321; Mar. 8.
Browne, Lyle W., assignor to The Fisher Governor Company, Marshalltown, Iowa. Pressure and vacuum control valve. 1,620,322; Mar. 8.
Bruner, Simon. (See Lehr, Louis, assignor.)
Brunhübner, Georg. (See Wenz, J., Alvera, and Brunhübner.)
Brunswick-Balke-Collender Company, The. (See Whelan, Michael J., assignor.)
Bryce, James W., Bloomfield, N. J., assignor to The Tabulating Machine Company, Endicott, N. Y. Tabulating card-printer device. 1,620,068; Mar. 8.
Brye, Walter C., Knoxville, Tenn. Cot for automobiles. 1,620,433; Mar. 8.

Brynoldt, Christian, Pittsburgh, Pa., assignor to Blaw-Knox Company. Molding concrete or cementitious structures. 1,620,514; Mar. 8.
Bucherer, August, Amriswil, Switzerland. Frame or body of jointed dolls and other articulated or jointed toys. 1,620,069; Mar. 8.
Buehheit, Henry F., Milwaukee, Wis. Shade-roller support. 1,620,515; Mar. 8.
Buehler, Charles H., Camden, N. J. Spring suspension. 1,620,070; Mar. 8.
Budd, Edward G., Manufacturing Company. (See Meadowcroft, Joseph W., assignor.)
Budd Wheel Company. (See Ludwick, Herbert V., assignor.)
Buehler, Leon, jr. (See Small, N. M., and Buehler.)
Bugatti, Ettore, Molsheim, France. Elastic axle for motor vehicles. 1,620,323; Mar. 8.
Bundy, Clifton L., assignor to Philadelphia Electrical & Manufacturing Company, Philadelphia, Pa. Lamp hanger. 1,620,516; Mar. 8.
Bunevac, Frank, South Bend, Ind. Automobile body. 1,619,918; Mar. 8.
Bunger, Edward W., Cedar Rapids, Iowa. Tire chain. 1,620,517; Mar. 8.
Bunte Brothers. (See Barnotow, Dominik M., assignor.)
Burden, Everett, East Liverpool, Ohio. Glove. 1,620,434; Mar. 8.
Burdette, Richard S., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Air bag. 1,620,435; Mar. 8.
Burkhart, Paul H., New Haven, Conn., and W. L. Bayne, Henry, Ill. Automobile lighting system and switch mechanism therefor. 1,620,187; Mar. 8.
Burlin, Leslie H., Chicago, assignor to Chicago Hardware Foundry Company, North Chicago, Ill. Aquarium. 1,620,006; Mar. 8.
Burmeister, Charles C., Davenport, Iowa. Stagging hook. 1,620,436; Mar. 8.
Burnham, Locke H., Pittsfield, Mass., assignor to General Electric Company. Transformer. 1,620,437; Mar. 8.
Burns, Alfred P. (See Turner, A., and Burns.)
Burt Machine Company. (See Wild, Charles H., assignor.)
Bushee, Joseph F., Jersey City, N. J. Smoking pipe. 1,620,438; Mar. 8.
Bushey, Franklin P. (See Morgan, H. D., and Bushey.)
Bushnell, Charles S., assignor to General Railway Signal Company, Rochester, N. Y. Train control. 1,620,188; Mar. 8.
Butler, Henry E., Scotia, N. Y., assignor to General Electric Company. Film cut-out. 1,620,518; Mar. 8.
C-S Engineering Company. (See Schellens, E. L., and Coffin, assignors.)
Cameron, James A., assignor to Cameron Machine Company, Brooklyn, N. Y. Winding means. 1,620,007; Mar. 8.
Cameron Machine Company. (See Cameron, James A., assignor.)
Cameron Machine Company. (See Stocker, William M., assignor.)
Camp, Curtis B., trustee. (See Bracke, Robert F., assignor.)
Canfield, William C., Philadelphia, Pa. Detachable suspension hinge. 1,620,189; Mar. 8.
Carbide and Carbon Chemicals Corporation. (See Young, C. O., and Herrly, assignors.)
Carlson, Anthony E., Los Angeles, Calif. Apparatus for elevating and lowering oil-well tubing. 1,620,190; Mar. 8.
Carmichael, William M., Atlanta, Ga. Static neutralizer for printing presses. 1,619,968; Mar. 8.
Caro Cloth Corporation. (See Walsh, Patrick H., assignor.)
Carolyn Laundry. (See Lane, Edwin, assignor.)
Carson, John H. (See Bell, G. A., and Carson.)
Carter, Clarence W., assignor to Carter-Mayhew Manufacturing Company, Minneapolis, Minn. Scalper. 1,620,439; Mar. 8.
Carter, Glenn O., New Rochelle, N. Y., assignor to The Linde Air Products Company. Welded structure and making same. 1,620,324; Mar. 8.
Carter-Mayhew Manufacturing Company. (See Carter, Clarence W., assignor.)
Cary, George W., assignor to Goodell Manufacturing Company, Greenfield, Mass. Drill chuck. 1,620,440; Mar. 8.
Casey, Vasco F., assignor to Minneapolis Dredging Co., Minneapolis, Minn. Dredging machine. 1,619,850; Mar. 8.
Castle, Timothy P., assignor to Comstock-Castle Stove Company, Quincy, Ill. Heater. Des. 72,144; Mar. 8.
Cautley, John R., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Operating mechanism. 1,619,810; Mar. 8.
Chadeloid Chemical Company. (See Swift, Owen P., assignor.)
Champion, Albert, assignor to A C Spark Plug Company, Flint, Mich. Spark plug. 1,619,969; Mar. 8.
Chappelle, Charles C., New York, N. Y. Gas burner. 1,620,071; Mar. 8.
Chase, Herbert, Forest Hills, N. Y. Case for tennis rackets. 1,620,072; Mar. 8.
Chase, Leon W., assignor to Chase Plow Company, Lincoln, Nebr. Ridge-splitter attachment. 1,620,441; Mar. 8.
Chase Plow Company. (See Chase, Leon W., assignor.)
Chiarelli, Antonio, New York, N. Y. Propelling, lifting, and steering device for airships. 1,620,618; Mar. 8.
Chicago Hardware Foundry Company. (See Burlin, Leslie H., assignor.)
Christensen, Anders Wilson, and A. W. Warsen, Hartford, Conn. Weeding machine. 1,620,594; Mar. 8.
Christensen, Niels A., Milwaukee, Wis. Vehicle brake mechanism. 1,619,970; Mar. 8.
Christensen, Niels A., Milwaukee, Wis. Vehicle brake. 1,620,073; Mar. 8.
Christmann, Ludwig J., assignor to American Cyanamid Company, New York, N. Y. Lactonitrile fumigant. 1,620,074; Mar. 8.
Cincinnati Bickford Tool Company, The. (See Klausmeyer, David C., assignor.)
Claessens, Frederick C. (See Leonard, Frank P., assignor.)
Clancy, John C., Asbury Park, N. J. Converting oils and apparatus therefor. 1,620,075; Mar. 8.
Clark, Farley G. (See Allan, William G., assignor.)
Clarke, Charles W. E., New York, N. Y. Pulverized-fuel combustion system. 1,620,191; Mar. 8.
Claude, Georges, Paris, France, assignor, by mesne assignments, to Lazote Inc. Separation of the constituents of gaseous mixtures such as those containing hydrogen. 1,620,192; Mar. 8.
Coad, William H., Nowata, Okla. Antiskid chain for tires. 1,620,076; Mar. 8.
Coates, Frederick, Cincinnati, Ohio. Nail. 1,620,193; Mar. 8.
Cobb, William J., Mokameh, assignor of one-half to H. W. McGuire, Bengal, British India. Load-indicating mechanism. 1,620,442; Mar. 8.
Coffin, Joel S., jr. (See Schellens, E. L., and Coffin.)
Clawson, Monroe S., Upper Montclair, N. J. Electric abrasion process. 1,620,519; Mar. 8.
Clow, James B., & Sons. (See Beatty, William H., assignor.)
Coley, Joseph, Detroit, Mich. Combination lawn cleaner. 1,619,851; Mar. 8.
Collins, Julius D., Vineland, N. J. Automatic switch. 1,620,443; Mar. 8.
Collins, Patrick W. (See Westbury, W., and Collins.)
Comstock-Castle Stove Company. (See Castle, Timothy P., assignor.)
Conklin, William F., Tarentum, H. S. Hopkins, Crafton, and J. M. Hover, Pittsburgh, Pa. Sheet-piling mechanism. 1,619,804; Mar. 8.
Conti, Emile, Alfortville, France. Solder for aluminum and its alloys. 1,619,852; Mar. 8.
Cook, Joseph, assignor to Blue Valley Creamery Company, Chicago, Ill. Liquid-measuring gauge. 1,619,919; Mar. 8.
Cooke, Charles A., Sioux City, Iowa. Bridge-score recorder. 1,620,077; Mar. 8.
Cookinham, Edward F., assignor to Acme Road Machinery Company, Frankfort, N. Y. Stone crusher. 1,620,078; Mar. 8.
Copeland Products, Inc. (See De Luiz, Edward R., assignor.)
Corash, Julius H., et al. (See Methot, John A., assignor.)
Corman, Jean J. G. G., Verviers, Belgium, Combing machine. 1,620,325; Mar. 8.
Corrall, Herbert, Helensburgh, and J. Heggie, Clydebank, Scotland, assignors to The Singer Manufacturing Company, Elizabeth, N. J. Sewing-machine attachment. 1,620,249; Mar. 8.
Correa, Frank M., Honolulu, Hawaii. Adjustable bedding clamp. 1,619,853; Mar. 8.
Coryell, Charles N., Mamaroneck, N. Y. Vanity case. 1,620,251; Mar. 8.
Coryell, William C., Youngstown, Ohio. Sash. 1,619,811; Mar. 8.
Courtney, Louis J. (See Heffelfinger, L. W., and Courtney.)
Cox, Walter J., Bridgeport, Conn., assignor to Franklin Railway Supply Company. Device for lubricating locomotive-axle journals. 1,620,520; Mar. 8.
Crawford, McGregor and Canby Company, The. (See Mattern, George W., assignor.)
Crompton & Knowles Loom Works. (See Wakefield, Walter H., assignor.)
Crossley, Alfred, Washington, D. C., assignor to Wired Radio, Inc., New York, N. Y. Piezo-electric-crystal apparatus. 1,619,854; Mar. 8.
Culp, Herbert, Willoughby, Ohio. Bottle receptacle. 1,620,079; Mar. 8.
Cunningham, Earl T., Lansing, Mich. Freight car. 1,619,920; Mar. 8.
Cunningham, Roy S., assignor of one-third to F. J. Hassell and one-third to J. R. Kell, Los Angeles, Calif. Carburetor. 1,620,080; Mar. 8.
Currier, Philip M., Ballston Lake, N. Y., assignor to General Electric Company. Transformer-voltage-regulating system. 1,620,619; Mar. 8.
Curtin, Leo P., Freehold, N. J., assignor to The Western Union Telegraph Company, New York, N. Y. Preserving wood and solutions therefor. 1,620,152; Mar. 8.
Curtis, Edward E., assignor to The Osborn Manufacturing Company, Cleveland, Ohio. Wire-base brush. 1,620,008; Mar. 8.
Curtner, Rolland, Marion, Ind. Cutter. 1,620,153; Mar. 8.
Czerniak, Casmimir. (See Czerniak, Jozeph and C.)
Czerniak, Jozeph and C., South Chicago, Ill. Railway-switch-operating device. 1,620,326; Mar. 8.

Czochralski, Johann, Frankfort-on-the-Main, Germany, assignor, by mesne assignments, to Allied Process Corporation, New York, N. Y. Aluminum alloy containing lithium. 1,620,082; Mar. 8.

Czochralski, Johann, and G. Welter, Frankfort-on-the-Main, Germany, assignors, by mesne assignments, to Allied Process Corporation, New York, N. Y. Alloy of lithium and aluminum. 1,620,081; Mar. 8.

Dalglish, John, Birmingham, England, assignor to Dunlop Tire and Rubber Corporation of America, Buffalo, N. Y. Apparatus for the manufacture of rubber or the like tubes. 1,620,521; Mar. 8.

Dalton, Hubert, New York, N. Y. Combined lathe, drilling and milling machine. 1,620,522; Mar. 8.

Davidson Manufacturing Company. (See Davidson, William W., assignor.)

Davidson, William W., Evanston, Ill., assignor to Davidson Manufacturing Company, Madison, Wis. Folding machine. 1,620,444; Mar. 8.

Davis, Augustine, jr., Cincinnati, Ohio. Measuring bucket or vessel. 1,620,610; Mar. 8.

Davis Boring Tool Company. (See Davis, Emery E., assignor.)

Davis, Emery E., assignor to Davis Boring Tool Company, St. Louis, Mo. Expansion reamer. 1,619,855; Mar. 8.

Davis, Harry A., assignor to Draper Corporation, Hopedale, Mass. Stop mechanism for looms. 1,620,194; Mar. 8.

Davis, Harry G., St. Paul, Minn. Dandelion digger and puller. 1,619,856; Mar. 8.

Davis, Richard T., Chicago, Ill. Base for a loud speaker. Des. 72,145; Mar. 8.

Day, J. H., Company, The. (See Kirchhoff, William G., assignor.)

Dean, Albert E., Fall River, assignor to Draper Corporation, Hopedale, Mass. Shuttle-checking mechanism for looms. 1,620,195; Mar. 8.

Dean, Edson A., Edgewood, R. I. Feeding mechanism for swaging machines. 1,619,971; Mar. 8.

De Jong, Hendrik, and W. Koning, Eindhoven, Netherlands, assignors to General Electric Company. Hook forming and inserting machine. 1,620,523; Mar. 8.

De Laval Steam Turbine Company. (See Kennedy, Frank W., assignor.)

De Luiz, Edward R., assignor to Copeland Products, Inc., Flint, Mich. Compressor valve. 1,620,524; Mar. 8.

Dennis, Oliver C., Wilmette, Ill. Cigar lighter. 1,620,327 Mar. 8.

Densmore, William M., assignor of one-half to W. Monthe, Montevideo, Minn. Cam device. 1,620,445; Mar. 8.

Derby, Frank H., assignor to Erie Foundry Company, Erie, Pa. Power hammer. 1,620,525; Mar. 8.

De Stubner, Emile, New York, N. Y. Filter. 1,620,083; Mar. 8.

Det Tekniske Forsgsaktiesskab. (See Goldschmidt, Rudolf, assignor.)

Develay, Marie N. A., Paris, France. Tire for vehicle wheels. 1,619,812; Mar. 8.

De Vry, Herman A., Chicago, Ill. Film spool. 1,620,605; Mar. 8.

De Waters, Enos A., Flint, assignor to General Motors Corporation, Detroit, Mich. Transmission lock for motor vehicles. 1,619,972; Mar. 8.

Dewend, William D., assignor to Oliver Chilled Plow Works, South Bend, Ind. Disk harrow. 1,619,857; Mar. 8.

Dewhurst, John. (See Baker, W. H., and Dewhurst.)

Dickinson, Harry E., San Antonio, Tex. Internal-combustion engine. 1,620,446; Mar. 8.

Diehl Manufacturing Company. (See Karle, John D., assignor.)

Dilley, Fred M., and C. F. Hallberg, Oelwein, Iowa. Pressure oil can. 1,620,595; Mar. 8.

Dingman, Thomas C., assignor to The White Motor Company, Cleveland, Ohio. Instrument panel. 1,620,328; Mar. 8.

Directoplate Corporation. (See Koppe, Alexander T., assignor.)

Dobson, Marion L., Kevin, Mont. Pump jack. 1,620,009; Mar. 8.

Dodds, Joseph J. (See Larkin, Arthur J., assignor.)

Doll, Charles E. (See Holcroft, C. T., and Doll.)

Donaldson, George H., West Hartford, Conn. Nipple for nursing bottles. 1,620,329; Mar. 8.

Donovan, John F., East Cleveland, Ohio, assignor to General Electric Company. Apparatus for making incandescent lamps and similar articles. 1,620,447; Mar. 8.

Dornin, George A., assignor to The Gathmann Engineering Company, Baltimore, Md. Ingot mold. 1,620,010; Mar. 8.

Dornin, George A., assignor to The Gathmann Engineering Company, Baltimore, Md. Making ingot molds. 1,620,011; Mar. 8.

Dorr Company, The. (See Blomfield, A. L., and Ramsey, assignors.)

Douglass, Samuel E., Raleigh, N. C. Toothbrush. 1,620,330; Mar. 8.

Dourdoufis, Alexandros, Philadelphia, Pa. Saddle seat. 1,620,448; Mar. 8.

Dowley, Jesse E., Jackson, Mich., assignor to Jackson Machine & Tool Company. Perch puller. 1,620,084; Mar. 8.

Draper Corporation. (See Davis, Harry A., assignor.)

Draper Corporation. (See Dean, Albert E., assignor.)

Draper Corporation. (See Rhoades, A. E., and Johnson, assignors.)

Dresner, Emanuel, Chicago, Ill. Fastener. 1,620,611; Mar. 8.

Driscoll, Bartholomew L., Watsonville, Calif. Plow. 1,620,085; Mar. 8.

Dufresne, Oliver J. (See Marsh, L., and Dufresne.)

Duncan, Floyd E., Escondido, Calif. Ditching plow. 1,620,250; Mar. 8.

Dunham, Bert G., Hawthorne, and W. T. Haines, Mountain Lakes, N. J.; said Haines assignor to American Telephone and Telegraph Company and said Dunham assignor to Western Electric Company, Incorporated, New York, N. Y. Telephone-exchange system. 1,620,012; Mar. 8.

Dunlop Tire and Rubber Corporation of America. (See Dalglish, John, assignor.)

Dürr, Ludwig, Friedrichshafen, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Bodensee, Germany. Airship. 1,620,449; Mar. 8.

Dyke, Darrell F., assignor to The Seng Company, Chicago, Ill. Bed davenport. 1,620,086; Mar. 8.

Early, Harry H., Oshkosh, Wis. Changeable sign. 1,620,450; Mar. 8.

Eastman Kodak Company. (See Frederick, Charles W., assignor.)

Eastman Kodak Company. (See Frederick, C. W., and Altman, assignors.)

Eastman Kodak Company. (See Frederick, C. W., and Wood, assignors.)

Eastman Kodak Company. (See Underwood, Ernest E., assignor.)

Eckerman, Allen H., Sioux City, Iowa. Hog spray. 1,620,013; Mar. 8.

Edison Electric Appliance Company. (See Simmons, Albert H., assignor.)

Egan, George F., Jersey City, N. J. Vehicle fender. 1,620,196; Mar. 8.

Egloff, Gustav, assignor to Universal Oil Products Company, Chicago, Ill. Cracking petroleum oil. 1,619,921; Mar. 8.

Egloff, Gustav, and H. P. Benner, assignors to Universal Oil Products Company, Chicago, Ill. Apparatus for cracking oil. 1,619,922; Mar. 8.

Ehret, Cornelius D. (See Appleby, Thomas, assignor.)

Eichenlaub, Edward S., North Fairfield, Ohio. Toy-balloon frame. 1,620,331; Mar. 8.

Eichner, Robert F., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt buckle. Des. 72,146; Mar. 8.

Electrical Research Laboratories, Inc. (See Ballantine, Stuart, assignor.)

Elliott, Harold F. (See Beal, R. R., and Elliott.)

Ellison Brass Manufacturing Co. (See Ellison, E. H., and Beckstrom, assignors.)

Ellison, Edward H., and A. W. Beckstrom, Jamestown, assignors to The Ellison Brass Manufacturing Co., Inc., Falconer, N. Y. Metal door. 1,620,451; Mar. 8.

Emig, Edmund J., Desplaines, Ill. Casement window or door construction. 1,620,526; Mar. 8.

Emmet, William L. R., Schenectady, N. Y., assignor to General Electric Company. Governing mechanism for prime movers. 1,620,527; Mar. 8.

Emmet, William L. R., Schenectady, N. Y., assignor to General Electric Company. Governing mechanism for elastic-fluid turbines. 1,620,528; Mar. 8.

Engelhard, Charles, Inc. (See Rohn, Wilhelm, assignor.)

Entwisle & Kenyon Limited. (See Kenyon, William H., assignor.)

Entwisle & Kenyon Limited. (See Shorrock, James L., assignor.)

Erban, Richard, Vienna, Austria. Swiveling-roller gearing. 1,619,813; Mar. 8.

Erie Foundry Company. (See Derby, Frank H., assignor.)

Errett, Thomas A. (See Kragen, T. R., and Errett.)

Estes, George L., Oklahoma City, Okla. Stop signal for crossings. 1,620,087; Mar. 8.

Evans, Albert E., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Apparatus for cracking off and handling continuously-formed sheet glass. 1,620,014; Mar. 8.

Evans, Benjamin, Albany, assignor to Fort Orange Paper Company, Castleton-on-Hudson, N. Y. Display carton. 1,620,197; Mar. 8.

Evans, Wilson, assignor to Aluminate Sales Corporation, Chicago, Ill. Treating liquids. 1,620,332; Mar. 8.

Evans, Wilson, assignor to Aluminate Sales Corporation, Chicago, Ill. Treating liquids. 1,620,333; Mar. 8.

Ewart, Andrew. (See Ewart, Orrie F. C. and A.)

Ewart, Orrie F. C. and A., Port Huron, Mich. Roller-blind support for casement windows. 1,620,596; Mar. 8.

Fageol, Rollie B., Los Angeles, Calif., assignor to American Chain Company, Inc., Bridgeport, Conn. Multibar bumper. 1,620,334; Mar. 8.

Fairbairn, Francis A., assignor to Palmers Limited, Montreal, Quebec, Canada. Vanity case. 1,620,088; Mar. 8.

Falson, William D., et al. (See Gage, Charles H., assignor.)

Fal, Edward A., Rutherford, N. J. Heating hood for tank-car outlets. 1,620,452; Mar. 8.

Fall, Edward A., Rutherford, N. J. Tank car. 1,620,453; Mar. 8.

Farkas, Louis, New York, N. Y. Bust supporter. 1,620,335; Mar. 8.

Farren, Roy, Lake Worth, Fla. Saw. 1,620,454; Mar. 8.

Farwell, Fay G., Toledo, Ohio. Road light. 1,620,198; Mar. 8.

Faurot, Henry, assignor to Western Felt Works, Chicago, Ill. Window channel strip. 1,619,923; Mar. 8.

Federal Laboratories, Inc. (See Lawrence, Ruben B., assignor.)

Federal Telegraph Company. (See Beal, R. R., and Elliott, assignors.)

Feldman, Edward D. (See Papst, Herman, assignor.)

Felicety, John B., Philadelphia, Pa. Clothes rack. 1,620,199; Mar. 8.

Ferris, William I., Westfield, N. J., assignor to L. E. Waterman Company, New York, N. Y. Fountain pen and stand therefor. 1,620,529; Mar. 8.

Field, Crosby, Brooklyn, N. Y., assignor to Gray Products, Inc. Consolidated metallic fiber article. 1,620,530; Mar. 8.

Finstone, Marx, New York, N. Y. Desk set. Des. 72,147; Mar. 8.

Fire Proof Wall Company. (See Makowski, John F., assignor.)

First Trust and Savings Bank of Pasadena, trustee. (See Key, James F., assignor.)

Fischer, Albert C., Chicago, Ill. Rail filler. 1,619,924; Mar. 8.

Fischer, Albert F., Mason City, Iowa. Head-wall structure for culverts. 1,620,089; Mar. 8.

Fischer, Charles, New York, N. Y. Mount for finger-ring facings. 1,620,252; Mar. 8.

Fisher, Charles R., Rogers City, Mich. Apparatus for loading and unloading materials. 1,620,531; Mar. 8.

Fisher, Charles R., Rogers City, Mich. Control system for endless-belt conveyers. 1,620,532; Mar. 8.

Fisher, Ernest F., St. Louis, Mo. Fabric-renovating machine. 1,619,814; Mar. 8.

Fisher Governor Company, The. (See Browne, Lyle W., assignor.)

Flad, Artur, Berlin, assignor to Siemens & Halske Aktiengesellschaft, Wernerwerk, Siemensstadt, near Berlin, Germany. Telephone system. 1,620,090; Mar. 8.

Flockhart, James, San Francisco, Calif. Machine for washing, cleaning, waxing, and polishing sheet material. 1,619,925; Mar. 8.

Florence Stove Company. (See Price, David R., assignor.)

Fontana, Paul F. M. A., assignor to Societe des Apparells Mephisto Jules Manfredi & Cie., Cluses, France. Vulcanizer. 1,620,597; Mar. 8.

Ford, Frank H., Hattiesburg, Miss. Insulation composition. 1,620,091; Mar. 8.

Fording, William G., Cleveland, Ohio. Cord-tire machine. 1,620,092; Mar. 8.

Forgrove Machinery Company Limited, The. (See Grover, Frederick, assignor.)

Fornaca, Guido, Turin, Italy. Device for preventing abnormal flexure of the springs of motor vehicles. 1,620,093; Mar. 8.

Fort Orange Paper Company. (See Evans, Benjamin, assignor.)

Foster, Claud H., Wickliffe, Ohio. Shock absorber. 1,619,815; Mar. 8.

Foster, Edgar E., Montgomery, Ala. Boxing apparatus. 1,620,598; Mar. 8.

Foster Machine Company. (See McKean, John O., assignor.)

Fournier, Oscar, Symmes Township, Hamilton County, assignor to The United States Playing Card Company, Norwood, Ohio. Step and repeat machine. 1,620,336; Mar. 8.

Frank, Benjamin E. (See Schuman, I., and Frank.)

Franklin Railway Supply Company. (See Cox, Walter J., assignor.)

Franklin Railway Supply Company. (See Martin, Frederick W., assignor.)

Frantz, George A., et al., trustees. (See Baker, William E., assignor.)

Frederick, Charles W., assignor to Eastman Kodak Company, Rochester, N. Y. Projection system. 1,620,338; Mar. 8.

Frederick, Charles W., and F. E. Altman, assignors to Eastman Kodak Company, Rochester, N. Y. Objective. 1,620,337; Mar. 8.

Frederick, Charles W., and D. L. Wood, assignors to Eastman Kodak Company, Rochester, N. Y. Projection objective. 1,620,339; Mar. 8.

Fredricks, John T., et al. (See Prator, Ernest P., assignor.)

Freeman, J. B., et al. (See Bilbrey, George L., assignor.)

Freudenberg, Sarah, Brooklyn, N. Y. Pile textile fabric. 1,620,340; Mar. 8.

Frick Company. (See Small, N. M., and Buehler, assignors.)

Frieze, William C. (See Bennett, Guy I., assignor.)

Fuligraff, Frank G., New York, N. Y. Display device. 1,620,533; Mar. 8.

Furman, Eugene C., Newport News, assignor of forty-nine per cent to E. F. Heard, Hampton, Va. Method and apparatus for repairing fluid containers. 1,620,154; Mar. 8.

Fust, Robert, Glogau, Germany. Arrangement for removing secretions from dental canals by suction. 1,620,599; Mar. 8.

Gabriel, Charles R., assignor to E. W. Bliss Company, Brooklyn, N. Y. Press. 1,620,534; Mar. 8.

Gage, Charles H., assignor to L. W. Searles, W. D. Riter, Washington, D. C., and W. D. Falson, Chester, Pa. Car coupler. 1,620,535; Mar. 8.

Gage, Vincent, Washington, D. C. Paper guide for type-writing machines. 1,619,858; Mar. 8.

Gagnon, Archie, assignor of one-half to C. G. Greenhalgh, Pawtucket, R. I. Loom attachment. 1,620,601; Mar. 8.

Gains, Chester R., Muscatine, Iowa. Reminder clock. 1,620,455; Mar. 8.

Gairing, Emil, assignor to Gairing Tool Company, Detroit, Mich. Interchangeable boring and counterboring tool. 1,620,536; Mar. 8.

Gairing Tool Company. (See Gairing, Emil, assignor.)

Gallus, Joseph M., and J. J. Schelts, Wrightstown, N. J. Traffic-signal switch. 1,620,456; Mar. 8.

Gardner, George W., Flint, Mich. Spark plug. 1,620,341; Mar. 8.

Garey, Charles C., assignor of one-third to T. L. Smith, Bremerton, Wash. Electrical heater. 1,620,537; Mar. 8.

Garfunkel, Harry I., et al. (See Ginsburg, Marcus O., assignor.)

Gatea, Philetus W., assignor to Hanna Engineering Works, Chicago, Ill. Lubricator. 1,620,253; Mar. 8.

Gathmann Engineering Company, The. (See Dornin, George A., assignor.)

Gatti, Hector, Chicago, Ill. Machine-operated portable fan. 1,620,457; Mar. 8.

Gauss, Paul G., Indianapolis, Ind. Ladder-pulley-block support. 1,620,254; Mar. 8.

Gaven, Mary E. (See Gaven, William J., assignor.)

Gaven, William J., deceased, assignor of one-half to M. E. Gaven, Wilkes-Barre, Pa.; M. E. Gavin, administratrix. Making composition articles. 1,620,538; Mar. 8.

Gebhard, John B., and H. Althaus, Dyersville, Iowa. Crossing signal. 1,620,600; Mar. 8.

Geiger, Paul H., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling apparatus. 1,620,015; Mar. 8.

Gelissen, Henri C. J. H., Rijswijk, Netherlands, assignor, by mesne assignments, to Novadel Process Corporation, Buffalo, N. Y. Improving milling products. 1,620,458; Mar. 8.

General Electric Company. (See Alexanderson, Ernst F. W., assignor.)

General Electric Company. (See Batchelder, Asa F., assignor.)

General Electric Company. (See Berry, Edward R., assignor.)

General Electric Company. (See Burnham, Locke H., assignor.)

General Electric Company. (See Butler, Henry E., assignor.)

General Electric Company. (See Currier, Philip M., assignor.)

General Electric Company. (See De Jong, H., and Koning, assignors.)

General Electric Company. (See Donovan, John F., assignor.)

General Electric Company. (See Emmet, William L. R., assignor.)

General Electric Company. (See Hilliard, John D., assignor.)

General Electric Company. (See Johnson, Ernest E., assignor.)

General Electric Company. (See Jones, Benjamin W., assignor.)

General Electric Company. (See Jones, B. W., and Wolfe, assignors.)

General Electric Company. (See Rohde, Paul, assignor.)

General Electric Company. (See Samson, Curt, assignor.)

General Electric Company. (See Sprenger, George W., assignor.)

General Electric Company. (See Temple, Elmer J., assignor.)

General Electric Company. (See Winter, Fred H., assignor.)

General Electric Company. (See Witherow, Harry M., assignor.)

General Motors Corporation. (See De Waters, Enos A., assignor.)

General Motors Corporation. (See Smarr, Benjamin M., assignor.)

General Motors Corporation. (See Stoll, Herman, assignor.)

General Motors Corporation. (See Whitacre, Clarence J., assignor.)

General Motors Corporation. (See White, John W., assignor.)

General Motors Research Corporation. (See Aseltine, Fred E., assignor.)

General Motors Research Corporation. (See Hallett, George E. A., assignor.)

General Motors Research Corporation. (See Hunt, John H., assignor.)

General Railway Signal Company. (See Bushnell, Charles S., assignor.)

General Rubber Company. (See Jury, A. E., and Smith, assignors.)

Gerdes, Adolf F., Berlin, Germany. Magneto-electric machine. 1,619,926; Mar. 8.

Gernsback, Hugo, New York, N. Y. Depilator. 1,620,539; Mar. 8.

Gervais, Wainwright B., assignor to Variety Fire Door Company, Chicago, Ill. Folding closure and operating same. 1,619,816; Mar. 8.

Gibbs, Alonzo L., and J. A. Gill, Tulsa, Okla. Composition for treating inner tubes. 1,620,342; Mar. 8.

Gibson, Arthur A., Bloomfield, N. J., assignor to Westinghouse Lamp Company. Regulator for mercury gauges. 1,620,540; Mar. 8.

Gibson, Harry L., Chicago, Ill. Wax-applying tool. 1,619,817; Mar. 8.

Gill, Joseph A. (See Gibbs, A. L., and Gill.)

Gill, Samuel A., Nevada, Iowa. Advertising sign. Des. 72,148; Mar. 8.

Gillam, Arthur L., administrator. (See Gillam, Manly M.)

Gillam, Manly M., deceased, Flushing, N. Y.; A. L. Gillam, administrator. Device for vaporizing and burning liquid fuel. 1,619,859; Mar. 8.

Gillick, Lawrence H., St. Paul, Minn., assignor to Vapor Car Heating Company, Inc., Chicago, Ill. Flexible joint. 1,620,094; Mar. 8.

Gilson, Robert M., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electrical switching apparatus. 1,619,860; Mar. 1.

Ginsburg, Marcus O., Corona, assignor of one-third to J. E. Sloe and one-third to H. I. Garfunkel, New York, N. Y. Egg-shipping box. 1,620,541; Mar. 8

Gladwill, Rudolph H., Ada, and G. M. Ramsey, Altus, Okla. Check-endorsing attachment for adding machines. 1,620,542; Mar. 8.

Glennon, Michael F., Glen Ridge, N. J. Lead pencil. 1,619,927; Mar. 8.

Globe Lighting Fixture Mfg. Co. (See Villaret, Gustave E., assignor.)

Goddu, George, Winchester, and F. L. Mackenzie, Beverly, Mass., assignors to United Shoe Machinery Corporation, Paterson, N. J. Fastening-inserting mechanism. 1,620,200; Mar. 8.

Godowsky, Leopold, jr. (See Mannes, L. D., and Godowsky.)

Goldberg, Jacob M. (See Goldberg, Louis B., N., W., and J. M.)

Goldberg, Louis B., N., W., and J. M., Denver, Colo. Gasoline camp stove. 1,620,095; Mar. 8.

Goldberg, Nathan. (See Goldberg, Louis B., N., W., and J. M.)

Goldberg, Samuel, Dorchester, Mass. Hair curler. 1,620,543; Mar. 8.

Goldberg, William. (See Goldberg, Louis B., N., W., and J. M.)

Goldschmidt, Rudolf, Berlin, Germany, assignor to Det Tekniske Forsgsaktiesskab, Ordrup, Charlottenlund, Denmark. Percussive hand tool. 1,620,201; Mar. 8.

Goodell Manufacturing Company. (See Cary, George W., assignor.)

Goodyear Tire & Rubber Company. (See Burdette, Richard S., assignor.)

Goodyear Tire & Rubber Company, The. (See Lind, Frederick A., assignor.)

Goodyear Tire & Rubber Company, The. (See Templeton, Edwin G., assignor.)

Goodyear Tire & Rubber Company, The. (See Van Orman, Wart T., assignor.)

Gordon, George G., Dollis Hill, London, England. Disinfectant composition. 1,619,861; Mar. 8.

Goulas, Henry, assignor of one-third to O. O. Mobley, Quantico, Va. Pipe wrench. 1,620,016; Mar. 8.

Gowans, John M., Hartford, Conn. Cake support. 1,619,818; Mar. 8.

Grasselli Chemical Company, The. (See Howard, Henry, assignor.)

Graves, Arnold, Frinton-on-Sea, England. Vehicle lamp. 1,620,202; Mar. 8.

Gray, Lester H., Portage, Pa. Surfacing machine. 1,620,459; Mar. 8.

Gray Products, Inc. (See Field, Crosby, assignor.)

Green Engineering Company. (See Marsh, Thomas A., assignor.)

Greenhalgh, Charles G. (See Gagnon, Archie, assignor.)

Grelve, Edmund J., Los Angeles, Calif. Casket. 1,620,544; Mar. 8.

Grenier, Henry J., Bridgeport, Conn. Cue-tip fastener. 1,620,545; Mar. 8.

Griffith, Porter M., assignor to Gruenhagen's, San Francisco, Calif. Book end. Des. 72,149; Mar. 8.

Griffith, Richard H., Richmond, Va., assignor to The Ohio Cultivator Company, Bellevue, Ohio. Cultivator. 1,619,862; Mar. 8.

Grondahl, Lars O., Pittsburgh, assignors to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 1,619,928; Mar. 8.

Grossman, Samuel, assignor to David Klebanoff and Samuel Grossman, copartners trading under the firm name of Klebanoff and Grossman, New York, N. Y. Finger ring. Des. 72,150; Mar. 8.

Grossman, Samuel, et al. (See Grossman, Samuel, assignor.)

Grover, Frederick, assignor to The Forgrove Machinery Company Limited, Leeds, England. Apparatus for dividing plastic material into separate tablets of uniform size. 1,620,546; Mar. 8.

Gruenhagen's. (See Griffith, Porter M., assignor.)

Guerrini, Luigi, Milan, Italy, assignor to Société Anonyme des Dispositifs d'Adhérence Guerrini, Paris, France. Traction device for vehicle wheel. 1,620,460; Mar. 8.

Guggenheim Brothers. (See Smith, Elias A. C., assignor.)

Guth, Henry L., Allentown, Pa. Table. Des. 72,151; Mar. 8.

Gustafson, Eric B., et al. (See Madsen, Gustav N., assignor.)

Haase, Ernst R., New London, Conn. Graphophone needle. 1,619,863; Mar. 8.

Haberman, George, Fort Atkinson, Iowa. Cream-removing apparatus. 1,619,973; Mar. 8.

Hack, Charles W., Topeka, Kans. Cooling-medium container. 1,619,864; Mar. 8.

Hacker, Horace W., Chicago, Ill. Method of and apparatus for making objects. 1,620,343; Mar. 8.

Hageman, Augustus B., Broken Bow, Nebr. Gate. 1,619,819; Mar. 8.

Hahn, Charles N., Binghamton, N. Y. Applying heels to shoes. 1,620,344; Mar. 8.

Hald, Herbert, Salem, Oreg., assignor, by mesne assignments, to Pressteel Engineering Corporation. Visible card record. 1,620,547; Mar. 8.

Haines, William T. (See Dunham, B. G., and Haines.)

Haist, Charles A., Fresno, Calif. Fountain pen. 1,620,345; Mar. 8.

Halbach, Howard L., Clarksburg, W. Va., and J. A. Sweet, Pittsburgh, Pa., assignors to Pittsburgh Plate Glass Company. Flattening window glass sheets. 1,620,017; Mar. 8.

Hall, Edward L. (See Rider, Herbert E., assignor.)

Hall, John A., Seattle, Wash. Tubular stone saw. 1,620,255; Mar. 8.

Hallberg, Clay F. (See Dilley, F. M., and Hallberg.)

Halle, Hiram J., New York, N. Y., assignor to Universal Oil Products Company, Chicago, Ill. Apparatus for treating petroleum oil. 1,619,929; Mar. 8.

Hallett, George E. A., assignor to General Motors Research Corporation, Dayton, Ohio. Valve-operating mechanism. 1,619,974; Mar. 8.

Halliwell, John J., Mount Vernon, assignor, by mesne assignments, to R. Hoe and Co., Inc., New York, N. Y. Shock absorber for power plate presses. 1,619,820; Mar. 8.

Hamilton, Harry D., Winthrop, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Manufacture of shoes. 1,620,018; Mar. 8.

Hammer, Ervin J. and O. H., Miller City, Ohio. Beet harvester. 1,620,019; Mar. 8.

Hammer, Orrin H. (See Hammer, Ervin J. and O. H.)

Hammond, Robert O., assignor of one-half to C. H. Ogden and one-half to H. H. Simms, Rochester, N. Y. Lighter for cigars and the like. 1,620,548; Mar. 8.

Hanna Engineering Works. (See Gates, Philetus W., assignor.)

Harber, Edward N. (See Krick, Homer, assignor.)

Hardy, Charles, assignor to Amsco Products Inc., New York, N. Y. Variable condenser. 1,620,020; Mar. 8.

Harmon, James A. (See Nelson, F. L., and Harmon.)

Harmon, Katrina T. (See Harmon, Lawrence E., assignor.)

Harmon, Lawrence E., assignor to K. T. Harmon, Buffalo, N. Y. Trolley wheel. 1,620,203; Mar. 8.

Harper, Le Roy, Kenosha, Wis. Universal joint. 1,620,549; Mar. 8.

Harper, Oswald C., Saskatoon, Saskatchewan, Canada. Automobile bed. 1,620,346; Mar. 8.

Harris, Ford W., Los Angeles, Calif. Gas and oil separator. 1,620,096; Mar. 8.

Harris, Raymond J., Houston, Tex. Flytrap. 1,620,461; Mar. 8.

Hart, Harold W., Los Angeles, Calif. Automatic gas feed. 1,619,931; Mar. 8.

Hart, Harry S. (See Hindahl, David, assignor.)

Hart, Harry S. (See Hoscelt, William J., assignor.)

Hartford-Empire Company. (See Howard, George E., assignor.)

Hartz, John O., Duluth, Minn. Decalcomania transfer sheet. Des. 72,152; Mar. 8.

Hasburg, John W., Chicago, Ill. Follower for paint packages. 1,619,930; Mar. 8.

Hassell, Frank J., et al. (See Cunningham, Roy S., assignor.)

Hawkins, Edgar M., assignor to M. D. Knowlton Company, Rochester, N. Y. Tube-cutting machine. 1,619,975; Mar. 8.

Hawkins, Jepson M., and S. Losey, Covington, Okla. Oil-well pump. 1,620,347; Mar. 8.

Hawkins, William W., Brooklyn, N. Y., assignor to Webster Electric Company, Racine, Wis. Breaker mechanism for ignition magnetos. 1,619,932; Mar. 8.

Hawley Inventions, Incorporated. (See Hawley, John B., jr., assignor.)

Hawley, John B., jr., assignor to Hawley Inventions, Incorporated, Minneapolis, Minn. Form tie for concrete structures. 1,619,933; Mar. 8.

Head, Cecil A., Royal Oak, Mich. Electric radiator. 1,619,865; Mar. 8.

Heald Machine Company, The. (See Turner, A., and Burns, assignors.)

Heard, Edmund F. (See Furman, Eugene C., assignor.)

Heffelfinger, Le Roy W., and L. J. Courtney, Chicago, Ill. Bleeder attachment for air brakes. 1,619,821; Mar. 8.

Heggie, James. (See Corrall, H., and Heggie.)

Heintz Manufacturing Company. (See Lambert, Albert L., assignor.)

Heise, William H., Los Angeles, Calif. Truck elevator utilizing parallel motion. 1,620,256; Mar. 8.

Heising, Raymond A., Millburn, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Frequency indication and control. 1,620,204; Mar. 8.

Henderson, Ada, Wampsville, N. Y. Rubber protector for stockings. 1,619,934; Mar. 8.

Hendlin, Israel. (See Pukt, A. J., and Hendlin.)

Hermani, Henry, assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Duplex closure for display containers. 1,620,156; Mar. 8.

Hermani, Henry, assignor to The Tin Decorating Company of Baltimore, Baltimore, Md. Sheet-metal assembling and working machine. 1,620,205; Mar. 8.

Hernton, Pete, Hulbert, Ark. Cattle guard. 1,620,348; Mar. 8.

Herrly, Clarence J. (See Young, C. O., and Herrly.)

Hickey, John J., Brooklyn, N. Y. Christmas-club saving stamp. Des. 72,153; Mar. 8.

Hickman, William A., West Mystic, Conn. Boat. 1,620,349; Mar. 8.

Hickok Manufacturing Company. (See Eichner, Robert F., assignor.)

Hickok Manufacturing Company. (See Shields, Lowell W., assignor.)

Higgins, Lewis W., Bulan, Ky. Car coupling. 1,620,350; Mar. 8.

Hill, J. Lawrence. (See White, Robert, assignor.)

Hilliard, John D., Schenectady, N. Y., assignor to General Electric Company. Attachment for oil switches. 1,620,155; Mar. 8.

Hilligardt, Erich, Akron, Ohio, assignor to Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung, Friedrichshafen, Germany. Controlling device for ballast containers in airships. 1,620,462; Mar. 8.

Hindahl, David, assignor to H. S. Hart, Chicago, Ill. Dump-door mechanism. 1,620,097; Mar. 8.

Hitchcock, Halbert K., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Apparatus for supplying polishing material to a series of polishing machines. 1,620,021; Mar. 8.

Hnilo, Frank, and J. Schultz, Cicero, Ill. Microscopic-slide staining and drying apparatus. 1,620,351; Mar. 8.

Hoe, R., and Co. (See Halliwell, John J., assignor.)

Hoeschen, Henry A., assignor of one-half to J. L. Baker, Omaha, Nebr. Pressure-actuated control device. 1,619,866; Mar. 8.

Hoffer, Le Roy H., Nyack, assignor to T. E. Murray, Brooklyn, N. Y. Electric welding and the like. 1,620,206; Mar. 8.

Holcroft, Charles T., Detroit, and C. E. Doll, Mount Clemens, Mich. Firing ceramic and other products. 1,620,022; Mar. 8.

Holtz, Karl, assignor to Carl Lindström Aktiengesellschaft, Berlin, Germany. Talking machine. 1,620,257; Mar. 8.

Holtzman, Minard, Bexley, Ohio. Radiotable. 1,620,352; Mar. 8.

Homan, Walter A., and C. T. Austin, Denver, Colo. Parking meter. 1,620,098; Mar. 8.

Homeland Mfg. Co., The. (See Matthai, William H., assignor.)

Hopkins, Elmer. (See Hover, Loren, assignor.)

Hopkins, Homer S. (See Conklin, W. F., Hopkins, and Hover.)

Horn & Brannen Manufacturing Co., The. (See Horn, Herman, jr., assignor.)

Horn, Herman, jr., assignor to The Horn & Brannen Manufacturing Co., Philadelphia, Pa. Floor lamp. 1,619,976; Mar. 8.

Horney, Odus C., U. S. Army, Philadelphia, Pa. Primer for cartridges. 1,619,867; Mar. 8.

Hoscelt, William J., assignor to H. S. Hart, Chicago, Ill. Dump-car-door control. 1,620,023; Mar. 8.

Hosch, Greene C., assignor to The Measuregraph Company, St. Louis, Mo. Shutter for measuring-machine charts. 1,619,935; Mar. 8.

Hoshafian, Nishan, Forest Hills, N. Y. Wave and tide motor. 1,620,258; Mar. 8.

Hothersall, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Pouring spout. 1,620,024; Mar. 8.

Hothersall, John M., Brooklyn, assignor to American Can Company, New York, N. Y. Automatic box body and cover assembling apparatus. 1,620,025; Mar. 8.

Hover, John M. (See Conklin, W. F., Hopkins, and Hover.)

Hover, Loren, assignor of one-half to E. Hopkins, Saginaw, Mich. Cultivator attachment for tractors. 1,620,099; Mar. 8.

Howard, George E., Butler, Pa., assignor, by mesne assignments, to Hartford-Empire Company, Hartford, Conn. Method and apparatus for feeding molten glass. 1,620,207; Mar. 8.

Howard, Henry, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Insecticide. 1,620,208; Mar. 8.

Howe, Fred C., Pasadena, Calif. Spotlight. 1,619,936; Mar. 8.

Howe, Ralph A., Washington, D. C. Needle. 1,620,550; Mar. 8.

Hoxton, Llewellyn G., University, Va. Braking engine-driven vehicles. 1,620,100; Mar. 8.

Huber, Walter, Pforzheim, Germany. Watchcase. 1,619,822; Mar. 8.

Hudgens, Albert C., assignor to Loom Lay Patch Company, Greenwood, S. C. Checkstrap holder. 1,620,463; Mar. 8.

Huff, Lyman C., assignor to Universal Oil Products Company, Chicago, Ill. Valve. 1,619,937; Mar. 8.

Huff, Lyman C., assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for treating oils. 1,619,977; Mar. 8.

Huff, Omer, Fresno, Calif. Blow-off cock. 1,620,464; Mar. 8.

Huffman, Charles A., assignor to The Long-Bell Lumber Company, Longview, Wash. Pacific coast type trimmer with tightener take-up. 1,620,101; Mar. 8.

Hughes, Guy N., Atlanta, Ga. Fruit-juice-extracting machine. 1,620,551; Mar. 8.

Hulse, Edison G., assignor to Kelly-Springfield Tire Company, Cumberland, Md. Tire flap. 1,619,868; Mar. 8.

Hunt, John H., assignor to General Motors Research Corporation, Dayton, Ohio. Control of engine-oil heaters. 1,619,978; Mar. 8.

Hutchison, Miller R. (See Schick, Jacob, assignor.)

Hydraulic Brake Company. (See Loughead, Malcolm, assignor.)

Hyman, Henry & Co. (See Kleinman, Jack, assignor.)

Ihne, Charles, Baltimore, Md. Spray nozzle. 1,620,209; Mar. 8.

Indiana Canning Machinery Company. (See Lindley, Stacey B., assignor.)

Indiana Fibre Products Company. (See Bell, G. A., and Carson, assignors.)

Industrial Controller Company. (See Van Valkenburg, Hermon L., assignor).

International Scale Company. (See Osgood, L. A., and Wolf, assignors.)

Ipag International Patent Exploiting Company. (See Simmchen, Wilhelm, assignor.)

Jackson, Arthur H. (See Jones, E. P., and Jackson.)

Jackson, Lloyd E., Pittsburgh, Pa. Treating hydrocarbon oils. 1,619,869; Mar. 8.

Jackson Machine & Tool Company. (See Dowley, Jesse E., assignor.)

Jacobs, Ernest H., and C. F. Schoonmaker, Chicago, Ill. Electric-transmission system. 1,620,552; Mar. 8.

Jacobson, Conrad C., Glen Ridge, assignor to The Artesian Well Engineering Co., Inc., Newark, N. J. Automatic control for air lifts. 1,620,210; Mar. 8.

Jaffe, Abe, Philadelphia, Pa. Necktie holder. 1,620,553; Mar. 8.

Jelley, Henry, Birmingham, and J. Jelley, Coventry, England. Manufacture of cycle and like saddles. 1,620,554; Mar. 8.

Jelley, James. (See Jelley, Henry and J.)

Jenckick, Stephen, Cleveland, Ohio. Starting device for internal-combustion engines. 1,620,102; Mar. 8.

Jennings, Henry B., jr., Long Island, Va. Loose-leaf binder. 1,620,103; Mar. 8.

Jennings, Henry B., jr., Leesburg, Va. Loose-leaf binder. 1,620,104; Mar. 8.

Jennings, Henry B., jr., Leesburg, Va. Loose-leaf binder. 1,620,105; Mar. 8.

Jerabek, Benard D., Hutchinson, Minn. Wheel puller. 1,620,211; Mar. 8.

Jersey-Creme Company. (See Boswell, John S., assignor.)

Johnson, Alrik, Kelliher, Saskatchewan, Canada. Safety bumper. 1,620,106; Mar. 8.

Johnson, Arthur S. (See Rhoades, A. E., and Johnson.)

Johnson, Emil L., et al. (See Knistrom, Joseph, assignor.)

Johnson, Ernest E., Scotia, N. Y., assignor to General Electric Company. Displacement-responsive device. 1,620,465; Mar. 8.

Johnson, John M., Kansas City, Mo., assignor to The United States Automatic Fire Alarm Company. Fire-alarm system. 1,620,107; Mar. 8.

Johnson, John R., Greenwich, Conn. Fire pot. 1,620,353; Mar. 8.

Johnson, William M., assignor of one-half to F. E. Brown, Pomona, Calif. License plate. Des. 72,154; Mar. 8.

Jones, Benjamin W., Schenectady, N. Y., assignor to General Electric Company. Electromagnetic device. 1,620,556; Mar. 8.

Jones, Benjamin W., and N. A. Wolfe, Schenectady, N. Y., assignors to General Electric Company. Electromagnetic device for alternating-current circuits. 1,620,555; Mar. 8.

Jones, Edward P., Ellesmere Port, and A. H. Jackson, Manchester, England. Machine for shearing metal bars. 1,620,354; Mar. 8.

Jones, James M., Lewisburg, Tenn. Railway and highway crossing gate. 1,620,026; Mar. 8.

Jones, John O., Dallas, Tex. Valve for engines and motors. 1,620,355; Mar. 8.

Jones, William J., Carthage, Mo. Stone and marble saw. 1,620,466; Mar. 8.

Jorgensen, Clarence H. (See Jorgensen, Peter J. and C. H.)
Jorgensen, Peter J. and C. H., Chicago, Ill. Lubricant cup. 1,620,557; Mar. 8.
Jory, William E., Martinez, Calif. Automobile headlight. 1,620,356; Mar. 8.
Josephs, Benjamin, et al. (See Methot, John A., assignor.)
Jourdan, Felix, Rome, Italy. Treatment of leucite and other sodium and potassium silicates with lime for the purpose of extracting potassium or sodium and aluminum values. 1,620,212; Mar. 8.
Joyce, James D., Philadelphia, Pa. Unwinding device. 1,620,558; Mar. 8.
Jublonsky, Max, San Francisco, Calif. Automobile bumper. 1,620,357; Mar. 8.
Julian, Gideon, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Sole-rounding machine. 1,620,027; Mar. 8.
Junonville, Edward, New Orleans, La. Combined mop and wringer. 1,620,028; Mar. 8.
Jury, Alfred E., Rutherford, N. J., and O. H. Smith, assignors to General Rubber Company, New York, N. Y. Preserving latex and product. 1,619,938; Mar. 8.
Kaden, Harry E., assignor to The Art Specialty Company, Cleveland, Ohio. Lighting fixture. Des. 72,155; Mar. 8.
Kanawha Manufacturing Company. (See Schadel, William F., assignor.)
Kaplan, Morris L., Hazleton, Pa. Cutting board and guide. 1,619,940; Mar. 8.
Kaplan, Morris L., and M. Brandish, Hazleton, Pa. Collar-stretching machine. 1,619,939; Mar. 8.
Karle, John D., Roselle Park, assignor to Diehl Manufacturing Company, Elizabeth, N. J. Medallion. 1,620,259; Mar. 8.
Kasantzeff, Florentin, Berlin, Germany. One-lined air brake. 1,619,979; Mar. 8.
Kearney, Joseph J., Henryetta, Okla. Swivel-socket closure. 1,620,029; Mar. 8.
Keenan, Edward T., Brewster, Fla. Vibration machine for screens. 1,620,213; Mar. 8.
Kell, James R., et al. (See Cunningham, Roy S., assignor.)
Kellogg, Daniel P., Los Angeles, Calif. Bolt or rod straightening machine. 1,620,260; Mar. 8.
Kelly-Springfield Tire Company. (See Hulse, Edison G., assignor.)
Kelsey, Cadwallader W., Short Hills, N. J. Steering gear. 1,619,980; Mar. 8.
Kennedy, Frank W., assignor to De Laval Steam Turbine Company, Trenton, N. J. Rotary gear pump. 1,620,261; Mar. 8.
Kennedy, William P., New York, N. Y. Motor vehicle. 1,619,941; Mar. 8.
Kenyon, William H., assignor to Entwisle & Kenyon Limited, Accrington, England. Carpet sweeper. 1,620,358; Mar. 8.
Key, James F., Sierre Madre, Calif., assignor to First Trust and Savings Bank of Pasadena, trustee. Valve. 1,620,108; Mar. 8.
Kidd, William J., Walnutport, Pa. Low-speed pedal actuating and holding means. 1,620,467; Mar. 8.
Killefer Manufacturing Company. (See Watters, Daniel M., assignor.)
King, George A., F. E. Warner, and E. H. Tompkins, assignors to Scovill Manufacturing Company, Waterbury, Conn. Mechanism for setting carpet fasteners. 1,620,468; Mar. 8.
King, George D. (See Brookby, H. E., and King.)
Kirchhoff, William G., assignor to The J. H. Day Company, Cincinnati, Ohio. Dough molder. 1,620,559; Mar. 8.
Kirkhoff, Samuel R., Stowe, Pa. Clamp. 1,620,469; Mar. 8.
Kirkpatrick, Richard J., Dodge City, Kans. Valve-spring compressor. 1,619,870; Mar. 8.
Kirnbauer, Michael, Forest Park, Ill. Check for garage-door-closing means. 1,620,109; Mar. 8.
Klaboe, Ralph, Chicago, Ill. Combination tool. 1,620,262; Mar. 8.
Klausmeyer, David C., assignor to The Cincinnati Bickford Tool Company, Cincinnati, Ohio. Belt shifter. 1,620,214; Mar. 8.
Klebanoff, David, et al. (See Grossman, Samuel, assignor.)
Klein, Karl, St. Louis, Mo. Motor vehicle. 1,619,823; Mar. 8.
Kleinman, Jack, Bronx, assignor to Henry Hyman & Co., Inc., New York, N. Y. Telephone receiver. 1,620,263; Mar. 8.
Kleinschmidt, Edward E., Long Island City, N. Y., assignors to Morkrum-Kleinschmidt Corporation, Chicago, Ill. Motor-control system. 1,620,359; Mar. 8.
Kllesrath, Victor W. (See Bragg, C. S., and Kllesrath.)
Klinch Lath Corporation. (See Strand, Joseph, assignor.)
Klingaman, Lloyd L., Kelso, Wash. Actuating attachment for rims. 1,620,470; Mar. 8.
Knistrom, Joseph, assignor of one-half to E. L. Johnson and one-half to O. Lundsten, Attleboro, Mass. Belt buckle. 1,620,157; Mar. 8.
Knowlton, M. D., Company. (See Hawkins, Edgar M., assignor.)
Knut, Sargeant P., Washington, D. C. Sound magnifier. 1,619,981; Mar. 8.
Koeppe, Herman F., Detroit, Mich. Tank. 1,620,471; Mar. 8.
Koford, James M., trustee. (See Van Emon, Burton C., assignor.)
Kohn, Koby, New York, N. Y., assignor to Victory Sparkler & Specialty Co., Elkton, Md. Color changer for sparklers and analogous lights. 1,620,560; Mar. 8.
Kohn, Koby, New York, N. Y., assignor to Victory Sparkler & Specialty Co., Elkton, Md. Amusement and protective device. 1,620,561; Mar. 8.
Kolmar Laboratories. (See Marsek, Frederick A., assignor.)
Koning, Willem. (See De Jong, H., and Koning.)
Konoff, Alexander, assignor to Overland Metal Novelty Co. Inc., New York, N. Y. Eye set. 1,619,824; Mar. 8.
Koppe, Alexander T., Chicago, Ill., assignor, by mesne assignments, to Directoplate Corporation. Machine for making offset press plates. Re16,567; Mar. 8.
Kragen, Thomas R., and T. A. Errett, Los Angeles, Calif. Sterilizer. 1,620,360; Mar. 8.
Kreiss, Charles F. (See Kreiss, Edward J. and C. F.)
Kreiss, Edward J. and C. F., assignors to Kreiss Sign Co., Inc., Buffalo, N. Y. Illuminated sign. 1,620,472; Mar. 8.
Kreiss, Edward J. and C. F., assignors to Kreiss Sign Co., Inc., Buffalo, N. Y. Illuminated sign. 1,620,473; Mar. 8.
Kreiss Sign Co., Inc. (See Kreiss, Edward J. and C. F., assignors.)
Krick, Homer, assignor of one-half to E. N. Harber, Fort Wayne, Ind. Gang mail box. 1,620,474; Mar. 8.
Krieg, Walter L., assignor to Bendix Brake Company, Chicago, Ill. Brake shoe. 1,620,030; Mar. 8.
Kroczek, Anton M., Chicago, Ill. Birdcage. 1,620,361; Mar. 8.
Kurlloff, Samuel, assignor to Lehman Brothers Silverware Corporation, New York, N. Y. Beverage urn or similar article. Des. 72,156; Mar. 8.
Labbe, Itoland A., Onaga, Kans. Device for supplying moistened air to internal-combustion engines. 1,619,871; Mar. 8.
Lachman, Laurence S. (See Lachman, Maurice and L. S.)
Lachman, Maurice and L. S., New York, N. Y., assignors to Universal Electric Welding Company. Girder. 1,620,362; Mar. 8.
Lambert, Albert L., Narberth, assignor to Heintz Manufacturing Company, Philadelphia, Pa. Vehicle door construction. 1,620,614; Mar. 8.
Lambert, Albert L., Narbeth, assignor to Heintz Manufacturing Company, Philadelphia, Pa. Vehicle door construction. 1,620,615; Mar. 8.
Lambert, Albert L., assignor to Heintz Manufacturing Company, Philadelphia, Pa. Making axle housings. 1,620,616; Mar. 8.
Lamberton, Jack H., Santa Monica, Calif. Shirt. Des. 72,157; Mar. 8.
Landman, Herman, Kansas City, Mo. Ice-cream-dipper mold. 1,620,110; Mar. 8.
Lane, Edwin, assignor to Carolyn Laundry, New York, N. Y. Laundry check. 1,620,158; Mar. 8.
Langer, Julius, Hamburg, Germany. Fire bridge. 1,620,215; Mar. 8.
Lanning, James K., Fall River, Mass. Half lap for combing textile fibers. 1,620,031; Mar. 8.
Larkin, Arthur J., Council Bluffs, Iowa, assignor of one-third to J. J. Dodds, Omaha, Nebr. Power wheel. 1,620,363; Mar. 8.
Lashar, Thomas B., Fairfield, Conn., and T. H. Lashar, Chicago, Ill., assignors to Associated Silver Company, Chicago, Ill. Silver-reenforced tableware and making the same. 1,619,872; Mar. 8.
Lashar, Thomas H. (See Lashar, Thomas B., and T. H.)
Latourell, Charles H., Heppner, Oreg. Gun sight. 1,620,364; Mar. 8.
Lawler, Chester R. (See Sannar, J. T., and Lawler.)
Lawrence, Ruben B., Bellevue, assignor to Federal Laboratories, Inc., Pittsburgh, Pa. Hand grenade. 1,620,475; Mar. 8.
Lawton, Mortimer P., assignor to Atlantic Steel Company, Atlanta, Ga. Band-bending and buckle-attaching machine. 1,619,873; Mar. 8.
Lazore, Inc. (See Claude, Georges, assignor.)
Lee, George P., East Stroudsburg, Pa. Automobile jack. 1,619,942; Mar. 8.
Lee, Leif, Youngstown, Ohio. Rolling mill. 1,620,476; Mar. 8.
Lehman Brothers Silverware Corporation. (See Kurlloff, Samuel, assignor.)
Lehman, Max R., assignor to Orbon Stove Co., Belleville, Ill. Stove. Des. 72,158; Mar. 8.
Lehr, Louis, Brighton Heights, assignor to S. Bruner, Far Rockaway, N. Y. Buckle. 1,620,216; Mar. 8.
Lehrecke, Hans, Frankfort-on-Main, Germany, assignor to The Roessler & Hasslacher Chemical Company, New York, N. Y. Evolution of hydrocyanic acid. 1,620,365; Mar. 8.
Lehwess, Edouard B., Paris, France. Clockwork mechanism. 1,619,943; Mar. 8.
Leichter, Philip, New York, N. Y. Shirt neckband and making the same. 1,620,477; Mar. 8.
Leonard, Frank P., Troy, N. Y., assignor of one-half to F. C. Claessens, Troy, N. Y. Nail. 1,619,944; Mar. 8.

Leonard, Peter G., Tulsa, Okla., assignor to Bovaird and Seyfang Manufacturing Company, Bradford, Pa. Clutch. Re16,568; Mar. 8.
Leslie, Maud, Paintsville, Ky. Curtain. 1,619,945. Mar. 8.
Levy, Samuel S., Boston, Mass. Window shade. 1,620,159; Mar. 8.
Lewis, Edward D., Elmira, N. Y. Oil-burning apparatus. 1,620,111; Mar. 8.
Lewis, Stephen, Martins Ferry, Ohio. Shock absorber for vehicles. 1,620,112; Mar. 8.
Libbey Glass Manufacturing Company, The. (See Ratner, Richard L., assignor.)
Licht, William I., Brooklyn, N. Y. Radio extension conductor and reel. 1,620,562; Mar. 8.
Lightship Cloth Board Corporation. (See Smith, Harry B., assignor.)
Lincoln Manufacturing Company. (See Airo, Sally, assignor.)
Lincoln Manufacturing Company. (See Aspinwall, Robert S., assignor.)
Lincoln Meter Company Limited, The. (See Paine, Louis A., assignor.)
Lind, Frederick A., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Tire holder. 1,620,478; Mar. 8.
Linde Air Products Company, The. (See Carter, Glenn O., assignor.)
Lindemann, Frederick W., St. Paul, Minn. Garment press. 1,620,366; Mar. 8.
Lindemann, Oscar, Tompkinsville, N. Y. Birdcage. Des. 72,159; Mar. 8.
Lindh, Carl R., et al. (See Madsen, Gustav N., assignor.)
Lindley, Stacey B., assignor to Indiana Canning Machinery Company, Indianapolis, Ind. Turnover table for vegetables and fruits. 1,620,217; Mar. 8.
Lindström, Carl, Aktiengesellschaft. (See Holtz, Karl, assignor.)
Link-Belt Company. (See Pollak, Solomon, assignor.)
Lion, Henry, Paris, France. Sound-purifying device. 1,620,367; Mar. 8.
Lipman, Adolph, assignor to Venus Brassiere Co., Chicago, Ill. Corset. 1,619,874; Mar. 8.
Live Leather Products, Inc. (See Martin, Horace J., assignor.)
Livergood, Gerald R. (See Nixon, J. D., and Livergood.)
Lloyd, Harold M., Los Angeles, Calif. Lamp post. Des. 72,160; Mar. 8.
Lockwood, Aleatha H., Hartford, Conn. Maternity corset. 1,620,264; Mar. 8.
Locomotive Terminal Improvement Co., The. (See Summers, Bertrand S., assignor.)
Loftus, Thomas L., assignor to E. V. Timm, Denver, Colo. Excavating machine. 1,619,875; Mar. 8.
Lomax, Clarence E., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,620,113; Mar. 8.
Long-Bell Lumber Company, The. (See Huffman, Charles A., assignor.)
Longworth, Arthur, assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y. Radio receiving loop. Des. 72,161; Mar. 8.
Loom Lay Patch Company. (See Hudgens, Albert C., assignor.)
Loomis, Virgil V., assignor to United States Glass Company, Pittsburgh, Pa. Goblet. Des. 72,162; Mar. 8.
Losey, Sylvester. (See Hawkins, J. M., and Losey.)
Loughead, Malcolm, Detroit, Mich., assignor, by mesne assignments, to Hydraulic Brake Company, Los Angeles, Calif. Hose fitting. 1,620,114; Mar. 8.
Lox Seal Corporation, The. (See Behrman, Marcus B., assignor.)
Lucas, Joseph C., Blandinsville, Ill. Bank protector. 1,619,982; Mar. 8.
Lucke, Charles E., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Internal-combustion engine. 1,619,825; Mar. 8.
Ludwick, Herbert V., assignor to Budd Wheel Company, Philadelphia, Pa. Brake-applying mechanism for motor vehicles. 1,620,265; Mar. 8.
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Arnstein, Karl, assignor.)
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Dürr, Ludwig, assignor.)
Luftschiffbau Zeppelin Gesellschaft mit beschränkter Haftung. (See Hilligardt, Erich, assignor.)
Lundsten, Olof, et al. (See Knistrom, Joseph, assignor.)
Lynch, Patrick H. (See McKay, J. A., and Lynch.)
Maanum, Dedrick A., Hancock, Minn. Can washer. 1,620,116; Mar. 8.
Mackenzie, Fred L. (See Goddu, G., and Mackenzie.)
MacKenzie, Frederick J., Trenton, N. J. Hydraulic brake mechanism. 1,620,115; Mar. 8.
Maddox, Notley, Los Angeles, Calif. Adjustable sawing machine. 1,620,370; Mar. 8.
Maddox, Notley, Los Angeles, Calif. Adjustable boring machine. 1,620,371; Mar. 8.
Madsen, Gustav N., assignor of one-third to C. R. Lindh and one-third to E. B. Gustafson, Minneapolis, Minn. Electric water heater. 1,620,117; Mar. 8.
Magee, John, Hartford, Conn. Toothbrush and container for same. 1,619,946; Mar. 8.
Maider, Martha M., Akron, Ohio. Shoulder-strap fastener. 1,620,372; Mar. 8.
Makin, John S., Philadelphia, Pa. Automatic humidifier. 1,620,373; Mar. 8.
Makowski, John F., Stockton, Calif., assignor, by mesne assignments, to Fire Proof Wall Company, Reno, Nev. Mounting lathing structures for plaster walls. 1,619,947; Mar. 8.
Malligan, Joseph, Point Marion, Pa. Transmission band. 1,619,983; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Embroidered cloth bridge-table cover or the like. Des. 72,163; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace table cover or the like. Des. 72,164; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace table cover or the like. Des. 72,165; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace table cover or the like. Des. 72,166; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace tray cover or the like. Des. 72,167; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace scarf or the like. Des. 72,168; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace mat or the like. Des. 72,169; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace mat or the like. Des. 72,170; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace mat or the like. Des. 72,171; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace mat or the like. Des. 72,172; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace mat or the like. Des. 72,173; Mar 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace mat or the like. Des. 72,174; Mar. 8.
Mallouk, Salim N., Brooklyn, N. Y. Lace mat or the like. Des. 72,175; Mar. 8.
Maloney, Edward J., Long Island City, N. Y. Motorized handsaw. 1,620,374; Mar. 8.
Mangiameli, Francesco, Corleone, Italy. Device for proportionate feeding of gases. 1,619,948; Mar. 8.
Mannes, Leopold D., New York, N. Y., and L. Godowsky, jr., Los Angeles, Calif. Method and apparatus for producing colored motion pictures. 1,619,949; Mar. 8.
Mapes, Clarence T., Pittsburgh, Pa. Underreamer. 1,619,984; Mar. 8.
Markert, Franz, Lindenruh-Glogau, Germany, assignor to Mount Clemens Pottery Company, Mount Clemens, Mich. Plate or similar article. Des. 73,176; Mar. 8.
Marsek, Frederick A., assignor to Kolmar Laboratories, Milwaukee, Wis. Combined face powder and skin bleach. 1,620,269; Mar. 8.
Marsh, Louis, and O. J. Dufresne, St. Paul, Minn.; said Marsh assignor to said Dufresne. Fisherman's bait trap and carrier. 1,620,617; Mar. 8.
Marsh, Thomas A., Chicago, Ill., assignor to Green Engineering Company, East Chicago, Ind. Stoker furnace. 1,620,270; Mar. 8.
Martin, Frederick W., Brooklyn, N. Y., assignor to Franklin Railway Supply Company. Lubricator. 1,620,479; Mar. 8.
Martin, Horace J., Brookline, assignor, by mesne assignments, to Live Leather Products, Inc., Cambridge, Mass. Elastic strapping. 1,620,162; Mar. 8.
Marty, Benjamin F., Friant, Calif. Well pump. 1,619,950; Mar. 8.
Marx, Carl, Wyoming, N. J., assignor of one-half to R. Weiss, New York, N. Y. Preparation of concentrated onion juice. 1,619,826; Mar. 8.
Mason, Richard C., Tulsa, Okla. Power transmission. 1,619,876; Mar. 8.
Mathews, Fred. (See Strid, Sven J., assignor.)
Mathews, Fred, Chicago, Ill. Mounting for brake gears. 1,620,271; Mar. 8.
Mattern, George W., assignor to The Crawford, McGregor and Canby Company, Dayton, Ohio. Golf club. 1,620,118; Mar. 8.
Matthni, William H., assignor to The Homeland Mfg. Co., Baltimore, Md. Handle for tools. 1,620,480; Mar. 8.
May, Charles J., Mishawaka, Ind. Jar holder. 1,620,272; Mar. 8.
Mayer, Benjamin, assignor to The Pronto Manufacturing Company, Baltimore, Md. Electric cooking device. 1,620,602; Mar. 8.
Mayer, Emil M., Cincinnati, Ohio. Child's vehicle. 1,620,563; Mar. 8.
Mayer, Fred G., assignor to Starr Piano Company, Richmond, Ind. Combined radio and phonograph appsratus. 1,620,481; Mar. 8.
Mayer, Karl, Vienna, Austria. Turntable. 1,620,273; Mar. 8.
Maynes Corporation. (See Maynes, Hyla F., assignor.)
Maynes, Hyla F., North Tonawanda, N. Y., assignor to Maynes Corporation, Dover, Del. Amusement ride. Re16,569; Mar. 8.
McCabe, Thomas, Arnold Borough, Pa. Plate-lifting mechanisms for rolling mills. 1,620,032; Mar. 8.
McCallum, Alexander J., Little Falls, N. Y. Hose or socks. 1,620,160; Mar. 8.
McCarthy, Joseph A., Jamaica, N. Y. Extracting soot and grease from flue gases. 1,620,266; Mar. 8.
McClelland, Bert, Sellersville, Pa., assignor to United States Gauge Company, New York, N. Y. Pressure gauge. 1,620,482; Mar. 8.
McDaniel, Samuel, Knoxville, Tenn. Water key. 1,620,161; Mar. 8.
McDougall, David. (See Melville, A., and McDougall.)

McElhaney, Frank, Morgantown, W. Va. Aeroplane. 1,620,368; Mar. 8.
McElroy, Charles W., Philadelphia, Pa. Attachment for saxophones. 1,620,364; Mar. 8.
McElwain, James, assignor of one-half to J. E. Wright, sr., Wheeling, W. Va. Method of and apparatus for indicating the amount of liquid in a supply tank. 1,620,606; Mar. 8.
McElwee, Clayton R. (See Whisler, J. C., and McElwee.)
McGuire, Hugh W. (See Cobb, William J., assignor.)
McKay, John A., Manufacturing Company, The. (See McKay, J. A., and Lynch, assignors.)
McKay, John A., and P. H. Lynch, assignors to The John A. McKay Manufacturing Company, Inc., Dunn, N. C. Lock for the wheeled axles of stalk cutters and other wheeled agricultural implements. 1,620,369; Mar. 8.
McKean, John O., assignor to Foster Machine Company, Westfield, Mass. Winding machine. 1,620,267; Mar. 8.
McKeown, Joseph B., Grantwood, N. J. Explosive chamber for gas engines. 1,620,565; Mar. 8.
McKibben, Robert E., Warrendale, Pa. Shoe. 1,620,612; Mar. 8.
McMahon, William F., Riverside, Calif. Noiseless elevator safety stop. 1,620,033; Mar. 8.
McMinn, John E., assignor to Peerless Manufacturing Company, Louisville, Ky. Heater. Des. 72,177; Mar. 8.
McPhail, Ewen, Missoula, Mont. Luggage carrier. 1,620,218; Mar. 8.
McVicker, Emery M., Milwaukee, Wis. Conveyer. 1,620,268; Mar. 8.
Meadowcroft, Joseph W., assignor to Edward G. Budd Manufacturing Company, Philadelphia, Pa. Automatic electric welding machine. 1,620,274; Mar. 8.
Measurgraph Company, The. (See Hosch, Greene C., assignor.)
Melhinch, Charles L., Carbondale, Pa. Automatic switch. 1,619,877; Mar. 8.
Meling, Gustave, Flushing, N. Y. Amusement device. 1,620,375; Mar. 8.
Melville, Alexander, and D. McDougall, Glasgow, Scotland. Machinery for bending metallic rods, wires, or the like. 1,619,951; Mar. 8.
Mercer, Harry, McDonald, Ohio. Rolling-mill guide. 1,620,566; Mar. 8.
Mercer, Henry S. (See Waters, Victor J., assignor.)
Mershon, Ralph D., New York, N. Y. Excitation of electrolytic condensers. 1,620,119; Mar. 8.
Metal & Thermit Corporation. (See Taurman, Alphonso, assignor.)
Methot, John A., assignor to B. Josephs and J. H. Corash, Worcester, Mass. Small hand bag. Des. 72,178; Mar. 8.
Meyer, Frank J. (See Baer, Abraham L., assignor.)
Meyerson, Max, New York, N. Y. Card holder. 1,619,827; Mar. 8.
Michelson, Albert S., assignor to The Akron Rubber Mold and Machine Company, Akron, Ohio. Tire. Des. 72,179; Mar. 8.
Miehle, Robert F., jr., assignor to The Bell & Howell Company, Chicago, Ill. Reel. 1,619,952; Mar. 8.
Mikulic, Milos N., Kansas City, Mo. Automatic alternating-current cut-out device for polyphase circuits. 1,620,483; Mar. 8.
Miller, Frank P., Chicago, Ill. Accessory container for railway use. 1,620,376; Mar. 8.
Miller Improved Gas Engine Company, The. (See Watts, Elmer A., assignor.)
Miller, Jane R., Los Angeles, Calif. Necklace or similar article. Des. 72,180; Mar. 8.
Miller, Joseph N. (See Ball, Joseph S., assignor.)
Milliff, Frank A. and J. A., Los Angeles, Calif. Process of and apparatus for refining petroleum. 1,620,163; Mar. 8.
Milliff, Frank A. and J. A., Los Angeles, Calif. Adjustable weir. 1,620,164; Mar. 8.
Milliff, John A. (See Milliff, Frank A. and J. A.)
Millward, George, Marquette, Mich. Automobile ladder. 1,620,377; Mar. 8.
Minneapolis Dredging Co. (See Casey, Vasco F., assignor.)
Minutillo, Francesco, New York, N. Y. Auxiliary motor-drive mechanism for player pianos. 1,620,484; Mar. 8.
Mistretta, Antonio, New York, N. Y. Trimming device for embroidery machines. 1,620,378; Mar. 8.
Mitchell, Charlie B., Los Angeles, Calif. Direction signal for motor vehicles. 1,620,379; Mar. 8.
Mobley, Ormonde O. (See Goulas, Henry, assignor.)
Monckton, Charles E. (See Ball, Everett R., assignor.)
Monthe, William. (See Densmore, William M., assignor.)
Moore, George L., Bethlehem, Pa. Rail anchor. 1,620,275; Mar. 8.
Morgan, Harry D., and F. P. Bushey, San Francisco, Calif.; said Bushey assignor to said Morgan. Dosage spoon. 1,619,878; Mar. 8.
Morkrum-Kleinschmidt Corporation. (See Kleinschmidt, Edward E., assignor.)
Morris, Leonard D., Chicago, Ill. Sound amplifier. Des. 72,181; Mar. 8.
Morrison, Samuel E., Lynn, Mass. Gradometer. 1,620,380; Mar. 8.
Morshead, Howard, and H. H. Wigglesworth, assignor to The Philadelphia Drying Machinery Company, Philadelphia, Pa. Drying machine. 1,620,120; Mar. 8.
Mortland, George W., Lead, S. Dak. Ore-grinding machine. 1,620,276; Mar. 8.
Morton, Charles, Pawtucket, R. I. Spinning frame. 1,619,985; Mar. 8.
Morton, Charles, Pawtucket, R. I. Spinning frame. 1,619,986; Mar. 8.
Morton, Harry D., New York, N. Y. Guide and conductor for welding electrodes. 1,620,220; Mar. 8.
Morton, Harry D., New York, N. Y., assignor to Automatic Arc-Welding Company, Detroit, Mich. Arc-welding system. 1,620,219; Mar. 8.
Mose, Carl C., Chicago, Ill., assignor to The Studebaker Corporation, South Bend, Ind. Automobile radiator-cap ornament. Des. 72,182; Mar. 8.
Mount Clemens Pottery Company. (See Markert, Franz, assignor.)
Moyers, George F., Osceola, Iowa. Poultry feeder. 1,620,607; Mar. 8.
Munson, Charles A., New Britain, Conn. Forming hinges. 1,620,603; Mar. 8.
Munson, Sweney, Scammon, Kans. Lubricator. 1,620,381; Mar. 8.
Murphy, Fred K., and R. W. Retterer, Indianapolis, Ind. Fluid-operable lubricator for engines. 1,620,121; Mar. 8.
Murray, Thomas E. (See Hoffer, Le Roy H., assignor.)
Mutscheller, Arthur, New York, N. Y. Electric phonograph record and making the same. 1,620,122; Mar. 8.
Myers, Cornelius T., Avenel, N. J. Magazine lubricating means. 1,620,277; Mar. 8.
Myers, Cornelius T., Avenel, N. J. Magazine lubricating means. 1,620,278; Mar. 8.
Nagel-Chase Mfg. Co., The. (See Nagel, Theodore, assignor.)
Nagel, Theodore, assignor to The Nagel-Chase Mfg. Co., Chicago, Ill. Vapor burner. 1,620,123; Mar. 8.
Nakagawa, Shoichi, San Jose, Calif. Combined side wing and sun and rain shield for automobiles. 1,619,879; Mar. 8.
National Manufacturing Company. (See Pemberton, Harold, assignor.)
Navarre, Placide, Paris, assignor to Société Fraisse Freres, Cavaillon, and Société P. Navarre et Fils, Paris, France. Apparatus for continuous extraction by pressure. 1,620,567; Mar. 8.
Neal, Frank F., assignor of one-half to F. W. Neal, Chicago, Ill. Money-changer holder. 1,619,880; Mar. 8.
Neal, Frank W. (See Neal, Frank F., assignor.)
Neidich, Samuel A., Edgewater Park, N. J. Ribbon-spool clutch. 1,620,279; Mar. 8.
Nelson, Fyan L., and J. A. Harmon, Uvalde, Tex. Equalizer for four-wheel brakes. 1,620,221; Mar. 8.
Nelson, Nels H., Minneapolis, Minn. Vehicle signal. Des. 72,183; Mar. 8.
Neumann, R., Hardware Co., The. (See Stuart, Frank T., assignor.)
Newton, Charles T., Glendale, Calif. Dispenser. 1,620,280; Mar. 8.
Nielsen, George P., Seattle, Wash. Internal-combustion engine. 1,620,124; Mar. 8.
Nixon, Jeddy D., and G. R. Livergood, Houston, Tex. Pump. 1,620,222; Mar. 8.
Norcross, Daniel E., Dallas, Tex. Steering-wheel knob. 1,620,223; Mar. 8.
North, Clayton O., Tallmadge Township, Summit County, Ohio. Higher aldehyde derivatives of reaction products of aldehydes and amines and making same. 1,619,953; Mar. 8.
Norton, William T., jr., Chicago, Ill. Vehicle brake. 1,620,485; Mar. 8.
Novadel Process Corporation. (See Gelissen, Henri C. J. H., assignor.)
Nowosielski, Edward B., Bloomfield, assignor to Splitdorf Electrical Company, Newark, N. J. Radiator cap. Des. 72,184; Mar. 8.
O'Bannon, Walter A., Tulsa, Okla. Multiple sucker-rod socket. 1,620,382; Mar. 8.
O'Bannon, Walter A., Tulsa, Okla. Sucker-rod socket. 1,620,383; Mar. 8.
O'Bannon, Walter A., Tulsa, Okla. Multiple sucker-rod socket. 1,620,486; Mar. 8.
O'Branovich, Matt A., Tabasco, Colo. Lock. 1,619,881; Mar. 8.
Ogden, Charles H., et al. (See Hammond, Robert O., assignor.)
Ohaver, David W., Rockville, Ind. Resilient-tire traction device. 1,620,384; Mar. 8.
Ohio Cultivator Company, The. (See Griffith, Richard H., assignor.)
Ohl, Russell S., New York, N. Y., assignor to American Telephone and Telegraph Company. Transferring high-frequency energy. 1,619,882; Mar. 8.
O'Leary, Thomas J., St. Paul, Minn. Signal for motor cars. 1,620,385; Mar. 8.
Oliver Chilled Plow Works. (See Dewend, William D., assignor.)
Oliver Typewriter Company, The. (See Washburne, William H., assignor.)
Olmstead, Edward L. (See Olmstead, William L. and E. L.)
Olmstead, William L., Pomona, and E. L. Olmstead, Anaheim, Calif. Air strainer for combustion engines. 1,619,954; Mar. 8.

Olsen, John K., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Magnetic speedometer. 1,620,034; Mar. 8.
Orbon Stove Co. (See Lehman, Max R., assignor.)
Ordway, Carroll T., assignor of one-half to C. Ordway, Brooklyn, N. Y. Centrifugal machine. 1,620,568; Mar. 8.
Ordway, Charles. (See Ordway, Carroll T., assignor.)
Orr, Elijah C., Seattle, Wash. Saw-tooth grinder. 1,620,165; Mar. 8.
Osborn, Harold C., Chicago, Ill. Illuminated sign. 1,620,386; Mar. 8.
Osborn Manufacturing Company, The. (See Curtis, Edward E., assignor.)
Osgood, Louis A., Dayton, and E. E. Wolf, Springfield, Ohio, assignors, by mesne assignments, to International Scale Company. Weighing scale. 1,620,125; Mar. 8.
Östberg, Karl G., Stocksund, Sweden. Advertising apparatus. 1,619,987; Mar. 8.
Overland Metal Novelty Co. Inc. (See Konoff, Alexander, assignor.)
Oyston, William R., Sydney, New South Wales, Australia. Collapsible baby carriage. 1,620,281; Mar. 8.
P & M Company, The. (See Warr, Harold G., assignor.)
Paine, Louis A., assignor to The Lincoln Meter Company Limited, Toronto, Ontario, Canada. Electric measuring instrument. 1,620,126; Mar. 8.
Palmer, David, Sharon, Kans. Clevis. 1,620,387; Mar. 8.
Palmer, Theron R., Erie, Pa. Apparatus for molding battery boxes. 1,620,388; Mar. 8.
Palmer, William C., Davenport, Iowa. Velocimeter. 1,620,224; Mar. 8.
Palmers Limited. (See Fairbairn, Francis A., assignor.)
Papst, Hermann, Vienna, Austria, assignor to E. D. Feldman, New York, N. Y. Electric machine with split poles. 1,620,608; Mar. 8.
Parker, Morgan, New York, N. Y. Scissors. 1,620,225; Mar. 8.
Parker, Morgan, New York, N. Y. Scissors. 1,620,226; Mar. 8.
Parker, Ralph D., San Francisco, Calif. Vehicle signaling window. 1,620,166; Mar. 8.
Parks, Paul B., Oak Park, and J. Van Vulpen, assignors to Vapor Car Heating Company, Inc., Chicago, Ill. Pressure-actuated circuit breaker. 1,620,127; Mar. 8.
Pauly Jail Building Company. (See Tracy, Michael J., assignor.)
Paxton, Arthur H., Omaha, Nebr. Carcass-splitting machine. 1,620,035; Mar. 8.
Payton, Victor R., Ardmore, Okla. Razor compact. 1,620,389; Mar. 8.
Pearson, Eric A., Portland, Oreg. Method and apparatus for changing main sheaves and cables on lift bridges. 1,620,284; Mar. 8.
Peerless Manufacturing Company. (See McMinn, John E., assignor.)
Pelzer, Harold H., New York, N. Y. Machine for applying gumming labels, wrappers, and the like. 1,620,282; Mar. 8.
Pemberton, Harold, assignor to National Manufacturing Company, Seattle, Wash. Toy balloon. 1,620,036; Mar. 8.
Perry, John E., Sharon, assignor to Valley Mould & Iron Corporation, Sharpsville, Pa. Casting ingot molds and apparatus for same. 1,620,128; Mar. 8.
Perry, John E., Sharon, assignor to Valley Monld and Iron Corporation, Sharpsville, Pa. Core box for ingot molds or the like. 1,620,227; Mar. 8.
Peschl, Frank A., Jackson Heights, N. Y. Paper-making machine. 1,620,037; Mar. 8.
Peters, Henry W., Columbus, Ohio. Dust hood. 1,620,390; Mar. 8.
Peters, James B. (See Peters, James C. and J. B.)
Peters, James C. and J. B., Reedsville, Pa. Double-row ginseng seed drill. 1,620,283; Mar. 8.
Peterson, Gabull, Tarpon Springs, Fla. Propeller guard. 1,620,129; Mar. 8.
Pfau, Arnold, jr., Milwaukee, Wis. Electrical heating appliance. Des. 72,186; Mar. 8.
Philadelphia Drying Machinery Company, The. (See Morshead, H., and Wigglesworth, assignors.)
Philadelphia Electrical & Manufacturing Company. (See Bundy, Clifton L., assignor.)
Phoenix Hosiery Company. (See Breyer, Robert, assignor.)
Pietzsch, Frank H., assignor to Western Railway Equipment Company, St. Louis, Mo. Floor construction. 1,620,130; Mar. 8.
Pittsburgh Plate Glass Company. (See Evans, Albert E., assignor.)
Pittsburgh Plate Glass Company. (See Halbach, H. L., and Sweet, assignors.)
Pittsburgh Plate Glass Company. (See Hitchcock, Halbert K., assignor.)
Pollak, Solomon, San Francisco, Calif., assignor to Link-Belt Company, Chicago, Ill. Flexible coupling. 1,620,285; Mar. 8.
Pollock, Elizabeth M. and M., Flint, Mich. Lingerie-strap holder. 1,620,228; Mar. 8.
Pollock, Milton. (See Pollock, Elizabeth M. and M.)
Pomeroy, James W. (See Todd, W. C., and Pomeroy.)
Postell, F. F. (See Arundel, Clarence E., assignor.)
Potts, Louis M., Tenafly, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Trouble-indicating system. 1,620,286; Mar. 8.
Powell, Arthur L., Bloomfield, N. J., assignor to Westinghouse Lamp Company. Filament support for series lamps. 1,620,487; Mar. 8.
Powers, Howard, Marietta, Ohio. Concrete mixer. 1,620,287; Mar. 8.
Prator, Ernest P., assignor of one-third to J. T. Fredricks, Leeper, and one-third to J. R. Stephens, St. Louis, Mo. Automatic shut-off for water gauges. 1,619,828; Mar. 8.
Pressteel Engineering Corporation. (See Haid, Herbert, assignor.)
Preston, Herbert E., assignor to American Engineering Company, Philadelphia, Pa. Stoker-side-wall construction. 1,620,488; Mar. 8.
Price, David R., Wellesley, assignor to Florence Stove Company, Gardner, Mass. Oil stove and electrical igniting means. 1,620,489; Mar. 8.
Price, Owen A., Kilmarnock, Scotland. Automatic self-closing valve. 1,620,131; Mar. 8.
Pronto Manufacturing Company, The. (See Mayer, Benjamin, assignor.)
Psilander, Charles A., Youngstown, Ohio, assignor to American Manganese Steel Company, Chicago, Ill. Reversible-point dipper tooth. 1,620,132; Mar. 8.
Pukt, Albert J., Boston, and I. Hendlin, South Boston, Mass. Container for ice-cream cones. 1,619,883; Mar. 8.
Pulilean Manufacturing Corporation. (See Trinks, William W., assignor.)
Quick, Aaron N., Los Angeles, Calif. Detachable anti-glare lens. 1,620,569; Mar. 8.
Rail Joint Company, The. (See Wolhaupter, Benjamin, assignor.)
Rainsford, Thomas F., Detroit, Mich., assignor of one-foudth to T. C. Whitehead, River Rouge, Mich. Automobile radiator. Des. 72,187; Mar. 8.
Ramsey, Elmer R. (See Blomfield, A. L., and Ramsey.)
Ramsey, George M. (See Gladwill, R. H., and Ramsey.)
Ramstad, Carl N., Valdez, Alaska. Fastening device. 1,620,391; Mar. 8.
Randolph, Otis M., Kinsley, Kans. Topping and pruning knife. 1,620,133; Mar. 8.
Ratner, Richard I., New York, N. Y., assignor to The Libbey Glass Manufacturing Company, Toledo, Ohio. Drinking glass. Des. 72,188; Mar. 8.
Ratner, Richard I., New York, N. Y., assignor to The Libbey Glass Manufacturing Company, Toledo, Ohio. Goblet. Des. 72,189; Mar. 8.
Ratner, Richard I., New York, N. Y., assignor to The Libbey Glass Manufacturing Company, Toledo, Ohio. Sherbet glass. Des. 72,190; Mar. 8.
Raybestos Company, The. (See Stanley, Frederick C., assignor.)
Reed, Harold V., assignor to The Borg & Beck Company, Chicago, Ill. Clutch. 1,619,884; Mar. 8.
Reedy, John H., and W. S. Brock, Urbana, Ill. Fungicide and preparing same. 1,620,229; Mar. 8.
Reinhard, Frank, Eau Claire, Wis. Gear-shift stop. 1,619,955; Mar. 8.
Reinke, John C., jr., Pulaski, Wis. Supporting device. 1,620,288; Mar. 8.
Relief Society for the Aged. (See Sprague, Alonzo B., assignor.)
Remde, Edward H., assignor to The Baker-Raulang Company, Cleveland, Ohio. Industrial truck. 1,620,038; Mar. 8.
Remde, Edward H., assignor to The Baker-Raulang Company, Cleveland, Ohio. Switch mechanism. 1,620,167; Mar. 8.
Renehan, Claude R., Texas City, Tex. Cut-off. 1,619,956; Mar. 8.
Renholdt, John E., Stratford, Conn. Control mechanism. 1,620,230; Mar. 8.
Republic Brass Company. (See Bloch, Leon, assignor.)
Retterer, Raymond W. (See Murphy, F. K., and Retterer.)
Reynolds, Joseph H., Bristol, Tenn. Automatic gluing machine for applying paper to wood. 1,620,570; Mar. 8.
Rhoades, Alonzo E., and A. S. Johnson, assignors to Draper Corporation, Hopedale, Mass. Yarn tension for winding machines. 1,620,571; Mar. 8.
Richardson, David W., Princeton, N. J. Radio antenna system. 1,620,231; Mar. 8.
Riches, Piver & Co. (See Sanders, George E., assignor.)
Rider, Herbert E., assignor to E. L. Hall, New York, N. Y. Insulator. 1,620,392; Mar. 8.
Ridgway, Herbert N., Winthrop, Mass. Amusement apparatus. 1,619,988; Mar. 8.
Ridley, Grahame B., assignor to E. B. Ward, San Francisco, Calif. Desiccator. 1,620,289; Mar. 8.
Riley Stoker Corporation. (See Beers, Royce L., assignor.)
Ripplen, Walter, Philadelphia, Pa. Hydrometer. 1,620,393; Mar. 8.
Ritchie, W. C., & Company. (See Stock, Julius A., assignor.)
Riter, William D., et al. (See Gage, Charles H., assignor.)
Ritow, Herman, Chicago, Ill. Skate. 1,620,232; Mar. 8.
Robertson, Robert D., Windsor, Ontario, Canada. Loading device. 1,620,039; Mar. 8.
Robillard, Godfrey N. (See Blackham, N. A., and Robillard.)
Robin, Joseph E., New York, N. Y. Method and apparatus for fire protection in moving-picture machines. 1,619,957; Mar. 8.

Rockwell, Byrd C., St. Joseph, Mo. Knife glue clamp. 1,619,989; Mar. 8.
Rodriguez, Alfredo, Angiola, Calif. Hand fan. 1,620,394; Mar. 8.
Roessler & Hasslacher Chemical Company, The. (See Lehrecke, Hans, assignor.)
Rohde, Paul, Berlin, Germany, assignor to General Electric Company. Alternating-current commutator motor. 1,620,395; Mar. 8.
Rohn, Wilhelm, Hanau-on-the-Main, Germany, assignor to Charles Engelhard, Inc., New York, N. Y. Electric resistance muffle furnace. 1,619,829; Mar. 8.
Root, Chapman J. (See Samuelson, Alexander, assignor.)
Rosenblum, Morris, Pittsfield, Mass. Thread and cord cutter. 1,620,572; Mar. 8.
Rosenthal, Frank, New York, N. Y. Making thread. 1,620,233; Mar. 8.
Rostron, Joseph A., Cambridge, Mass. Rheostat. 1,620,573; Mar. 8.
Ross, Rufus R., Detroit, Mich. Fuel economizer and carbonizing device. 1,619,830; Mar. 8.
Royal, Ellery E., assignor to United States Screw & Stamping Co., Worcester, Mass. Shuttle tip. 1,620,234; Mar. 8.
Royse, Grover C., Ogden, Utah. Convertible built-in hot-air furnace. 1,620,235; Mar. 8.
Rubin, Adolph, St. Louis, Mo., assignor, by mesne assignments, to Arcade Manufacturing Company, Freeport, Ill. Fastener for refrigerator doors. 1,619,831; Mar. 8.
Rubin, Adolph J., Brooklyn, N. Y. Signal bell. 1,620,290; Mar. 8.
Ruckel, Le Roy, Stamford, Conn. Windshield cleaner. 1,619,885; Mar. 8.
Rutter, Essington O., Bangaroo, near Canowindra, New South Wales, Australia. Swiveling headlight of automobiles. 1,620,291; Mar. 8.
Ryan, Dorsy M., Hinton, W. Va. Diagnostic apparatus. 1,619,886; Mar. 8.
Sackett, Herbert S., Windom, Minn. Advertising device. 1,620,396; Mar. 8.
Saltzman, Joseph. (See Zeman, Anton, assignor.)
Samson, Curt, Berlin, Germany, assignor to General Electric Company. Incandescent electrode device. 1,620,397; Mar. 8.
Samuelson, Alexander, assignor to C. J. Root, Terre Haute, Ind. Glass-working machine. 1,620,292; Mar. 8.
Sanders, George E., Deloro, Ontario, Canada, assignor to Riches, Piver & Co. Copper-lime dust. 1,620,490; Mar. 8.
Sannar, John T., and C. R. Lawler, Enterprise, Oreg. Log-securing device. 1,619,958; Mar. 8.
Sapp, Casiah, Enterprise, Oreg. Paper-bag-sealing means. 1,619,887; Mar. 8.
Sasseman, David C., River Forest, assignor to F. H. Smith Manufacturing Company, Chicago, Ill. Seal press. 1,619,959; Mar. 8.
Savage, Edward S., Rochester, N. Y. Changeable assembly set for amusement and educational purposes. 1,620,574; Mar. 8.
Schade, Blanche, Gloucester, Mass. Visible registering device for cameras. 1,620,040; Mar. 8.
Schadel, William F., assignor to Kanawha Manufacturing Company, Charleston, W. Va. Vibratory screen. 1,620,575; Mar. 8.
Scheits, Jacob J. (See Gallus, J. M., and Scheits.)
Schellens, Eugene L., Pointe Claire, Quebec, Canada, and J. S. Coffin, jr., Lisbon, N. H., assignors to C-S Engineering Company. Spring support. 1,620,491; Mar. 8.
Schellens, Eugene L., Pointe Claire, Quebec, Canada, and J. S. Coffin, jr., Lisbon, N. H., assignors to C-S Engineering Company. Spring support. 1,620,492; Mar. 8.
Schenck, Charles, assignor to Bethlehem Steel Company, Bethlehem, Pa. Welded beam. 1,620,293; Mar. 8.
Schick, Jacob, Orange, assignor to M. R. Hutchison, West Orange, N. J. Pencil knife. 1,620,236; Mar. 8.
Schindler, Paul, Bayonne, N. J. Suction-operated circuit closer for motor vehicles. 1,620,493; Mar. 8.
Schley, Fred, Waukegan, Ill. Latching means for gates. 1,620,134; Mar. 8.
Schmelske, William F., Binghamton, N. Y. Flower holder. 1,619,888; Mar. 8.
Schmidt, Le Roy L., South Tacoma, Wash. Traffic signal. 1,620,576; Mar. 8.
Schnabel Company, The. (See Schnabel, Paul R., assignor.)
Schnabel, Paul R., Oakmont, assignor to The Schnabel Company, Pittsburgh, Pa. Vehicle body. 1,620,494; Mar. 8.
Schneider, John L., Charles City, Iowa. Oil holder. 1,620,294; Mar. 8.
Schoonmaker, Charles F. (See Jacobs, E. H., and Schoonmaker.)
Schramm, Walter J., Chicago, Ill. Ticket case. 1,620,295; Mar. 8.
Schroder, Herman, Capron, Okla. Steering device. 1,620,237; Mar. 8.
Schroeder, Carl A. (See Wakefield, F. W., Basil, and Schroeder.)
Schultz, John. (See Hnilo, F., and Schultz.)
Schuman, Isador, Kansas City, Mo., and B. E. Frank, Johnson County, Kans. Drier. 1,620,577; Mar. 8.
Scintilla Aktiengesellschaft. (See Billion, F., and Bohli, assignors.)
Scott, John L., Harriston, Miss. Car flange-wheel oiler. 1,620,578; Mar. 8.
Scott, Lewis L., St. Louis, Mo. Oil-burner boiler. 1,619,889; Mar. 8.
Scovill Manufacturing Company. (See King, G. A., Warner, and Tompkins, assignors.)
Searles, Linn W., et al. (See Gage, Charles H., assignor.)
Sederholm, John E., assignor to American Hoist & Derrick Company, St. Paul, Minn. Electric controller. 1,619,960; Mar. 8.
Sederholm, John E., assignor to American Hoist & Derrick Company, St. Paul, Minn. Electric heater. 1,620,296; Mar. 8.
Seekamp, Herman L., Gillespie, Ill. Mining-machine chain lubricator. 1,620,135; Mar. 8.
Sendelbach, Edward C., Philadelphia, Pa. Wood disk wheel. 1,620,398; Mar. 8.
Seng Company, The. (See Dyke, Darrell F., assignor.)
Seymour, Benjamin F., Washington, D. C. Combined resilient transmission and bearing. 1,620,136; Mar. 8.
Shields, Lowell W., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Belt buckle. Des. 72,191; Mar. 8.
Mar. 8.
Shirley, Herman V., Long Beach, Calif. Chain. 1,620,613;
Shorrock, James L., Accrington, assignor to Entwisle & Kenyon Limited, Ewbank Works, Accrington, England. Carpet sweeper. 1,620,297; Mar. 8.
Singer Manufacturing Company, The. (See Corrall, H., and Heggie, assignors.)
Siemens & Halske Aktiengesellschaft. (See Flad, Arthur, assignor.)
Silberman, Clara, executrix. (See Silberman, Jacob.)
Silberman, Harry, New York, N. Y. Textile fabric or the like. Des. 72,192; Mar. 8.
Silberman, Jacob, deceased, New York, N. Y.; C. Silberman, executrix. Pintle for hinges. 1,619,890; Mar. 8.
Silent, Harold C., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Echo-suppressor relay. 1,619,891; Mar. 8.
Silver, James W., Orden, Utah. Endless-belt conveyer. 1,620,168; Mar. 8.
Simmchen, Wilhelm, assignor to the Firm: Ipag International Patent Exploiting Company, Ltd., Aussig a/E (Ustin/Lab.), Czechoslovakia. Harness motion for looms. 1,619,990; Mar. 8.
Simmons, Albert H., Oak Park, assignor to Edison Electric Appliance Company, Inc., Chicago, Ill. Electric urn. 1,620,495; Mar. 8.
Simms, Harold H., et al. (See Hammond, Robert O., assignor.)
Simon, Fred L., Baltimore, Md. Sheet piling. 1,620,137; Mar. 8.
Sloe, Joseph E., et al. (See Ginsburg, Marcus O., assignor.)
Small, Norman M., and L. Buehler, jr., assignors to Frick Company, Waynesboro, Pa. Can grid. 1,620,579; Mar. 8.
Smarr, Benjamin M., assignor to General Motors Corporation, Detroit, Mich. Header bracket for ignition cables 1,619,991; Mar. 8.
Smith, Alice M., et al., executrices. (See Smith, Christian N.)
Smith, Allen A., Great Notch, N. J. Temperature-controlled fluid-mixing device. 1,620,238; Mar. 8.
Smith, Charles E., et al. (See Williamson, Aubrey C., assignor.)
Smith, Charles W., Banner, Okla. Body lifter and carrier. 1,620,298; Mar. 8.
Smith, Christian N., deceased, Elgin, Ill.; A. M. and L. I. Smith, executrices, assignors of one-half to W. P. Topping, Elgin, Ill. Machine for bending metallic printing plates, such as stereotype and electrotype plates. 1,620,041; Mar. 8.
Smith, Christian N., deceased, Elgin, Ill.; A. M. and L. I. Smith, executrices, assignors of one-half to W. P. Topping, Elgin, Ill. Heating and bending metallic printing plates, such as stereotype and electrotype plates. 1,620,042; Mar. 8.
Smith, Elias A. C., assignor to Guggenheim Brothers, New York, N. Y. Metallurgy of tin. 1,620,580; Mar. 8.
Smith, F. H., Manufacturing Company. (See Sasseman, David C., assignor.)
Smith, Harry B., assignor to Lightship Cloth Board Corporation, Brooklyn, N. Y. Paper-ware manufacture. 1,620,239; Mar. 8.
Smith, Henry, Richmond, Va. Garment hanger. 1,619,992; Mar. 8.
Smith, James D., Overall, Tenn. Game. 1,620,399; Mar. 8.
Smith, Lily I., et al., executrices. (See Smith, Christian N.)
Smith, Marion R., Portland, Oreg. Toy dog. Des. 72,193; Mar. 8.
Smith, Mildred A., Albany, N. Y. Chemical heating pad. 1,620,581; Mar. 8.
Smith, Myrtle E., Glenwood, Wash. Cap. 1,620,400; Mar. 8.
Smith, Omar H. (See Jury, A. E., and Smith.)
Smith, Thomas L. (See Garey, Charles C., assignor.)

Smith, William C., Bristol, England. Clutch device. 1,619,892; Mar. 8.
Smock, Elizabeth M., Asheville, N. C. Automobile driver's heel protector. 1,620,401; Mar. 8.
Smolens, Abraham M., Brooklyn, N. Y. Figure wheeled toy. Des. 72,194; Mar. 8.
Smoot, Charles H., Maplewood, N. J. Flow regulator. 1,620,240; Mar. 8.
Societe Anonyme des Anciens Etablissements Hotchkiss & Cie. (See Sutter, Charles, assignor.)
Société Anonyme des Dispositifs d'Adhérence Guerrini. (See Guerrini, Luigi, assignor.)
Societe des Appareils Mephisto Jules Manfredi & Cie. (See Fontana, Paul F. M. A., assignor.)
Société Fraisse Freres et al. (See Navarre, Placide, assignor.)
Société P. Navarre et Fils et al. (See Navarre, Placide, assignor.)
Sokolowski, Peter, assignor of one-half to M. Strack, Girardville, Pa. Vegetable and fruit slicer. 1,620,138; Mar. 8.
Somac Traffic Signal Co. (See Soper, Harold H., assignor.)
Somersalo, George, Providence, R. I. Radio apparatus. 1,620,609; Mar. 8.
Sonora Phonograph Company. (See Wolff, Joseph, assignor.)
Soper, Harold H., Medford, assignor to Somac Traffic Signal Co., Boston, Mass. Direction indicator for automobiles. 1,620,402; Mar. 8.
Sorensen, Andrew J., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Apparatus for transmitting coded currents. 1,620,169; Mar. 8.
Sorensen, Henry, San Francisco, Calif. Fireproof building. 1,620,139; Mar. 8.
Southcomb, Robert P., Baltimore, Md. Corrugated-wire articles. 1,620,403; Mar. 8.
Spieckermann, Karl, Dortmund, Germany. Iron contact rail with copper insert. 1,620,496; Mar. 8.
Splitdorf Electrical Company. (See Nowosielski, Edward B., assignor.)
Sprague, Alonzo B., Brooklyn, N. Y., assignor of two-thirds to Relief Society for the Aged. Bed and spring therefor. 1,620,404; Mar. 8.
Sprenger, George W., Lynn, Mass., assignor to General Electric Company. Telemetric system. 1,620,405; Mar. 8.
Stanley, Frederick C., Fairfield, assignor to The Raybestos Company, Bridgeport, Conn. Attaching non-metallic facings to working clutch members. 1,620,043; Mar. 8.
Starr, Perl L., Detroit, Mich. Lathe attachment. 1,619,832; Mar. 8.
Starr Piano Company. (See Mayer, Fred G., assignor.)
Stebbins, Albert H., Los Angeles, Calif. Air-volume dust reducer. 1,620,241; Mar. 8.
Stebbins, Albert H., Los Angeles, Calif. Concentrator-table fan. 1,620,242; Mar. 8.
Stebbins, Albert H., Los Angeles, Calif. Classifier deck. 1,620,243; Mar. 8.
Stegner, Cloyd E., Detroit, Mich. Device for sharpening straight and safety razor blades. 1,619,833; Mar. 8.
Stein, Louis H., Chicago, Ill. Measuring gauge. 1,619,834; Mar. 8.
Stephens, John R., et. al. (See Prator, Ernest P., assignor.)
Stephenson, Herman. (See Stephenson, Thomas E., assignor.)
Stephenson, Thomas E., Harrisburg, assignor of forty one-hundredths to H. Stephenson, Wyomissing, Pa. Pipe wrench. 1,620,170; Mar. 8.
Stewart-Warner Speedometer Corporation. (See Olsen, John K., assignor.)
Stimson, Annie W., Los Angeles, Calif. Morning gown. 1,620,140; Mar. 8.
Stock, Julius A., Cicero, assignor to W. C. Ritchie & Company, Chicago, Ill. Thumb-hole-cutting machine. 1,620,299; Mar. 8.
Stocker, William M., Woodhaven, assignor to Cameron Machine Company, Brooklyn, N. Y. Winding machine. 1,620,044; Mar. 8.
Stoer, Bruno P., Cleveland, Ohio. Holder for laundry marking pins. 1,619,893; Mar. 8.
Stoll, Herman, Detroit, Mich., assignor to General Motors Corporation, Detroit, Mich. Piston-ring groove. 1,619,993; Mar. 8.
Stone, Joseph, Bessemer, Ala. Mold-ramming machine. 1,620,406; Mar. 8.
Strack, Mat. (See Sokolowski, Peter, assignor.)
Strand, Joseph, assignor to Klinch Lath Corporation, Los Angeles, Calif. Wall-board-retaining member. 1,619,994; Mar. 8.
Streif, Harold R., St. Paul, Minn. Bottle rack. 1,620,407; Mar. 8.
Strid, Sven J., assignor to F. Mathews, Chicago, Ill. Drop shaft for hand brakes. 1,620,141; Mar. 8.
Stromberg-Carlson Telephone Manufacturing Company. (See Longworth, Arthur, assignor.)
Stuart, Frank T., Maplewood, N. J., assignor to The R. Neumann Hardware Co. Bag lock. 1,620,171; Mar. 8.
Stuber & Kuck Co. (See Abele, Theodore, assignor.)
Studebaker Corporation, The. (See Bourgon, Joseph H., assignor.)
Studebaker Corporation, The. (See Mose, Carl C., assignor.)
Summers, Bertrand S., Port Huron, Mich., assignor to The Locomotive Terminal Improvement Co., Chicago, Ill. Plating metal. 1,619,835; Mar. 8.
Susman, John G., Indianapolis, Ind. Art-glass joint. 1,620,300; Mar. 8.
Sutter, Charles, Suresnes, assignor to Societe Anonyme des Anciens Etablissements Hotchkiss & Cie., St Denis, France. Feed strip for firearms. 1,620,408; Mar. 8.
Swartz, Ira T., trustee. (See Swartz, Ira T., assignor.)
Swartz, Ira T., assignor, by mesne assignments, to I. T. Swartz, trustee, Indianapolis, Ind. Carburetor. 1,619,894; Mar. 8.
Sweet, John A. (See Halbach, H. L., and Sweet.)
Swift, Owen P., Halifax, England, assignor to Chadeloid Chemical Company, New York, N. Y. Paint and varnish remover. 1,620,409; Mar. 8.
Swope, Frederick E., jr., Philadelphia, Pa. Variable condenser. 1,620,244; Mar. 8.
Sykes, Howard M., Valparaiso, Ind. Automatic fishhook. 1,620,497; Mar. 8.
Sykora, Rudolf, Boston, Mass. Producing relative color design. 1,620,604; Mar. 8.
Symington Company, The. (See Symington, Thomas H., assignor.)
Symington, Thomas H., Baltimore, Md., assignor, by mesne assignments, to The Symington Company. Side frame and journal box thereof. 1,620,498; Mar. 8.
Tabulating Machine Company, The. (See Bryce, James W., assignor.)
Tansill, Charles M., White Hall, Md. Gas mixing gasket for internal-combustion engines. 1,620,410; Mar. 8.
Tarman, Benjamin F., Quincy, Pa. Shipping crate for animals. 1,619,895; Mar. 8.
Tasman, George, Brooklyn, N. Y. Joint. 1,619,836; Mar. 8.
Taurman, Alphonso, Birmingham, Ala, assignor to Metal & Thermit Corporation, Carteret, N. J. Rail-clamping apparatus. 1,620,172; Mar. 8.
Taylor, Jerome C., Huntington Beach, Calif. Oil-well-tubing drainer. 1,620,173; Mar. 8.
Temple, Elmer J., Pittsfield, Mass., assignor to General Electric Company. Transformer. 1,620,411; Mar. 8.
Templeton, Edwin G., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Tire machine. 1,620,499; Mar. 8.
Thide, Charles, Brooklyn, N. Y. Self-lubricating and internal-pressure spring. 1,620,301; Mar. 8.
Thomas, Frederick, Philadelphia, Pa. Steam trap. 1,619,989; Mar. 8.
Thompson, Albert F., assignor of one-half to A. T. Walraven, Dallas, Tex. Fire extinguisher. 1,620,142; Mar. 8.
Thrush, Homer A., Peru, Ind. Water relief valve. 1,620,582; Mar. 8.
Timm, Ellen V. (See Loftus, Thomas L., assignor.)
Tin Decorating Company, The. (See Hermani, Henry, assignor.)
Tin Decorating Company of Baltimore, The. (See Hermani, Henry, assignor.)
Tingley, Philo B., Glen Ridge, N. J. Cigarette holder. 1,620,302; Mar. 8.
Todd, William C., and J. W. Pomeroy, Victoria, B. C., Canada. Traveling lawn sprinkler. 1,620,583; Mar. 8.
Tompkins, Emerson H. (See King, G. A., Warner, and Tompkins.)
Topping, William P. (See Smith, Christian N., assignor.)
Torbert, William R., Kansas City, Mo. Awning. 1,620,045; Mar. 8.
Torbert, William R., Kansas City, Mo. Awning structure. 1,620,500; Mar. 8.
Tracy, Michael J., assignor to Pauly Jail Building Company, St. Louis, Mo. Combined niche seat and lavatory. Des. 72,195; Mar. 8.
Trent Process Corporation. (See Trent, Walter E., assignor.)
Trent, Walter E., Washington, D. C., assignor to Trent Process Corporation, New York, N. Y. Converting or cracking hydrocarbon oils. 1,619,896; Mar. 8.
Trimble, Edwin S., Atchison, Kans. Collapsible chicken coop. 1,620,143; Mar. 8.
Trimble, Frank H., Lankershim, Calif. Lighting-fixture wall plate. Des. 72,196; Mar. 8.
Trinity Wheel Corporation. (See Baker, Frederick W., assignor.)
Trinks, William W., assignor to Pulilean Manufacturing Corporation, Bridgeport, Conn. Laundering machine. 1,620,144; Mar. 8.
Turner, Albert W., Hamburg, Germany. Device for closing the air bladders of sport balls of any kind. 1,620,245; Mar. 8.
Turner, Albert, and A. P. Burns, assignors to The Heald Machine Company, Worcester, Mass. Spindle mounting. 1,619,995; Mar. 8.
Turner, Channing, Geneva, assignor to United States Wind Engine & Pump Company, Batavia, Ill. Windmill. 1,620,145; Mar. 8.
Tweeddale, John, Torrance, Calif. Liner for oil wells. 1,620,412; Mar. 8.
Uhlmann, Otto E., Grand Rapids, Mich. Signal light for automobiles. Des. 72,185; Mar. 8.
Uhrig, William H., St. Louis, Mo. Preparing feathers for bedding and the like. 1,620,303; Mar. 8.

Underwood, Ernest E., assignor to Eastman Kodak Company, Rochester, N. Y. Photographic-camera construction. 1,620,304; Mar. 8.
Union Switch & Signal Company, The. (See Geiger, Paul H., assignor.)
Union Switch & Signal Company, The. (See Gilson, Robert M., assignor.)
Union Switch & Signal Company, The. (See Grondahl, Lars O., assignor.)
Union Switch & Signal Company, The. (See Sorensen, Andrew J., assignor.)
United Iron Works, Inc. (See Brown, Walter E., assignor.)
United Shoe Machinery Corporation. (See Ballard, Milton H., assignor.)
United Shoe Machinery Corporation. (See Goddu, G., and Mackenzie, assignors.)
United Shoe Machinery Corporation. (See Hamilton, Harry D., assignor.)
United Shoe Machinery Corporation. (See Julian, Gideon, assignor.)
United Shoe Machinery Corporation. (See Winkley, Erastus E., assignor.)
United States Automatic Fire Alarm Company, The. (See Johnson, John M., assignor.)
United States Gauge Company. (See McClelland, Bert, assignor.)
United States Glass Company. (See Loomis, Virgil V., assignor.)
United States Gypsum Company. (See Brookby, H. E., and King, assignors.)
United States Playing Card Company, The. (See Fournier, Oscar, assignor.)
United States Screw & Stamping Co. (See Royal, Ellery E., assignor.)
United States Wind Engine & Pump Company. (See Turner, Channing, assignor.)
Universal Electric Welding Company. (See Lachman, Maurice and L., assignors.)
Universal Oil Products Company. (See Egloff, Gustav, assignor.)
Universal Oil Products Company. (See Egloff, G., and Benner, assignors.)
Universal Oil Products Company. (See Halle, Hiram J., assignor.)
Universal Oil Products Company. (See Huff, Lyman C., assignor.)
Urwin, Norman W., Annfield Plain, England. Protector for boots and shoes. 1,620,413; Mar. 8.
Utterbaugh, Walter H., Washington, D. C. Locomotive driving box. 1,620,584; Mar. 8.
Valley Mould & Iron Corporation. (See Perry, John E., assignor.)
Vanderlip, Louis C., Elkhart, Ind. Hood latch. 1,620,414; Mar. 8.
Van Diest, William, Minneapolis, Minn. Display plaque and making. 1,620,046; Mar. 8.
Van Emon, Burton C., San Francisco, assignor to J. M. Koford, trustee, Oakland, Calif. Elevator. 1,620,305; Mar. 8.
Van Orman, Wart T., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Leakproof-tank cover. 1,620,415; Mar. 8.
Vapor Car Heating Company. (See Gillick, Lawrence H., assignor.)
Vapor Car Heating Company, Inc. (See Parks, P. B., and Van Vulpen, assignors.)
Van Valkenburg, Hermon L., assignor to Industrial Controller Company, Milwaukee, Wis. Sectional cabinet for electrical apparatus. 1,620,047; Mar. 8.
Van Vulpen, John. (See Parks, P. B., and Van Vulpen.)
Variety Fire Door Company. (See Gervais, Wainwright B., assignor.)
Vaughn, James R., et al. (See Bilbrey, George L., assignor.)
Veigel, Louis A., jr., Newark, N. J. Chain link. 1,620,048; Mar. 8.
Venus Brassiere Co. (See Lipman, Adolph, assignor.)
Vernam, Gilbert S., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Printing-telegraph-exchange system. 1,619,897; Mar. 8.
Vetter, Ignatius J., New York, N. Y., assignor to Bigelow Hartford Carpet Company. Carpet. Des. 72,198; Mar. 8.
Victory Sparkler & Specialty Co. (See Kohn, Koby, assignor.)
Villaret, Gustave E., Leonia, N. J., assignor to Globe Lighting Fixture Mfg. Co., Brooklyn, N. Y. Chandelier or article of similar nature. Des. 72,197; Mar. 8.
Vogel, Reinhold, South Wilton, Conn. Concrete-reenforcing-rod chair. 1,620,501; Mar. 8.
Wagner, Joshua, Brooklyn, N. Y. Carton. 1,620,174; Mar. 8.
Wakefield, Frederick W., G. L. Basil, and C. A. Schroeder, assignors to The F. W. Wakefield Brass Company, Vermilion, Ohio. Lighting fixture. 1,620,306; Mar. 8.
Wakefield, F. W., Brass Company, The. (See Wakefield, F. W., Basil, and Schroeder, assignors.)
Wakefield, Walter H., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Reversing motion for loom let-offs. 1,620,175; Mar. 8.
Wakefield, Walter H., assignor to Crompton & Knowles Loom Works, Worcester, Mass. Dobby finger for looms. 1,620,176; Mar. 8.
Walint, Markus, Endicott, N. Y. Refrigerator. 1,620,177; Mar. 8.
Walraven, Albert T. (See Thompson, Albert F., assignor.)
Walsh, Patrick H., Newton, assignor to Caro Cloth Corporation, Boston, Mass. Method and apparatus for making composite fabric. 1,620,307; Mar. 8.
Walter, Maurice, New York, N. Y. Differential gearing. 1,620,246; Mar. 8.
Walther, Frederick, Omaha, Nebr. Crate. 1,620,585; Mar. 8.
Walton, Thomas A., Scranton, Pa. Swimming-instructing machine. 1,620,146; Mar. 8.
Ward, Edward B. (See Ridley, Grahame B., assignor.)
Ward, Leonora H., Weatherford, Okla. Blackboard-eraser cleaner. 1,619,899; Mar. 8.
Warner, Frank E. (See King, G. A., Warner, and Tompkins.)
Warr, Harold G., Park Ridge, assignor to The P & M Company, Chicago, Ill. Rail anchor. 1,619,902; Mar. 8.
Warren, Richard, Washington, D. C. Display rack. 1,619,900; Mar. 8.
Warsen, August W. (See Christensen, A., and Warsen.)
Warwick, Eleanor O. and R. M., Eastlake, Fla. Dispensing device. 1,620,178; Mar. 8.
Warwick, Rogers M. (See Warwick, Eleanor O. and R. M.)
Washburne, William H., assignor to The Oliver Typewriter Company, Chicago, Ill. Making two-piece valves. 1,619,901; Mar. 8.
Waskewicz, Waclaw, Ludlow, Vt. Rail joint. 1,620,502; Mar. 8.
Waterman, L. E., Company. (See Ferris, William I., assignor.)
Waters, Victor J., assignor of one-third to H. S. Mercer, Shidler, Okla. Valved piston. 1,620,416; Mar. 8.
Watt, Washington, jr., Memphis, Tenn. Case. 1,620,417; Mar. 8.
Watters, Daniel M., assignor to Killefer Manufacturing Company, Los Angeles, Calif. Road tool. 1,620,247; Mar. 8.
Watts, Elmer A., assignor to The Miller Improved Gas Engine Company, Springfield, Ohio. Cylinder construction for gas engines. 1,619,903; Mar. 8.
Web Engineering Company, The. (See Baker, William E.)
Webster Electric Company. (See Hawkins, William W., assignor.)
Weech, Joseph, Galesburg, Ill. Signaling apparatus for automobiles. 1,620,049; Mar. 8.
Weech, Joseph, Galesburg, Ill. Signaling device. 1,620,147; Mar. 8.
Weiss, Rudolph. (See Marx, Carl, assignor.)
Welspiel, Letitia. (See Arnett, F., and Welspiel.)
Welter, Georg. (See Czochralski, J., and Welter.)
Wennadt, Arnold, Lowden, Iowa. Truck for disk cultivators. 1,619,904; Mar. 8.
Wenz, Jonathan, J. Alvera, and G. Brunhübner, Pforzheim, Germany. Soldering art. 1,619,837; Mar. 8.
Westbury, William, Canastota, and P. W. Collins, Elmira, N. Y. Manufacture of glass articles. 1,620,308; Mar. 8.
Western Electric Company, Incorporated, et al. (See Dunham, B. G., and Haines, assignors.)
Western Electric Company. (See Heising, Raymond A., assignor.)
Western Electric Company. (See Potts, Louis M., assignor.)
Western Felt Works. (See Faurot, Henry, assignor.)
Western Railway Equipment Company. (See Pietzsch, Frank H., assignor.)
Western Union Telegraph Company. (See Curtin, Leo P., assignor.)
Westinghouse Lamp Company. (See Gibson, Arthur A., assignor.)
Westinghouse Lamp Company. (See Powell, Arthur L., assignor.)
Werner, Joseph, Perth Amboy, N. J. Flush box. 1,620,503; Mar. 8.
Wetzel, John W., Allentown, Pa. Fire escape. 1,620,309; Mar. 8.
Whelan, Michael J., Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill. Bowling pin. 1,620,310; Mar. 8.
Whisler, Joseph C., and C. R. McElwee, Peru, Ind. Adjustable bulkhead. 1,619,905; Mar. 8.
Whitacre, Clarence J., Janesville, Wis., assignor to General Motors Corporation, Detroit, Mich. Closure. 1,619,906; Mar. 8.
White, Alvin C., Austin, Minn. Base-attached plotting instrument. 1,620,311; Mar. 8.
White, Edward A., Lewiston, Idaho. Motion storage and conveying apparatus. 1,619,906; Mar. 8.
White, Edward A., Lewiston, Idaho. Transport stand. 1,619,907; Mar. 8.
White, Joseph, Columbus, Ohio. Rail-handling device. 1,619,908; Mar. 8.
White, John W., assignor to General Motors Corporation, Detroit, Mich. Manufacture of gears. 1,619,907; Mar. 8.
White Motor Company, The. (See Dingham, Thomas C., assignor.)
White, Robert, assignor to J. L. Hill, Rochester, N. Y. Machine for making lubricating means for vehicle springs. 1,619,838; Mar. 8.

White, Roy M., Riverside, Calif. Dentist's furnace. 1,620,179; Mar. 8.
Whitehead, Thomas C. (See Rainsford, Thomas F., assignor.)
Whitelegg, Robert H., Manchester, England. Steam locomotive. 1,620,586; Mar. 8.
Wiarda, Jerry R., Coopersville, Mich. Washbench. 1,620,418; Mar. 8.
Widmann, Oscar O., Brooklyn, N. Y. Loud speaker. Des. 72,199; Mar. 8.
Widmann, Oscar O., Brooklyn, N. Y. Loud speaker. Des. 72,200; Mar. 8.
Wigglesworth, Harry H. (See Morshead, H., and Wigglesworth.)
Wilcox, Frank S., Union, S. C. Mercerizing machine. 1,620,419; Mar. 8.
Wild, Charles H., Baltimore, Md., assignor to Burt Machine Company, Incorporated. Case-filling machine. 1,619,839; Mar. 8.
Wild, Charles H., assignor to Burt Machine Company, Incorporated, Baltimore, Md. Can-labeling machine. 1,619,840; Mar. 8.
Wilkinson, Walter, Jersey City, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Separation of the contituents of ternary gaseous mixtures. 1,619,909; Mar. 8.
Williams, Leo L., Portland, Oreg. Display stand. 1,620,148; Mar. 8.
Williamson, Aubrey C., assignor of 36 per cent to C. E. Smith and 24 per cent to J. K. Bagley, New Orleans, La. Plaster composition. 1,620,587; Mar. 8.
Wilson, John M., San Diego, Calif. Tobacco pipe. 1,620,420; Mar. 8.
Wilson, Ray O., Los Angeles, Calif. Adjustable golf club. 1,620,588; Mar. 8.
Wilson, William, New York, N. Y. Life preserver. 1,620,421; Mar. 8.
Winkley, Erastus E., Lynn, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for use in the manufacture of heels for boots and shoes. 1,620,149; Mar. 8.
Winter, Fred H., Schenectady, N. Y., assignor to General Electric Company. Regulating apparatus. 1,620,504; Mar. 8.
Wired Radio, Inc. (See Crossley, Alfred, assignor.)
Witherow, Harry M., Lynn, Mass., assignor to General Electric Company. Induction meter. 1,620,505; Mar. 8.
Withrow, Floyd G., Grand Rapids, Mich. Spring oiler. 1,620,150; Mar. 8.
Witwer, Charles S., Yonkers, N. Y. Hose clamp. 1,619,841; Mar. 8.
Wolf, Elmer E. (See Osgood, L. A., and Wolf.)
Wolfe, Noble A. (See Jones, B. W., and Wolfe.)
Wolff, Joseph, Brooklyn, N. Y., assignor to Sonora Phonograph Company, Inc. Radiocabinet. Des. 72,201; Mar. 8.
Wolhaupter, Benjamin, New Rochelle, assignor to The Rail Joint Company, New York, N. Y. Preparing rolls for rolled stop-joint bars. 1,620,422; Mar. 8.
Wood, Donald L. (See Frederick, C. W., and Wood.)
Wood, Franz J., Des Moines, Iowa. Mechanism for controlling and operating molding machines. 1,620,050; Mar. 8.
Woodard, William E., Forest Hills, N. Y. Locomotive-rear-end support. 1,620,423; Mar. 8.
Woodcock, Andrew J., Wilmette, Ill. Fuel-oil burner. 1,619,910; Mar. 8.
Woodcock, Andrew J., Wilmette, Ill. Fuel-oil burner. 1,619,998; Mar. 8.
Worthington Pump and Machinery Corporation. (See Lucke, Charles E., assignor.)
Wright, Dallas V., Fort Dodge, Iowa. Bottle dispensing and refrigerating apparatus. 1,619,999; Mar. 8.
Wright, J. E., sr. (See McElwain, James, assignor.)
Wright, John W., Olympia, Wash. Grate construction. 1,619,842; Mar. 8.
Young, Charles O., Elmhurst, N. Y., and C. J. Herrly, Pittsburgh, Pa., assignors to Carbide and Carbon Chemicals Corporation. Process and apparatus for conducting chemical reactions. 1,620,180; Mar. 8.
Zeman, Anton, assignor to J. Saltzman, Chicago, Ill. Pressing machine. 1,620,248; Mar. 8.
Zimmerman, Harry C., Washington, D. C. Training mechanism for gun carriages. 1,619,843; Mar. 8.
Zito, Joseph, Utica, N. Y. Locking device. 1,620,051; Mar. 8.
Zotoli, Anthony M., Quincy, Mass. Paving block. 1,619,844; Mar. 8.
Zucker, Benjamin, New York, N. Y. Chock brake. 1,619,845; Mar. 8.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 8TH DAY OF MARCH, 1927.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Accessory container for railway use. F. P. Miller. 1,620,376; Mar. 8.
Acid, Evolution of hydrocyanic. H. Lehrecke. 1,620,365; Mar. 8.
Adding machines, Check-endorsing attachment for. R. H. Gladwill and G. M. Ramsey. 1,620,542; Mar. 8.
Advertising apparatus. K. G. Östberg. 1,619,987; Mar. 8.
Advertising device. H. S. Sackett. 1,620,396; Mar. 8.
Aeroplane. F. McElhaney. 1,620,368; Mar. 8.
Agitating, washing, liming, or tanning solutions. B. R. Baxter. 1,620,317; Mar. 8.
Air bag. R. S. Burdette. 1,620,435; Mar. 8.
Air brake, One-lined. F. Kasantzeff. 1,619,979; Mar. 8.
Air lifts, Automatic control for. C. C. Jacobson. 1,620,210; Mar. 8.
Airship. L. Dürr. 1,620,449; Mar. 8.
Airships, Controlling device for ballast containers in. E. Hilligardt. 1,620,462; Mar. 8.
Airships, Hull construction of rigid. K. Arnstein. 1,620,507; Mar. 8.
Airships, Propelling, lifting, and steering device for. A. Chiarelli. 1,620,618; Mar. 8.
Air-volume dust reducer. A. H. Stebbins. 1,620,241; Mar. 8.
Aldehyde derivatives of reaction products of aldehydes and amines and making same, Higher. C. O. North. 1,619,953; Mar. 8.
Alloy or lithium and aluminum. J. Czochralski and G. Welter. 1,620,081; Mar. 8.
Aluminum alloy containing lithium. J. Czochralski. 1,620,082; Mar. 8.
Amplifier, Sound. L. D. Morris. Des. 72,181; Mar. 8.
Amusement and educational purposes, Changeable assembly set for. E. S. Savage. 1,620,574; Mar. 8.
Amusement and protective device. K. Kohn. 1,620,561; Mar. 8.
Amusement apparatus. H. N. Ridgway. 1,619,988; Mar. 8.
Amusement device. G. Melling. 1,620,375; Mar. 8.
Amusement ride. H. F. Maynes. Re16,569; Mar. 8.
Anchor, Rail. H. G. Warr. 1,619,902; Mar. 8.
Antirattling device. S. Baruch. 1,619,913; Mar. 8.
Apron. M. Baxter. 1,620,426; Mar. 8.
Aquarium. L. H. Burlin. 1,620,006; Mar. 8.
Arc converter, High frequency. R. R. Beal and H. F. Elliott. 1,620,318; Mar. 8.
Arc-welding system. H. D. Morton. 1,620,219; Mar. 8.
Automatic switch. J. D. Collins. 1,620,443; Mar. 8.
Automatic switch. C. L. Melhinch. 1,619,877; Mar. 8.
Automobile bed. O. C. Harper. 1,620,346; Mar. 8.
Automobile body. F. Bunevac. 1,619,918; Mar. 8.
Automobile bumper. M. Jublonsky. 1,620,357; Mar. 8.
Automobile cushions, Retainer for. W. Brewster. 1,619,916; Mar. 8.
Automobile inclosure. G. E. Bishop. 1,620,003; Mar. 8.
Automobile jack. G. P. Lee. 1,619,942; Mar. 8.
Automobile ladder. G. Millward. 1,620,377; Mar. 8.
Automobiles, Combined side wing and sun and rain shield for. S. Nakagawa. 1,619,879; Mar. 8.
Automobiles, Signal light for. O. E. Uhlmann. Des 72,185; Mar. 8.
Automobiles, Signaling apparatus for. J. Weech. 1,620,049; Mar. 8.
Awning. W. R. Torbert. 1,620,045; Mar. 8.
Awning structure. W. R. Torbert. 1,620,500; Mar. 8.
Axle housings, Making. A. L. Lambert. 1,620,616; Mar. 8.
Baby carriage, Collapsible. W. R. Oyston. 1,620,281; Mar. 8.
Bag: *See*—
  Air bag.
Bag lock. F. T. Stuart. 1,620,171; Mar. 8.
Bait trap and carrier, Fisherman's. L. Marsh and O. J. Dufresne. 1,620,617; Mar. 8.
Ball: *See*—
  Signal ball.
Balls of any kind, Device for closing the air bladders of sport. A. W. Turner. 1,620,245; Mar. 8.
Bank protector. J. C. Lucas. 1,619,982; Mar. 8.
Base-attached plotting instrument. A. C. White. 1,620,311; Mar. 8.
Bed and spring therefor. A. B. Sprague. 1,620,404; Mar. 8.
Bed davenport. D. F. Dyke. 1,620,086; Mar. 8.
Bedding and the like, Preparing feathers for. W. H. Uhrig. 1,620,303; Mar. 8.
Bedding clamp, Adjustable. F. M. Correa. 1,619,853; Mar. 8.
Bedstead. M. Antrobus. Des. 72,127; Mar. 8.
Belt conveyers, Control system for endless. C. R. Fisher. 1,620,532; Mar. 8.
Belt conveyers, Endless. J. W. Silver. 1,620,168; Mar. 8.
Belt shifter. D. C. Klausmeyer. 1,620,214; Mar. 8.
Bending and buckle-attaching machine, Band-. M. P. Lawton. 1,619,873; Mar. 8.
Binder, Loose-leaf. H. B. Jennings, jr. 1,620,103–5; Mar. 8.
Binders, Tripping mechanism for. L. K. O. Bakke. 1,620,055; Mar. 8.
Birdcage. A. M. Kroczek. 1,620,361; Mar. 8.
Birdcage. O. Lindemann. Des. 72,159; Mar. 8.
Block: *See*—
  Paving block.
Boat. W. A. Hickman. 1,620,349; Mar. 8.
Body lifter and carrier. C. W. Smith. 1,620,298; Mar. 8.
Boiler: *See*—
  Oil-burner boiler.
Boilers, Control for sub-vacuous condition of periodically-fired. V. T. Brigham. 1,620,005; Mar. 8.
Bolt or rod straightening machine. D. P. Kellogg. 1,620,260; Mar. 8.
Book end. P. M. Griffith. Des. 72,149; Mar. 8.
Boots and shoes, Protector for. N. W. Urwin. 1,620,413; Mar. 8.
Boring machine, Adjustable. N. Maddox. 1,620,371; Mar. 8.
Bottle rack. H. R. Streif. 1,620,407; Mar. 8.
Bowling pin. M. J. Whelan. 1,620,310; Mar. 8.
Box: *See*—
  Driving box. Mail box.
  Flush box. Shipping box.
  Locomotive driving box.
Box body and cover assembling apparatus, Automatic. J. M. Hothersall. 1,620,025; Mar. 8.
Boxes, Apparatus for molding battery. T. R. Palmer. 1,620,388; Mar. 8.
Boxing apparatus. E. E. Foster. 1,620,598; Mar. 8.
Brake: *See*—
  Air brake. Roller brake.
  Chock brake. Vehicle brake.
Brake-equalizing mechanism. Barrett, P. D. 1,619,912; Mar. 8.
Brake mechanism. V. Bendix. 1,619,806; Mar. 8.
Brake mechanism, Hydraulic. F. J. MacKenzie. 1,620,115; Mar. 8.
Brake mechanism, Railway-. J. S. Ball. 1,620,508; Mar. 8.
Brake shoe. W. L. Krieg. 1,620,030; Mar. 8.
Brakes, Bleeder attachment for. L. W. Heffelfinger and L. J. Courtney. 1,619,821; Mar. 8.
Brakes, Drop shaft for hand. S. J. Strid. 1,620,141; Mar. 8.
Brakes, Equalizer for four-wheel. F. L. Nelson and J. A. Harmon. 1,620,221; Mar. 8.
Bridge-score recorder. C. A. Cooke. 1,620,077; Mar. 8.
Brush, Wire-base. E. Curtis. 1,620,008; Mar. 8.
Buckle. L. Lehr. 1,620,216; Mar. 8.
Buckle, Belt. R. F. Eichner. Des. 72,146; Mar. 8.
Buckle, Belt. J. Knistrom. 1,620,157; Mar. 8.
Buckle, Belt. L. W. Shields. Des. 72,101; Mar. 8.
Building materials, Composition of matter adapted to be used for. H. B. Abbott. 1,620,312; Mar. 8.
Bulkhead, Adjustable. J. G. Whisler and C. R. McElwee. 1,619,905; Mar. 8.
Bumper, Multibar. R. B. Fageol. 1,620,334; Mar. 8.
Bumper, Safety. A. Johnson. 1,620,106; Mar. 8.
Burner: *See*—
  Gas burner. Vapor burner.
  Oil burner.
Bust supporter. L. Farkas. 1,620,335; Mar. 8.
Cabinet for electrical apparatus, Sectional. H. L. Van Valkenburg. 1,620,047; Mar. 8.
Cables, Header bracket for ignition. B. M. Smarr. 1,619,991; Mar. 8.
Cake support. J. M. Gowans. 1,619,818; Mar. 8.
Cam device. W. M. Densmore. 1,620,445; Mar. 8.
Camera construction, Photographic-. E. E. Underwood. 1,620,304; Mar. 8.
Cameras, Visible registering device for. B. Schade. 1,620,040; Mar. 8.
Can: *See*—
  Pressure oil can.

Can grid. N. M. Small and L. Buehler, jr. 1,620,579; Mar. 8.
Can washer. D. A. Maanum. 1,620,116; Mar. 8.
Candlestick. O. B. Bach. Des. 72,133–4; Mar. 8.
Cap. M. E. Smith. 1,620,400; Mar. 8.
Car coupler. C. H. Gage. 1,620,535; Mar. 8.
Car coupling. L. W. Higgins. 1,620,350; Mar. 8.
Car-door controls, Dump-. W. J. Hoscelt. 1,620,023; Mar. 8.
Car-flange-wheel oiler. J. L. Scott. 1,620,578; Mar. 8
Car, Freight. E. T. Cunningham. 1,619,920; Mar. 8.
Car, Tank. E. A. Fall. 1,620,453; Mar. 8.
Carburetor. R. S. Cunningham. 1,620,080; Mar. 8.
Carburetor. I. T. Swartz. 1,619,894; Mar. 8.
Carcass splitting machine. A. H. Paxton. 1,620,035; Mar. 8.
Card holder. M. Meyerson. 1,619,827; Mar. 8.
Card record, Visible. H. Hald. 1,620,547; Mar. 8.
Carpet. I. J. Vetter. Des. 72,198; Mar. 8.
Carpet fasteners, Mechanism for setting. G. A. King, F. E. Warner, and E. H. Tompkins. 1,620,468; Mar. 8.
Carrier: *See*—
  Luggage carrier.
Carton. J. Wagner. 1,620,174; Mar. 8.
Carton, Display. B. Evans. 1,620,197; Mar. 8.
Cartridges, Primer for. O. C. Horney. 1,619,867; Mar. 8.
Case: *See*—
  Ticket case. Vanity case.
Case. W. Watt, jr. 1,620,417; Mar. 8.
Case-filling machine. C. H. Wild. 1,619,830; Mar. 8.
Casket. E. J. Greive. 1,620,544; Mar. 8.
Cattle guard. P. Herndon. 1,620,348; Mar. 8.
Centrifugal machine. C. T. Ordway. 1,620,568; Mar. 8.
Ceramic and other products, Firing. C. T. Holcroft and C. E. Doll. 1,620,022; Mar. 8.
Chain. H. V. Shirley. 1,620,613; Mar. 8.
Chain link. L. A. Veigel. 1,620,048; Mar. 8.
Chair: *See*—
  Rod chair.
Chair. O. B. Bach. Des. 72,137; Mar. 8.
Chandelier or article of similar nature. G. E. Villaret. Des. 72,197; Mar. 8.
Chemical reactions, Process and apparatus for conducting. C. O. Young and C. J. Herrly. 1,620,180; Mar. 8.
Chicken coop, Collapsible. E. S. Trimble. 1,620,143; Mar. 8.
Chock brake. B. Zucker. 1,619,845; Mar. 8.
Cigar lighter. O. C. Dennis. 1,620,327; Mar. 8.
Cigarette holder. P. B. Tingley. 1,620,302; Mar. 8.
Circuit closer, Thermal. F. Bosshart. 1,620,062; Mar. 8.
Clamp: *See*—
  Bedding clamp. Knife glue clamp.
  Hose clamp.
Clamp. S. R. Kirkhoff. 1,620,469; Mar. 8.
Clamping apparatus, Rail-. A. Taurman. 1,620,172; Mar. 8.
Classifier deck. A. H. Stebbins. 1,620,243; Mar. 8.
Cleaner: *See*—
  Eraser cleaner. Windshield cleaner.
  Lawn cleaner.
Clevis. D. Palmer. 1,620,387; Mar. 8.
Clock, Reminder. C. R. Gains. 1,620,455; Mar. 8.
Clockwork mechanism. E. E. Lehwess. 1,619,943; Mar. 8.
Closet: *See*—
  Water-closet.
Closure. L. E. Baltzley. 1,620,316; Mar. 8.
Closure. C. J. Whitacre. 1,619,996; Mar. 8.
Closure and operating same, Folding. W. B. Gervais. 1,619,816; Mar. 8.
Cloth bridge-table cover or the like, Embroidered. S. N. Malhouk. Des. 72,106; Mar. 8.
Clothes rack. J. B. Felicety. 1,620,199; Mar. 8.
Clutch. P. G. Leonard. Re16,568; Mar. 8.
Clutch. H. V. Reed. 1,619,884; Mar. 8.
Clutch device. W. C. Smith. 1,619,892; Mar. 8.
Clutch, Ribbon-spool. S. A. Neldich. 1,620,279; Mar. 8.
Cock, Blow-off. O. Huff. 1,620,464; Mar. 8.
Coffeepot. M. Bontempi. 1,619,967; Mar. 8.
Collar-stretching machine. M. L. Kaplan and M. Brandish. 1,619,939; Mar. 8.
Color design, Producing relative. R. Sykora. 1,620,604; Mar. 8.
Combing machine. J. J. G. G. Corman. 1,620,325; Mar. 8.
Commutator motor, Alternating-current. P. Rohde. 1,620,395; Mar. 8.
Composition articles, Making. W. J. Gaven. 1,620,538; Mar. 8.
Concrete mixer. H. Powers. 1,620,287; Mar. 8.
Concrete or cementitious structure, Molding. C. Brynoldt. 1,620,514; Mar. 8.
Concrete structures, Form tie for. J. B. Hawley, jr. 1,619,933; Mar. 8.
Condenser, Variable. C. Hardy. 1,620,020; Mar. 8.
Condenser, Variable. F. E. Swope, jr. 1,620,244; Mar. 8.
Container, Cooling-medium. C. W. Hack. 1,619,864; Mar. 8.
Containers, Method and apparatus for repairing fluid. E. C. Furman. 1,610,154; Mar. 8.
Control mechanism. J. E. Renholdt. 1,620,230; Mar. 8.
Control method and apparatus. T. Appleby. 1,619,911; Mar. 8.
Conveyer. E. M. McVicker. 1,620,268; Mar. 8.
Cooking device, Electric. B. Mayer. 1,620,602; Mar. 8.
Copper-lime dust. G. E. Sanders. 1,620,490; Mar. 8.
Corset. A. Lipman. 1,619,874; Mar. 8.
Corset, Maternity. A. H. Lockwood. 1,620,264; Mar. 8.
Cot for automobiles. W. C. Brye. 1,620,433; Mar. 8.
Coupling: *See*—
  Car coupling. Flexible coupling.
Crate. F. Walther. 1,620,585; Mar. 8.
Crate for animals, Shipping. B. F. Tarman. 1,619,895; Mar. 8.
Cream-removing apparatus. G. Haberman. 1,619,973; Mar. 8.
Crossing gate, Railway and highway. J. M. Jones. 1,620,026; Mar. 8.
Crossing signal. J. B. Gebbard and H. Althaus. 1,620,600; Mar. 8.
Crossings, Stop signal for. G. L. Estes. 1,620,087; Mar. 8.
Crusher: *See*—
  Stone crusher.
Cue-tip fastener. H. J. Grenier. 1,620,545; Mar. 8.
Cuff, Reenforced shirt. G. I. Bennett. 1,620,319; Mar. 8.
Cultivator. R. H. Griffith. 1,619,862; Mar. 8.
Cultivator for eliminating quack grass. L. Leonard and R. J. Beise. 1,620,510; Mar. 8.
Cultivators, Truck for disk. A. Wenndt. 1,619,904; Mar. 8.
Culverts, Head-wall structure for. A. F. Fischer. 1,620,089; Mar. 8.
Cup: *See*—
  Lubricant cup.
Current cut-out device for polyphase circuits, Automatic alternating-. M. N. Mikulic. 1,620,483; Mar. 8.
Curtain. M. Leslie. 1,619,945; Mar. 8.
Cutter: *See*—
  Thread and cord cutter.
Cutter. R. Curtner. 1,620,153; Mar. 8.
Cutting board and guide. M. L. Kaplan. 1,619,940; Mar. 8.
Cut-off. C. R. Renehan. 1,619,956; Mar. 8.
Cycle and like saddles, Manufacture of. H. and J. Jelley. 1,620,554; Mar. 8.
Dandelion digger and puller. H. G. Davis. 1,619,856; Mar. 8.
Decalcomania transfer sheet. J. O. Hartz. Des. 72,152; Mar. 8.
Dental canals by suction, Arrangement for removing secretions from. R. Fust. 1,620,599; Mar. 8.
Dentist's furnace. R. M. White. 1,620,179; Mar. 8.
Depilator. H. Gernsback. 1,620,539; Mar. 8.
Desiccator. G. B. Ridley. 1,620,289; Mar. 8.
Desk set. M. Finstone. Des. 72,147; Mar. 8.
Diagnostic apparatus. D. M. Ryan. 1,619,886; Mar. 8.
Dipper tooth, Reversible-point. C. A. Pallander. 1,620,132; Mar. 8.
Disinfectant composition. G. G. Gordon. 1,619,861; Mar. 8.
Disk wheel, Wood. E. C. Sendelbach. 1,620,398; Mar. 8.
Dispenser. C. T. Newton. 1,620,280; Mar. 8.
Dispensing and refrigerating apparatus, Bottle. D. V. Wright. 1,619,999; Mar. 8.
Dispensing device. E. O. and R. M. Warwick. 1,620,178; Mar. 8.
Displacement-responsive device. E. E. Johnson. 1,620,465; Mar. 8.
Display containers, Duplex closure for. H. Hermani. 1,620,156; Mar. 8.
Display device. F. G. Fullgraff. 1,620,533; Mar. 8.
Display plaque and method of making. W. Van Diest. 1,620,046; Mar. 8.
Display rack. T. J. Abele. 1,620,313; Mar. 8.
Display rack. R. Warren. 1,619,900; Mar. 8.
Display stand. L. L. Williams. 1,620,148; Mar. 8.
Distilling apparatus. W. E. Brown. 1,620,593; Mar. 8.
Distribution system. E. F. W. Alexanderson. 1,620,506; Mar. 8.
Door-closing means, Check for garage-. M. Kirnbauer. 1,620,109; Mar. 8.
Door, Metal. E. H. Ellison and A. W. Beckstrom. 1,620,451; Mar. 8.
Doors, Operating mechanism for shaft. F. A. Boedtcher. 1,620,430; Mar. 8.
Dough molder. W. G. Kirchhoff. 1,620,559; Mar. 8.
Dredging machine. V. F. Casey. 1,619,850; Mar. 8.
Drier. I. Schuman and B. E. Frank. 1,620,577; Mar. 8.
Drill: *See*—
  Seed drill.
Drill chuck. G. W. Cary. 1,620,440; Mar. 8.
Drinking glass. R. I. Ratner. Des. 72,188; Mar. 8.
Drying machine. H. Morshead and H. H. Wigglesworth. 1,620,120; Mar. 8.
Dump-door mechanism. D. Hindahl. 1,620,097; Mar. 8.
Elastic strapping. H. J. Martin. 1,620,162; Mar. 8.
Electric controller. J. E. Sederholm. 1,619,960; Mar. 8.
Electric droplight fixture. R. S. Aspinwall. Des. 72,130–1; Mar. 8.
Electric heater. J. E. Sederholm. 1,620,296; Mar. 8.
Electric machine with split poles. H. Papst. 1,620,608; Mar. 8.
Electric measuring instrument. L. A. Paine. 1,620,126; Mar. 8.
Electric transmission system. E. H. Jacobs and C. F. Scheonmaker. 1,620,552; Mar. 8.

Electrical abrasion process. M. S. Clawson. 1,620,519; Mar. 8.
Electrical heater. C. C. Garey. 1,620,537; Mar. 8.
Electrical heating appliance. A. Pfau, jr. Des. 72,186; Mar. 8.
Electrical switching apparatus. R. M. Gilson. 1,619,860; Mar. 8.
Electrode device, Incandescent. C. Samson. 1,620,397; Mar. 8.
Electrolytic apparatus and electrode therefor. W. G. Allan. 1,620,052; Mar. 8.
Electrolytic condensers, Excitation of. R. D. Mershon. 1,620,119; Mar. 8.
Electromagnetic device. B. W. Jones. 1,620,556; Mar. 8.
Electromagnetic device for alternating-current circuits. B. W. Jones and N. A. Wolfe. 1,620,555; Mar. 8.
Elevator. N. A. Blackham and G. N. Robillard. 1,619,966; Mar. 8.
Elevator. B. C. Van Emon. 1,620,305; Mar. 8.
Elevator safety stop, Noiseless. W. F. McMahon. 1,620,033; Mar. 8.
Embroidery machines, Trimming device for. A. Mistretta. 1,620,378; Mar. 8.
Emergency heater. W. A. Brown. 1,620,432; Mar. 8.
Engine: *See*—
Internal-combustion engine.
Engines, Air strainer for combustion. W. L. and E. L. Olmstead. 1,619,954; Mar. 8.
Engines and motors, Valve for. J. U. Jones. 1,620,355; Mar. 8.
Engines, Cylinder construction for gas. E. A. Watts. 1,619,903; Mar. 8.
Engines, Device for supplying moistened air to internal-combustion. R. A. Labbe. 1,619,871; Mar. 8.
Engines, Explosive chamber for gas. J. B. McKeown. 1,620,565; Mar. 8.
Engines, Fluid-operable lubricator for. F. K. Murphy and R. W. Retterer. 1,620,121; Mar. 8.
Engines, Starting device for internal-combustion. S. Jencick. 1,620,102; Mar. 8.
Eraser cleaner, Blackboard-. L. H. Ward. 1,619,899; Mar. 8.
Excavating machine. T. L. Loftus. 1,619,875; Mar. 8.
Extraction by pressure, Apparatus for continuous. P. Navarre. 1,620,567; Mar. 8.
Eye set. A. Konoff. 1,619,824; Mar. 8.
Fabric: *See*—
Pile textile fabric.
Fabric, Method of and apparatus for making composite. P. H. Walsh. 1,620,307; Mar. 8.
Fan, Concentrator-table. A. H. Stebbins. 1,620,242; Mar. 8.
Fan, Hand. A. Rodriguez. 1,620,394; Mar. 8.
Fan, Machine-operated portable. H. Gatti. 1,620,457; Mar. 8.
Fastener. E. Dresner. 1,620,611; Mar. 8.
Fastening device. C. N. Ramstad. 1,620,301; Mar. 8.
Fastening-inserting mechanism. G. Goddu and F. L. Mackenzie. 1,620,209; Mar. 8.
Fastening means M. B. Behrman. 1,619,803; Mar. 8.
Fender: *See*—
Vehicle fender.
Fertilizer distributor. G. L. Bilbrey. 1,620,320; Mar. 8.
Film cut-out. H. E. Rutter. 1,620,518; Mar. 8.
Film spool. H. A. De Vry. 1,620,605; Mar. 8.
Filter. E. de Stubner. 1,620,083; Mar. 8.
Filtering apparatus. B. Bramwell. 1,620,431; Mar. 8.
Finger ring. S. Grossman. Des. 72,150; Mar. 8.
Finger-ring facings, Mount for. C. Fischer. 1,620,252; Mar. 8.
Fire-alarm system. J. M. Johnson. 1,620,107; Mar. 8.
Firearms, Feed strip for. C. Sutter. 1,620,408; Mar. 8.
Fire bridge. J. Langer. 1,620,215; Mar. 8.
Fire escape. J. W. Wetzel. 1,620,309; Mar. 8.
Fire extinguisher. A. F. Thompson. 1,620,142; Mar. 8.
Fire pot. J. R. Johnson. 1,620,353; Mar. 8.
Fireproof building. H. Sorensen. 1,620,139; Mar. 8.
Fishhook, Automatic. H. M. Sykes. 1,620,497; Mar. 8.
Fishhook, Snagless. H. R. Ackerman. 1,620,589; Mar. 8.
Flatiron. M. C. Bersted. 1,629,183; Mar. 8.

Locomotive-rear-end support. W. E. Woodard. 1,620,423; Mar. 8.
Locomotive, Steam. R. H. Whitelegg. 1,620,586; Mar. 8.
Log-securing device. J. T. Sannar and C. R. Lawler. 1,619,958; Mar. 8.
Loom attachment. A. Gagnon. 1,620,601; Mar. 8.
Loom let-offs, Reversing motion for. W. H. Wakefield. 1,620,175; Mar. 8.
Looms, Dobby finger for. W. H. Wakefield. 1,620,176; Mar. 8.
Looms, Harness motion for. W. Simmchen. 1,619,930; Mar. 8.
Looms, Shuttle-checking device for. W. H. Baker and J. Dewhurst. 1,619,847; Mar. 8.
Looms, Shuttle-checking mechanism for. A. E. Dean. 1,620,195; Mar. 8.
Looms, Stop mechanism for. H. A. Davis. 1,620,194; Mar. 8.
Loud speaker. O. O. Widmann. Des. 72,199–200; Mar. 8.
Loud speaker, Base for a. R. T. Davis. Des. 72,145; Mar. 8.
Lubricant cup. P. J. and C. H. Jorgensen. 1,620,557; Mar. 8.
Lubricating and internal-pressure spring, Self-. C. Thide. 1,620,301; Mar. 8.
Lubricator. P. W. Gates. 1,620,253; Mar. 8.
Lubricator. F. W. Martin. 1,620,479; Mar. 8.
Lubricator. S. Munson. 1,620,381; Mar. 8.
Luggage carrier. E. McPhail. 1,620,218; Mar. 8.
Machines, Controlling means for. M. H. Ballard. 1,620,001; Mar. 8.
Magazine-lubricating means. C. T. Myers. 1,620,277–8; Mar. 8.
Magneto-electric machine. A. F. Gerdes. 1,619,926; Mar. 8.
Magnetos, Brenker mechanism for ignition. W. Hawkins. 1,619,932; Mar. 8.
Mail box, Gang. H. Krick. 1,620,474; Mar. 8.
Mail-box indicator or flag, Rural-. I. D. Alderman. 1,620,314; Mar. 8.
Marble-polishing buffer. C. R. Abbott. 1,619,961; Mar. 8.
Mat or the like, Lace. S. N. Mallouk. Des. 72,169–75; Mar. 8.
Measuring bucket or vessel. A. Davis, jr. 1,620,610; Mar. 8.
Measuring gauge. L. H. Stein. 1,619,834; Mar. 8.
Measuring gauge, Liquid-. J. Cook. 1,619,919; Mar. 8.
Medallion. J. D. Karle. 1,620,259; Mar. 8.
Mercerizing machine. F. S. Wilcox. 1,620,419; Mar. 8.
Mercury gauges, Regulator for. A. A. Gibson. 1,620,540; Mar. 8.
Metal bars, Machine for shearing. E. P. Jones. 1,620,354; Mar. 8.
Metallic fiber article, Consolidated. C. Field. 1,620,530; Mar. 8.
Meter: *See*—
Induction meter. Parking meter.
Liquid meter.
Microscopic-slide staining and drying apparatus. F. Hintio and J. Schultz. 1,620,351; Mar. 8.
Mill: *See*—
Rolling mill.
Mills, Plate-lifting mechanism for rolling. T. McCabe. 1,620,032; Mar. 8.
Milling products, Improving. H. C. J. H. Gelissen. 1,620,458; Mar. 8.
Mining-machine chain lubricator. H. L. Seekamp. 1,620,135; Mar. 8.
Mixer: *See*—
Concrete mixer.
Mold: *See*—
Ice-cream-dipper mold. Multicellular mold.
Ingot mold.
Mold-ramming machine. J. Stone. 1,620,406; Mar. 8.
Molds, Making ingot. G. A. Dornin. 1,620,011; Mar. 8.
Molding machine, Centrifugal. W. H. Beatty. 1,620,427; Mar. 8.
Molding machines, Mechanism for controlling and operating. F. J. Wood. 1,620,050; Mar. 8.
Molten glass, Method and apparatus for feeding. G. E. Howard. 1,620,207; Mar. 8.
Money-changer holder. F. F. Neal. 1,619,880; Mar. 8.
Mop and wringer, Combined. E. Jumonville. 1,620,028; Mar. 8.
Motor: *See*—
Commutator motor. Wave and tide motor.
Motor-control system. E. E. Kleinschmidt. 1,620,359; Mar. 8.
Muffle furnace, Electric resistance. W. Rohn. 1,619,829; Mar. 8.
Multicellular mold. D. M. Bernotow. 1,619,914; Mar. 8.
Nail. F. Coates. 1,620,193; Mar. 8.
Nail. F. P. Leonard. 1,619,944; Mar. 8.
Necklace or similar article. J. R. Miller. Des. 72,180; Mar. 8.
Necktie holder. A. Jaffe. 1,620,553; Mar. 8.
Needle. R. A. Howe. 1,620,550; Mar. 8.

Niche seat and lavatory, Combined. M. J. Tracy. Des. 72,195; Mar. 8.
Nipple for nursing bottles. G. H. Donaldson. 1,620,329; Mar. 8.
Nonmetallic facings to working-clutch members, Attaching. F. C. Stanley. 1,620,043; Mar. 8.
Nozzle, Spray. C. Ibne. 1,620,209; Mar. 8.
Objective. C. W. Frederick and F. E. Altman. 1,620,337; Mar. 8.
Objects, Method of and apparatus for marking. H. W. Hacker. 1,620,343; Mar. 8.
Oil, Apparatus for cracking. G. Egloff and H. P. Benner. 1,619,922; Mar. 8.
Oil, Apparatus for treating petroleum. H. J. Halic. 1,619,929; Mar. 8.
Oil-burner boiler. L. L. Scott. 1,619,889; Mar. 8.
Oil burner, Fuel-. A. J. Woodcock. 1,619,910; Mar. 8.
Oil burner, Fuel-. A. J. Woodcock. 1,619,998; Mar. 8.
Oil-burning apparatus. E. D. Lewis. 1,620,111; Mar. 8.
Oil, Cracking petroleum. G. Egloff. 1,619,921; Mar. 8.
Oil holder. J. L. Schneider. 1,620,294; Mar. 8.
Oil, Lubricating. J. F. Anderson. 1,619,964; Mar. 8.
Oil-well-tubing drainer. J. C. Taylor. 1,620,173; Mar. 8.
Oil wells, Liner for. J. Tweeddale. 1,620,412; Mar. 8.
Oils and apparatus therefor, Converting. J. C. Clancy. 1,620,075; Mar. 8.
Oils, Converting or cracking hydrocarbon. W. E. Trent. 1,619,896; Mar. 8.
Oils, Process and apparatus for treating. L. C. Huff. 1,619,977; Mar. 8.
Oils, Treating hydrocarbon. L. E. Jackson. 1,619,869; Mar. 8.
Onion juice, Preparation of concentrated. C. Marx. 1,619,826; Mar. 8.
Operating mechanism. J. R. Cautley. 1,619,810; Mar. 8.
Ore-grinding machine. G. W. Northland. 1,620,276; Mar. 8.
Pad: *See*—
Heating pad.
Pail, Fruit. J. L. Betts. 1,620,059; Mar. 8.
Paint and varnish remover. O. P. Swift. 1,620,409; Mar. 8.
Paint packages, Follower for. J. W. Hasburg. 1,619,930; Mar. 8.
Paper, carton, and like materials, Apparatus for working. H. Robst. 1,619,848; Mar. 8.
Paper-making machine. F. A. Peschl. 1,620,037; Mar. 8.
Paper-ware manufacture. H. B. Smith. 1,620,239; Mar. 8.
Parking meter. W. A. Homan and C. T. Austin. 1,620,098; Mar. 8.
Paving block. A. M. Zottoli. 1,619,844; Mar. 8.
Pedal actuating and holding means, Low-speed. W. J. Kidd. 1,620,467; Mar. 8.
Pen and pencil grip. A. L. Baer. 1,619,801; Mar. 8.
Pen and stand therefor, Fountain. W. I. Ferris. 1,620,529; Mar. 8.
Pen, Fountain. C. A. Haist. 1,620,345; Mar. 8.
Pencil, Lead. M. F. Glennon. 1,619,927; Mar. 8.
Perch puller. J. E. Dowley. 1,620,084; Mar. 8.
Petroleum, Process of and apparatus for refining. F. A. and J. A. Milliff. 1,620,163; Mar. 8.
Phonograph record and making the same, Electric. A. Mutscheller. 1,620,122; Mar. 8.
Pianos, Auxiliary motor-drive mechanism for player. F. Minutillo. 1,620,484; Mar. 8.
Picture machines, Method and apparatus for fire protection in moving-. J. E. Robin. 1,619,957; Mar. 8.
Pictures, Method and apparatus for producing colored motion. L. D. Mannes and L. Godowsky, jr. 1,619,949; Mar. 8.
Piezo-electric-crystal apparatus. A. Crossley. 1,619,854; Mar. 8.
Pile textile fabric. S. Freudenberg. 1,620,340; Mar. 8.
Piling mechanism, Sheet-. W. F. Conklin, H. S. Hopkins, and J. M. Hover. 1,619,804; Mar. 8.
Pin: *See*—
Bowling pin.
Pins, Holder for laundry marking. B. P. Stoer. 1,619,893; Mar. 8.
Pipe: *See*—
Tobacco pipe.
Pipe wrench. H. Goulas. 1,620,016; Mar. 8.
Pipe wrench. T. E. Stephenson. 1,620,170; Mar. 8.
Piston-ring groove. H. Stoll. 1,619,993; Mar. 8.

Display stand. Transport stand.
Steam trap. F. Thomas. 1,619,898; Mar. 8.
Steel crosstie, Twin. J. Ashman. 1,620,181; Mar. 8.
Steering device. H. Schroder. 1,620,237; Mar. 8.
Steering gear. C. W. Kelsey. 1,619,980; Mar. 8.
Steering-wheel knob. D. E. Norcross. 1,620,223; Mar. 8.
Step and repeat machine. O. Fournier. 1,620,336; Mar. 8.
Sterilizer. T. R. Kragen and T. A. Errett. 1,620,360; Mar. 8.
Stocking. R. Breyer. Des. 72,143; Mar. 8.
Stockings, Rubber protector for. A. Henderson. 1,619,934; Mar. 8.
Stoker furnace. T. A. Marsh. 1,620,270; Mar. 8.
Stokers, Fuel-distributing means for underfeed. R. L. Beers. 1,620,509; Mar. 8.
Stone crusher. E. F. Cookinham. 1,620,078; Mar. 8.
Storage and conveying apparatus, Motion. E. A. White. 1,619,900; Mar. 8.
Stove. M. R. Lehman. Des. 72,158; Mar. 8.
Stove and electrical igniting means, Oil. D. R. Price. 1,620,489; Mar. 8.
Stove, Gasoline camp. L. B., N., W., and J. M. Goldberg. 1,620,095; Mar. 8.
Strap holder, Check-. A. C. Hudgens. 1,620,463; Mar. 8.
Supporting device. J. C. Reinke, jr. 1,620,288; Mar. 8.
Surfacing machine. L. H. Gray. 1,620,459; Mar. 8.
Swaging machines, Feeding mechanism for. E. A. Dean. 1,619,971; Mar. 8.
Sweeper, Carpet. W. H. Kenyon. 1,620,358; Mar. 8.
Sweeper, Carpet. J. L. Shorrock. 1,620,297; Mar. 8.
Swimming-instructing machine. T. A. Walton. 1,620,146; Mar. 8.
Switch: *See*—
Automatic switch. Signal switch.
Switch-box support and latch holder, Combined. C. E. Bowers. 1,620,063; Mar. 8.
Switch mechanism. E. H. Remde. 1,620,167; Mar. 8.
Switches, Attachment for oil. J. D. Hilliard. 1,620,155; Table. M. Antrobus. Des. 72,128; Mar. 8.
Table. O. B. Bach. Des. 72,135; Mar. 8.
Table. H. L. Guth. Des. 72,151; Mar. 8.
Table cover or the like, Lace. S. N. Mallouk. Des. 72,164–6; Mar. 8.
Table for vegetables and fruits, Turnover. S. B. Lindley. 1,620,217; Mar. 8.
Tableware and making the same, Silver-reenforced. T. B. Lashar. 1,619,872; Mar. 8.
Talking machine. K. Holtz. 1,620,257; Mar. 8.
Tank. H. F. Koeppe. 1,620,471; Mar. 8.
Tank cover, Leakproof-. W. T. Van Orman. 1,620,415; Mar. 8.
Telegraph-exchange system, Printing-. G. S. Vernam. 1,619,897; Mar. 8.
Telemetric system. G. W. Sprenger. 1,620,405; Mar. 8.
Telephone-exchange system. B. G. Dunham and W. T. Haines. 1,620,012; Mar. 8.
Telephone receiver. J. Kleinman. 1,620,263; Mar. 8.
Telephone system. A. Flad. 1,620,090; Mar. 8.
Telephone system, Automatic. C. E. Lomax. 1,620,113; Mar. 8.
Temperature controlled fluid mixing device. A. A. Smith. 1,620,238; Mar. 8.
Tennis rackets, Case for. H. Chase. 1,620,072; Mar. 8.
Ternary gaseous mixtures, Separation of the constituents of. W. Wilkinson. 1,619,909; Mar. 8.
Textile fabric or the like. H. Silberman. Des. 72,192; Mar. 8.
Textile fibers, Half lap for combing. J. K. Lanning. 1,620,031; Mar. 8.
Thread and cord cutter. M. Rosenblum. 1,620,572; Mar. 8.
Thumb-hole-cutting machine. J. A. Stock. 1,620,299; Mar. 8.
Ticket case. W. J. Schramm. 1,620,295; Mar. 8.
Tin, Metallurgy of. E. A. C. Smith. 1,620,580; Mar. 8.
Tire. A. S. Michelson. Des. 72,179; Mar. 8.
Tire chain. E. W. Bunger. 1,620,517; Mar. 8.
Tire flap. E. G. Hulse. 1,619,868; Mar. 8.
Tire for vehicle wheels. M. N. A. Develay. 1,619,812; Mar. 8.

Tire holder. F. A. Lind 1,620,478; Mar. 8.
Tire machine. E. G. Templeton. 1,620,499; Mar. 8.
Tire machine, Cord-. W. G. Fording. 1,620,092; Mar. 8.
Tire traction device, Resilient-. D. W. Ohaver. 1,620,384; Mar. 8.
Tires, Antiskid chain for. W. H. Coad. 1,620,076; Mar. 8.
Tires, Chain equipment for. F. H. Arnzen. 1,619,846; Mar. 8.
Thread, Making. F. Rosenthal. 1,620,233; Mar. 8.
Tobacco pipe. J. M. Wilson. 1,620,420; Mar. 8.
Tool, Combination. R. Klaboe. 1,620,262; Mar. 8.
Tool, Interchangeable boring and counterboring. E. Gairing. 1,620,536; Mar. 8.
Tool, Percussive hand. R. Goldschmidt. 1,620,201; Mar. 8.
Tools, Handle for. W. H. Matthai. 1,620,480; Mar. 8.
Toothbrush. S. E. Douglass. 1,620,330; Mar. 8.
Toothbrushes and container for same. J. Magee. 1,619,946; Mar. 8.
Torchère. O. B. Bach. Des. 72,136; Mar. 8.
Towel rack and clothesline, Combined. O. R. Betts. 1,620,590; Mar. 8.
Toy balloon. H. Pemberton. 1,620,036; Mar. 8.
Toy balloon frame. E. S. Eichenlaub. 1,620,331; Mar. 8.
Toy dog. M. R. Smith. Des. 72,193; Mar. 8.
Toy, Figure wheeled. A. M. Smolens. Des. 72,194; Mar. 8.
Toy, Sheet-material. C. E. Arundel. 1,620,053; Mar. 8.
Toy, Single horse and cart. W. D. Bludworth. Des. 72,140; Mar. 8.
Toy tracks, Wire-terminal clip for. H. S. Becker. 1,620,428; Mar. 8.
Toys, Frame or body of joint dolls and other articulated or jointed. A. Bucherer. 1,620,069; Mar. 8.
Tractors, Cultivator attachment for. L. Hover. 1,620,099; Mar. 8.
Traffic signal. L. L. Schmidt. 1,620,576; Mar. 8.
Train control. C. S. Bushnell. 1,620,188; Mar. 8.
Transformer. L. H. Burnham. 1,620,437; Mar. 8.
Transformer. E. J. Temple. 1,620,411; Mar. 8.
Transmission. A. B. Bowman. 1,620,064; Mar. 8.
Transmission and bearing, Combined resilient. B. F. Seymour. 1,620,136; Mar. 8.
Transmission band. J. Mulligan. 1,619,983; Mar. 8.
Transmitting coded currents, Apparatus for. A. J. Sorensen. 1,620,169; Mar. 8.
Transport stand. E. A. White. 1,619,907; Mar. 8.
Trap: *See*—
Game trap.
Tray cover or the like, Lace. S. N. Mallouk. Des. 72,167; Mar. 8.
Trimmer with tightener take-up, Pacific coast type. C. A. Huffman. 1,620,101; Mar. 8.
Trolley wheel. L. E. Harmon. 1,620,203; Mar. 8.
Trouble-indicating system. L. M. Potts. 1,620,286; Mar. 8.
Truck elevator utilizing parallel motion. W. H. Heise. 1,620,256; Mar. 8.
Truck, Industrial. E. H. Remde. 1,620,038; Mar. 8.
Truck, Locomotive or car. A. F. Batchelder. 1,620,425; Mar. 8.
Tube-cutting machine. E. M. Hawkins. 1,619,975; Mar. 8.
Tubes, Apparatus for the manufacture of rubber or the like. J. Dalglish. 1,620,521; Mar. 8.
Tubing, Apparatus for elevating and lowering oil-well. A. E. Carlson. 1,620,190; Mar. 8.
Turbines, Governing mechanism for elastic fluid. W. L. R. Emmet. 1,620,528; Mar. 8.
Turntable. K. Mayer. 1,620,273; Mar. 8.
Tuyère structure. R. L. Beers. 1,620,056; Mar. 8.
Tuyère structure, Side. R. L. Beers. 1,620,057; Mar. 8.
Typewriting machine. G. K. Block. 1,620,004; Mar. 8.
Typewriting machines, Paper guide for. V. Gage. 1,619,858; Mar. 8.
Underreamer. C. T. Mapes. 1,619,984; Mar. 8.
Universal joint. L. Harper. 1,620,540; Mar. 8.
Unwinding device. J. D. Joyce. 1,620,558; Mar. 8.
Urn, Electric. A. H. Simmons. 1,620,495; Mar. 8.
Urn or similar article, Beverage. S. Kurilloff. Des. 72,156; Mar. 8.
Valve. W. E. Baker. 1,620,315; Mar. 8.
Valve. L. C. Huff. 1,619,937; Mar. 8.
Valve. J. F. Key. 1,620,108; Mar. 8.
Valve, Automatic relief. L. W. Browne. 1,620,321; Mar. 8.
Valve, Automatic self-closing. O. A. Price. 1,620,131; Mar. 8.
Valve, Compressor. E. R. De Luiz. 1,620,524; Mar. 8.
Valve-operating mechanism. G. E. A. Hallett. 1,619,974; Mar. 8.
Valve-spring compressor. R. J. Kirkpatrick. 1,619,870; Mar. 8.
Valve, Pressure and vacuum control. L. W. Browne. 1,620,322; Mar. 8.
Valve, Water relief. H. A. Thrush. 1,620,582; Mar. 8.
Valve within body of fixture, Shut-off. L. Bloch. 1,620,186; Mar. 8.
Valves, Making two-piece. W. H. Washburne. 1,619,901; Mar. 8.
Vanity case. E. R. Barany. 1,620,002; Mar. 8.
Vanity case. C. N. Coryell. 1,620,251; Mar. 8.
Vanity case. F. A. Fairbairn. 1,620,088; Mar. 8.
Vapor burner. T. Nagel. 1,620,123; Mar. 8.
Vaporizing and burning liquid fuel, Device for. M. M. Gillam. 1,619,859; Mar. 8.
Vehicle body. P. R. Schnable. 1,620,494; Mar. 8.
Vehicle brake. N. A. Christensen. 1,620,073; Mar. 8.
Vehicle brake. W. T. Norton, jr. 1,620,485; Mar. 8.
Vehicle brake mechanism. N. A. Christensen. 1,619,970; Mar. 8.
Vehicle, Child's. E. M. Mayer. 1,620,563; Mar. 8.
Vehicle door construction. A. L. Lambert. 1,620,614-15; Mar. 8.
Vehicle fender. G. F. Egan. 1,620,196; Mar. 8.
Vehicle, Motor. W. P. Kennedy. 1,619,941; Mar. 8.
Vehicle, Motor. K. Klein. 1,619,823; Mar. 8.
Vehicle signal. N. H. Nelson. Des. 72,183; Mar. 8.
Vehicle signaling window. R. D. Parker. 1,620,166; Mar. 8.
Vehicle spring snubber. J. W. Barnes. 1,620,424; Mar. 8.
Vehicle springs, Machine for making lubricating means for. R. White. 1,619,838; Mar. 8.
Vehicle wheel. F. W. Baker. 1,619,802; Mar. 8.
Vehicle wheels, Traction device for. L. Guerrini. 1,620,460; Mar. 8.
Vehicles, Brake-applying mechanism for motor. H. V. Ludwick. 1,620,265; Mar. 8.
Vehicles, Braking engine-driven. L. G. Hoxton. 1,620,100; Mar. 8.
Vehicles, Device for preventing abnormal flexure of the springs of motor. G. Fornaca. 1,620,093; Mar. 8.
Vehicles, Direction signal for motor. C. B. Mitchell. 1,620,379; Mar. 8.
Vehicles, Elastic axle for motor. E. Bugatti. 1,620,323; Mar. 8.
Vehicles, Fuel-feed system for motor. R. F. Bracke. 1,619,809; Mar. 8.
Vehicles, Suction-operated circuit closer for motor. P. Schindler. 1,620,493; Mar. 8.
Vehicles, Transmission lock for motor. E. A. De Waters. 1,619,972; Mar. 8.
Velocimeter. W. C. Palmer. 1,620,224; Mar. 8.
Ventilator. J. H. Bourgon. 1,620,512; Mar. 8.
Vibratory screen. W. F. Schadel. 1,620,575; Mar. 8.
Voltage-regulating system, Transformer-. P. M. Currier. 1,620,619; Mar. 8.
Vulcanizer. P. F. M. A. Fontana. 1,620,597; Mar. 8.
Wall-board-retaining member. J. Strand. 1,619,994; Mar. 8.
Wall construction, Stoker-side-. H. E. Preston. 1,620,488; Mar. 8.
Wall plate, Lighting fixture. F. H. Trimble. Des. 72,196; Mar. 8.
Washbench. J. R. Wiarda. 1,620,418; Mar. 8.
Washer: *See*—
Can washer.
Washing, cleaning, waxing, and polishing sheet material, Machine for. J. Flockhart. 1,619,925; Mar. 8.
Watchcase. W. Huber. 1,619,822; Mar. 8.
Water-closet. G. R. Bell. 1,620,429; Mar. 8.
Water heater, Electric. G. N. Madsen. 1,620,117; Mar. 8.
Wave and tide motor. N. Hoshafian. 1,620,258; Mar. 8.
Wax-applying tool. H. L. Gibson. 1,619,817; Mar. 8.
Weather strip and guide. F. W. and O. W. Brazell. 1,619,915; Mar. 8.
Weeding machine. A. Christensen and A. W. Warsen. 1,620,594; Mar. 8.
Weir, Adjustable. F. A. and J. A. Milliff. 1,620,164; Mar. 8.
Welded beam. C. Schenck. 1,620,293; Mar. 8.
Welded structure and making same. G. O. Carter. 1,620,324; Mar. 8.
Welding and the like, Electric. L. H. Hoffer. 1,620,206; Mar. 8.
Welding electrode, Guide and conductor for. H. D. Morton. 1,620,220; Mar. 8.
Welding machine, Automatic electric. J. W. Meadowcroft. 1,620,274; Mar. 8.
Wheel: *See*—
Disk wheel. Trolley wheel.
Power wheel. Vehicle wheel.
Wheel puller. B. D. Jerabek. 1,620,211; Mar. 8.
Winding machine. J. O. McKean. 1,620,267; Mar. 8.
Winding machine. W. M. Stocker. 1,620,044; Mar. 8.
Winding machines, Yarn tension for. A. E. Rhoades and A. S. Johnson. 1,620,571; Mar. 8.
Winding means. J. A. Cameron. 1,620,007; Mar. 8.
Windmill. C. Turner. 1,620,145; Mar. 8.
Window-channel strip. H. Faurot. 1,619,923; Mar. 8.
Window-glass shawls, Flattening. H. L. Halbach and J. A. Sweet. 1,620,017; Mar. 8.
Window or door construction, Casement. E. J. Emig. 1,620,526; Mar. 8.
Windows, Roller-blind support for casement. O. F. C. Ewart and A. Ewart. 1,620,596; Mar. 8.
Windshield cleaner. L. Ruckel. 1,619,885; Mar. 8.
Wire articles, Corrugated-. R. P. Southcomb. 1,620,403; Mar. 8.
Wood and solutions therefor, Preserving. L. P. Curtin. 1,620,152; Mar. 8.
Wrench: *See*—
Pipe wrench.
X-ray machine. M. B. Adrian. 1,619,962; Mar. 8.

CLASSIFICATION OF PATENTS

ISSUED MARCH 8, 1927.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 5: 1,620,200
33: 1,620,140
2— 27: 1,619,874
41: 1,620,264
42: 1,620,335
74: 1,620,140
123: 1,620,310
127: 1,620,477
163: 1,620,434
240: 1,620,160
245: 1,620,216
4— 73: 1,620,429
5— 34: 1,620,095
80: 1,620,208
118: 1,620,346
1,620,433
184: 1,620,404
7— 15: 1,620,262
8— 20: 1,620,419
9— 17: 1,620,421
12— 25: 1,620,027
147: 1,620,344
14— 42: 1,620,284
15— 7: 1,619,814
14: 1,620,390
45: 1,620,297
48: 1,620,358
97: 1,620,591
120: 1,620,028
142: 1,619,899
147: 1,620,330
206: 1,620,008
255: 1,619,885
16— 84: 1,620,109
172: 1,620,189
17— 23: 1,620,035
18— 17: 1,620,388
18: 1,620,567
43: 1,620,521
45: 1,620,435
50: 1,619,938
54: 1,620,233
56: 1,620,554
19— 4: 1,620,303
116: 1,620,031
120: 1,620,325
130: 1,619,986
132: 1,619,985
20— 53: 1,620,526
69: 1,619,915
92: 1,619,836
22— 1: 1,620,172
13: 1,620,227
41: 1,620,406
56: 1,620,050
65: 1,620,427
133: 1,620,128
139: 1,620,010
200: 1,620,011
23— 30: 1,620,212
151: 1,620,365
24— 5: 1,619,888
19: 1,619,841
21: 1,619,803
57: 1,620,553
72.5: 1,619,853
73: 1,620,228
1,620,372
114.5: 1,620,029
134: 1,619,846
191: 1,620,157
249: 1,620,100
25— 131: 1,619,933
1,620,514
157: 1,620,022
26— 122: 1,619,894
27— 6: 1,620,544
28— 4: 1,620,307
29— 11: 1,620,025
1,620,608
27: 1,620,522
85: 1,620,084
1,620,211
86.3: 1,619,870
148.4: 1,620,422
153: 1,620,616
156.7: 1,619,901
30— 9: 1,620,133
12: 1,620,389
13: 1,620,225
1,620,226
14: 1,620,572
22: 1,619,878
32— 7: 1,620,599
33— 52: 1,620,364
80: 1,620,311
133: 1,619,935
178: 1,619,834
220: 1,620,380
